## BIDDING METHODS

### HERITAGE Live!®<sup>1</sup> Bidding

Bid live on your computer or mobile, anywhere in the world, during the Auction using our HERITAGELive!® program at HA.com/Live

### Live Floor Bidding

Bid in person during the floor sessions.

### Live Telephone Bidding (Floor Sessions Only)

Phone bidding must be arranged 24 hours before your session begins. Client Service: 866-835-3243

### Internet Absentee Bidding

Proxy bidding ends 10 minutes prior to the session start time. Live Proxy bidding continues through the session. HA.com/1277

### Fax Bidding

Fax bids must be received 24 hours before your session begins. Fax: 214-409-1425

Phone: 214-528-3500 • 877-HERITAGE (437-4824)

Fax: 214-409-1425

Direct Client Service Line: 866-835-3243

Dear Bidder,

Heritage has a long history of success as Official Auctioneer for the Florida United Numismatists, which celebrates its 12th annual Summer FUN event in Orlando July 12-16. The finest-known 1860-O double eagle heads up a strong contingent of collector coins spread throughout Thursday evening's Premier Session. In addition, two Friday floor sessions are sure to provide plenty of bidder action at this year's FUN event. We look forward to seeing you in Orlando!

Our Featured Collections deserve special attention:

## THE EAST END COLLECTION

Top Ten NGC Registry Sets for Morgan dollars in both circulation strike and proof formats in the "All Coins" categories yield many opportunities to upgrade even a high-end collection. Proofs include these outstanding examples:

- 1880 PR68 Cameo NGC with stunning, white-on-black contrast.
- 1892 PR67 Cameo NGC, rare this fine with claims to an Ultra Cameo designation.
- 1895 PR65 Cameo NGC, a necessary and beautiful example for any advanced collection.
- 1921 Chapman PR65 NGC, brilliant and deeply mirrored, from the Chapman Dies.

Among the many circulation strikes, The East End Collection offers coin after coin carefully selected for their brilliant surfaces and high-end quality for the assigned grades, including these highlights:

- 1879-O MS66 PCGS, conditionally rare so fine.
- 1884-S MS63 PCGS, lustrous Select Uncirculated collector grade, seldom finer.
- 1889-CC MS64 NGC, the Carson City key date, Choice brilliant surfaces.
- 1893-CC MS64 PCGS, final Carson City issue, sharp strike.
- 1893-O MS64 PCGS, lowest-mintage New Orleans issue, green label holder.

It is important to note that all of the coins in this fine Morgan dollar collection are in their original holders of purchase when the bulk of The East End Collection was formed between 12 and 20 years ago. A total of 142 lots make up this high-grade collection, with examples in Premier Session, Floor Session Three, and our online Signature® Internet session.

## THE KADISON FAMILY COLLECTION

Our consignor, Doug Kadison, had these thoughts when asked if he would like to share a few words about his collection. He replied, "Let's keep it simple. I started collecting in 1954, when my grandparents gave me a small bank with old American coins. My interest grew as I read about them, and found that in many ways the coins were an embodiment of American history. I still find the story fascinating. I lament the inability of many young people to become collectors as easily as I did, since there are fewer coins in circulation today that are truly "collectible," or coins that can create value for young collectors to use when trading for other coins that are not readily available in circulation."

We believe that the bourse at shows like Summer FUN are a big help in that regard, with many dealers willing to spend time with youngsters and introduce them to the span of American history as depicted through U.S. coinage.

The Kadison Family Collection is a testament to Doug's historical perspective. It offers numerous Colonials and early coppers, early Draped Bust and Bust silver issues, early gold issues, Territorials, and gold type (including a nice 1915-S Octagonal Panama-Pacific fifty in MS62 PCGS), plus copper, nickel, and silver type presenting a comprehensive representation of American coinage from its earliest colonial days into the 20th century. A link to The Kadison Family Collection appears with each individual lot in the collection, as well as on the auction home page, where a list of all Featured Collections exists.

## THE TERRY BRAND ESTATE, PART X

A sharply struck Overton-101a 1794 Flowing Hair half dollar graded VF30 PCGS Secure highlights additional selections from the Terry Brand collection of 1794 halves. This is our tenth presentation of examples from this remarkable accumulation of the country's earliest half dollars. In total, we believe the entire collection accounts for between 25% to 30% of all surviving 1794 half dollars. The dispersal of this vast collection presents an exceptional opportunity for collectors of the Mint's early issues, and for Bust half collectors of all specialties.

## THE REILLY CODY COLLECTION, PART II

We are pleased to offer additional selections from The Reilly Cody Collection, which was a Featured Collection at the recent Long Beach Expo. Seated half dimes and Seated dimes make up the lion's share of this excellent collection, and more of these two denominations are offered here for Summer FUN, in both proof and circulation strike formats. A nice Bust quarter and two Seated quarter proofs round out the offering.

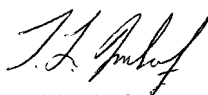

Orlando is always an ideal venue for Summer FUN, and we hope you will join us in person for the excitement and fun of live-action floor bidding. We value your participation – even if you cannot attend in person, there are several ways to place your bids either before or during the auction. Our live telephone bidding and interactive online bids through HERITAGE Live!® are second to none in the auction industry, with real-time mobile or computer bidding from anywhere in the world. We are always happy to accept your bids via e-mail, fax, or regular mail before the auction, and answer any questions you may have.

However you participate, please accept our best wishes for good luck and great success!

Sincerely,

Greg Rohan  
President

Todd Imhof  
Executive Vice-President

# U.S. COINS PLATINUM NIGHT® AUCTION

August 16, 2018 | Philadelphia | Live & Online

Heritage Auctions is Proud to Present

## **The Unique 1792 Washington President Gold Eagle**

**Likely George Washington's  
Treasured Pocket Piece**

**To be auctioned without  
reserve on August 16, 2018  
at the Philadelphia ANA  
World's Fair of Money**

Items being sold are from the extensive collection of Eric P. Newman Numismatic Education Society (a Missouri not-for-profit corporation) and have been assembled over a period of 90 years. Proceeds of the sale of all items will be used exclusively for supplementing the Society's scholarly research efforts and for the benefit of other not-for-profit institutions selected by Eric P. Newman Numismatic Education Society for public purposes.

**HERITAGE**  
AUCTIONS

## SESSION ONE

## COLONIALS

1652 Pine Tree Shilling, Choice VF  
Small Planchet, Noe-17, W-840

**3001** 1652 Pine Tree Shilling, Small Planchet, VF35 PCGS. Noe-17, W-840, Salmon 3-B, R.3. 70.06 grains. This die pair features doubling on the H in MASATHVSETS, the W in NEW, and on both I's in XII. The centering is flawless, and every design element, though lightly worn, remains strong. Mixed steel and deep gray patina appears naturally over each side with occasional hints of lavender. Readily appealing in every way. Listed on page 51 of the 2019 *Guide Book*.

*From The Kadison Family Collection.* NGC ID# 2ARZ, PCGS# 24

(1670-75) St. Patrick Halfpenny, XF45  
Rare Vlack 4-E Variety

**3002** (1670-75) St. Patrick Halfpenny XF45 PCGS. Vlack 4-E, Breen-204, W-11540. This rare St. Patrick halfpenny variety has small letters on both the obverse and reverse. These curious coppers are attributed to Mark Newby of Dublin who emigrated to New Jersey (then West Jersey) in 1681. Among other things, Newby brought a quantity of St. Patrick halfpennies and supposedly convinced the state legislature to accept the coins for small transactions. Research is ongoing as to the relationship and origin of the farthings and halfpennies. This chocolate-brown piece is smooth with strong devices. No brass insert plug is noted. A nice addition to any Colonial assemblage. Listed on page 53 of the 2019 *Guide Book*. Population: 1 in 45, 1 finer (6/18). NGC ID# AUAS, PCGS# 46

(1694) Elephant Token, MS65 Brown  
GOD PRESERVE LONDON, Thick Planchet  
Hodder 2-B, W-12040

- 3003 (1694) London Elephant Token, Thick Planchet, MS65 Brown NGC. Hodder 2-B, W-12040, R.2. This is the common thick planchet variety with the reverse legend GOD PRESERVE LONDON and the sword in the first quadrant of the shield to the upper left. It is a sharply struck and nicely centered example with smooth olive and steel-brown surfaces that retain traces of original red color hidden among the devices on each side. Slight planchet defects are evident at the left and right obverse border, as struck. Although Elephant tokens are not particularly rare in Mint State grades, they are almost never seen in Gem quality. Listed on page 58 of the 2019 *Guide Book*.  
Ex: Long Beach Signature (Heritage, 2/2007), lot 2008, where it brought \$8,050.  
From The Kadison Family Collection. NGC ID# 2U3A, PCGS# 55

1723 Hibernia Farthing in Silver, MS64  
M. 3.2-Bc.10, W-12500

- 3004 1723 Hibernia Pattern Farthing, Silver MS64 PCGS. M. 3.2-Bc.10, W-12500, R.5. Breen-173, "very rare." Close DEI GRATIA. According to Breen, "About 20 pieces turned up in England, 1971," a quantity insufficient to satisfy the growing number of Early American collectors. Lovely orange-gold and ocean-blue endow this prooflike and needle-sharp Hibernia pattern. A small planchet flaw (as struck) is located in the field near the chin and a tiny roundish depression on the King's cheek are mentioned for the sake of future pedigree researchers. Listed on page 56 of the 2019 *Guide Book*. Population: 10 in 64 (2 in 64+), 5 finer (5/18).  
From The Kadison Family Collection. NGC ID# 2AT7, PCGS# 179

1779 Rhode Island Ship Token, MS63 Brown  
No Wreath Variant, Betts-562, W-1730

- 3005** 1779 Rhode Island Ship Token, No Wreath, Brass, MS63 Brown PCGS. Betts-562, W-1730, R.3. The Rhode Island Ship token is a British propaganda medal, intended for a Dutch audience. Initial pieces bear VLU~~TENDE~~, garbled Dutch for fleeing, beneath the ship. The makers realized that this word might imply that *British* forces had retreated, so the offending word was removed from struck specimens. Later, VLU~~TENDE~~ was replaced on the die by a wreath. This piece is the no VLU~~TENDE~~, no wreath variety. Intricately struck and well cared for over the years. No abrasions are detected, only a hint of verdigris on the middle reverse ship and a faint retained lamination (as made) on the reverse field near 1 o'clock. Listed on page 62 of the 2019 *Guide Book*.

From *The Oak Collection of American Colonial Coinage / Long Beach Signature* (Heritage, 9/2005), lot 369, where it brought \$7,475.

From *The Kadison Family Collection*. NGC ID# D7HW, PCGS# 579

1787 Immunis Columbia Copper, AU55  
Eagle Reverse, W-5680

- 3006** 1787 Immunis Columbia, Eagle Reverse, AU55 PCGS. W-5680, High R.4. Crosby Pl. VIII, 8. Breen-1137. Medium dark brown in color and without the usual spots or surface problems. The strike is stronger than often encountered with sharper details on the eagle and Liberty. Struck a hair off center which allowed the tops of the letters to be on the planchet, an unusual and desirable feature for this issue. The bottoms of the digits in the date are slightly off the planchet. Identifiable by a jagged scrape touching and below the O of COLUMBIA. A scarce issue which is difficult to obtain so well-preserved. This issue is found in the 2019 edition of *A Guide Book Of United States Coins* on page 67.

From *The Kadison Family Collection*. NGC ID# BFJL, PCGS# 841

1787 Nova Eborac Copper, MS63 Brown  
W-5760, Second-Finest Example Known  
Ex: Bushnell-Winsor-Mills-Boyd

- 3007** 1787 Nova Eborac Copper, Seated Right, MS63 Brown PCGS. Breen-987, W-5760, R.4. Struck from the later state of the dies with a significant die break on the reverse at the foot of Liberty, also the cinquefoil in that same area is very weak. After the ill-fated Seated Left variant, it appears engravers John Bailey and Gilbert Rindell still had not learned how to properly sink relief for striking coinage. This reverse was sunk too deeply, and as a result, the relief is usually softly defined. On this piece, however, it appears extra care was taken in its manufacture and the reverse is well brought up, except on the uppermost portions of the drapery.

The exceptionally fine condition of this coin was noted by Charles Bushnell, who covered the piece with a thin layer of shellac to preserve the color. Both obverse and reverse are slightly off center with extra flan on the left portion of each side and some of the lettering cut off on the right side. The surfaces are a lovely medium brown with faint portions of mint red still in evidence in the more protected areas. There are no detracting abrasions or copper spots in evidence. This is the second-finest Nova Eborac graded by either of the major services. Listed on page 80 of the 2019 *Guide Book*.

Ex: Charles Bushnell Collection (S.H. & H. Chapman, 11/20/1882), lot 893; Richard B. Winsor Collection (S.H. & H. Chapman, 12/16/1895), lot 166; John G. Mills Collection (S.H. & H. Chapman, 4/27/1904), lot 352; F.C.C. Boyd Estate; unknown intermediaries; FUN Signature (Heritage, 1/2006), lot 3004, where it realized \$25,875.

From *The Kadison Family Collection*. NGC ID# 2B49, PCGS# 475

1786 VERMONTENSIVM Landscape Copper  
AU50, RR-6, Bressett 4-D

- 3008** 1786 Vermont Copper, VERMONTENSIVM, AU50 PCGS. RR-6, Bressett 4-D, W-2020, R.2 A pleasing chocolate-brown Republic copper that has no remotely relevant marks. A couple of small areas of slight granularity are present on the reverse border, but the quality is outstanding compared with usual dark and porous piece. Sharply struck, even on the plow which is often softly defined on this short-lived landscape type. The obverse is slightly off center toward 5:30, which affects the bottom half of the date. The reverse is slightly off center toward 1 o'clock. Much nicer than usually encountered, and a great collector coin. Listed on page 84 of the 2019 *Guide Book*.

*From The Kadison Family Collection.* NGC ID# 2B57, PCGS# 545

1787 Fugio Cent, MS64 Brown  
4 Cinquefoils, Newman 11-B, W-6785

- 3009** 1787 Fugio Cent, UNITED STATES, 4 Cinquefoils, MS64 Brown PCGS. N. 11-B, W-6785, R.4. A splendid golden-brown near-Gem that has no relevant contact and only a trace of the planchet roughness usually seen. The strike is uncommonly sharp across most of the borders, while the centers and left periphery have occasional minor softness of detail. Boldly clashed, portions of the obverse legends and the sun are present on the reverse where the rings permit. A scarcer subtype than the usually encountered STATES UNITED reverse. Listed on page 99 of the 2019 *Guide Book*. Population: 33 in 64 (2 in 64+) Brown, 9 finer (5/18).

*Ex: Dallas Signature (Heritage, 11/2005), lot 42, where it brought \$6,900.*

*From The Kadison Family Collection.* NGC ID# 2B8F, PCGS# 889

1794 Talbot, Allum and Lee Cent  
NEW YORK Variety, PR65 Red and Brown

- 3010** 1794 Talbot, Allum & Lee Cent, PR65 Red and Brown PCGS. Large ampersand above YORK. Lovely rose, magenta, orange, and gunmetal-blue colors adorn this 1794 Talbot, Allum, & Lee Cent, an available variety in circulated grades but rare in proof format, especially with substantial mint red color still present. The fields are nicely mirrored, and the strike is good aside from slight softness on the center of the ship and opposite on the lower legs. A couple of tiny spots are near the second E in COMMERCE, these are only mentioned for accuracy and do not reduce the eye appeal. Listed on page 88 of the 2019 *Guide Book*. Population: 5 in 65 Red and Brown, 0 finer (5/18).

*John J. Ford, Jr. (Stacks, 5/2004), lot 339; The Michael Casper Collection, Part Three / Palm Beach Signature (Heritage, 3/2006), where it brought \$11,501.15.*

*From The Kadison Family Collection.* NGC ID# 2B5Y, PCGS# 90635

1796 Half Penny Token, PR64 Brown  
Copper Company of Upper Canada  
Myddelton Token Mule, W-8910

- 3011** 1796 Copper Company of Upper Canada Token, Copper, PR64 Brown PCGS Secure. W-8910, R.7. The obverse of the Copper Company of Upper Canada one half penny token is from the identical die used for the Myddelton tokens with the legend BRITISH SETTLEMENT KENTUCKY. The reverse is inscribed COPPER COMPANY OF UPPER CANADA in the center, with ONE HALF PENNY around. The *Whitman Colonial Encyclopedia* assigns a rarity rating of URS-4, meaning that just five to eight examples are known. This lovely walnut-brown example has mirrored surfaces and bold design motifs, and exhibits exceptional aesthetic appeal despite faint hairlines and trivial surface marks. Listed on page 89 of the 2019 *Guide Book*. NGC ID# 2B66, PCGS# 646

## HALF CENT

1794 C-5a, B-3b Half Cent, XF45  
Nearly Condition Census

- 3012** 1794 Normal Head, C-5a, B-3b, High R.4, XF45 PCGS Secure. Breen Die State I, Manley Die State 1.0, the usual die state with perfect, unclashed obverse and reverse dies. The die alignment is about 225 degrees, or stated another way, the reverse is rotated clockwise about 45 degrees from the usual coin-turn alignment. This is an exceptional example of the scarce C-5a, B-3b die pair exhibiting smooth, problem-free walnut-brown surfaces. Our EAC grade VF30. NGC ID# 2223, PCGS# 35042 Base PCGS# 35015

## PROOF HALF CENTS

1842 Half Cent, PR64 Brown  
First Restrike, B-2

- 3013** 1842 First Restrike, B-2, R.6, PR64 Brown PCGS. CAC. An impressive Choice proof, this piece exhibits light brown and iridescent toning with hints of underlying mint red in fully mirrored fields that surround sharp devices. A steep, high wire rim is visible from 3 o'clock to 8 o'clock on the reverse. Exemplary overall, though we note a few unobtrusive steel-gray streaks near AMERICA and the upper stars. Our EAC grade PR63. PCGS# 35354 Base PCGS# 1263

1856 B-3 Half Cent, PR65 Brown  
From the Missouri Cabinet

- 3014** 1856 Restrike PR65 Brown PCGS Secure. B-3, R.4. Ex: Missouri Cabinet Collection. 87.1 grains. Doubled T in CENT, Reverse of 1856. Type collectors will be interested to know that this variety ranks among the most plentiful of Braided Hair proof half cents along with the 1841 B-1 Original and the 1852 B-2 Restrike. Walter Breen assigned three subvarieties of the Breen-3 based on weight. This piece falls at the high end of the Series II or "thick planchet" pieces where he noted: "possibly four proofs are in collectors' hands." Attractive mahogany-brown on the obverse with sea-green overtones. The reverse exhibits golden-tan patina with delicate teal overtones. Both sides of this lovely Gem proof exhibit fully mirrored fields. Our EAC grade PR62.

Ex: Douglas Weaver (12/6/1971); R. Tettenhorst; Eric P. Newman Numismatic Education Society; Missouri Cabinet (Goldberg Auctions, 1/2014), lot 224. PCGS# 35423

## LARGE CENTS

1793 Liberty Cap Cent, Fine Details  
S-13, B-20

- 3015** 1793 Liberty Cap, S-13, B-20, Low R.4 — Damage — PCGS Genuine Secure. Fine Details. The 1793 Liberty Cap cent is a scarce first-year issue. Breen described the Joseph Wright design as being "of a quality unequaled in any subsequent cent coinage." Only 11,056 1793 Liberty Cap cents were struck, and the most frequently encountered variety is Sheldon-13 with the L nearly touching the beads and three leaves below the O in OF. The legends are clear and a partial portrait outline is visible on this rough reddish-brown example, but the heavily corroded obverse shows additional unspecified damage that prevents a numeric grade. Our EAC grade VG7.

1797 S-135, B-5 Cent, MS62 Brown  
Beaded Edge Subvariety

- 3016** 1797 Reverse of 1797, Stems, S-135, B-5, R.3, MS62 Brown PCGS Secure. CAC. This fully lustrous light brown cent is likely from the Nichols Find of Mint State 1796 and 1797 Draped Bust large cents that appeared in Massachusetts circa 1863. The small hoard consisted of three varieties: 1796 S-119, 1797 S-123, and 1797 S-135. All three varieties are found more often in Mint State grades than in lower circulated grades. These pieces are ideal candidates for type collectors. Trivial toning spots are evident on the satin surfaces of this important cent. Our EAC grade MS60. NGC ID# 2242, PCGS# 35936 Base PCGS# 1422

1807/6 S-272, B-2 Cent, XF Details  
Census-Level Sharpness

- 3017** 1807/6 Blunt 1, S-272, B-2, High R.4 — Corrosion — NGC Details. XF. This important cent has the sharpness equivalent to Condition Census-level examples of the rare and important 1807/6 S-272 cent. Both sides of this steel-brown cent have noticeable corrosion, with old obverse scratches. It is likely a coin that was buried for a long period of time. Our EAC grade VG8. NGC ID# 224N, PCGS# 36439 Base PCGS# 1525

1851 N-10 Cent, MS67 Red and Brown  
Census-Quality Example

- 3018** 1851 N-10, R.1, MS67 Red and Brown NGC. Grellman Die State b. The fields are flowlined, and many of the diagnostic die lines are gone, but the variety can still be attributed by the 1 touching the bust and the lump in front of Liberty's eye. Radiant fire-orange color blends with deeper shades of golden-brown. Definition is incredibly sharp on the stars, which are almost all complete, and on the curls. Surface preservation is outstanding. This is one of three 1851 cents graded MS67 Red and Brown at NGC (all varieties). None are finer in that category, and a single MS67 Red is reported at that service (6/18). Our EAC grade MS64.  
**From The Kadison Family Collection.** NGC ID# 226H, PCGS# 406678 Base PCGS# 1893

## PROOF FLYING EAGLE CENTS

1856 Flying Eagle Cent  
Snow-3, PR45  
Rarest Small Cent Date

- 3019** 1856 Snow-3 PR45 PCGS Secure. Although designated as a proof by PCGS, the present cent was probably struck in business format, as one of the originals coined in 1856 to demonstrate the design and smaller diameter to Washington officials. The Snow-3 pieces were distributed primarily to non-numismatists, who often spent them. This example likely circulated only briefly before it was identified and saved by an alert collector. The eagle's breast feathers show wear, but the wings and tail are richly detailed. The surfaces are primarily wheat-gold, though the reverse displays a few streaks of deeper tan toning. Marks are limited to a few minor ticks above the date. NGC ID# 227A, PCGS# 47058 Base PCGS# 2037

1856 Flying Eagle Cent, PR65  
Snow-9, Sharp and Attractive

- 3020 1856 Snow-9 PR65 PCGS Secure.** Snow-9 is the usual variety encountered when acquiring a proof 1856 Flying Eagle cent. Rick Snow notes that this variety frequently comes with squared rims and sharp detail, consistent with its traditional proof attribution, but without the mirrored fields that are associated with most proofs. This luminous Gem is indeed sharp but has satiny rather than mirrored fields. No objectionable marks are seen, and the original surfaces glow with lovely tan-gold and chestnut hues. Eye appeal is exceptional for the issue and variety. Population: 59 in 65, 7 finer (6/18). NGC ID# 227A, PCGS# 147890 Base PCGS# 2037

## INDIAN CENTS

1873 Indian Cent, MS62 Red and Brown  
Doubled LIBERTY Guide Book Variety

- 3021 1873 Doubled LIBERTY, Snow-1, FS-101, MS62 Red and Brown PCGS Secure.** This spectacular MS62 specimen shows strong doubling on the letters in LIBERTY, the profile, eye, and headdress feathers, identifying the extremely popular FS-101 doubled die obverse variety. The *Cherrypickers' Guide* considers the FS-101 the "chief" of all Indian cent varieties and examples are eagerly sought-after in all grades and conditions. The present coin offers well-detailed design elements that show the obverse doubling to good advantage. The lightly marked original surfaces have mellowed to light brown in many areas, with highlights of red in sheltered spots around the devices. The overall presentation is most attractive for this rare and important variety. Population: 1 in 62 Red and Brown, 23 finer (6/18). PCGS# 37505 Base PCGS# 2116

**1877 Indian Cent, MS64+ Red and Brown  
Low-Mintage Key Date**

- 3022 1877 MS64+ Red and Brown PCGS Secure. CAC.** Due to economic difficulties, nearly 10 million unneeded cents were returned to the Mint in 1877, most of which were then reissued in place of new coinage. The resulting low mintage of the 1877 cent makes it the scarcest of all business-strike Indian cent issues, and most extant pieces are well-worn. This satiny near-Gem retains much of its original coppery luster beneath rich burgundy overtones, and the surfaces are free of any noticeable imperfections. Some minor softness of strike is seen on the tips of select feathers and on the reverse bow, though the overall eye appeal is excellent for this key-date issue.

*Ex: Long Beach Signature (Heritage, 6/2014), lot 4283. NGC ID# 2284, PCGS# 2128*

**1885 Indian Cent, MS66 Red  
Registry Set Candidate**

- 3023 1885 MS66 Red PCGS Secure.** The design elements of this delightful Premium Gem exhibit razor-sharp definition throughout and the original red surfaces are impeccably preserved, with blazing mint luster on both sides. Overall visual appeal is terrific. The 1885 Indian cent is unknown in finer numeric grades, especially with the Red designation (6/18). NGC ID# 228C, PCGS# 2153

**1908-S Cent, MS66 Red  
Just One Coin Graded Higher**

- 3024 1908-S MS66 Red PCGS. CAC.** Branch mints refrained from the production of cents until 1908, when the San Francisco Mint struck 1.1 million Indian Head representatives. Aside from being a popular semikey, the 1908-S is a legitimate condition rarity in MS66 Red. Slight softness occurs on the feathertips and shield of this piece (as always), but the eye appeal more than compensates. Each side emits frosty luster over copper-gold surfaces. A single mark under (S)T(ATES) acts as a pedigree identifier. Population: 62 in 66 (5 in 66+) Red, 1 finer. CAC: 14 in 66, 0 finer (6/18). NGC ID# 2296, PCGS# 2234

**PROOF INDIAN CENTS**

**1868 Cent, PR65 Red Cameo  
Dramatic Color and Contrast**

- 3025 1868 PR65 Red Cameo NGC.** Beautiful copper-red color adorns both sides, each of which exhibits sharp design elements. This beautiful Gem proof is well-preserved throughout. The reverse is rotated to a nearly full medal turn, typical of the issue. Full Red proof 1868 cents are scarce with or without cameo contrast, and most seen are Red and Brown. Census: 2 in 65 Red Cameo, 0 finer (5/18). NGC ID# 229L, PCGS# 82293

**1868 Indian Cent, PR65 Red Cameo  
Rarely Seen This Fine**

- 3026 1868 PR65 Red Cameo PCGS.** From a proof mintage of 3,790 pieces, this delightful Gem Indian cent exhibits razor-sharp definition on all design elements and the deeply reflective fields contrast boldly with the frosty devices to create a dramatic cameo effect. The original red surfaces are free of mentionable distractions. Population: 8 in 65 (1 in 65+) Cameo, 3 finer (6/18). *Ex: Bartle Family Collection (Stack's, 10/1984), lot 464, flip accompanies the lot. NGC ID# 229L, PCGS# 82293*

**1884 Cent, PR68 Brown  
Sole Finest at NGC**

- 3027 1884 PR68 Brown NGC.** Brown proof Indian cents usually do not excite collectors as much as Red coins or Cameos, but this Brown proof is an exception. It is the only proof 1884 cent at NGC in the PR68 grade across all color designations, and none are finer. PCGS also lists only one PR68 coin, designated Red and Brown (5/18). Liberty's portrait, the wreath, and the small shield are razor-sharp, complementing liquidlike fields and unmarked surfaces. Sea-green, gold, and russet toning make up the Brown coloration. *From The Kadison Family Collection. NGC ID# 22A5, PCGS# 2339*

## LINCOLN CENTS

1914-D Cent, MS65 Red  
Elusive So Fine

**3028 1914-D MS65 Red PCGS Secure.** Satiny original luster shows no mentionable abrasions or significant carbon but offers a soft, luminous cartwheel effect and illuminates sharp design elements. This Gem 1914-D Lincoln cent has no significant toning and is a condition rarity in its Red condition. Finer Red coins are out of reach for most collectors. The 1914-D is a well-known series key, although it is often rated second to the 1909-S VDB, which boasts a lower mintage. Nonetheless, the 1914-D is the rarer of these two issues in high Red grades. Population: 72 in 65 (8 in 65+) Red, 7 finer (6/18). NGC ID# 22BH, PCGS# 2473

1918-S Cent, MS65 Red  
Among the Finest Red Coins Certified

**3029 1918-S MS65 Red PCGS Secure.** This 1918-S Lincoln cent is elusive is Gem condition overall, and the Red category Gems are the finest pieces known. This coin displays satiny, original copper-orange luster and no distracting carbon. The 8 in the date and the O in ONE show the only mentionable strike weakness. Ideal for Registry purposes. Population: 20 in 65 (1 in 65+) Red, 0 finer (6/18). NGC ID# 22BX, PCGS# 2512

1922 No D Lincoln Cent, MS62+ Brown  
Strong Reverse, Die Pair 2

**3030 1922 No D, Strong Reverse, FS-401, MS62+ Brown NGC.** Die Pair 2. The second 2 in the date is slightly sharper than the first 2, all letters in TRUST are bold, and the reverse is sharply detailed throughout, identifying the all important Die Pair 2, the only universally recognized dies for the key No D Lincoln cent. Two other die pairs are known with the mintmark partially or completely effaced by die polishing or clogged dies, but those Weak D varieties are not as desirable as the true No D, Strong Reverse variety from Die Pair 2.

The present coin is a Plus-graded MS62 example that exhibits glossy mahogany brown surfaces with only minor signs of contact. The obverse shows the effects of die erosion on the central design elements, but the reverse is sharply detailed, as expected for the issue. The overall presentation is most attractive for this important key Lincoln cent. Census: 12 in 62 Brown (1 in 62+), 10 finer (6/18). NGC ID# 22C9, PCGS# 37676 Base PCGS# 3285

## TWO CENT PIECE

1865 Two Cent Piece, MS66+ Red  
Fancy 5

- 3031 1865 Fancy 5 MS66+ Red PCGS. CAC.** This Plus-graded Premium Gem exhibits sharply detailed design elements and some interesting peripheral die cracks on both sides. The original red surfaces are impeccably preserved, with just a few microscopic specks of carbon on the obverse. Overall eye appeal is terrific. Population (for the variety): 3 in 66 (1 in 66+) Red, 1 finer (6/18). NGC ID# 22NA, PCGS# 38258 Base PCGS# 3584

## PROOF TWO CENT PIECES

1869 Two Cent, PR66 Red  
High-End Registry Candidate

- 3032 1869 PR66 Red NGC.** NGC has certified only a few dozen proof 1869 two cent pieces in Red condition, of which this Premium Gem is among the finest. A single Red Cameo is graded PR65 at that service. This piece exhibits sharp devices and glimmering copper-orange surfaces with no distractions. Eye appeal is excellent. Census: 10 in 66 Red, 0 finer (5/18). NGC ID# 274Y, PCGS# 3641

1873 Two Cent, PR66 Red and Brown  
Bright Open 3 Example

- 3033 1873 Open 3 PR66 Red and Brown PCGS Secure.** The fields glimmer on this orange-red and amber Premium Gem, complementing sharp design elements. Under a loupe, a few tiny carbon specks are seen, but the overall eye appeal is outstanding. Red and Brown proofs are rarely offered this fine, and no circulation strikes were issued in 1873. This piece represents the Open 3 variety. Population: 18 in 66 Red and Brown, 0 finer; 6 in 66 Red, 0 finer (5/18). NGC ID# 2754, PCGS# 3655

## THREE CENT SILVER

1866 Three Cent Silver, MS66  
Frosty and Prooflike

- 3034 1866 MS66 PCGS Secure.** The production of three cent silver coins increased slightly in 1866, but still only 22,000 circulation strikes were minted. Coins struck during this period were never meant to serve any meaningful role in commerce. They were simply used to pay off odd amounts of gold purchases or silver deposits. So, while the 1866 is scarce overall, it can still be found in high grades. This Premium Gem boasts thickly frosted and fully defined central devices. Daubs of reddish-gold patina encircle the largely brilliant interiors. Population: 15 in 66 (1 in 66+), 13 finer (6/18). NGC ID# 22NK, PCGS# 3686

## BUFFALO NICKELS

1913 Type One Nickel, MS68  
An Absolute Showstopper  
Unsurpassed Quality

**3035 1913 Type One MS68 NGC. CAC.** This glistening Superb Gem is an absolute showstopper. Although struck from heavily eroded dies, as evidenced by cracking and flowlines on each side, this Registry-grade Type One nickel displays relatively strong detail on the hair braid, and on the bison's horn and shoulder. LIBERTY, the date, and the tail are slightly soft, but these are trivial shortcomings. Eye appeal is extraordinary. A high-powered lens fails to locate any consequential marks. Both sides are lightly toned in marvelous ice-blue and lavender-rose hues. While the 1913 Type One nickel was widely saved and can be found on occasion in MS68, few examples can match the quality of this piece. Certified in a former generation holder. Census: 18 in 68 (2 in 68+, 4 in 68 ★), 0 finer. CAC: 8 in 68, 0 finer (6/18). NGC ID# 22PW, PCGS# 3915

1918/7-D Buffalo Nickel, AU50  
Popular Guide Book Series Key

**3036 1918/7-D FS-101 AU50 PCGS Secure.** The 1918/7-D is an extremely important wartime hubbing error that is traditionally collected as an integral part of the Buffalo nickel series. The issue escaped the notice of contemporary numismatists and only became widely known in the 1930s, after Barney Bluestone described a specimen in an October, 1931-dated auction catalog. By the time numismatic awareness of the issue became widespread, the coins had been circulating for two decades and high-grade examples were extremely difficult to locate.

The present coin is an impressive AU specimen with lightly abraded lavender-gray surfaces that show a few hints of greenish-gold and amber toning. The 1918/7-D was not a well-struck issue, and this example exhibits just a trace of softness on the lightly worn design elements. A diagnostic die break is evident above the tie in the braid, slanting slightly down toward the Indian's mouth. Satiny luster shines through the patina. The overall presentation is quite attractive for this important key issue. NGC ID# 22RJ, PCGS# 38446 Base PCGS# 3939

1918-D Nickel, MS66  
A Rarity in This Condition

- 3037 1918-D MS66 PCGS. CAC.** Warm golden toning graces the Premium Gem surfaces of this CAC-approved 1918-D nickel. Moderate strike weakness on the central high points is typical of the issue, although it is rare to locate a coin in this fine a state of preservation. Satiny mint luster exhibits no distracting abrasions. Population: 29 in 66 (2 in 66+), 1 finer. CAC: 7 in 66, 0 finer (6/18). NGC ID# 22RH, PCGS# 3938

1925-D Nickel, Toned MS66  
Top-Grade Registry Coin, CAC Endorsed

- 3038 1925-D MS66 PCGS. CAC.** Few 1925-D Buffalo nickels survive in Premium Gem quality and none are finer. Moreover, this piece is one of only five in this top grade with CAC endorsement. The coin is satiny and devoid of abrasions, showing a blend of lilac, lavender, and golden toning. Well-struck design elements contrast with minor die wear that is visible in the fields. Population: 14 in 66, 0 finer. CAC: 5 in 66, 0 finer (6/18). NGC ID# 22S3, PCGS# 3955

1935-S Nickel, Colorful MS67+  
Unlisted Repunched Mintmark  
A Registry-Grade Condition Rarity

- 3039 1935-S MS67+ PCGS Secure.** The finest 1935-S Buffalo nickels are a handful of Plus-graded MS67s, although even without the Plus designation this issue is rare in Superb Gem condition. This Registry-grade piece displays a sharp strike and frosty mint luster. Beautiful rainbow toning covers each side. The mintmark is repunched. Population: 46 in 67 (3 in 67+), 0 finer (6/18). NGC ID# 22SR, PCGS# 3976

1937-D Three-Legged Nickel, MS65+  
High-End and CAC Approved

- 3040 1937-D Three-Legged, FS-901, MS65+ PCGS Secure. CAC.** The 1937-D Three-Legged Buffalo nickel is one of the key varieties in the series and a major *Guide Book* listing. It is usually available for a price, but in Gem condition collectors will encounter a challenge, and finer examples of this die polishing error are downright rare. This piece, like all of its peers, shows heavy die erosion in the fields and design recesses, and the bison's forward right leg is effaced by a futile attempt to polish off the die erosion. The number of Three-Legged nickels known today in lower grades suggests that this heavily worn die was used for an extended period of time after the bison's leg was effaced.

This Plus-graded, CAC-approved Gem is well-struck and mostly unabraded. Warm golden toning covers the satiny surfaces, and eye appeal is pleasing. Population: 62 in 65 (8 in 65+), 10 finer. CAC: 30 in 65, 6 finer (6/18). NGC ID# 22SX, PCGS# 38475 Base PCGS# 3982

## JEFFERSON NICKEL

1942-D FS-501 Nickel, MS66  
D Over Horizontal D

- 3041** 1942-D D Over Horizontal D, FS-501, MS66 PCGS Secure. The mintmark was initially entered with a 90 degree clockwise rotation, then corrected. Portions of the upright and curve of the errant placement are evident near the deeply entered second impression. Powder-blue and almond-gold toning graces lustrous, nicely struck, and essentially immaculate surfaces. A popular *Guide Book* variety. NGC ID# 22TL, PCGS# 38495 Base PCGS# 4015

## EARLY HALF DIME

1797 15 Stars Half Dime, VF35  
V-2, LM-1

- 3042** 1797 15 Stars, V-2, LM-1, R.3, VF35 PCGS Secure. Golden-gray interiors cede to deep blue and violet borders on this Choice VF 1797 half dime. The strike is even but predictably weak in the centers. Much of the weakness on this coin is not from wear but rather strike. Some lines in the obverse fields likely contributed to the seemingly conservative grade. Small Eagle half dimes are a sought-after two-year type with a combined mintage of only 54,757 pieces for 1796 and 1797. NGC ID# 22ZZ, PCGS# 38597 Base PCGS# 4258

## SEATED HALF DIMES

1851-O Half Dime, Brilliant MS66  
A Rarity This Fine

- 3043** 1851-O MS66 NGC. The New Orleans Mint struck 860,000 half dimes in 1851, feeding a large commercial need for the denomination. Few coins survive in Uncirculated condition, and Premium Gems are decidedly rare. This piece displays frosty, untuned luster and lacks abrasions. Trivial softness on the wreath bow and Liberty's head are in keeping with the reputation of O-mint coinage. Census: 5 in 66, 1 finer (5/18). *From The Kadison Family Collection.* NGC ID# 233J, PCGS# 4348

1852-O Half Dime, Toned MS65  
Few Pieces Known in High Grade

- 3044** 1852-O MS65 NGC. Rich orange-gold, amber-red, russet, and pearl-gray toning covers this sharp, prooflike Gem. Such quality and eye appeal are rarely found on an 1852-O half dime. This issue circulated extensively and is rarely offered in any Mint State grade. This piece is particularly high-end. Census: 6 in 65, 2 finer (5/18). *Ex: FUN Signature (Heritage, 1/2007), lot 2492, which realized \$6,152.50.* *From The Reilly Cody Collection, Part II.* NGC ID# 233L, PCGS# 4350

## EARLY DIMES

1796 JR-1 Dime, VF25  
Complete Border Dentils

- 3045** 1796 JR-1, R.3, VF25 PCGS. The usual die state with the rim cud at star 1. On the reverse, a horizontal die crack is visible below the eagle's right (facing) wing. This gunmetal-gray and olive-colored VF25 JR-1 dime displays an even strike and complete border dentils on each side. No distracting contact marks are visible. A pleasing first-year Small Eagle type coin. NGC ID# 236B, PCGS# 38742 Base PCGS# 4461

1796 JR-6 Dime, MS63  
High-Grade Early Type Coin

**3046** 1796 JR-6, R.3, MS63 PCGS. This coin represents the first year of dime production at the United States Mint. The Draped Bust and Small Eagle motifs originated on 1795 silver dollars and were adapted for the dime in 1796. Technically, the 1796 15 Stars dime is a single-year subtype, since the 1797 issue has either 16 (JR-1) or 13 (JR-2) stars. This satiny, stone-gray representative displays a small dab of russet color right of the D in UNITED, and the obverse shows several parallel, slender, and toned alloy streaks (mint made). The strike is sharp for the type.

A spectacular assemblage of die cracks is seen, including a horizontal break through the 17 in the date, and a slender crack through star 8 to the center of Liberty's neck that splits into two cracks descending to the rim at 5:30 and 6 o'clock. On the reverse, a crack from 10:30 proceeds through the eagle to the M in AMERICA, a vertical crack runs from the ribbon to the eagle's breast, a crack extends through the bases of OF AMER, and another connects the rim to the M in AMERICA. Population (all varieties included): 15 in 63, 25 finer (5/18).

Ex: *Central States Signature* (Heritage, 4/2014), lot 5559, which realized \$32,900; *FUN Signature* (Heritage, 1/2015), lot 4058, which realized \$23,500. NGC ID# 236B, PCGS# 38747 Base PCGS# 4461

## BUST DIMES

1827 Bust Dime, MS64+  
JR-11, Pointed Top 1

**3047** 1827 Pointed Top 1, JR-11, R.2, MS64+ PCGS Secure. Star 13 is repunched, diagnostic for this conditionally scarce die marriage. The coruscating surfaces appear void of abrasions, though a mint-made lint mark is west of star 11. The centers show striking incompleteness, but the borders are bold and display attractive golden-brown and navy-blue toning. NGC ID# 2375, PCGS# 38821 Base PCGS# 4504

1834 Capped Bust Dime, MS65  
Large 4, JR-2 Variety

**3048** 1834 Large 4, JR-2, R.3, MS65 NGC. The Large 4, with the upright below the edge of the curl, the Large D in UNITED, and the denomination placed low identify the JR-2 variety. This delightful Gem exhibits sharply detailed design elements and well-preserved surfaces, under shades of pale gold and lavender-blue toning. Census (for the variety): 2 in 65, 0 finer (6/18). NGC ID# 237E, PCGS# 38874 Base PCGS# 4526

## SEATED DIMES

1845-O F-101a Dime, MS63  
Second Finest Known

- 3049** 1845-O F-101a, R.4, MS63 NGC. The mintage for the 1845-O dime was large with 230,000 pieces struck, but attrition has obviously taken a heavy toll. It is available in Good through VF, but it quickly becomes scarce in XF and better grades. In Uncirculated grades it is very rare. Combining the Mint State populations of both grading services yields only six examples, and this is the second finest of those — second only to the MS69 Eliasberg coin. As expected from the 101a designation, the dies were polished and the fields retain evidence of that mint-induced field brightness. Well-struck overall, as usual for the issue, but this an unusual trait for a New Orleans product from this era. The surfaces retain much underlying brightness with both sides showing a thin veil of interspersed rose and lilac toning. PCGS# 537834 Base PCGS# 4587

1853 No Arrows Dime, MS67  
F-101a, Clashed Obverse Die State

- 3050** 1853 No Arrows, F-101a, R.5, MS67 PCGS Secure. The obverse is boldly clashed, with portions of the wreath and reverse denomination plainly visible in the obverse fields. This example is fully deserving of the Superb Gem grade, showing delicate iridescence across frosty, unabraded luster. The strike is sharp and eye appeal is outstanding. Only a few numerically finer pieces are known, and it is doubtful they surpass this piece in terms of eye appeal. Population: 4 in 67, 4 finer (6/18). NGC ID# 238R, PCGS# 537941 Base PCGS# 4599

1881 Dime, MS67+ ★  
Ex: Gardner, Beautifully Toned  
Only 24,000 Coins Struck

- 3051** 1881 F-101a, R.4, MS67+ ★ NGC. The 1881 dime is part of a string of “afterthought” Philadelphia issues from 1879 to 1881, all with five-figure mintages — 24,000 coins in this case. The rarity of these dates often goes unrecognized, especially at the Superb Gem level. Each side of this coin is beautifully toned with primarily blue and green hues, illuminated by radiant mint frost that emanates from beneath the patina. Flickers of rose toning appear in the center of the obverse, while a daub of orange color graces the left reverse. Census: 4 in 67 (1 in 67+ ★), 2 finer (5/18).  
Ex: *Portland Signature* (Heritage, 3/2004), lot 5523, which realized \$5347.50; *Eugene H. Gardner Collection, Part III* (Heritage, 5/2015), lot 98254, which brought \$8,225; *Houston Signature* (Heritage, 12/2015), lot 3104, which realized \$3,290; *Central States Signature* (Heritage, 4-5/2016), lot 3245, where it realized \$2,820. NGC ID# 23AU, PCGS# 538646 Base PCGS# 4689

## MERCURY DIME

1916-D Mercury Dime, Choice XF  
Collector-Grade Example

**3052 1916-D XF45 PCGS Secure.** Sharp rims and bold central devices show light wear and are only mildly abraded from brief circulation. The mintmark is sharp. Hints of luster remain in the protected areas and the coin has light golden-gray color. The 1916-D is elusive in this collector-favorite grade, and the present example is entirely problem-free. NGC ID# 23GY, PCGS# 4906

## PROOF TWENTY CENT PIECES

1877 Twenty Cent, PR62  
Merely 510 Proofs Struck for the Year

**3053 1877 PR62 PCGS Secure. BF-1, R.3.** All 510 proof twenty cent pieces struck in 1877 were produced from a single pair of dies that show a horizontal die scratch in the drapery above Liberty's foot. Examples of this proof-only issue are challenging in any grade and highly sought-after among collectors trying to assemble complete sets of this short-lived denomination. The interiors are mostly bright and frosted, while the rims show deep multicolor patina. Wispy marks in the fields explain the grade. NGC ID# 27H4, PCGS# 5305

1878 Twenty Cent, PR65 Cameo  
Elusive With Field-Device Contrast

**3054 1878 PR65 Cameo NGC. BF-1, R.3.** The final year in the twenty cent series, the 1878 was produced to the extent of only 600 pieces, all proofs. This is among the most visually impressive survivors, being conditionally rare with the Cameo designation. No Ultra Cameos are reported by NGC. There is no toning to report, a feature that allows full appreciation of the boldly contrasted surfaces. A sharp strike and carefully preserved surfaces add to the already strong eye appeal. Census: 15 in 65 Cameo, 8 finer (5/18). Ex: New York Signature (Heritage, 7/2002), lot 7772, which realized \$8,970; Dallas Signature (Heritage, 11/2005), lot 1233, which realized \$13,800.

**From The Kadison Family Collection.** NGC ID# 27H5, PCGS# 85306

## PROOF BUST QUARTER

1828 B-4 Quarter, PR62  
Sharply Struck, Deeply Reflective  
The Earle Collection Coin

**3055** 1828 PR62 PCGS Secure. B-4, R.7 as a proof. While the exact proof mintage of 1828 quarters is unrecorded, conventional wisdom suggests no more than about a dozen true proofs were struck. Most proofs were from the Browning-4 die pair (six to eight proofs known), with Browning-1 accounting for a few more examples. Reports of one or two Browning-2 proofs are unconfirmed and are now thought to be prooflike circulation strikes.

To our knowledge, this Browning-4 example has been absent from public auction for more than 15 years. In some previous appearances, it was thought to be the former Cleneay specimen, but later research — augmented by greater access to early catalog images — has clarified the pedigree. We note that the present coin is sharply struck on all of the stars, while the Cleneay coin is softly struck on stars 4 to 7, and this proof is indeed more sharply struck throughout both sides than the Cleneay piece.

The earliest auction appearance we can confirm is the Henry Chapman sale of the George Earle Collection in June 1912. Subsequent appearances describe the coin as Choice proof or finer, not out of line for then-current standards. Certainly, the eye appeal alone is suggestive of the Choice level. A few tiny marks and stray hair-thin lines temper the glittering, mirrored surfaces, yet the proof status of this important, well-pedigreed piece is unquestioned, and it fits comfortably within the Rea-Koenings-Haroutunian Census in its current PR62 PCGS Secure holder. This distinguished 1828 proof quarter is sure to inspire spirited bidding when it crosses the block.

*Ex:* George Earle Collection (H. Chapman, 6/1912), lot 3065; Hillyer Ryder Collection; Louis Eliasberg Collection, duplicates and other properties (New Netherlands, 6/1957), lot 1150; Eugene Gardner Collection (Stack's, 2/1965), lot 1630; Auction '82 (RARCOA, 8/1982), lot 713; Auction '90 (Superior, 8/1990), lot 1076; Robert W. Miller Collection (Bowers and Merena, 11/1992), lot 1675 as PR64; Benson Collection, Part 2 (Goldberg, 2/2002), lot 696. NGC ID# 27HC, PCGS# 5375

## SEATED QUARTERS

**1853/53 No Arrows Quarter, MS66  
Repunched Date, Important Melt Rarity**

**3056 1853/53 No Arrows, Briggs 1-A, FS-301, MS66 PCGS.** A brief mintage of 44,200 1853 quarters was struck before word came to reduce the amount of silver in 1853 coinage as a means of bringing the silver-to-gold ratio back in balance. Arrows were added on each side of the date to signify the reduced weight, as well as rays on the reverse. By then, most of the “heavyweight” silver coinage had been melted, either by the Mint or by speculators.

Consequently, 1853 quarters at the old standard are scarce-to-rare and readily identified by faint, broad repunching of the 53 in the date. This Premium Gem example displays a colorful patina of reddish-gold and bluish-gray and a crisp strike. Silver mint luster glows beneath the toning and emerges in patches on the reverse. Most of the high-grade Uncirculated pieces come from a small hoard of coins that avoided melting. Population for all No Arrows 1853 quarters: 5 in 66, 2 finer (5/18). NGC ID# 23TA, PCGS# 395930 Base PCGS# 5421

**1863 Quarter, MS65  
Frosty and Fully Struck**

**3057 1863 MS65 PCGS. Briggs 2-B.** Both sides are lightly clashed and extensively cracked. From a mintage of 191,600 coins, the 1863 is an available date through most circulated grades and even into the lower Uncirculated levels. It becomes conditionally rare in MS65. This Gem is fully brilliant, razor-sharp, and thickly frosted — typical of high-end survivors. Void of mentionable marks. Housed in an old green label holder. Population: 18 in 65 (1 in 65+), 10 finer (6/18). NGC ID# 23TX, PCGS# 5458

## PROOF SEATED QUARTERS

**1863 Quarter, PR66 Cameo  
A Rarity So Fine**

**3058 1863 PR66 Cameo NGC. Briggs 4-D.** NGC lists a single Ultra Cameo example of the 1863 proof quarter, graded only PR64, and Cameos are rare in all grades. This Premium Gem displays silver-white surfaces that are starkly contrasted. Eye appeal and preservation are outstanding. Proof quarter production in 1863 amounted to only 460 pieces, making this issue popular among modern-day collectors. Census: 4 in 66 Cameo, 1 finer (5/18). NGC ID# 23WR, PCGS# 85559

**1877 Quarter Dollar, PR67+  
Sole Finest Non-Cameo at NGC**

**3059 1877 PR67+ NGC. Briggs 1-B.** Only a handful of Superb Gem proof 1877 Seated Liberty quarters are certified at NGC, and this Plus-graded piece is the sole finest non-Cameo at that service (5/18). The coin is sharp and deeply reflective with original sea-green and gold interior toning. More vivid yellow-gold, crimson, and violet color appears around the outer peripheries. Census: 3 in 67 (1 in 67+), 0 finer; 3 in 67 Cameo, 1 finer (5/18). NGC ID# 23X9, PCGS# 5578

## BARBER QUARTER

1896-S Quarter Dollar, AU58  
Much Luster Remains

- 3060 1896-S AU58 PCGS Secure.** The 1896-S is a major key date in the Barber quarter series and is especially rare in Mint State. This nearly Uncirculated coin displays sharp detail and bright, satiny luster in the fields with no mentionable toning. A brush of high-point friction and some scattered abrasions determine the grade. Population: 7 in 58 (1 in 58+), 34 finer (6/18). NGC ID# 23Y9, PCGS# 5615

## PROOF BARBER QUARTER

1895 Quarter, PR67 Deep Cameo  
Incredible Contrast, Conditionally Rare

- 3061 1895 PR67 Deep Cameo PCGS Secure.** PCGS lists only eight Deep Cameo examples of the 1895 proof quarter in all grades, and NGC reports none. This Superb Gem is starkly contrasted and second to only one numerically finer Deep Cameo (5/18). Razor-sharp, frosty devices glisten atop liquidlike fields, generating beautiful eye appeal that complements nearly flawless preservation. A hint of golden color emerges from the outer peripheries. Population: 4 in 67 (1 in 67+) Deep Cameo, 1 finer (5/18). NGC ID# 242A, PCGS# 95681

## STANDING LIBERTY QUARTERS

1916 Standing Liberty Quarter, AU55  
Ever-Popular, First-Year Issue

- 3062 1916 AU55 NGC.** This is a pleasing example of the ever-popular, first-year Standing Liberty quarter. Slight high-point wear is hidden beneath olive-gray and faintly iridescent toning, while traces of luster remain visible near the borders. In 1916, new designs were prepared for all of the silver denominations, marking the first instance in United States Mint history that each denomination showcased its own unique design. Due to the low mintage of this introductory issue (just 52,000 coins), demand for 1916 Standing Liberty quarters in all grades has endured the test of time. Ex: Long Beach Signature (Heritage, 2/2006), lot 1003; Summer FUN Signature (Heritage, 7/2014), lot 3732. NGC ID# 43XR, PCGS# 5704

1917 Type Two Quarter, MS67 Full Head  
Frosty Luster, Among the Finest Certified

- 3063 1917 Type Two MS67 Full Head PCGS Secure.** The first-year Type Two Standing Liberty quarter from Philadelphia is a rarity in Superb Gem condition. PCGS lists only two non-Full Head pieces and 16 Full Head coins in this condition. The present example is sharp on Liberty's head but slightly soft on the shield and toes due to die wear. This die wear is also responsible for the frosty, radiant luster than engulfs each side. Daubs of olive, amber, russet, and crimson toning appear around the peripheries, surrounding light golden interiors. No mentionable abrasions are seen. Population: 16 in 67 (3 in 67+) Full Head, 0 finer (6/18). NGC ID# 2434, PCGS# 5715

**1926-D Quarter, MS64 Full Head**  
Remarkably Sharp for the Issue

- 3064 1926-D MS64 Full Head PCGS.** The 1926-D is the classic “flat head” of the Standing Liberty quarter series. Full Head examples are scarce and come at a strong price due to demand. The present coin is a near-Gem and not only shows full head detail but also has sharp toes on Liberty and strong eagle feathers on the reverse. The only notable weakness is on the shield rivets, which is unavoidable on this issue. Both sides are brilliant and satiny with limited abrasions. Population: 38 in 64 Full Head, 35 finer (6/18). NGC ID# 243S, PCGS# 5757

**PROOF WASHINGTON QUARTER**

**1936 Quarter Dollar, PR67**  
Among the Finest Certified

- 3065 1936 PR67 PCGS. CAC.** No Cameo proof 1936 Washington quarters are known. Non-Cameos are available through PR66, but this CAC-approved Superb Gem is a rare Registry Set candidate and is among the finest 1936 proofs certified. A crescent of orange-gold border toning along the lower obverse complements lighter lavender-gold color elsewhere. Deep reflectivity in the fields is revealed when tilted beneath a light. Population: 17 in 67, 0 finer. CAC: 6 in 67, 0 finer (6/18). NGC ID# 27HN, PCGS# 5975

**EARLY HALF DOLLARS**

**1794 O-101 Half Dollar, VF Details**  
Collector-Grade Example

- 3066 1794 O-101, T-7, High R.3 — Obverse Graffiti — NCS. VF Details.** Tompkins Die State 1/3. A middle die state example with moderately advanced cracks left of S(TATES) and to the leaves below (O)F. This well-defined VF half dollar exhibits varying shades of light and deep gray patina, with the motifs lighter and the fields deeper. Faint adjustment marks appear on the portrait and along the right obverse border. The noted graffiti occurs in the field behind Liberty. Any 1794 Flowing Hair half dollar is collectible, and this piece is no different.  
*From The Terry Brand Estate, Part X.* NGC ID# 24E6, PCGS# 39200 Base PCGS# 6051

**1794 O-101a Half Dollar, Fine 15**  
Problem-Free, Choice Surfaces

- 3067 1794 O-101a, T-7, High R.3, Fine 15 NGC.** Tompkins Die State 1/5. Even lilac-gray toning envelops both sides of this smooth, well-circulated 1794 half, with Choice surfaces that are remarkably free of marks and abrasions and entirely without adjustment marks on either side. The devices are fully outlined but not sharply defined, a function of the late die state where the reverse die shows signs of sinking. The date is full, and the rims are mostly bold for the grade except at the lower-right obverse. A golden glow from deep beneath the patina adds to the considerable eye appeal. NGC ID# 24E6, PCGS# 39201 Base PCGS# 6051

1794 Half Dollar, Fine 15  
O-101a, T-7

**3068** 1794 O-101a, T-7, High R.3, Fine 15 NGC. Tompkins Die State 1/5. The usually seen terminal die state, and the most collectible variety for the 1794 Flowing Hair half dollar. The lower-right obverse border is slightly soft, as are the central high points, but definition is at the upper end of what qualifies for the Fine grade level. Partial hair and feather detail is evident, and each side is toned in steel-gray patina with olive accents on the reverse. The only mentionable flaws are digs below the final S in STATES and the right wreath ribbon.

*From The Terry Brand Estate, Part X.* NGC ID# 24E6, PCGS# 39201 Base PCGS# 6051

1794 O-101a Flowing Hair Half, VF20  
Pleasing for the Grade

**3069** 1794 O-101a, T-7, High R.3, VF20 PCGS Secure. Tompkins Die State 1/5. The late die state O-101a makes up a majority of the O-101 (Tompkins-7) examples, and in the context of 1794 half dollars it is by far the most frequently seen die pair. The reverse die is shared with O-106 (T-4), O-107 (T-5), and O-108 (T-6), with O-101a the latest and final use of the reverse die. Because the initial die crack through the F in OF seems to come and go among the varieties, the Tompkins reference suggests there may have been die remarriages while the early Mint struggled with frequent first-year die failures.

This example shows all of the diagnostic die cracks in an advanced state, with slight bi-level layering of the upper-left reverse between die cracks left of the first S in STATES and through the F in OF. The reverse motifs are sharply struck for the grade, with about 50% of the wing feathers present plus full dentils and legends. The obverse is only slightly less-sharp, with a strong date and stars and only minor weakness along the lower-right margin. Pleasing medium-gray toning deepens at the borders with bluish-gray accents at the central motifs. NGC ID# 24E6, PCGS# 39201 Base PCGS# 6051

1794 Flowing Hair Half Dollar, VF25  
O-101a, Late Die State

**3070** 1794 O-101a, T-7, High R.3, VF25 NGC. Tompkins Die State 1/5. The crack near S(TATES) creates a biplanar surface, and another crack joins (STATE)S to the leaf tip. Bluish steel-gray patina dominates this VF25 representative from the historic inaugural issue of federal half dollars. Daubs of tan-gold color are complementary. The date, legends, and other peripheral design elements are strongly rendered, taking into account a normal amount of wear for the grade. Partial curl detail is visible, though the portrait is slightly soft. The eagle is moderately stronger with good wing feather definition. A pinscratch extends from the eagle's head to the berries below the A. Faint mint-made adjustment marks are noted on the obverse.

*From The Terry Brand Estate, Part X.* NGC ID# 24E6, PCGS# 39201 Base PCGS# 6051

1794 O-101a Half Dollar, VF30  
Tan-Gold and Lavender-Gray Patina  
Strongly Defined and Well-Centered

**3071** 1794 O-101a, T-7, High R.3, VF30 PCGS Secure. Tompkins Die State 1/5. The reverse is in its latest stage with a heavy biplanar crack right of S1 and another that connects S2 to the adjacent leaf. The reported mintage for the first-year 1794 half dollar has long been 23,464 coins. That total includes a delivery of 5,300 coins on December 1, 1794 plus another delivery of 18,164 pieces on February 4, 1795. Why would researchers assume that any quantity of 1794 half dollars were struck in 1795? It was a common practice at the early Mint to prioritize cost minimization at the expense of having properly dated dies. If in early 1795 only previously dated dies were on hand and half dollars were demanded by depositors, then it would have been perfectly normal to use them. Additionally, we know of 11 die marriages for the 1794 Flowing Hair half dollar. That number of varieties makes much more sense in the context of the larger mintage. As it happens, O-101, and specifically this later die state, is the most plentiful die pair for the issue.

This upper-end VF example is nicely centered with strong dentilation and bold legends. Softness and blending occur over the high central points, which show pleasing tan-gold patina that contrasts well against the lavender-gray fields. Crisscrossing adjustment marks appear over the obverse.

*From The Terry Brand Estate, Part X.* NGC ID# 24E6, PCGS# 39201 Base PCGS# 6051

1801 O-102 Half Dollar, AU58+  
High Condition Census for the Variety

**3072 1801 O-102, T-1, High R.4, AU58+ NGC.** A Condition Census example of the variety, showing lustrous fields and sharp central devices with only a brush of friction. Several border stars are weakly defined. Both sides of this lightly marked and satiny near-Mint coin display sea-green and golden toning. The 1801 half dollar overall is rare in Uncirculated condition and scarce in the upper AU grades. Overton-102 coins are in the minority. The finest O-102 example known is the Green/Newman coin, graded MS64 NGC. Stephen Herrman lists a scratched AU58 coin as the second finest of the variety. This fresh example, a Plus-graded and problem-free AU58 coin, will be an important acquisition for the Bust half dollar specialist. Census (both varieties included): 4 in 58 (1 in 58+), 2 finer (5/18).

Ex: Frontenac (Bowers and Merena, 11/1991), lot 3021. NGC ID# 24ED, PCGS# 39268 Base PCGS# 6064

BUST HALF DOLLARS

1809 O-106 Half Dollar, MS64  
All Border Stars Are Sharp

**3073 1809 Normal Edge, O-106, R.3, MS64 NGC.** The left-hand stars are connected by a die crack, and the left foot of the N in UNITED is recut. O-106 also shows a heavy die line extending into the top of the eagle's right (facing) wing from the shield corner. This lightly toned, highly lustrous near-Gem displays well-preserved fields and only a few marks on the devices. The border stars are razor-sharp, while the eagle's left (facing) wing shows some strike weakness. Neither side is toned. Census (all varieties included): 17 in 64 (1 in 64+ ★), 13 finer (5/18).

Ex: Long Beach Signature (Heritage, 2/2007), lot 3370, which realized \$6,325; FUN Signature (Heritage, 1/2008), lot 1458, which realized \$6,900.

**From The Kadison Family Collection.** NGC ID# 24ES, PCGS# 39395 Base PCGS# 6092

1812 Large 8 Half Dollar, MS66  
Woodin, Clapp, and Eliasberg's O-105a  
High Condition Census

**3074** 1812 Large 8, O-105a, R.2, MS66 NGC. Ex: Eliasberg. Gentle pearl-gray and tan hues adorn this lustrous and formidably pedigreed Overton-105a half dollar. Multiple sets of clash marks and a network of faint obverse die cracks confirm the relatively late state for the die marriage. A tiny obverse spot at 8 o'clock matches the plate in the third Eliasberg auction, which traces this coin's pedigree through the Clapp family to William H. Woodin. A couple of light vertical marks on Liberty's neck are only apparent when viewed beneath a strong loupe. The devices are well-struck. The Eliasberg coin is high in the Condition Census for the O-105a variety.

Ex: William H. Woodin; John H. Clapp; Clapp Estate to Louis E. Eliasberg, Sr. (1942); Louis E. Eliasberg, Sr. Collection (Bowers and Merena, 4/1997), lot 1721; Long Beach Signature (Heritage, 6/2006), lot 1613, which realized \$11,500.

**From The Kadison Family Collection.** NGC ID# 24EW, PCGS# 39450 Base PCGS# 6100

1818/7 Large 8 Half Dollar, O-101a, MS64  
Arcing Reverse Die Crack

**3075** 1818/7 Large 8, O-101a, R.1, MS64 NGC. An arcing die crack on the reverse through the olive leaves and denomination identifies the late state of the O-101 die marriage. Three die marriages are known for the overdate, including O-101 and -103, which have a large first 8 in the date, and O-102, which has a small first 8. All three varieties have a small second 8 over the underlying 7. This near-Gem O-101a coin displays bold peripheral definition with minor weakness on the eagle's left (facing) wing. Softly lustrous surfaces yield delicate rose-gold, sea-green, and lilac toning. Eye appeal is pleasing. Census (all 1818/7 varieties): 14 in 64 (1 in 64 ★), 4 finer (5/18).

**From The Kadison Family Collection.** NGC ID# 24FA, PCGS# 39541 Base PCGS# 6115

1818 O-107 Half Dollar, MS64  
Lustrous and Attractively Toned

**3076** 1818 O-107, R.1, MS64 PCGS. Vibrant cartwheel luster rolls around the near-Gem surfaces of this Overton-107 half dollar. A diagonal die line through the TY in LIBERTY and a couple of short, heavy spines on the top of the eagle's beak readily identify the die pair. This piece is sharp throughout and well-preserved. Russet-gold, lilac, and powder-blue hues make appearances on both sides. Housed in a green label holder. Population (all normal date varieties included): 37 in 64 (2 in 64+), 11 finer (5/18).

**From The Kadison Family Collection.** NGC ID# 24F9, PCGS# 39523 Base PCGS# 6113

**1819 Half Dollar, O-111, MS64**  
**Ex: Eliasberg, Original Pearlescent Surfaces**

- 3077 1819 O-111, R.2, MS64 NGC.** Ex: Eliasberg. Strike doubling on Liberty's profile and the flatness of stars 9 to 13 help confirm this Overton-111 as the example that appeared uncertified in the Bowers and Merena April 1997 auction of the Eliasberg Collection as lot 1764. Lustrous with pearlescent silver-gray surfaces, the coin is sharply struck throughout the central motifs. Choice, frosted surfaces show virtually no abrasions or marks of any kind. Wisps of olive-gray patina are most visible around the raised elements. While the Parsley Condition Census shows a 65,64,63,62,62 range, the Spring 2018 Steve Herrman Census lists an MS64 ANACS example at the top of its list. This well-pedigreed piece surely ranks near the top of the finest for the variety. NGC ID# 24FB, PCGS# 39549 Base PCGS# 6117

**1822 O-113 Bust Half, MS64**  
**Ex: Mougey, Eliasberg**

- 3078 1822 O-113, R.3, MS64 PCGS.** Ex: Eliasberg. A scarce die marriage, with the I in PLURIBUS far left of the second T in STATES. The T sits diagnostically low between A and E. This near-Gem example is one of the storied O-113 representatives, tracing back to the famous Mougey Collection according to the Eliasberg notebook. The Mougey Collection had four 1822 half dollars — three of which were called proofs. The present example is clearly a circulation strike, with delicate golden toning over lilac-silver surfaces that display attractive satin luster. Faint rose accents gleam around the central reverse devices. The strike is pinpoint sharp on the stars, showing only minor weakness on a few high-point curls and the eagle's shoulders.  
 Ex: Peter Mougey Collection (Thomas L. Elder, 9/1910); John H. Clapp; Clapp Estate (1942); Louis E. Eliasberg, Sr.; Eliasberg Estate (Bowers and Merena, 4/1997), lot 1789; Long Beach Signature (Heritage, 2/2018), lot 3880 as MS64 NGC. NGC ID# 24FG, PCGS# 39601 Base PCGS# 6129

**1826 O-111 Half Dollar, MS65**  
**Tied for Finest of the Variety**

- 3079 1826 O-111, R.2, MS65 NGC.** The obverse is heavily cracked including a horizontal crack across the top of the cap, yet no curving die crack below MERICA to the top arrowhead exists that would confirm the O-111a late die state (nor has any such crack been seen at auction). Regardless of the exact die state, this Gem example ties for top of the O-111 Condition Census according to Parsley's reference and the Spring, 2018 listing from Steve Herrman (6/18). Iridescent shades range from copper-red to bright-gold and bluish-tan on both sides, with a pinpoint-sharp strike. There are no significant marks or abrasions to disturb the lustrous, frosted surfaces. NGC ID# 24FM, PCGS# 39680 Base PCGS# 6143

**1830 Capped Bust Half, MS65**  
**Small O, O-101**

- 3080 1830 Small O, O-101, R.1, MS65 NGC.** The A in STATES is recut and partially filled, diagnostic for Overton-101. This delightful Gem half is sharply detailed, with frosty luster shining through low-intensity shades of pale gold toning. The obverse stars are sharp in the centers, and Liberty's drapery folds, hair curls, and cap are crisply defined. This piece is tied for second finest for the variety in Steve Herrman's most recent compilation of data on Bust halves (65+, 65, 65, 65, 64, 64). Census (for the variety): 1 in 65, 1 finer (6/18). NGC ID# 24FU, PCGS# 39810 Base PCGS# 6156

### 1830 Large 0 Half Dollar, Colorful MS65 O-123, Resplendent Surfaces

- 3081** 1830 Large 0, O-123, R.1, MS65 PCGS Secure. While O-123 is the most readily available Large 0 variety, it is seldom seen finer than this lustrous and attractively toned ocean-blue and orange-gold Gem. Gleaming, satin-smooth surfaces show virtually no distractions, and the strike is sharp on both the left and right sides. Only stars 7 and 9 lack their full central details. Numerous horizontal shield lines extend into the right-side wing feathers (similar to O-122), but the position of the I in PLURIBUS in relation to the second T in STATES confirms this is the O-123 die pair. The coin is certainly tied at the low end of the Condition Census for the variety, with claims to an even higher position. NGC ID# 24FU, PCGS# 39834 Base PCGS# 6157

### REEDED EDGE HALF DOLLAR

#### 1839-O Reeded Edge Half Dollar, MS61 GR-1, Late Die State

- 3082** 1839-O GR-1, R.1, MS61 NGC. Boldly struck for the type, this final-year Reeded Edge half dollar has attractive cartwheel luster and no bothersome abrasions. A hint of golden-gray color denies full brilliance. The mintmark is lightly repunched south on GR-1, the most plentiful die variety. A network of slender die cracks around the peripheries of both sides indicates a late die state. The 1839-O is the only collectible New Orleans issue of the Reeded Edge type. Ex: *Long Beach Signature* (Heritage, 9/2005), lot 3208, which realized \$3,220; *Dallas Signature* (Heritage, 10/2006), lot 1164, which realized \$3,220. From *The Kadison Family Collection*. NGC ID# 24G7, PCGS# 531106 Base PCGS# 6181

### SEATED HALF DOLLARS

#### 1852 Half Dollar, MS65 A Rarity in This Grade

- 3083** 1852 WB-101, Die Pair 1, R.4, MS65 PCGS Secure. Uncirculated 1852 Seated half dollars are scarce, and this Gem example is rare. Only a few finer coins are known. Frosty surfaces yield warm golden toning and show just a few light abrasions. Stars 7, 8, and 9 exhibit weakness, but the central devices are generally sharp. One obverse die was used for the coinage of 77,130 half dollars at the Philadelphia Mint in 1852, paired to three different reverse dies. Population: 5 in 65, 1 finer (6/18). NGC ID# 24HL, PCGS# 572083 Base PCGS# 6268

#### 1855-O Arrows Half Dollar, MS65 Conditionally Scarce New Orleans Type Coin

- 3084** 1855-O Arrows, WB-101, Die Pair 5, R.3, MS65 PCGS Secure. Only a few weak die cracks define this Wiley-Bugert variety, including a radial crack near star 9 that runs through the corner of the cap to Liberty's wrist. Another radial die crack runs across star 13 into the field toward the knee. This is a brilliant, frosted Gem with faint glimmers of pale-gold. The strike is weak on Liberty's hair and the stars surrounding the gown line, and at the opposing arrow fletchings and eagle's leg on the reverse, although the coin is sharp elsewhere. Marks and abrasions are nearly nonexistent. Population: 22 in 65 (1 in 65+), 10 finer (6/18). NGC ID# 24JP, PCGS# 572090 Base PCGS# 6283

**1876-CC Half Dollar, Reflective MS65  
Newly Discovered Obverse Die**

- 3085 1876-CC Large CC, WB-103, Die Pair-Unlisted, MS65 NGC.** The 1876-CC half dollar is a rarity in Gem or better grades, and this fully prooflike example, with its bold devices and cameo contrast, is especially appealing. A trace of light champagne toning graces the surfaces, and no bothersome abrasions are seen. Only two reverse dies are known with the Large CC mintmark. This coin represents Reverse H, but the obverse die is undocumented. Diagnostics of the obverse include a high date that slants up to the right, a small curved die line in Liberty's gown next to the left edge of the Liberty cap pole, and some small die lumps in the rightmost shield recess. A thin die crack is also seen from star 12 to 13. Census: 12 in 65 (1 in 65+, 1 in 65 ★), 4 finer (5/18). NGC ID# 24KH, PCGS# 572240 Base PCGS# 6353

**PROOF SEATED HALF DOLLARS**

**1860 Half Dollar, PR65 Cameo  
Few Contrasted Proofs Known This Fine**

- 3086 1860 PR65 Cameo NGC.** No Ultra or Deep Cameo proof 1860 half dollars are reported by the leading certification services, and NGC has seen only 15 Cameos (5/18). This Gem is well-contrasted and fully struck with delicate golden toning. An absence of bothersome marks promotes outstanding eye appeal. The 1860 proof is significantly scarcer in high grade than its mintage of 1,000 pieces would suggest. Census: 4 in 65 Cameo, 7 finer (5/18). NGC ID# 27TK, PCGS# 86414

**1879 Half Dollar, PR66 Cameo  
First in a Series of Low-Mintage Issues**

- 3087 1879 PR66 Cameo NGC.** This was the first year that saw a dramatic decline in the number of circulation-strike half dollars produced at the Mint. Only 4,800 such coins were struck in 1879, plus 1,100 proofs for collectors. This marvelous Premium Gem Cameo representative is flashy and minimally toned with deep reflectivity in the fields. Faint blue and gold accents appear on the obverse, and a spot of reddish color occurs on the lowest arrowhead. Census: 8 in 66 Cameo, 11 finer (6/18). *From The Kadison Family Collection.* NGC ID# 27UE, PCGS# 86440

**BARBER HALF DOLLARS**

**1903 Half Dollar, MS65  
Only Five Certified Finer**

- 3088 1903 MS65 PCGS Secure.** Gem Barber half dollars are elusive across the entire series. Even the most plentiful issues are rarely encountered in top grades. The 1903 is an example with only 20 coins in grades of MS65 or finer by PCGS and NGC combined (6/18). This lovely half dollar exhibits satin mint luster and sharp design definition with pale gold and emerald toning. Population: 10 in 65 (1 in 65+), 5 finer (6/18). NGC ID# 24MJ, PCGS# 6495

1908 Barber Half, MS66  
Conditionally Rare

- 3089 1908 MS66 PCGS Secure.** The 1908 Barber half dollar is an available date through MS64 but becomes scarce in MS65. This Premium Gem is a rarity. Only a few coins are known in this and finer grades. Olive, russet, and golden toning along the borders of this piece frames pearl-white interiors. No significant strike weakness occurs, and only a few light marks are noted on Liberty's cheek. Population: 8 in 66, 3 finer (6/18). NGC ID# 24N4, PCGS# 6512

## WALKING LIBERTY HALF DOLLARS

1916-D Half Dollar, MS66+  
Few Finer Pieces Are Known

- 3090 1916-D MS66+ PCGS. CAC.** The 1916-D Walking Liberty half dollar is scarce in MS66 and decidedly rare finer. This Plus-graded, CAC-approved Premium Gem displays a sharp strike and luminous, softly frosted luster with no distracting abrasions. Freckles of sea-green and russet-olive toning grace otherwise like golden surfaces. Population: 74 in 66 (2 in 66+), 3 finer. CAC: 23 in 66, 1 finer (6/18). NGC ID# 24PM, PCGS# 6567 Base PCGS# 6567

1919 Half Dollar, MS66  
Fully Struck, Strong Eye Appeal

- 3091 1919 MS66 NGC.** Each side is mostly light golden in color with additional splashes of lavender-gray patina over the obverse and a slight olive cast near the upper-reverse border. A lens reveals a couple of tiny marks: one on the hand, one on the eagle's leg, and three small reeding marks on the wing. Truly an extraordinary representative with complete design detail and elegant eye appeal. The 1919 Walking Liberty half dollar is rarely offered this fine, and only a few higher-grade representatives are known, none of which are certified by NGC. This is an outstanding example for the Registry Set collector. Census: 12 in 66, 0 finer (6/18). NGC ID# 24PY, PCGS# 6577

**1921-S Half Dollar, MS63  
Low Mint State Survivorship**

- 3092 1921-S MS63 PCGS Secure.** In 1921, the San Francisco Mint struck only 548,000 half dollars, and this issue circulated extensively. The preservation of high-grade Mint State coins was also affected by the economic hardships of the Great Depression less than a decade later. Today, this issue is a key date in the Walking Liberty half dollar series and is genuinely scarce in Uncirculated condition. In this condition, the 1921-S is significantly scarcer than both the Denver and Philadelphia issues of the same date, which had even lower mintages.

For collectors, this Select example strikes a balance between cost and condition. Satiny, untoned surfaces show light, unobtrusive contact marks and have good luster. Liberty's head and branch hand are weakly struck as normal, as is the eagle's trailing leg. Appealing for the grade. Population: 36 in 63, 68 finer (6/18). NGC ID# 24R8, PCGS# 6585

**1933-S Half Dollar, MS66+  
Ex: Newman, Few Finer**

- 3093 1933-S MS66+ PCGS. CAC. Ex: Newman.** Iridescent colors glow beneath a dappled mantle of tan and olive toning that bespeaks the natural state of this sharply struck 1933-S Walking Liberty half. Frosted silver luster shines through openings in the attractive patina. Nearly full details attend Liberty's head and branch hand, while the feathering on the eagle's trailing leg could hardly be sharper. CAC endorsement supports the PCGS Plus designation and sets this Premium Gem example apart from its peers. Population: 12 in 66+, 15 finer. CAC: 41 in 66, 9 finer (6/18). NGC ID# 24RE, PCGS# 6591

**PROOF FRANKLIN HALF DOLLAR**

**1951 Franklin Half Dollar, PR68  
Subtle Contrast, Among the Finest at PCGS**

- 3094 1951 PR68 PCGS.** This is a PCGS Registry coin of unsurpassed quality. Only five 1951 proof Franklins are graded PR68 at that service, all non-Cameo coins. This piece is untoned and modestly contrasted to the point that it would visually satisfy many collectors who otherwise seek Cameo proofs. Sharp design elements and virtually flawless fields place this piece in a level of quality that few proof Franklin half dollars achieve. Population: 5 in 68, 0 finer (5/18). NGC ID# 27VB, PCGS# 6692

## EARLY DOLLARS

1795 Draped Bust Centered Dollar  
B-15, BB-52, Sharp XF40

**3095** 1795 Draped Bust, Centered, B-15, BB-52, R.2, XF40 PCGS Secure. 30th Anniversary Green Label Holder. Die State V. This impressively detailed first-year Draped Bust dollar retains most of the eagle's breast feathers, with slight friction evident only on the very center of the breast, leg, and neck; Liberty's cheek and drapery are similarly well-detailed for the XF level. The golden-brown surfaces are glossy and relatively unmarked. A pair of tiny edge marks are noted on the reverse at 4 o'clock. Bust dollar collections by *Guide Book* variety are increasingly popular.

Ex: Long Beach Signature (Heritage, 9/2005), lot 3647, which realized \$7,762.50; FUN Signature (Heritage, 1/2013), lot 4476, which realized \$8,812.50; Long Beach Signature (Heritage, 6/2015), lot 4043, which realized \$8,518.75. NGC ID# 24X2, PCGS# 39995 Base PCGS# 6858

1795 B-15, BB-52 Dollar, XF45  
Centered Draped Bust

**3096** 1795 Draped Bust, Centered, B-15, BB-52, R.2, XF45 PCGS Secure. 30th Anniversary Green Label Holder. Bowers Die State IV. This olive-green first-year Draped Bust dollar displays plentiful indications of luster within the wreath, legends, wings, and curls. The protected regions display cobalt-blue and cherry-red toning. This piece is from the usually encountered die state with a narrow extension above the rectangular die break in Liberty's hair. No adjustment marks are seen.

Ex: Long Beach Signature (Heritage, 6/2015), lot 4044, which realized \$9,987.50. NGC ID# 24X2, PCGS# 39995 Base PCGS# 6858

1797 Draped Bust Dollar, VF25  
B-3, BB-71, 10x6 Stars, Large Letters  
High-End for the Grade

**3097** 1797 10x6 Stars, Large Letters, B-3, BB-71, R.2, VF25 PCGS. Die State III, as usual. A moderately available variety, ideal for type purposes. This is an unusually attractive midgrade example, with strong remaining detail that includes complete border dentils. A pale lavender tint accents primarily steel-gray surfaces, though deeper gunmetal hues are seen in the border recesses and lighter gray shades preside over the relief elements. A lack of adjustment marks further increases the eye appeal. Housed in an old green label holder.

Ex: Long Beach Signature (Heritage, 9/2014), lot 3206, which realized \$5,140.63. NGC ID# 24X4, PCGS# 40004 Base PCGS# 6865

## GOBRECHT DOLLAR

1836 Gobrecht Dollar, XF40 Details  
Judd-60 Original

**3098** 1836 Name on Base, Judd-60 Original, Pollock-65, R.1 — Scratched, Cleaned — ANACS. XF40 Details. Silver. Plain Edge. Die Alignment I (center of Liberty's head is opposite the D in DOLLAR). Undetermined die state. Probably Die State H, there is a rim nick above the U in UNITED, but so few other diagnostics from earlier states are apparent that we cannot be certain even of this one. As stated, the surfaces are scratched and cleaned with the result of a general blurring of many finer details, possibly including the angling die clash mark above the eagle's wing. Medium gray patina overall with much lighter accents over the high points.

From The Kadison Family Collection. NGC ID# BLWV, PCGS# 11225

## SEATED DOLLARS

1859-S Seated Dollar, MS62  
Rare in Mint Condition

- 3099** 1859-S MS62 NGC. OC-1, R.2. All evidence of the repunched date has been removed by die lapping. The 1859-S has an estimated survivorship of 800 coins out of 20,000 struck. Osburn and Cushing point out that while few examples circulated extensively (VF or lower), even fewer were preserved in mint condition. This stone-gray dollar is incompletely defined on Liberty's head and the eagle's feathers (as always), but the borders and peripheral elements are bold. The brilliant and semiprooflike surfaces are minimally marked for the designated grade. Census: 3 in 62, 6 finer (6/18). NGC ID# 24YZ, PCGS# 6948

1872-CC Seated Dollar, AU55  
Low-Mintage Carson City Issue

- 3100** 1872-CC AU55 NGC. OC-1, High R.3. While not as scarce as the mintage of 3,150 pieces suggests, the 1872-CC is, nevertheless, a difficult coin to locate especially in high grades. Bowers states that "in Mint State the 1872-CC is very rare and seems to be nearly (but not quite) on a par with the 1871-CC, although in lower grades the 1871-CC is measurably rarer." In all grades, somewhere between 210 and 250 coins are believed extant today, with most in major dollar collections. This piece is a bit softly struck over the high points. The surfaces are bright with darker toning seen around the obverse periphery. Numerous small abrasions are peppered over each side with a couple of larger ones in the right-obverse field. Census: 3 in 55, 21 finer (6/18).  
Ex: Long Beach Signature (Heritage, 6/2006), lot 2084, realized \$10,350; Central States Signature (Heritage, 4/2009), lot 2584, realized \$12,075. NGC ID# 24ZK, PCGS# 6969

## PROOF SEATED DOLLARS

1861 Seated Dollar, PR63 Cameo  
Low Cameo Survivorship

- 3101** 1861 PR63 Cameo PCGS. OC-P2, Low R.4. PCGS lists only 33 Cameo examples of the 1861 proof dollar, none finer than PR65. No Deep Cameos are listed. This collectible Select representative displays full detail and contrasted surfaces with mostly brilliant color. Under a loupe, a few field lines limit the grade but do not detract. Population: 10 in 63 (1 in 63+) Cameo, 19 finer (5/18). NGC ID# 252F, PCGS# 87004

1862 Seated Dollar, PR64+ Cameo  
Attractive Border Toning

- 3102** 1862 PR64+ Cameo PCGS Secure. OC-P2, High R.3. Cameo proof 1862 Seated dollars are scarce, and PCGS reports only two Deep Cameos. This high-end near-Gem Cameo offers well-struck motifs and pleasing contrast. Lavender and russet toning around the borders frames light golden interiors, and no distracting contact marks are seen. Population: 8 in 64 (1 in 64+) Cameo, 1 finer; 2 in 64 Deep Cameo, 0 finer (5/18). NGC ID# 252G, PCGS# 87005

1863 Seated Dollar, PR63  
Lightly Toned Collector Coin

- 3103** 1863 PR63 PCGS Secure. OC-P1, R.4. The lowest horizontal shield line on the reverse extends past the left border of the shield on this die pair, which shares its obverse with the other proof die pair of 1863. As a date, this issue is popular and relatively elusive with pleasing eye appeal. Light golden toning covers sharp design elements and glimmering fields, leaving faint hairlines almost unnoticed. Pleasing for the grade. NGC ID# 23BS, PCGS# 7006

**1864 Seated Dollar, Remarkable PR65  
Stunning, Early-Certified Gem Proof**

- 3104 1864 PR65 NGC. OC-P1, R.4.** Osburn-Cushing Die State a/a. Patchy ice-blue and gray toning allows windows of brilliant, silver-mirrored surface to shine through each side of this originally patinated, razor-sharp proof. Just 470 pieces were struck by the Mint during the year, and the most recent research by Dick Osburn and Brian Cushing estimates only 300 pieces of the 1864 proof mintage survive in all grades combined.

Dramatic, deep toning obscures some of the mirroring unless viewed at an advantageous angle, yet the proof surfaces are pristine and of obvious Gem quality. This example is housed in an old white-label, pre-hologram NGC holder (NGC 2.1) used only briefly in 1987. With more than 30 years in the early vintage holder, this amazing proof Seated dollar is not only of high technical quality, it seems conservatively graded according to current standards. A loupe reveals virtually no imperfections. Census: 13 in 65, 14 finer (5/18). NGC ID# 252J, PCGS# 7007

**1864 Seated Liberty Dollar, PR63 Cameo  
Lightly Toned and Contrasted**

- 3105 1864 PR63 Cameo PCGS Secure. OC-P2, High R.4.** A moderately elusive proof die pair, using an 1863 reverse die. This Select Cameo representative is razor-sharp and has broad, squared rims. Glimmering fields exhibit faint hairlines consistent with the grade, but light golden toning masks the imperfections and produces pleasing visual appeal. Population: 11 in 63 Cameo, 25 finer (5/18). NGC ID# 252J, PCGS# 87007

**1868 Dollar, PR64 Deep Cameo  
Dramatic Contrast**

- 3106 1868 PR64 Deep Cameo PCGS. OC-P2, High R.3.** One of two obverse dies used to strike proofs in 1868, this variety features a triple punched 1 in the date. Of the 375 proofs believed extant from a mintage of 600 pieces, OC-P2 is thought to represent about 250 survivors. The hallmark of this near-Gem is unquestionably its dramatic field-device contrast, enhanced by the near-complete lack of toning. There are just a few daubs of peripheral rose-gold color, but the centers remain wholly brilliant. An eye-catching example. Population: 7 in 64 (1 in 64+) Deep Cameo, 3 finer (6/18). *From The Kadison Family Collection.* NGC ID# 252P, PCGS# 97016

**1870 Seated Dollar, PR64 Cameo  
Warmly Toned, Conditionally Scarce**

- 3107 1870 PR64 Cameo NGC. CAC. OC-P1, Low R.3.** Three die pairs are known for proof 1870 Seated dollar coinage, despite a mintage of only 1,000 coins. All three varieties employ a common obverse die. The OC-P1 reverse shows minute die doubling on IN GOD WE TRUST. This near-Gem Cameo displays sharp motifs and light golden toning. Excellent contrast and deep mirrors earn a CAC endorsement. Census: 11 in 64 Cameo, 14 finer; 0 in 64 Ultra Cameo, 5 finer. CAC: 6 in 64, 5 finer (5/18). NGC ID# 252S, PCGS# 87018

## TRADE DOLLAR

1878-CC Trade Dollar, AU58+  
Low-Mintage Key Date  
Rare in High Grades

- 3108 1878-CC AU58+ PCGS Secure.** Unlike the Philadelphia Mint, the Carson City facility managed a small production of Trade dollars before the denomination was abolished by Treasury Secretary John Sherman on February 22, 1878. Nevada mint officials struck 56,000 pieces in January and 41,000 examples during the first three weeks in February for a total mintage of 97,000 coins. That total stands as the lowest in the Trade dollar series, making the 1878-CC a perennially in-demand issue.

This piece is as close to Mint State as one could hope to find without crossing that threshold. Wear is virtually unseen, and any softness on Liberty's head or the eagle's wingtips is a reflection of strike rather than friction. The stars, olive leaves, feathers, and talons are notably well-struck. Delicately toned lilac-gray surfaces display minimal abrasions with glints of original luster in the recesses. Population: 16 in 58 (1 in 58+), 37 finer (6/18). NGC ID# 253M, PCGS# 7047

## PROOF TRADE DOLLARS

1878 Trade Dollar, PR66  
Proof-Only Philadelphia Striking

- 3109 1878 PR66 PCGS.** When issued, 1878 Trade dollar proofs were available from the Mint for \$1.75 each in paper money, or for \$1.50 each in silver. Still, 219 pieces remained unsold at the end of the year from a mintage of 900 pieces. Rather than melting the excess proofs, the Mint distributed them at bullion value — likely to favored coin dealers. This stunning, deeply toned example must have spent decades carefully preserved in a Kraft envelope. Rotation under a light reveals nearly perfect mirrored fields that are concentrically toned in shades of sea-green, blue, and pale-rose hues. Iridescent colors play alongside the primary shades, while the strike is razor-sharp throughout both sides. Housed in a previous generation green label holder. Population: 13 in 66 (1 in 66+), 1 finer (6/18). NGC ID# 27YP, PCGS# 7058

1879 Trade Dollar, PR65 Cameo  
All-Brilliant Surfaces

- 3110 1879 PR65 Cameo NGC.** Beginning in 1878 and continuing through the end of the Trade dollar series in 1883 (or 1885 including clandestine issues), Trade dollars and Morgan dollars were both produced, including proofs of each. A collection of proof coins of each design during these transitional years has the potential to make a thought-provoking and aesthetic display. This lovely Gem is fully brilliant without a wisp of toning, and provides the viewer with exceptional aesthetics.

*Ex: Long Beach Signature (Heritage, 9/2004), lot 7088, where it realized \$8,051.15.*

**From The Kadison Family Collection.** NGC ID# 27YR, PCGS# 87059

1880 Trade Dollar, PR65  
Attractive Rose Patina

- 3111 1880 PR65 PCGS.** The Mint continued to strike proof Trade dollars for collectors officially through 1883, though the denomination had been abolished for circulation in late February 1878. A total of 1,987 pieces were produced in 1880 — the highest mintage among proof-only issues. This marvelous Gem is delicately toned in attractive rose patina. The fields remain flashy and moderately reflective beneath the original overlay. Housed in an old green label holder. NGC ID# 27YS, PCGS# 7060

## MORGAN DOLLARS

1878 8TF Silver Dollar, MS66  
VAM-14.1A, Smooth Obverse

- 3112 1878 8TF Alligator Eye, VAM-14.1A, MS66 PCGS Secure.** The briefly issued eight tailfeathers subtype is often collected by VAM variety. The pick-up point for VAM-14.1 (and its clashed VAM-14.1A successor) is an unfinished surface above the M in UNUM. This lustrous and stone-white Premium Gem has a sharp strike and virtually immaculate obverse. The reverse displays infrequent moderate contact. NGC ID# 253H, PCGS# 133796 Base PCGS# 7072

1878 Morgan Dollar, MS66  
8 Tailfeathers, VAM-17  
Prooflike Obverse

- 3113 1878 8TF Diagonal In 8, VAM-17, MS66 PCGS.** A diagonal die line in the lower loop of the first 8 is a diagnostic point for VAM-17, one of many sought-after 1878 8 Tailfeather Morgan dollar varieties. This Premium Gem is high-end not only for the variety but also the date. The obverse is deeply mirrored and contrasted, but the reverse is frosted overall, preventing a Prooflike designation. A couple of faint grazes on Liberty's cheek are all that deny an even finer grade. Neither side shows mentionable toning, and eye appeal is outstanding.

*Ex: Long Beach Signature (Heritage, 9/2006), lot 4903, which realized \$8,050.*

**From The East End Collection.** NGC ID# 253H, PCGS# 133818 Base PCGS# 7072

1878 7/8 Tailfeathers Morgan Dollar  
MS65 Deep Prooflike, VAM-36

- 3114 1878 7/8TF Strong, VAM-36, MS65 Deep Prooflike NGC.** VAM-36 is often seen with Deep Prooflike surfaces, but many coins are only one-sided in that regard. This reflective Gem is mirrored on both sides, producing cameo contrast and sharp detail. A trace of light golden toning surrounds the outer periphery, leaving the interiors brilliant. Only a few small surface grazes are visible. VAM-36 shows four of the eight underlying tailfeathers, known as a Strong 7/4 variety.

*Ex: Dallas Signature (Heritage, 11/2005), lot 2282, which realized \$8,625.*

**From The East End Collection.** NGC ID# 2TXZ, PCGS# 40216 Base PCGS# 97079

**1878-S Morgan Dollar, MS67**  
**Exemplary Surfaces and Luster**

- 3115 1878-S MS67 PCGS.** Ex: NFL Set/Mike Casper. A few additional Superb Gem 1878-S Morgan dollars have come to light since this sharp piece was last auctioned by us in 2006, but it remains decidedly scarce in this grade and is second to only four numerically finer examples at PCGS and NGC combined, including Prooflike pieces (5/18). The distinctive obverse is nearly prooflike, complementing a remarkably clean cheek on Liberty that shows only a few faint, mint-made roller marks on the lower jaw. The reverse is equally pristine and has frosty luster. Traces of delicate golden toning appear throughout, giving the coin strong visual appeal. Population: 35 in 67 (2 in 67+), 1 finer; 0 in 67 Prooflike, 2 finer (5/18).

Ex: FUN Signature (Heritage, 1/2001), lot 7911, which realized \$4,715; Palm Beach Signature (Heritage, 3/2006), lot 999, which realized \$9,200.

From The East End Collection. NGC ID# 253R, PCGS# 7082

**1879-CC Morgan Dollar, MS62**  
**Scarcer Carson City Issue**

- 3116 1879-CC MS62 PCGS.** The 1879-CC Morgan dollar is an elusive branch mint issue, from a small mintage of 756,000 pieces. This impressive MS62 example displays well-detailed design elements, with a touch of the usual softness on the hair above the ear. The lightly marked, lustrous surfaces show subtle hints of lavender toning. NGC ID# 253U, PCGS# 7086

**1879-CC Silver Dollar, MS63**  
**Better Carson City Morgan Issue**

- 3117 1879-CC MS63 PCGS.** After the 1889-CC, the '79-CC is the scarcest Carson City Morgan dollar in Mint State, a distinction that makes examples in all grades highly sought-after. This Select example is frosty with original luster. A few scattered abrasions on the cheek limit the grade, but eye appeal is yet pleasing. Neither side exhibits mentionable toning.

Ex: Long Beach Signature (Heritage, 6/2005), lot 6734, which realized \$6,037.50; Dallas Signature (Heritage, 11/2005), lot 3044, which realized \$6,325.

From The East End Collection. NGC ID# 253U, PCGS# 7086

**1879-CC Morgan Dollar, MS64**  
**Elusive in High Grade**

- 3118 1879-CC MS64 PCGS.** Large quantities of the 1879-CC dollar were put into storage at both the San Francisco Mint and the Treasury Building in Washington, D.C. The former source seems to have dried up after a few bags were paid out in the early years of World War II. Quantities paid out through the Treasury Department in the early 1950s were such that the 1879-CC was generally available on the numismatic market through the end of that decade. Today, the date is widely recognized as the scarcest CC-mint Morgan dollar of the 1878-1885 era.

This near-Gem features sharp design elements, save for some minor softness on Liberty's hair strands and the eagle's breast feathers. The surfaces are virtually brilliant and vibrantly lustrous. A few minute marks on Liberty's cheek limit the grade.

Ex: Long Beach Signature (Heritage, 6/2002), lot 5958, which realized \$4,715; Denver Signature (Heritage, 8/2006), lot 2609, which realized \$8,625.

From The East End Collection. NGC ID# 253U, PCGS# 7086

1879-CC GSA Dollar, MS64  
Scarcer Carson City Issue

- 3119 1879-CC GSA MS64 NGC.** The 1879-CC Morgan dollar is a scarce, low-mintage issue and relatively few examples were found in the GSA and Treasury releases of the 1960s and '70s. This well-preserved, sharply detailed Choice specimen is band certified in the official government holder. The original box and certificate accompany the lot. NGC ID# 253T, PCGS# 518848 Base PCGS# 7086

1879-CC Dollar, MS63  
Capped Die, VAM-3, Top 100 Variety

- 3120 1879-CC Capped Die, VAM-3, MS63 PCGS.** A Top 100 Variety. This Select Uncirculated example of the famous Capped Die variety is brilliant with relatively unmarked fields and above-average sharpness. A normal amount of softness occurs over the centers, and minor chatter is noted on the cheek. Both sides are brightly untoned and awash in thick mint luster characteristic of the facility.  
*Ex: Central States Signature (Heritage, 4/2006), lot 3235, where it realized \$5,750.00*  
**From The East End Collection.** NGC ID# 253U, PCGS# 133869 Base PCGS# 7088

1879-CC Dollar, MS64  
VAM-3, 'Capped Die' Variant

- 3121 1879-CC Capped Die, VAM-3, MS64 NGC. CAC.** A Top 100 Variety. Years ago the "Capped Die" 1879-CC dollar was underappreciated (and undervalued) compared to its Normal Mintmark counterpart. This was mostly from a lack of knowledge about the nature of the mintmark. It is actually a Large CC Over Small CC. The "Capped Die" moniker persists, but the stigma has long since vanished. Unlike many 1879-CC dollars, this piece shows remarkably clean surfaces and thick mint frost. Untoned. NGC ID# 253U, PCGS# 133869 Base PCGS# 7088

1879-O Silver Dollar, MS66  
White, Smooth, and Lustrous

- 3122 1879-O MS66 PCGS.** The 1879-O is common in circulated grades, and examples in typical Mint State are also always available. But at the MS66 level, it becomes a conditional rarity. This highly lustrous and essentially brilliant example offers remarkably smooth fields, and even Liberty's cheek shows only wispy contact. The strike is shy of a full impression, as usual for the facility and series, but only the eagle's breast and the hair above the ear are incomplete. Practically unimprovable. Population: 28 in 66 (4 in 66+), 0 finer (5/18).  
*Ex: Palm Beach Signature (Heritage, 3/2006), lot 1010, which realized \$12,650.*  
**From The East End Collection.** NGC ID# 253X, PCGS# 7090

1879-S Dollar, Frosty MS65  
Reverse of 1878

- 3123 1879-S Reverse of 1878 MS65 PCGS.** A minority of 1879-S Morgan dollars feature the Reverse of 1878, which is most easily recognized by the low relief eagle's breast and the parallel arrow fletchings. This is a sharp Gem example with frosty, untuned mint luster and well-preserved surfaces. The Reverse of 1878 is scarce in MS65 and decidedly rare finer. Population: 64 in 65 (1 in 65+), 1 finer; 1 in 65 Prooflike, 0 finer (5/18).  
*From The East End Collection.* NGC ID# 253W, PCGS# 7094

1880/79-CC Morgan Dollar, MS66  
VAM-4 Overdate, A Top 100 Variety

- 3124 1880/79-CC Reverse of 1878, VAM-4, MS66 PCGS.** A Top 100 Variety. The digits of the 7 and 9 show boldly underneath the 8 and 0 on this Reverse of 1878 variety. Premium Gems are the finest examples reported by PCGS. This piece displays frosty devices against shimmering, brilliant fields. The only mentionable abrasions are a few light grazes in the left obverse field.  
*Ex: Denver Signature (Heritage, 8/2006), lot 2818, which realized \$6,037.50.*  
*From The East End Collection.* NGC ID# AP7P, PCGS# 133876 Base PCGS# 7108

1880-CC Morgan Dollar, MS67  
Registry Grade Example

- 3125 1880-CC 8 Over Low 7, VAM-6, MS67 NGC.** A Top 100 Variety. This third reverse variety shows die filling within the interior spaces of the first 8, and clear evidence of a 7 beneath the second 8. The reverse has tiny die artifacts inside each C of the mintmark. Numerous overdate varieties of the 1880-CC Morgan dollars are known, having varying degrees of rarity. Both sides of this highly lustrous Morgan dollar are untuned with brilliant, frosty mint luster. The strike is bold with strong hair definition over Liberty's ear. A few tiny luster breaks and trivial marks are consistent with the grade of this splendid Superb Gem. As of (6/18), the VAM-6 NGC Census is 3 in MS66 with none finer.  
*Ex: Long Beach Signature (Heritage, 2/2012), lot 4165, realized \$12,650; FUN Signature (Heritage, 1/2015), lot 5902, realized \$9,400.* NGC ID# 2542, PCGS# 133878 Base PCGS# 7104

1880-CC Dollar, MS65 Deep Mirror Prooflike  
Cameo Contrast, Older PCGS Holder

- 3126 1880-CC MS65 Deep Mirror Prooflike PCGS.** Non-overdate Deep Mirror Prooflike examples of this Carson City issue are rarely offered in Gem condition. This piece displays mirrored fields and frosty devices. Neither side is toned and the strike is sharp. Only a few light marks on Liberty's cheek prevent a finer grade. Housed in a green label holder. Population: 23 in 65 (1 in 65+) Deep Mirror Prooflike, 2 finer (5/18).  
*Ex: Dallas Signature (Heritage, 11/2005), lot 3089, which realized \$5,175.*  
**From The East End Collection.** NGC ID# 2542, PCGS# 97101

1880-O Dollar, A Rare Gem  
Only One Coin Graded Finer

- 3127 1880-O MS65 PCGS.** The 1880-O silver dollar was well represented in the Treasury releases of the early 1960s, but almost the entire Mint State population exhibits bagmarks and other abrasions to the detriment of numeric grade. The 1880-O is a rarity in MS65 and nearly unknown finer. Its reputation as a condition rarity is prominent among Morgan dollar collectors, and the elusiveness of Gems at auction supports the perception of this issue's conditional rarity.

This piece is remarkably clean even for the Gem grade level, showing only a few microscopic marks beneath a loupe. The eagle's breast and the hair above Liberty's ear exhibit uncommon sharpness for a New Orleans product, and both sides showcase brilliant, softly frosted mint luster. Population: 48 in 65 (4 in 65+), 1 finer (5/18).

*Ex: Dallas Signature (Heritage, 10/2006), lot 1316, which realized \$27,600.*

**From The East End Collection.** NGC ID# 2543, PCGS# 7114

1881-CC Dollar, Frosty MS67  
Seldom Offered So Fine

- 3128 1881-CC MS67 PCGS. CAC.** Although distributed as part of the GSA release in fewer numbers than subsequent Carson City issues, the 1881-CC remains an accessible date through Superb Gem condition. Seldom are such coins offered with CAC approval, however, and finer representatives are rare. Devoid of color and nearly mark-free, this strong Carson City dollar is thickly frosted and boasts great visual appeal. There are four finer submissions at PCGS, and one at CAC (6/18).

**From The East End Collection.** NGC ID# 2549, PCGS# 7126

1881-O Dollar, MS66  
Exceptionally Bold and Vibrant

**3129 1881-O MS66 PCGS.** This brilliant piece is well-struck and nearly abrasion-free, save for a reeding mark on the eagle's breast and a single tick on Liberty's cheek. There is minimal contrast between the fields and devices, but the vibrant satin mint luster is far better than usually seen on this issue. The hair over the ear is especially well-detailed for a New Orleans dollar. Population: 50 in 66 (5 in 66+), 0 finer (6/18).

*Ex: Dallas Signature (Heritage, 10/2006), lot 1349, where it realized \$23,000.00.*

**From The East End Collection.** NGC ID# 2548, PCGS# 7128

1882 Morgan Dollar, MS67  
Registry Set Contender

**3131 1882 MS67 NGC.** The 1882 Philadelphia Morgan dollar's availability begins to peter out rather quickly on the topside of MS65. MS66 examples are scarce and Superb Gems are genuinely rare. This magnificent example deserves the utmost attention. The strike is razor-sharp, and the unabraded surfaces yield vibrant, cartwheel mint luster with a thick, frosty texture. The interiors show a faint glimpse of champagne color, surrounded by a halo of deeper gold at the rims. Undeniably a rare and important opportunity for the Morgan dollar collector. Census: 10 in 67 (1 in 67 ★), 0 finer (5/18). NGC ID# 254A, PCGS# 7132

1881-S Dollar, MS68  
Essentially Flawless

**3130 1881-S MS68 PCGS.** As collectible as the 1881-S is through the highest reaches of Mint State, it is always a delight to encounter an example in this remarkable grade. Both sides are as flawless as a modern Silver Eagle with swirling mint frost and radiant brilliance. Strike definition is full throughout. PCGS reports only two finer examples (6/18).

**From The East End Collection.** NGC ID# 2549, PCGS# 7130

1882-CC Dollar, Brilliant MS67  
Elusive This Fine

**3132 1882-CC MS67 PCGS.** More than 600,000 1882-CC dollars were disbursed through the General Services Administration sales of the 1970s, comprising more than half of this issue's total mintage. Uncirculated examples are plentiful, and the 1882-CC is among the most readily available dates in the Carson City Morgan dollar set. Nonetheless, Superb Gems are conditionally scarce, as GSA coins are notorious for bagmarks. This piece is sharp, frosty, and brilliant, showing a virtually perfect cheek and faintly reflective fields. Population: 93 in 67 (3 in 67+), 1 finer; 1 in 67 Prooflike, 0 finer; 1 in 67 Deep Mirror Prooflike, 0 finer (5/18).

*Ex: Dallas Signature (Heritage, 11/2006), lot 1248, which realized \$8,625.*

**From The East End Collection.** NGC ID# 254S, PCGS# 7134

**1884-S Silver Dollar, MS63**  
Noted Conditional Rarity

- 3133 1884-S MS63 PCGS.** San Francisco Morgan dollars dated through 1882 are common, even in Gem Mint State. Many such pieces were saved in Treasury vaults for decades. The 1883-S Morgan dollar is much scarcer in better grades than its West Coast predecessors, and the 1884-S is yet rarer in Mint State, despite a mintage of 3.2 million pieces. Many survivors are lightly circulated, and dealer speculation is that a bag or two of '84-S dollars was opened at a Nevada casino for one night's action, prior to the mid-1960s hoarding of silver coin. Many '84-S dollars exhibit cartwheel luster but show a hint of wear on the eagle's breast. The present Select example is both lustrous and unworn. The stone-white surfaces are surprisingly unabraded. Population: 55 in 63 (4 in 63+), 15 finer (5/18).  
*From The East End Collection.* NGC ID# 254P, PCGS# 7156

**1885-CC Dollar, MS67**  
Exceptional Brilliant Luster

- 3134 1885-CC MS67 NGC.** The GSA hoard included 130,823 Uncirculated 1885-CC Morgan dollars. However, only a couple hundred examples are known in this high grade, and only a handful are graded finer. A single tick on the cheek and another on the breast are the only bagmarks on either side. Brightly frosted surfaces remain completely brilliant and exhibit a pinpoint impression. Faint roller marks appear on the chin. NCG reports five finer submissions (6/18).  
*From The East End Collection.* NGC ID# 254S, PCGS# 7160

**1885-O Morgan Dollar, MS68**  
Registry Grade Example

- 3135 1885-O MS68 NGC.** From a large mintage of more than 9 million pieces, this magnificent MS68 Morgan dollar is one of the finest survivors. The virtually pristine surfaces exhibit vibrant mint luster on both sides and show just a hint of golden-tan toning. The design elements display razor-sharp definition throughout and eye appeal is terrific. Census: 11 in 68 (1 in 68 ★), 0 finer (6/18).  
*Ex: Long Beach Signature (5-6/2012), where it brought \$1,535; ANA Signature (Heritage, 8/2013), lot 4404, where it realized \$1,997.50; New York Signature (Heritage, 11/2013), lot 3700, where it realized \$9,987.50.* NGC ID# 254T, PCGS# 7162

**1886-O Morgan Dollar, MS64**  
Rarely Seen Finer

- 3136 1886-O MS64 PCGS.** Despite the large mintage of 10.7 million pieces, the 1886-O Morgan dollar is a scarce issue in MS64 condition, and finer coins are rare. This attractive Choice example displays sharply detailed design elements, with a few peripheral die cracks and a grease strike-through on the reverse. The lightly marked surfaces are lustrous and appealing. PCGS has graded three numerically finer examples (6/18). NGC ID# 254W, PCGS# 7168

**1886-O Dollar, MS64**  
**Only Three Coins Graded Higher**  
**Tied for Finest With CAC Approval**

- 3137 1886-O MS64 PCGS. CAC.** Despite a mintage exceeding 10 million coins, this issue is decidedly scarce in upper Mint State grades. In fact, MS64 is the highest collectible grade for the 1886-O Morgan dollar. This example has a few light marks on the cheek and a small, shallow scrape through the eagle's right (facing) wing that limit the grade. The design elements offer an above-average impression, though minor softness is noted on the hair strands over Liberty's ear. The untuned, bright silver surfaces project an almost frosted appearance for what is normally a satiny New Orleans issue. There are only three coins graded higher, all at PCGS (6/18).  
*Ex: ANA Signature (Heritage, 4/2006), lot 1033, where it realized \$8,625.00*  
**From The East End Collection.** NGC ID# 254W, PCGS# 7168

**1887-S Morgan Dollar, MS66**  
**A Great Rarity in This Condition**

- 3138 1887-S MS66 NGC.** This vibrantly lustrous Premium Gem showcases brilliant surfaces and bold design definition. Close scrutiny is required to see any imperfections. Although many Mint State 1887-S dollars are available, some from the Treasury releases and others from the Redfield Hoard, nearly all of those coins are in low grade. Gem-quality examples have only survived as a matter of chance. Few have been certified at this grade level, and only two coins are finer. Census: 11 in 66 (1 in 66 ★), 1 finer (5/18).  
**From The East End Collection.** NGC ID# 2554, PCGS# 7180

**1888 Morgan Dollar, MS67**  
**None Finer at PCGS**

- 3139 1888 MS67 PCGS.** The generous mintage exceeding 19 million pieces ensures the ready availability of the 1888 Morgan dollar through the Premium Gem level of preservation. The issue is conditionally elusive in Superb Gem, where PCGS and NGC combined have graded about 140 pieces, and only one numerically finer (6/18). Bright luster endows the silvery surfaces that exhibit sharply struck design elements. Wonderfully preserved throughout.  
*Ex: New York Signature (Heritage, 2/2014), lot 5226, realized \$7,637.50.* NGC ID# 26KE, PCGS# 7182

**1888 Morgan Dollar, MS67**  
**Conditionally Rare This Fine**

- 3140 1888 MS67 PCGS.** The 1888 Morgan dollar, coming from a mintage exceeding 19 million business strikes, is a common date in the series, with examples easily located through the MS65 grade level. Premium Gems are scarce, however, and finer examples are rare. This Superb Gem example displays brilliant, nicely preserved surfaces. The hair above Liberty's ear and the eagle's breast feathers exhibit a modicum of detail, better than usually seen. Eye appeal is terrific. Population: 49 in 67, 0 finer (6/18).  
*Ex: New York Signature (Heritage, 11/2013), lot 3702, realized \$8,812.50.* NGC ID# 26KE, PCGS# 7182

1889-CC Silver Dollar, AU53  
Lustrous Fields

**3141 1889-CC AU53 NGC.** The key to the Carson City Morgan dollars and one of the “stoppers” in the entire series is the 1889-CC. This issue is rare in Mint State in comparison to the demand for it, and attractive AU coins are highly sought-after. This partially lustrous AU53 coin displays light golden toning and sharp detail. Trivial friction over the central devices is all that prevents a Mint State designation.

*From The East End Collection.* NGC ID# 2559, PCGS# 7190

1889-CC Dollar, Unc Details  
Rarest Carson City Issue

**3142 1889-CC — Obverse Cleaned — NGC Details. Unc.** All Carson City Morgan dollars are widely collected, but the 1889-CC is the rarest and most popular among them. The issue was struck to the famously low extent of 350,000 pieces, and much of that production, possible 325,000 examples, were later melted. Mint State 1889-CC dollars are seldom offered and are rarely within the reach of most collectors. This well-detailed representative displays a moderately subdued obverse from the noted cleaning, but the reverse is bright and frosty. Pale gold patina complements each side.

CARSON CITY MINT  
1870-1933

Carson City branch Mint was authorized by the Act of March 3, 1863. The site was donated by Abe Curry, founder of Carson City. The building, 60 by 90 feet, two stories, was built of sandstone. After two years of installing machinery, the Mint officials opened it January 8, 1870. It was closed as a coinage facility November 6, 1885, but remained as an Assay Office. Coinage operations were resumed October 1, 1889, but June 1, 1893, saw the end of coinage and a reduction to an Assay Office once more until 1933. Legislation approved May 22, 1939, authorized the sale to the state of Nevada. It is now a Museum.

1889-CC Silver Dollar, MS64  
Choice Carson City Key

**3143 1889-CC MS64 NGC. VAM-2.** Four years on, and four off — the last years of the Carson City Mint roughly followed that course, with the 1889-CC Morgan dollar and similar issues marking the midpoint.

The Carson City Mint struck 228,000 Morgan dollars in 1885 during its first couple of months. Then, on March 8, 1885, Mint Superintendent James Crawford — overweight, unable to sleep soundly, and with a “throbbing heart” — died, at age 52. The facility ceased coinage operations for four years. According to Rusty Goe in *The Mint on Carson Street*:

“Throughout 1885 the new superintendent, William Garrard, scorned by locals, supervised transfers of nearly 3.2 million silver dollars to Washington, D.C., San Francisco, and other distribution points, nearly all of which were dated 1882, 1883, 1884, and 1885.”

The dispersal of those Carson City dollars accounts for their prevalence today, coming back out of storage during the great Treasury releases (and later GSA sales) of the 1960s and 1970s.

Despite four years of dormancy and disrepair, when the Carson City Mint finally started back up in 1889, it managed to strike a respectable total of 350,000 1889-CC Morgan dollars. However, according to Goe, from 250,000 to 325,000 pieces were later melted. If true, that would leave a maximum of 100,000 and a minimum of 25,000 business strikes that were ever released to circulation.

In an earlier era other CC-mint issues were considered more elusive, but the Treasury releases finally made plain the great rarity of the 1889-CC date. The typical survivor is a cleaned VF. Among the several hundred known Uncirculated examples, MS62 is the median grade. Near-Gems are rare relative to the formidable demand from Carson City specialists.

The present brilliant Choice dollar is well-struck and exhibits sweeping cartwheel luster. The obverse shows delicate distributed contact marks, with only a small reed impression between the LI in LIBERTY of any notice. The reverse is smooth aside from an unobtrusive mark on the eagle’s breast. Housed in a circa-2000 holder, and a monumental addition to an advanced holding.

**From The East End Collection.** NGC ID# 2559, PCGS# 7190

1889-CC Dollar, MS61 Deep Mirror Prooflike  
The Key Carson City Issue

- 3144 1889-CC MS61 Deep Mirror Prooflike NGC.** After a three-year intermission, the Carson City Mint continued coinage production in 1889, striking 350,000 silver dollars and 30,945 double eagles. The silver dollar mintage was not the lowest output of Morgan dollars from that facility as 1881 and 1885 had smaller mintages. However, quantities of the 1889-CC dollars were not stored in Treasury vaults as nearly all entered circulation, and few Mint State pieces have survived. The supply of such coins is clearly smaller than the demand from thousands of Morgan dollar collectors. This piece is a pleasing Mint State example with brilliant and untoned silver surfaces. The fields are fully mirrored around lustrous devices, featuring scattered grade-consistent marks on each side. NGC ID# 2559, PCGS# 97191

1891 Dollar, MS66  
Important Condition Rarity

- 3145 1891 MS66 NGC.** The Morgan dollar specialist will be quick to recognize the importance of this opportunity. This date is seldom encountered in any quality remotely approaching the present for overall eye appeal. The surfaces are fully brilliant and highly lustrous with remarkable mint frost. The design details on both sides are nearly full. Of this issue, Dave Bowers noted: "Deeply lustrous, sharply struck pieces require cherry-picking to find." Alternatively, collectors can take advantage of this offering. Census: 3 in 66, 0 finer (6/18).  
*Ex: Long Beach Signature (Heritage, 9/2006), lot 5325, where it brought \$13,800.00.*  
**From The East End Collection.** NGC ID# 255G, PCGS# 7204

1892-CC Dollar, MS65  
Rare Any Finer

- 3146 1892-CC MS65 PCGS.** A highly lustrous example that presents radiant brilliance over each side. Boldly struck with a degree of frost over the devices and abundant eye appeal throughout. The surfaces are largely free of abrasions and show only a few shallow grazes. Scarce as a Gem. PCGS reports 36 finer submissions (6/18).  
*Ex: Long Beach Signature (Heritage, 9/2006), lot 5379, where it brought \$7,475.00.*  
**From The East End Collection.** NGC ID# 255M, PCGS# 7214

**1892-CC Morgan Dollar, MS65**  
Seldom Seen Any Finer

- 3147 1892-CC MS65 NGC.** From a mintage of 1.3 million pieces, the 1892-CC Morgan dollar can be located in MS65 condition with some patience, but finer coins are decidedly elusive. This spectacular Gem offers sharply detailed design elements and impeccably preserved brilliant surfaces, with vibrant mint luster and terrific eye appeal. NGC has graded only 15 numerically finer examples (6/18). NGC ID# 255M, PCGS# 7214

**1893-CC Morgan Dollar, MS62**  
In Demand Final-Year Issue

- 3150 1893-CC MS62 NGC.** The Carson City Mint struck a meager mintage of 677,000 Morgan dollars in 1893, its final year of coinage operations. This impressive MS62 example exhibits well-detailed design elements and lustrous, brilliant surfaces, with a scattering of minor contact marks on both sides. Some interesting die cracks and clash marks are evident as well. NGC ID# 255S, PCGS# 7222

**1892-CC Morgan Dollar, MS64**  
Deep Prooflike Specimen

- 3148 1892-CC MS64 Deep Prooflike NGC.** Higher grade Deep Mirror Prooflike dollars rank among the most attractive of all non-proof issues. This example, for instance, has fully brilliant silver surfaces with deeply mirrored fields and satiny devices that combine to create a lovely cameo appearance. Census: 17 in 64 Deep Mirror Prooflike, 1 finer (6/18).  
*Ex: Baltimore Signature (Heritage, 3/2009), lot 1418, realized \$4,025.*  
NGC ID# 255M, PCGS# 97215

**1893-CC Morgan Dollar, MS63**  
Reflective Fields

- 3151 1893-CC MS63 PCGS.** The 1893-CC Morgan dollar is a low-mintage, final-year issue from the celebrated Carson City Mint. This distinctive Select example features lightly marked surfaces, with much prooflike reflectivity in the fields. The design elements are shallowly struck in the centers, suggesting this coin might be some kind of setup piece. The die spacing might have been slightly too wide for such a trial piece, and the freshly polished dies would account for the reflective fields. In any case, this coin is an interesting memento of a colorful period in Western history. NGC ID# 255S, PCGS# 7222

**1892-S Dollar, Lustrous AU58**  
A Major Rarity in Mint Condition

- 3149 1892-S AU58 NGC.** The 1892-S is famously the second-rarest Morgan dollar in Mint State, trailing only the 1893-S. Although 1.2 million pieces were struck, this issue was released into circulation in quantity, and few Uncirculated coins survive. The surfaces of this near-Mint example are satiny and lustrous, showing limited abrasions. Trivial strike softness and mild high-point friction appear on the eagle's breast and the hair above Liberty's ear. This is a coin that will fit in well with an otherwise Mint State Morgan dollar collection.  
*From The East End Collection.* NGC ID# 255P, PCGS# 7218

1893-CC VAM-5 Dollar, MS64  
Sharply Struck, Unmarked Fields

**3152 1893-CC MS64 PCGS. VAM-5.** 1893 is a challenging date to collect regardless of issue. The Carson City facility was downgraded to Assay Office status that year, and the mintage of 677,000 silver dollars proved to be its last. Only a single example (graded XF40 by NGC) emerged from the GSA holdings, thus nice Mint State examples are elusive when compared with consistent demand. Most Uncirculated '93-CC dollars have softly struck centers and lack eye appeal. This crisply struck and brilliant near-Gem possesses practically pristine fields, and the portrait shows only moderate contact. According to VAMworld.com, the pick-up points for VAM-5 are "several horizontal die scratches below [the] lower right hair vee." In addition, the front of Liberty's eye is minutely die doubled.

*From The East End Collection.* NGC ID# 255S, PCGS# 7222

1893-O Silver Dollar, MS64  
Green Label Holder

**3153 1893-O MS64 PCGS.** It is well-known that the 1893-O is the lowest mintage New Orleans Morgan issue. Most survivors are in circulated grades. Gems are of the highest rarity, which makes Choice examples the finest available to the advanced collector. This lustrous and practically brilliant near-Gem has an exceptionally smooth cheek. The fields also display only minor marks. The centers are lightly brought up, which may be all that limits the grade. Housed in a green label holder. Population: 94 in 64 (4 in 64+), 6 finer (5/18).

*Ex: FUN Signature (Heritage, 1/2006), lot 3329; Palm Beach Signature (Heritage, 3/2006), lot 1214, which realized \$18,400.*

*From The East End Collection.* NGC ID# 255T, PCGS# 7224

1893-S Dollar, AU53  
High-End Problem-Free Example

**3154 1893-S AU53 NGC.** The lowest circulation-strike mintage in the long-running Morgan dollar series is claimed by the 1893-S with 100,000 coins. There are issues that are rarer in high grades, and others, like the 1895 that are only known in proof format, but this San Francisco dollar is a key date across all grade levels and enjoys a certain cachet that other entries in the series do not.

This high-end AU53 example is far better than the typical VF representative. The motifs are strongly defined aside from trivial rub on the cheek, central hair strands, and the eagle's breast. Bright silver surfaces display faint hints of tan-gold. Peppered abrasions are generally shallow, and none distract. NGC ID# 255U, PCGS# 7226

1894 Morgan Dollar, MS63  
Low-Mintage Philadelphia Issue

**3155 1894 MS63 PCGS.** The 1894 Morgan dollar is always in demand, due to its low mintage of 110,000 pieces. This attractive Select specimen is sharply detailed in most areas, with just the slightest trace of blending on the hair strands above the ear. The lightly marked creamy surfaces radiate vibrant mint luster with outstanding eye appeal. NGC ID# 255V, PCGS# 7228

1894 Silver Dollar, MS64  
The Rarest Philadelphia Circulation Issue

**3156 1894 MS64 PCGS.** Completely brilliant and lustrous with a sharp strike and a relatively clean cheek. This choice 1894 dollar is well-preserved, save for a few faint grazes in the left obverse field that prevent Gem classification. The Philadelphia Mint struck only 110,000 silver dollars for circulation in 1894. This is the second-lowest mintage in the series. PCGS lists only 31 finer representatives (5/18).

*Ex: Dallas Signature (Heritage, 7/2006), lot 2935, which realized \$10,350.*

*From The East End Collection. NGC ID# 255V, PCGS# 7228*

1894 Morgan Dollar, MS64  
Rare in Higher Grades

**3157 1894 MS64 PCGS Secure.** The radiantly lustrous surfaces of this near-Gem display traces of light gold toning, which is more pronounced on the reverse. The coin is generally well-struck, including partial delineation on the hair over Liberty's ear. Some minute obverse marks deny full Gem status, although this coin would be out of reach for most collectors in that grade.

*Ex: Houston Signature (Heritage, 12/2008), lot 3127, which realized \$6,325. NGC ID# 255V, PCGS# 7228*

1894-O Dollar, MS64  
Rare in Finer Grades

**3158 1894-O MS64 PCGS.** The 1894-O Morgan dollar is only available to the majority of collectors through MS64. PCGS lists only 13 Gems that are finer (6/18), and the Prooflike/Deep Mirror Prooflike population is so small it is insignificant in the overall availability of the issue. This near-Gem non-Prooflike coin displays brilliant, frosty luster and minimal abrasions for the grade. Minor strike softness occurs on the hair above Liberty's ear and the eagle's breast. NGC ID# 255W, PCGS# 7230

1894-O Dollar, Bright MS64  
Few Pieces Known Finer

- 3159 1894-O MS64 PCGS.** Barely a handful of 1894-O dollars are known in Prooflike and Deep Mirror Prooflike grades, leaving high-end non-Prooflike coins as the finest option for collectors. This New Orleans semikey is moderately elusive in MS64 but is collectible at this level. The current coin displays bright satin luster and brilliant surfaces with the usual central strike softness. PCGS lists only 13 finer representatives (5/18).  
*From The East End Collection.* NGC ID# 255W, PCGS# 7230

1894-S Morgan, Eye-Appealing MS65  
High-End and Scarce

- 3160 1894-S MS65 PCGS.** A hint of field reflectivity adds to the eye appeal of this already well-preserved and attractive Gem. Trivial softness occurs above Liberty's ear, but the sharpness is above average for the 1894-S Morgan dollar. Both sides are brilliant and devoid of mentionable abrasions. PCGS lists only 18 higher-grade examples of this semikey San Francisco issue (5/18).  
*From The East End Collection.* NGC ID# 255X, PCGS# 7232

1895-O Dollar, MS62  
Conditionally Rare  
Low-Mintage Semikey

- 3161 1895-O MS62 NGC.** The year 1895 is famous in the Morgan dollar series, with no known Philadelphia circulation strikes and only small quantities produced at the New Orleans and San Francisco branch mints. Specifically, just 450,000 silver dollars were manufactured in Louisiana. About 100,000 coins were placed into circulation. The rest were held in storage, and most were later melted. Consequently, the 1895-O is one of the rarest O-mint dollars in Uncirculated condition.

This MS62 representative is more frosty than satiny, featuring shimmering luster over bright, largely untuned surfaces. The borders show accents of reddish-gold patina that add to the eye appeal. Strike detail is surprisingly good (the issue is infamous for its poor definition), and there are minimal marks for the technical assessment. Census: 22 in 62 (2 in 62+), 30 finer (6/18). NGC ID# 255Y, PCGS# 7236

**1895-S Morgan, Nearly Prooflike MS64  
A Rare Date in Finer Grades**

**3162 1895-S MS64 PCGS.** Only 400,000 silver dollars were struck at San Francisco in 1895, creating a semikey date in the Morgan series. Choice examples are collectible, but Gems are rarely offered. This near-Gem displays pleasing preservation and brilliant surfaces with nearly full prooflike mirroring in the fields on both sides. Minor strike softness is seen on the eagle's breast and immediately above Liberty's ear, as usual for the issue.

*From The East End Collection.* NGC ID# 255Z, PCGS# 7238

**1896-O Morgan Dollar, MS63  
Seldom Seen Finer**

**3164 1896-O MS63 PCGS.** The 1896-O Morgan dollar is one of the most challenging dates of the series to locate in high grade. This impressive MS63 example offers well-detailed design elements, with the often-seen touch of softness above Liberty's ear. The surfaces are blanketed in shades of gray, gold, and lavender toning, with satiny mint luster underneath. PCGS has graded 33 numerically finer examples (6/18).

*Ex: Long Beach Signature (Heritage, 5/2012), lot 4408, realized \$4,887.50. NGC ID# 27ZU, PCGS# 7242*

**1896-O Morgan Dollar, MS63  
Satiny Cartwheel Luster**

**3163 1896-O MS63 PCGS.** The 1896-O dollar has a reputation for being poorly struck with unattractive luster. This Select example is above average in both regards, showing satiny cartwheel luster and well-defined centers. A thin ring of yellow-gold luster surrounds the extreme outer periphery of this otherwise brilliant and only lightly marked 1896-O silver dollar. PCGS lists only 33 finer coins, all non-Prooflike (5/18).

*Ex: Denver Signature (Heritage, 8/2006), lot 2714, which realized \$6,900.*

*From The East End Collection.* NGC ID# 27ZU, PCGS# 7242

**1896-S/S Morgan Dollar, MS65  
Repunched Mintmark, A Hot 50 Variety**

**3165 1896-S/S VAM-5 MS65 PCGS.** A Hot 50 Variety. The mintmark is repunched north of the primary, with the lower loop of the secondary mintmark plainly visible. The 1896-S as a whole is scarce in Gem condition and rare finer. This piece earns the MS65 designation on grounds of pure surface preservation, showing bright, brilliant luster and no distracting marks. The usual strike softness is noted on the central high points. Population: 74 in 65 (5 in 65+), 5 finer; 1 in 65 Prooflike, 1 finer (5/18).

*From The East End Collection.* NGC ID# 2564, PCGS# 134022 Base PCGS# 7244

1897-O Dollar, MS64  
Upper-End for the Issue  
Conditionally Rare

**3166 1897-O MS64 PCGS.** The Philadelphia and San Francisco issues of 1897 are plentiful in high grade, but the New Orleans counterpart is generally only available through MS63. Choice coins such as the present are scarce, and finer pieces are out of reach for most collectors. A number of the Uncirculated coins known today came out the Treasury in the 1950s and 1960s, but almost none of these survive in high grade, having already acquired numerous bagmarks by the time they fell into collectors' hands. This near-Gem is high-end for the issue, and its brilliant, softly frosted luster is more appealing than what is seen on many other 1897-O dollars. Central strike sharpness is above average for the issue. Population: 41 in 64 (2 in 64+), 14 finer; 2 in 64 Deep Mirror Prooflike, 0 finer (5/18).

*From The East End Collection.* NGC ID# 2565, PCGS# 7248

1899-O VAM-4 Silver Dollar, MS62  
Micro O Mintmark

**3167 1899-O Micro O MS62 PCGS Secure. VAM-4.** A Top 100 Variety. There are five different VAM numbers assigned to 1899-O silver dollar varieties that are called Micro O pieces. A die line in the central tail feather and peripheral reverse die cracks identify the VAM-4 die pair that has an extremely small O mintmark leaning sharply to the right. Delicate gold toning visits the obverse border and appears over much of the reverse, with satiny silver luster on both sides. NGC ID# 256C, PCGS# 87260 Base PCGS# 87260

1900 Morgan Dollar, MS67  
Registry Grade Specimen

**3168 1900 MS67 NGC.** Tens of thousands of 1900 Morgan dollars have been certified through MS65. The population drops precipitously at the MS66 level, but even these can be located with concentrated searching. On the other hand, fewer than 120 Superb Gems have been graded at NGC and PCGS combined, and none are numerically finer (6/18). Strong mint luster adorns both sides of this MS67 example, with whispers of electric-blue, lavender, and orange-gold clinging to the margins. The design features are well brought up, including the eagle's breast feathers that are usually weak. Only the hair over the ear is a tad soft. Census: 49 in 67 (2 in 67+), 0 finer (5/18).

*Ex: FUN Signature (Heritage, 1/2012), lot 7249, where it brought \$6,325; November Signature (Heritage, 11/2013), lot 3753, where it realized \$7,637.50.* NGC ID# 256E, PCGS# 7264

1901 Morgan Dollar, MS63  
Famous Condition Key

**3169 1901 MS63 PCGS.** Satiny luster is virtually brilliant as it illuminates surprisingly few abrasions for the grade. This Select 1901 Morgan dollar has only light surface scuffs that are visible beneath a loupe, and the reverse shows a few marks on the eagle's breast. The central strike sharpness is a trifle weak, as normal for the issue. The 1901 Morgan dollar is a famous condition rarity in MS64 and finer grades, but in this condition is collectible for a price. The Pittman Act melts in 1918 and the following years are usually blamed for the low survivorship of this issue, although quantities of the date were also distributed into circulation. PCGS lists only 39 coins in higher grades than the present (5/18).

*From The East End Collection.* NGC ID# 256J, PCGS# 7272

1901 Morgan Dollar, MS64  
Rare Any Finer

**3170 1901 MS64 NGC.** The 1901 P-mint Morgan dollar's reputation precedes it: Lots of well-circulated coins around worth only slight premiums, with even strictly graded AU coins difficult to find, high-grade Mint State specimens downright rare, and an issue that is usually challenged both in terms of strike and luster.

This near-Gem piece will please on all counts. Bright, satiny luster radiates from each side, with light gray-lilac toning abundant throughout. The color is more mottled on the reverse, more even on the obverse. The obverse is sharply struck, displaying near-complete definition on the hair over the ear, but the reverse is somewhat weakly struck on the eagle's central breast feathers. A few obvious marks explain the grade: a couple near the jawline and neck of Liberty, and on the eagle's left (facing) wing. Census: 17 in 64, 3 finer (5/18).

*Ex: Long Beach Signature (Heritage, 2/2011), lot 4006, realized \$25,300.* NGC ID# 256J, PCGS# 7272

1901-S Morgan Dollar, MS66  
Better San Francisco Mint Issue

- 3171 1901-S MS66 PCGS.** From a mintage of less than 2.3 million pieces, the 1901-S Morgan dollar was not present in the Redfield Hoard and relatively few examples were included in the Treasury releases of the 1960s. As a result, the issue is elusive in high grade today. This impressive MS66 specimen offers well-detailed design elements, with some faint parallel striations on the obverse (seen on many examples of this issue). The well-preserved brilliant surfaces radiate vibrant mint luster. Population: 39 in 66 (5 in 66+), 3 finer (6/18). NGC ID# 256L, PCGS# 7276

1902-S Morgan, MS66  
Outstanding Surface Quality

- 3172 1902-S MS66 PCGS.** PCGS lists no Prooflike or Deep Mirror Prooflike examples of the 1902-S dollar above MS65, and non-Prooflike pieces are scarce in this condition. This Premium Gem is brilliant and unabraded with well-struck centers. Appreciable reflectivity is apparent in the fields, although the mirror quality needed for a Prooflike designation is lacking. Population: 56 in 66 (8 in 66+), 4 finer (5/18).  
*From The East End Collection.* NGC ID# 256P, PCGS# 7282

1902-S Morgan Dollar, MS66  
Condition Rarity in Finer Grades

- 3173 1902-S MS66 PCGS.** The 1902-S Morgan had a moderately low mintage of little more than 1.5 million pieces, and survivors are proportionately elusive in the finer Mint State grades. This piece exhibits a thin ring of lemon-gold peripheral toning, though the surfaces are otherwise brilliant. Semiprooflike reflectivity in the fields complements satiny devices, though the central design elements show a touch of the usual softness. Population: 56 in 66 (8 in 66+), 4 finer (6/18).  
*Ex: Long Beach Signature (Heritage, 9/2014), lot 3307, realized \$6,462.50.* NGC ID# 256P, PCGS# 7282

1903-S Dollar, Satiny MS64  
Upper-End for the Grade

- 3174 1903-S MS64 PCGS.** The 1903-S is a semikey Morgan dollar, especially among 20th century issues, although examples are usually available for a price in grades below MS65. This collectible but moderately high-end Choice example displays good central sharpness and satiny, untuned mint luster. Only a few unobtrusive marks are seen beneath a loupe.  
*From The East End Collection.* NGC ID# 256T, PCGS# 7288

1903-S Morgan, MS65  
A High-End Example

- 3175 1903-S MS65 PCGS.** MS65 is the finest grade in which the 1903-S dollar is typically available, as finer pieces are out of reach for most collectors. This Gem is well-struck and satiny, showing a relatively clean cheek and fields. A couple of marks are seen on the eagle's breast. PCGS lists 52 finer coins, all non-Prooflike (5/18).  
*From The East End Collection.* NGC ID# 256T, PCGS# 7288

1904-S Morgan Dollar, MS64  
Better Late-Series Issue

- 3176 1904-S MS64 PCGS.** Among 20th century issues, the 1904-S is challenging in high grade. Choice coins are occasionally seen, but higher-grade examples are scarce. This piece is brilliant and vibrantly lustrous. A few marks in the field near Liberty's nose limit the grade but are not particularly distracting without a loupe. NGC ID# 256W, PCGS# 7294

1904-S Dollar, MS65  
Seldom Offered Finer

- 3177 1904-S MS65 PCGS.** Most of the design elements are fully detailed, although the hair strands over the ear and the eagle's breast each show slight weakness as usual. The surfaces of this satiny Gem are brilliant and lustrous. The 1904-S dollar is an elusive issue in high grade. PCGS lists 19 finer non-Prooflike coins (5/18).  
*Ex: Central States Signature (Heritage, 4/2006), lot 3790, which realized \$7,475.*  
**From The East End Collection.** NGC ID# 256W, PCGS# 7294

1921 Morgan Dollar, MS67  
Frosty and Brilliant  
Among the Finest Certified

- 3178 1921 MS67 NGC.** The most plentiful issue in the series, the 1921 Morgan dollar becomes conditionally rare in MS67 and is unknown finer. This piece is frosty, brilliant, and beautifully preserved. Eye appeal is outstanding. On the reverse, strike softness is seen as usual on the eagle's breast and legs, and on the lower wreath, but the obverse is better-defined. Preservation is exceptional. Census: 13 in 67 (1 in 67 ★), 0 finer; 1 in 67 Prooflike, 0 finer (5/18).  
**From The East End Collection.** NGC ID# 256X, PCGS# 7296

PROOF MORGAN DOLLARS

1879 Morgan Dollar, PR67 Cameo  
Astonishing Quality

- 3179 1879 PR67 Cameo NGC.** NGC has certified no Ultra Cameo examples of the 1879 proof Morgan, and high-end Cameos are rare. This Superb Gem showcases stark contrast and frosty devices, and the mirrored fields are free of noticeable hairlines. Traces of light golden toning grace each side, mainly around the borders, and the central devices are sharp.

Mint records indicate a coinage 1,100 proof Morgan dollars in 1879, although Breen once suggested that the reported figure included 1878 coins, and that 1879 proof production amounted to only 750 pieces, 100 of which were melted as unsold. Given the survivorship of this issue overall, the Mint record of 1,100 pieces is generally believed to be accurate, although coins in Superb Gem Cameo condition are difficult to locate today. Census: 14 in 67 Cameo (1 in 67+), 5 finer (5/18).

**From The East End Collection.** NGC ID# 27Z2, PCGS# 87314

1880 Silver Dollar, PR65  
Ex: Heifetz Collection

**3180 1880 PR65 PCGS. VAM-13.** Rich blue, gold, and lavender toning encompasses this fully struck and magnificent Gem. The motifs display mint frost, though it is partially concealed by the colorful patina. The reverse is die doubled, most noticeably on ONE. Formerly in the collection of acclaimed violinist Jascha Heifetz. Housed in a first-generation "rattler" holder.  
Ex: Auction '84 (*Stack's*, 7/1984), lot 1244; *Jascha Heifetz Collection* (*Superior*, 10/1989), part of lot 3400. NGC ID# 27Z4, PCGS# 7315

1880 Silver Dollar, PR68 Cameo  
White-On-Black Contrast

**3181 1880 PR68 Cameo NGC. VAM-13.** With a mintage of 1,355 pieces, the 1880 is the Morgan dollar with the highest proof production figure. That year was the peak of collector interest in the proof-only Trade dollars. David Bowers, in his 1993 *Silver Dollar and Trade Dollars of the United States*, writes that many 1880 proofs still survive today, the majority of which have been cleaned or are in lower proof grades. Today, most of the 1880 Cameo pieces certified by NGC and PCGS fall into the PR64 to PR66 grade levels. They become more difficult to acquire in Superb Gem proof Cameo, and are virtually unobtainable any finer than the present piece, which reveals stunning field-device contrast. The surfaces are essentially white, save for the slightest hint of color at portions of the rims. Both sides are remarkably well-preserved. The strike is close to full, including sharp delineation on the hair over Liberty's ear and on the eagle's breast feathers. This coin possesses tremendous technical and aesthetic quality, and as such is bound to attract generous bids. Census: 16 in 68 Cameo (3 in 68 ★), 1 finer (5/18).  
Ex: *Dallas Signature* (*Heritage*, 11/2005), lot 2335, which realized \$25,300.  
**From The East End Collection.** NGC ID# 27Z4, PCGS# 87315

1881 Morgan Dollar, PR67 Cameo  
Blatant Contrast, Outstanding Eye Appeal

- 3182 1881 PR67 Cameo NGC.** An expectedly pinpoint-sharp strike and blatant Cameo contrast deliver outstanding eye appeal. Although most observers would simply consider this piece to be fully brilliant, a hint of gold color occasionally graces the borders. This marvelously preserved Superb Gem proof has a whisper of struck-in grease, as made, near the C in AMERICA. Just 984 proofs were issued, a figure slightly greater than the proof-only Trade dollar of the same date. Census: 10 in 67 Cameo (1 in 67+, 1 in 67 ★), 8 finer (6/18).

*Ex: Dallas Signature (Heritage, 11/2005), lot 2336, where it realized \$12,650.00.*

**From The East End Collection.** NGC ID# 27Z5, PCGS# 87316

1886 Morgan Dollar, PR66  
Subtle Contrast on Both Sides

- 3183 1886 PR66 PCGS Secure.** The proof 1886 Morgan dollar is a rarity in Premium Gem condition, with or without cameo contrast. In *A Guide Book of Morgan Silver Dollars*, fifth edition, Q. David Bowers writes: "Nice 1886 Proof dollars exist, but they are harder to find than certain other dates..." This piece displays a full strike and modest contrast, but dusky golden toning prevents a Cameo designation from PCGS. Population: 12 in 66, 5 finer; 6 in 66 Cameo, 3 finer; 0 in 66 Deep Cameo, 2 finer (6/18). NGC ID# 27ZF, PCGS# 7321

1890 Silver Dollar, PR66 Cameo  
Delicate Golden Toning

- 3184 1890 PR66 Cameo NGC.** Fully struck devices exhibit frosty luster and show no marks, and the liquidlike fields are equally well-preserved. Golden border toning frames brilliant interiors, complementing the cameo contrast. A mere 590 proof Morgan dollars were struck in 1890, fewer than for any other proof date in the series. Census: 22 in 66 Cameo (1 in 66+), 19 finer; 4 in 66 (1 in 66+) Ultra Cameo, 6 finer (5/18).

*Ex: Long Beach Signature (Heritage, 9/2006), lot 2545, which realized \$4,312.50; Dallas Signature (Heritage, 11/2006), lot 1520, which realized \$6,037.50.*

**From The East End Collection.** NGC ID# 27ZK, PCGS# 87325

1891 Dollar, PR65 Cameo  
Elusive With Stark Contrast

- 3185 1891 PR65 Cameo NGC.** Proof Morgan dollar coinage in 1891 amounted to only 650 coins, delivered on a more or less quarterly basis in March (240), June (110), September (100), and November (200). This issue is relatively scarce in Cameo grades. Sharp, frosty devices and mirrored fields adorn this Gem, providing excellent field-motif contrast. A hint of yellow-gold toning appears only around the outer peripheries. Census: 14 in 65 Cameo (1 in 65 ★), 34 finer (including a pair of Ultra Cameos) (5/18).  
Ex: Dallas Signature (Heritage, 7/2006), lot 3008, which realized \$5,865.  
From The East End Collection. NGC ID# 27ZL, PCGS# 87326

1892 Morgan Dollar, PR67 Cameo  
Icy Motifs, Glassy Fields

- 3186 1892 PR67 Cameo NGC.** Collector interest in the new Barber dime, quarter, and half dollar led to increased proof set sales in 1892. Proof silver dollars from that year are always available for a price in PR61 through PR64, but high-grade specimens with profound two-sided cameo contrast are rare. The present fully struck pearl-white Superb Gem has strong claims to an Ultra Cameo designation. The surfaces are immaculate, and exhibit outstanding eye appeal. Census: 17 in 67 Cameo (3 in 67 ★), 3 in 68 Cameo, 1 in 68 ★ Cameo, 2 in 67 Ultra Cameo, 1 in 68 Ultra Cameo, 1 in 68 ★ Ultra Cameo (5/18).  
From The East End Collection. NGC ID# 27ZM, PCGS# 87327

1894 Dollar, High-End PR67  
Modest Field-Motif Contrast

- 3187 1894 PR67 NGC.** Superb Gem proof 1894 dollars are scarce, and pieces grading finer than the present are genuine rarities. This coin displays a full strike with soft frost over the devices. The fields are deeply mirrored, and subtle cameo contrast is apparent on both sides, even though not recognized on the holder. A trace of light golden border toning frames each side. Census: 24 in 67 (1 in 67 ★, 1 in 67+ ★), 10 finer; 23 in 67 (3 in 67 ★) Cameo, 6 finer; 1 in 67 (1 in 67+) Ultra Cameo, 0 finer (5/18).  
From The East End Collection. NGC ID# 2577, PCGS# 7329

1895 Morgan Dollar, PR63  
Date Only Known in Proof Format

**3188 1895 PR63 PCGS Secure.** Deposits of silver at the United States Mint declined in 1895 from much higher levels the year before. The most significant deposits of this precious metal came from crude and refined bullion, worn domestic coinage, foreign bullion, and “Jewelers’ bars, old plate, etc.” Smaller amounts came from foreign coinage and a few hundred Trade dollars, the latter of which had been out of production in any official capacity since 1883. The lower silver deposits reflected normal business for the Mint in 1895, not inflated by legislative demands such as the Bland-Allison Act of 1878 or the Sherman Silver Purchase Act of 1890. The *Mint Director’s Annual Report* of 1895 stated:

“Since November 1, 1893, the date of the repeal of the purchasing clause of the act of July 14, 1890, the purchase of silver bullion by the Government has been restricted to the silver contained in gold deposits, small fractions of silver for return in fine bars, the amount retained in payment for charges, surplus silver bullion returned by the operative officers of the mints on the annual settlement of their accounts at the close of the fiscal year, and uncurrent and mutilated domestic silver coin...”

The result was a significant drop-off in silver dollar production that began in 1893 and continued through 1895. In the latter year, the two operating branch mints at New Orleans and San Francisco struck just 450,000 and 400,000 dollars, respectively. The Philadelphia Mint, according to a Mint report, struck only 12,000 coins for circulation, plus 880 proofs for collectors. While the branch mint productions are uncontested, the 12,000-coin mintage at Philadelphia has been the subject of debate that will likely never be fully resolved. One school of thought is that the small mintage was an accounting error and actually referred to 1894-dated coins, with only 880 proofs actually struck bearing the 1895 date. The other theory suggests that the 12,000 circulation strikes were destroyed at the Mint, possibly as late as the 1918 Pittman Act melts. Both scenarios arrive at the same conclusion: The 1895 Morgan dollar is known today only in proof format.

This Select example is deeply mirrored and subtly contrasted, showing a pale golden-gray hue overall. Under a loupe, small tinges of red, green, and violet color are visible around the outer peripheries. A few grade-limiting lines in the fields are hardly noticeable to the unaided eye. An outstanding collector-grade example of the rarest date and mintmark combination in the Morgan dollar series. NGC ID# 27ZR, PCGS# 7330

1895 Dollar, PR62 Cameo  
Among the 100 Greatest U.S. Coins

**3189** 1895 PR62 Cameo NGC. The "King of the Morgan Dollars" is ranked 30th on Jeff Garrett and Run Guth's most recent listing of the *100 Greatest U.S. Coins* (2015) just behind the 1870-S Seated Liberty dollar and ahead of the 1854-S presentation strike double eagle. The legend of the 1895 dollar is well-known. Mint records show 12,000 circulation strikes were produced, but none have ever surfaced and that total is now widely believed to be an accounting error. The only option available to collectors are surviving examples of the 880 proofs struck that year, but they are exceedingly scarce relative to the demand for them from the tens of thousands of active Morgan dollar specialists.

This PR62 example boasts seldom-seen Cameo contrast enhanced by the near-complete lack of toning. There are occasional golden accents near the rims, but the centers remain brilliant. Flashy and reflective fields exhibit myriad wispy lines that limit the grade. An excellent example of this famous rarity. NGC ID# 27ZR, PCGS# 87330

1895 Silver Dollar, PR63 Cameo  
Attractive Border Toning and Contrast  
Rare Among Morgan Dollars

**3190 1895 PR63 Cameo PCGS Secure.** From 1878 through much of 1893, silver dollar coinage was fueled by congressional legislation, not commercial need. By November 1, 1895, the Treasury had more than 342 million silver dollars on hand, backing certificates outstanding, and another 22 million-plus coins in excess of certificates. Only a little more than 58 million pieces were in circulation.

In July 1895, the three operating mints and Carson City (not operational since 1893) held slightly more than 100 million silver dollars for ready distribution, of which only a little more than 723,000 were distributed throughout the fiscal year, mainly from the San Francisco Mint. A lack of significant commercial need, combined with the staggering volume of coins already on hand, resulted in small mintages at each of the operating Mints in 1895. The Sherman Silver Purchase Act of 1890 had been repealed in 1893, removing the legislative mandate to coin unneeded silver dollars.

San Francisco struck 400,000 Morgan dollars dated 1895, and New Orleans 450,000 — both issues being semikey dates today. According to a Mint report, Philadelphia produced just 12,000 circulation strikes, and some research suggests that this small mintage was actually an accounting error, and that no circulation strikes were made in Philadelphia with the 1895 date. Whether 12,000 pieces were struck or not, no such coin has ever been available to collectors. Morgan dollar specialists instead compete for survivors of the proof 1895 dollar to fill their date and mintmark sets. Only 880 proofs were coined, and any example is highly sought-after.

This Select Cameo displays sharp central detail and glimmering fields, with expected hairlines for the grade. The interiors are brilliant, framed by blue-green, orange-gold, and lilac toning around the outer peripheries. Cameo contrast is apparent on both sides but is more distinct on the reverse. NGC ID# 27ZR, PCGS# 87330

1895 Dollar, PR65 Cameo  
Stopper to the Morgan Series  
Stark White-on-Black Contrast

**3191 1895 PR65 Cameo NGC.** In addition to its immense popularity, the 1895 Morgan dollar is one of the most mysterious and controversial issues in American numismatics. Mint records indicate 12,000 business-strike examples were struck at the Philadelphia Mint in June of 1895, to complement a nominal proof mintage of 880 specimens struck throughout the year (290 in March, 180 in May, 90 in September, and 320 in December). Other records indicate five obverse and four reverse dies were prepared by the Engraving Department to produce proof dollars in 1895, but none were produced to strike regular-issue coins. The fact that no business strike dies were produced and the regular issue mintage took place at the end of the fiscal year, in June, has convinced many numismatists that no business-strike 1895 Morgan dollars were ever struck. They believe the 12,000-coin entry in June represents coins dated 1894, carried forward to balance the books at the end of the fiscal year. Supporting this theory is the fact that no business-strike 1895 Morgan dollar has ever been confirmed in any collection, down to the present day.

Writing in *Coin Values* magazine in September 2006, Roger W. Burdette suggests an alternative explanation for the lack of business strikes. He notes six circulation strike and four proof Morgan dollars were submitted to the 1896 Assay Commission, according to their official report. Two business strike coins were tested and destroyed. Burdette notes the legal purpose of the Assay Commission was to verify the prior year's coinage for weight and fineness and they would have been acting outside the law to test coins dated 1894, or any date other than 1895. From this, he concludes the 12,000 coins produced in June were actually 1895-dated regular issue coins, struck using one of the proof die pairs, but with none of the planchet polishing, etc., which would have accompanied a proof mintage. One explanation for the missing business strikes is that the 12 bags containing the entire mintage were stored in government vaults, and later melted under the provisions of the Pittman Act in 1918. Of course, this explanation leaves open the hope that one of the four untested business strikes from the Assay Commission might surface someday, if one of the commission members purchased it for his collection. As time passes, this seems increasingly unlikely.

Whatever the explanation for the missing business strikes, the rarity of the 1895 Morgan dollar has been recognized ever since the coins were struck. It was fairly common for 19th century collectors to update their collections every year by purchasing proof sets from the Philadelphia Mint. One such collector was F. Merritt Alden, who had an unbroken run of silver and minor proof sets from 1859 to 1895 when his collection was sold by the Chapman brothers in April of 1896. The Chapman's description of lot 161 reads, "1895 Brilliant proof set. Dollar rare. 6 pieces." It is telling that the Chapmans singled out the rarity of the dollar only four months after the final coins were issued.

The present Gem proof is sharply struck, and exhibits full definition on the breast feathers. The brilliant fields are brightly mirrored, and contrast with the icy motifs and legends. Patient inspection beneath a lens is required to locate even the most trivial imperfections. Worthy of the most advanced collection of the ever-popular Morgan series.

**From The East End Collection.** NGC ID# 27ZR, PCGS# 87330

1896 Dollar, PR66 Deep Cameo  
Dramatic Field-Device Contrast

- 3192 1896 PR66 Deep Cameo PCGS.** The 1896 proof Morgan dollar has a reputation for being well-struck and eye-appealing. This Deep Cameo Premium Gem is no exception. The sharp design elements glisten with snowlike frost and show no impairments. The fields are deeply mirrored and untuned, producing dramatic white-on-black cameo contrast. Deep Cameos in this numeric grade are elusive, and finer pieces are rare. Registry Set collectors especially will appreciate the rarity and appeal of this high-end proof 1896 Morgan dollar. Population: 11 in 66 (2 in 66+) Deep Cameo, 12 finer (5/18).

*Ex: Long Beach Signature (Heritage, 9/2006), lot 2556, which realized \$19,550.*

**From The East End Collection.** NGC ID# 27ZT, PCGS# 97331

1897 Morgan Dollar, PR67  
Rare in This High Grade

- 3193 1897 PR67 NGC.** This Superb Gem proof is untuned across the interiors and light golden around the outer peripheries, complementing exceptional surface preservation. Although not a Cameo, this piece is modestly contrasted on both sides and shows razor-sharp detail. The 1897 proof is rare at this level of preservation. Census: 15 in 67 (1 in 67+), 5 finer; 12 in 67 Cameo, 10 finer; 1 in 67 (1 in 67+ ★) Ultra Cameo, 0 finer (5/18). *Ex: ANA Signature (Heritage, 4/2006), lot 1203, which realized \$9,430.*

**From The East End Collection.** NGC ID# 27ZV, PCGS# 7332

1897 Silver Dollar, PR64+ Cameo  
Attractively Toned

- 3194 1897 PR64+ Cameo PCGS Secure.** Cameo proof 1897 Morgan dollars are scarce in all grades, with this high-end near-Gem being about average quality for such coins — perfect for date set purposes. Deep Cameo examples of this date a major rarities. This piece displays a sharp strike and satiny devices. Deep orange-gold and russet toning on each side only serves to accentuate the cameo contrast, and a ring of ocean-blue border color further heightens the visual appeal. Population: 11 in 64 (2 in 64+) Cameo, 22 finer; 1 in 64 Deep Cameo, 3 finer (5/18). NGC ID# 27ZV, PCGS# 87332

1898 Dollar, PR67 Ultra Cameo  
A Rare Registry-Grade Example

- 3195 1898 PR67 Ultra Cameo NGC.** The 1898 proof dollar is a well-made issue that frequently comes with exceptional eye appeal, but Superb Gem Ultra Cameo examples are conditionally scarce, and only a few are known finer than the present. This piece displays a full strike and dramatic field-motif contrast with liquidlike mirroring in the fields. The centers are brilliant, surrounded by dusky tan-gold border toning. This coin is housed in an older NGC holder and shows virtually flawless surface preservation. Census: 22 in 67 Ultra Cameo (1 in 67+, 3 in 67 ★, 2 in 67+★), 4 finer (5/18). *From The Kadison Family Collection.* NGC ID# 27ZW, PCGS# 97333

1900 Morgan, PR66 Cameo  
A Popular Type Coin Issue

- 3196 1900 PR66 Cameo PCGS Secure.** Some lilac color appears around the borders on this Premium Gem Cameo, but the interiors show yellow-gold toning overall. Sharp central devices are satiny and well-contrasted. Under a loupe, no mentionable surface imperfections are seen. Cameo proof 1900 Morgan dollars are scarce in high grade. Deep Cameos are rare. Population: 11 in 66 Cameo, 4 finer; 3 in 66 (1 in 66+) Deep Cameo, 5 finer (5/18). NGC ID# 3MNH, PCGS# 87335

1900 Silver Dollar, PR67 Cameo  
Exemplary Surface Quality

- 3197 1900 PR67 Cameo NGC.** A faint trace of light golden color graces the softly frosted devices and border legends of this Superb Gem Cameo proof, leaving the beautifully preserved fields virtually flawless. Moderate contrast is apparent on both sides, and sharp central definition heightens the visual appeal. Cameo proof 1900 silver dollars are rarely offered in this exceptional condition. Census: 16 in 67 Cameo (1 in 67 ★), 7 finer; 2 in 67 Ultra Cameo, 2 finer (5/18). *Ex: Central States Signature (Heritage, 4/2006), lot 3808, which realized \$14,950.* *From The East End Collection.* NGC ID# 3MNH, PCGS# 87335

1904 Silver Dollar, PR66  
Cameo Contrasted Reverse

- 3198 1904 PR66 NGC.** A small proof coinage of 650 pieces was produced in four quarterly deliveries in 1904. Although some rare Chapman proofs are known for the 1921 Morgan dollar, the 1904 is the final regular proof issue in this series. An essentially brilliant coin, this Premium Gem displays glimmering fields and satiny devices. Little contrast is apparent on the obverse, but the reverse shows a modest cameo effect. The usual softness on the eagle's breast is seen on this piece, which has the typical look of the 1904 proof dollar. *Ex: Denver Signature (Heritage, 8/2006), lot 3212, which realized \$7,475.* *From The East End Collection.* NGC ID# 2824, PCGS# 7339

1921 Morgan Dollar, PR65  
Chapman Dies, Brilliant and Mirrored

**3199 1921 Chapman PR65 NGC.** Business strike 1921 Morgan dollars are common, but proofs are significant rarities. None were officially made for collector sale, but the grading services recognize two varieties: the Chapman proofs and the Zerbe proofs. Certified Zerbe proofs tend to be from VAM-1AG or VAM-47 dies, and do not show all characteristics of proof Morgan dollars of earlier dates in the series.

The Chapman proofs are much less controversial, and have the appearance of proof Morgan dollars from the early 20th century. Relative to the 1921 Morgan dollars made for commerce, the wreath is unusually well-struck. The dentils are squared off, and the hair above the ear shows nearly full detail. The surfaces lack the bagmarks characteristic of even the highest-graded business strikes. The fields are nicely mirrored. Leroy Van Allen has not assigned a VAM number to the Chapman proofs, but die markers (as listed at [VAMworld.com](http://VAMworld.com)) include a diagonal line above the first T in STATES, and another die line between the wreath and the right-side star. Both diagnostic die lines are clearly visible on the present lot, a brilliant and beautiful Gem. No flaws are apparent, and the eye appeal is remarkable.

Breen (1988) states that the Zerbe proofs were coined first. When Henry Chapman learned of their existence, he paid a visit to George Morgan, still employed at the Philadelphia Mint 43 years after his namesake design was first issued. Chapman, per Breen, compelled Morgan to strike 10 proofs, "thus creating one of the major rarities of this century with the Morgan dollars' final gasp." Q. David Bowers (1993) called the issue "exceedingly rare. Perhaps only 15 were struck."

As of (5/18), NGC has certified 23 examples as Chapman proofs, mostly as PR63 and PR64. PCGS has certified 42 pieces as Chapman proofs, generally in PR62 through PR64. Although the combined total of 65 pieces is multiples of the estimated mintage, it is likely that several examples have been submitted several times during the past 30-plus years of third-party grading. It is also possible that some of the coins certified as Chapman proofs are actually Zerbe proofs, a separately collected variety. Bowers (2016) wrote that "I have only seen a handful in 65 years that I would call mirrored Chapman proofs." There is no doubt about the Chapman proof status of the present prominently mirrored specimen. Census: 2 in 65, 5 finer (5/18).

**From The East End Collection.** NGC ID# 2579, PCGS# 7342

## PEACE DOLLAR

1934-S Peace Dollar, MS64  
Important Series Key

**3200 1934-S MS64 PCGS Secure.** The 1934-S Peace dollar claims a smallish mintage of just over 1 million pieces, and few examples were saved by contemporary collectors. Today, the 1934-S is a sought-after key issue in the series. This attractive Choice example offers well-preserved, lustrous surfaces, and well-detailed design elements, with outstanding eye appeal. NGC ID# 257Z, PCGS# 7377

## EARLY QUARTER EAGLES

1805 Early Quarter Eagle, BD-1, MS62+  
Just Two Coins Certified Finer

**3201 1805 BD-1, R.4, MS62+ PCGS Secure.** Bass-Dannreuther Die State b/a. Dual-Denomination reverse die, used on 1805 to 1807 quarter eagles, and on the entire mintage of 1807 dimes. In total, the amazingly resilient reverse die struck over 10,000 quarter eagles and more than 150,000 dimes without cracking or other failure. This 1805 quarter eagle is one of just 1,781 pieces struck from the sole BD-1 die pair — first use of the reverse, and the only use of the obverse die until, after it was retired, it was heated for a second time, overdated for use in 1806 (the BD-2 variety), and hardened again.

This high-end MS62 quarter eagle ranks solidly in the 1805 Condition Census by virtue of its PCGS Plus designation. The surfaces display attractive greenish-gold tinges over faintly reflective surfaces. Mint-made adjustment marks concentrate below the date and along the lower left-hand margin, with only a few faint marks spanning across the portrait. The strike is sharp with strong doubling on field star 11. PCGS estimates just 100 to 150 1805 quarter eagles survive in all grades. Population: 4 in 62 (1 in 62+), 2 finer (5/18). NGC ID# BFVV, PCGS# 45511 Base PCGS# 7653

## 1807 BD-1 Quarter Eagle, AU Details

**3202 1807 BD-1, R.3 — Damaged — NGC Details. AU.** Bass-Dannreuther Die State a/a, uncracked. The 1807 quarter eagle is a one-variety issue with a reported mintage of 6,812 pieces. It is also the final issue of the denomination struck with a right-facing Liberty portrait. This AU-level coin displays pleasing olive-gold patina with an even strike. Some vertical adjustment marks are visible in the central reverse. NGC denies a numeric grade due to a couple of obverse scratches, a dig in the horizontal shield lines, and a rim nick above the RI in AMERICA. NGC ID# BFVY, PCGS# 45514 Base PCGS# 7656

## LIBERTY QUARTER EAGLES

1851-O Two and a Half, MS61  
Rich Green-Gold Toning

- 3203 1851-O MS61 NGC. Variety 1.** The Repunched Date variety. A lovely and original green-gold quarter eagle that is devoid of any noticeable marks. Portions of the devices show softness that is usually seen on antebellum New Orleans gold coins. The date was initially entered too far left with a pronounced downward slant. The date was partially lapped from the die, then entered a second time with level positioning. All four digits from the first date impression remain partially visible. Census: 22 in 61, 15 finer (6/18).  
*Ex: ANA National Money Show Signature (Heritage, 2/2014), lot 4083, where it brought \$4,406.25. NGC ID# 25HP, PCGS# 7762*

1900 Two and a Half, MS67  
Low Late-Series Mintage

- 3204 1900 MS67 PCGS Secure.** This Superb Gem ranks among the finest 1900 quarter eagles seen by PCGS, with virtually mark-free surfaces and a full strike. The flaxen-gold surfaces glow with frosted mint luster for tremendous eye appeal. The 67,000-piece mintage is small in comparison to later Liberty Head issues, yet the issue does not command a premium, adding to its allure for high-grade gold specialists. Population: 19 in 67, 0 finer (6/18). NGC ID# 25LR, PCGS# 7852

## PROOF LIBERTY QUARTER EAGLES

1897 Quarter Eagle, PR65 Ultra Cameo  
Finely Textured Jet-Black Fields  
Exceptional Production Quality

- 3205 1897 PR65 Ultra Cameo NGC.** Proofs struck during the final years of the 19th century are famous for their exceptional production quality. Examples are often found well-preserved with Cameo or Ultra Cameo contrast. Additionally, a healthy total of 136 pieces were manufactured in 1897, making this a popular issue to represent the Liberty Head type. The certification totals at NGC and PCGS are grossly inflated, but probably 100 to 125 pieces survive across all levels, and few are finer than this PR65 Ultra Cameo offering. The finely textured jet-black fields are eye-catching and produce stark contrast against thickly frosted devices. A full strike with broad, square rims meets, or even exceeds expectations. A terrific proof impression. Census: 10 in 65 Ultra Cameo, 26 finer (6/18). NGC ID# 288L, PCGS# 97923

1903 Quarter Eagle, PR65  
Undesignated Contrast, Watery Fields

- 3206 1903 PR65 NGC.** Although not designated as a Cameo, this Gem delivers extraordinarily bold contrast between the devices and watery fields. This quality is far more difficult to locate on proofs struck in 1902 or later, after the Mint began using an all-brilliant finish. Smooth yellow-gold surfaces are predictably razor-sharp with crisp, squared-off rims, and there are no contact marks to report. A single lint mark occurs in the field left of the chin. From a mintage of 197 pieces, this would make an excellent high-end Liberty type coin in proof format. Census: 12 in 65 (1 in 65 ★), 16 finer (6/18). *From The Kadison Family Collection.* NGC ID# 288T, PCGS# 7929

1905 Two and a Half, PR65  
Sharp and Beautiful  
Rare in This Grade

- 3207 1905 PR65 PCGS.** The certified population of the proof 1905 quarter eagles gives an unrealistic survival estimate. Only 144 pieces were struck, yet the combined PCGS and NGC census is 277 pieces. Over the past couple of decades, the grading services have varied in strictness when awarding grades to proof coins, and designating pieces as Cameos and Deep or Ultra Cameos was not always done. These factors contributed to an uncommonly high number of resubmissions, inflating the certified population for most grades. Since our Permanent Auction Archives began in 1993, we have handled a proof of this date on 65 occasions, including reappearances of some coins. Most of the pieces that we have seen graded below the Gem level. It is reasonable to estimate that fewer than 100 1905 proof quarter eagles are known.

This Gem displays full detail and liquidlike mirroring, bathed in original apricot-orange color. Under a loupe, the fields reveal no mentionable lines or marks, and eye appeal is outstanding. Population: 23 in 65, 11 finer; 2 in 65 Cameo, 9 finer (6/18). NGC ID# 7KG5, PCGS# 7931

## INDIAN QUARTER EAGLES

### 1908 Indian Quarter Eagle, MS66 Pristine Fields

- 3208 1908 MS66 PCGS.** 30th Anniversary Green Label Holder. The first-year issue in Bela Lyon Pratt's half eagle series was struck to the extent of 564,800 coins, and contemporary collectors set examples aside as keepsakes. Representatives as well-preserved as the coin here offered are scarce nevertheless. This Premium Gem is softly frosted with rose and yellow-gold coloration. The headdress feathers are sharp, and weakness on the eagle's upper wing is from incomplete engraving of the die, not strike softness. There are no singular marks. PCGS has certified only two submissions in higher numeric grades (5/18).

*Ex: FUN Signature (Heritage, 1/2015), lot 6915, which realized \$6,168.75. NGC ID# 288Y, PCGS# 7939*

### 1911-D Two and a Half Indian, AU58 Strong D

- 3209 1911-D AU58 PCGS.** Strong D. The 1911-D is the acknowledged key to the Indian quarter eagle series, thanks to its series-low mintage of 55,680 pieces. This impressive near-Mint representative exhibits sharply detailed design elements, with just a trace of wear, and a bold mintmark. The lustrous orange-gold surfaces are lightly abraded and eye appeal is strong. NGC ID# 7KR7, PCGS# 7943

### 1911-D Quarter Eagle, AU58 Capstone Series Key

- 3210 1911-D AU58 NGC.** CAC. With a mintage of just 55,680 coins, the 1911-D is the undisputed key to the Indian quarter eagle series and enjoys strong demand in all grades. This boldly struck piece displays sharp definition on all design elements and the rich orange-gold surfaces show a few reddish overtones across each side. The mintmark is plainly visible, just inside the border of the NGC holder. Actual wear is virtually nonexistent, and overall eye appeal is exceptional. NGC ID# 7KR7, PCGS# 7943

### 1911-D Quarter Eagle, MS61 Pleasing for the Grade

- 3211 1911-D MS61 NGC.** The mintmark is sharp on this piece, and the diagnostic wire rim along the right obverse periphery is plain. The 1911-D quarter eagle is highly sought-after in the lower Mint State grades when such coins are available with good eye appeal. This piece is well-struck and shows minimal abrasions. The satiny luster has bright yellow-gold color. NGC ID# 7KR7, PCGS# 7943

### 1911-D Two and a Half, MS61 Original Color

- 3212 1911-D MS61 PCGS.** This well-detailed example has satiny olive-gold mint luster with only light field marks that limit the grade. The coloration is original, which is significant considering how many low-end Uncirculated and AU pieces have been brightened in an effort to receive a higher grade from the certification services. The mintmark is bold on this piece, a collector-grade example of the series key issue. NGC ID# 7KR7, PCGS# 7943

### 1925-D Quarter Eagle, MS66 Beautifully Preserved Among the Finest at PCGS

- 3213 1925-D MS66 PCGS Secure.** The Denver Mint struck only three Indian quarter eagle issues. The 1911-D is the famous series key, the 1914-D is a sought-after condition key at the Gem level, and the 1925-D is a popular type coin due to its availability and generally pleasing eye appeal. This Premium Gem example of the latter is conditionally scarce, but all Indian Head issues are in this remarkable grade. Frosty luster showcases original orange-gold, rose, and peach hues, and the strike is sharp. No mentionable abrasions are seen. Population: 39 in 66 (1 in 66+), 0 finer (6/18). NGC ID# 7KRD, PCGS# 7949

## THREE DOLLAR GOLD PIECES

1858 Three Dollar Gold, AU58

Low-Mintage, Low Survival Rate

- 3214 1858 AU58 NGC. CAC.** Unlike many dates in the series, the 1858 three dollar gold piece saw significant circulation, and few coins from the small mintage of 2,133 pieces were saved by contemporary collectors. As a result, the 1858 is an elusive issue in all grades today. This lightly worn, lightly abraded near-Mint example displays pleasing orange-gold surfaces with traces of prooflike reflectivity in the sheltered areas. Census: 26 in 58, 9 finer. CAC: 6 in 58, 1 finer (6/18). NGC ID# 7K5J, PCGS# 7978

1878 Three Dollar, MS66

Rarely Found Finer

- 3215 1878 MS66 PCGS Secure.** Two denominations were introduced in the early 1850s, the three cent piece in 1851 and the three dollar gold piece in 1854. These denominations might seem like odd choices until one considers that the postal rate was three cents to mail a letter up to one-half ounce. Having the second highest mintage of the three dollar gold series with a coinage of 82,304 pieces, the 1878 is an ideal type coin to represent the design. At the same time, it is an integral part of a date set or complete collection of this denomination that remained in production for less than four decades. This lovely Premium Gem has brilliant and frosty yellow-gold luster with above average design definition and excellent eye appeal. Population: 85 in 66 (6 in 66+), 8 finer (6/18). NGC ID# 25MZ, PCGS# 8000

1889 Three Dollar Gold, MS64

Sharp and Appealing

- 3216 1889 MS64 PCGS.** Although only 2,300 three dollar gold pieces were struck in 1889, this final-year issue was well-saved in the 19th century and is available for type collectors today. This near-Gem displays a sharp strike, even on the wreath bowknot. A few light luster grazes on the obverse are the only interruptions in the satiny wheat-gold luster. NGC ID# 7KDU, PCGS# 8011

## PROOF THREE DOLLAR GOLD PIECE

1883 Three Dollar Gold, PR65 Cameo  
Sharp and Well-Contrasted Proof Rarity

**3217** 1883 PR65 Cameo ANACS. Three dollar coinage in 1883 produced 900 circulated strikes and 89 proofs. The circulation-issue coins were heavily saved at the time and are more collectible today than the mintage would suggest. However, the small proof mintage ensures that this variant is rare in all grades. PCGS estimates that only 60 to 70 proofs survive overall, which is likely close to accurate. This issue often comes with outstanding eye appeal and strike quality, particularly at the Gem grade level. This Cameo example displays stark contrast and bright yellow-gold surfaces with a hint of deeper orange in the fields. Strike sharpness is excellent throughout, and no mentionable contact marks are visible. Housed in an early generation ANACS holder.

*From The Kadison Family Collection.* NGC ID# 28AS, PCGS# 88047

## EARLY HALF EAGLES

1795 Small Eagle Five, VF Details  
BD-3 Variety

**3218** 1795 Small Eagle, BD-3, High R.3 — Ex-Jewelry, Damaged, Cleaned — ANACS. VF Details, Net VG8. Bass-Dannreuther Die State c/b. A relatively plentiful Small Eagle variety in the context of early half eagles, suitable for type and date collectors. This piece is well-detailed and evenly struck. Unnaturally bright, abraded surfaces have a high-polish sheen, and there is a shallow bend in the planchet behind Liberty's cap.

*From The Kadison Family Collection.* NGC ID# 25ND, PCGS# 519852 Base PCGS# 8066

1800 BD-2 Five Dollar, AU Details  
Excellent Color, Even Strike

**3219** 1800 BD-2, High R.3 — Repaired — PCGS Genuine Secure. AU Details. Bass-Dannreuther Die State c/c. Both sides of this AU-level 1800 BD-2 half eagle display semiprooflike fields, despite some repair work left of the bust on the obverse. The obverse is cleaned and appears a little brighter in color than the orange-gold reverse, which is independently beautiful and original. Slight strike softness in the centers is hardly noticed. A moderately available variety among early half eagle issues.

1806 Pointed 6 Half Eagle, AU55  
BD-1, 8x5 Stars

**3220** 1806 Pointed 6, 8x5 Stars, BD-1, R.4, AU55 PCGS. Bass-Dannreuther Die State c/e. The obverse has faint peripheral die cracks, and the reverse shows a thin rim cud above the final S in STATES and the space to the right. This Choice About Uncirculated 1806 half eagle displays original yellow-gold luster in the fields amid copper-gold and olive patina. The centers are weakly struck, and numerous crisscrossing adjustment marks are visible on Liberty's portrait. The borders are better-defined. NGC ID# 25P7, PCGS# 45621 Base PCGS# 8090

1807 Bust Left Half Eagle, Unc Details  
BD-8, Early Die State for the Variety

- 3221** 1807 Bust Left, BD-8, R.2 — Obverse Scratched — NGC Details. Unc. Bass-Dannreuther Die State b/a. One of two Capped Bust Left varieties for the year. This is an early die stage for the BD-8 variety, with the obverse clashed but not cracked, paired with the reverse in its new, unclashed state. The 5D denomination is high and left, with the flag of the 5 point-to-point with the feather tip. Pleasing medium-gold surfaces are generally smooth and only lightly marked if not for some diagonal scrapes from the cap to chin and the field below. Brief mint luster adds eye appeal to the well-struck surfaces, which display Uncirculated sharpness.

1808 Wide 5D Half Eagle, BD-4, Unc Details  
Early Die State With Unclashed Reverse

- 3222** 1808 Wide 5D, BD-4, High R.3 — Cleaned — NGC Details. Unc. Bass-Dannreuther Die State c/a. The A in STATES is centered over the U in PLURIBUS to verify the Wide 5D reverse, and the first A in AMERICA is much closer to the wing than on the Normal 5D reverse. Finely granular, green-gold surfaces retain traces of mint luster around the margins despite the cleaning. Sharply struck motifs on both sides show no signs of wear, with a small nick near the corner of Liberty's mouth and tiny bagmarks throughout the fields.

1810 Large Date Half Eagle, BD-4, MS63  
Lustrous, Sharply Struck Type Coin

- 3223** 1810 Large Date, Large 5, BD-4, R.2, MS63 NGC. Bass-Dannreuther Die State a/a, uncracked and unclashed. Most of the 100,287 half eagles struck in 1810 were likely of this variety, as it is relatively plentiful in relation to the three other 1810 die pairings. It is the second and final use of the obverse and the only use of the reverse. Perfect die state examples such as the present are popular for representing the type, particularly when located in attractive Mint State condition. This piece is appealing and sharply struck everywhere except on the eagle's talons, which show minor softness. Bright yellow-gold mint luster shows only a few light abrasions. Finer pieces are rare and highly sought-after. NGC ID# BFXP, PCGS# 507598 Base PCGS# 8108

## CLASSIC HALF EAGLES

1834 Plain 4 Half Eagle, MS64+  
Semiprooflike Fields

- 3224** 1834 Plain 4 MS64+ PCGS. Breen-6501, McCloskey 3-A, R.3. Most Uncirculated 1834 Classic Head half eagles are of the Plain 4 date type, and these coins are highly sought-after for type purposes. This high-end Choice example displays bright yellow-gold surfaces and minimal contact marks. The fields are semiprooflike. Mild strike weakness occurs on the central hair curls and on the vertical shield lines, but the border stars are sharp. Two heavy die cracks are seen on the obverse, one vertical through Liberty's eye to the chin and the other a radial crack from the rim at 5 o'clock into the hair curls. The Classic Head half eagle as a type is rare in Gem condition, and this Plus-graded near-Gem is about as close to that level as most collectors can acquire. Population: 42 in 64 (7 in 64+), 6 finer (6/18). NGC ID# 25RR, PCGS# 8171

1838-C Classic Head Five, XF45  
Popular One-Year Type Coin

- 3225** 1838-C XF45 NGC. Breen-6517, Normal 5, Variety 1, R.4. The Charlotte Mint Classic Head five is a one-year type and, by definition, a first-year-of-issue coin. As such, it is revered by branch mint gold and type collectors alike. A combination of factors make it difficult to find the 1838-C in higher grades: Central strike weakness, lapped dies, and numerous abrasions all contribute to the lack of Choice specimens. This lustrous, green-gold example shows some unavoidable deficiencies of strike, but it retains much of its luster and eye appeal. Abrasions, although frequent, are relatively minor. Doug Winter suggests 200 to 250 pieces survive. Census: 34 in 45, 39 finer (6/18). NGC ID# 25S5, PCGS# 8177

## LIBERTY HALF EAGLES

1848-D/D FS-501 Five Dollar, AU55  
Rare Repunched Mintmark Variety

- 3226** 1848-D/D AU55 PCGS. FS-501, Variety 22-O. This is a rare early die state example of the 1848-D/D FS-501 half eagle. The original mintmark was punched too low and left. It was mostly effaced, and a new mintmark was placed higher and to the right. Remnants of the original punch are still visible on this Choice AU example. Fully struck motifs over bright, semiprooflike yellow-gold surfaces enhance the appeal. Small marks do nothing to minimize the importance of this elusive branch mint offering. Population: 5 in 55, 6 finer (6/18). NGC ID# 25TU, PCGS# 8239

1852-C Five Dollar, AU58  
Smooth Surfaces, Charlotte Type Coin

**3227 1852-C AU58 PCGS Secure. Variety 1.** Among Charlotte half eagles, the 1852-C is relatively plentiful, although it is a rarity in high grade in the context of the No Motto series overall. Doug Winter estimates that 300 to 350 pieces are extant in all grades. This near-Mint example displays smooth olive-gold surfaces with partial luster in the fields. Moderate strike weakness on the eagle's neck and the hair curls around Liberty's face is typical of the issue. On the reverse, a small russet discoloration is visible on the eagle's left (facing) wing, serving as a pedigree marker. Population: 11 in 58, 29 finer (6/18). NGC ID# 25UB, PCGS# 8251

1858-S Five Dollar Liberty, MS60  
Only Two Uncirculated Pieces Certified

**3228 1858-S MS60 NGC.** The 1858-S is an overlooked and underrated S-mint issue. Only 18,600 pieces were struck, and obviously the majority were dropped into circulation immediately after minting. As recently as 2006 no Uncirculated pieces were known of this issue. Even Harry Bass did not have an Uncirculated example. Today only two Mint State pieces have been certified, this MS60 NGC coin and a PCGS MS61. Fewer than 100 coins are believed known in all grades. This piece shows even orange-gold color with strong definition over the devices. Light abrasions are scattered over each side, as one would expect from the grade, but the only blemish that might be useful for pedigree purposes is a thin planchet flake on the lower part of the neck of Liberty. NGC ID# CLAM, PCGS# 8279

1860-D Half Eagle, MS61  
Reflective Fields

- 3229 1860-D Medium D MS61 PCGS Secure. Variety 46-GG.** All Mint State 1860-D half eagles certified by PCGS are of this Medium D variety, and these pieces are conditionally rare. Doug Winter estimates that fewer than 275 examples of this issue survive in all grades, with as few as a dozen pieces being in true Uncirculated condition. Some duplication is likely represented in the certified population figures. The present coin displays sharp obverse stars and hair curls and is undeniably Mint State. Strike weakness on the eagle's neck is not bothersome. The bright straw-gold surfaces are lightly marked but lack severe abrasions. An appealing Mint State Dahlonga half eagle. Population: 12 in 61, 16 finer (6/18). NGC ID# 25VH, PCGS# 8286

1873-CC Half Eagle, VF20  
Second-Rarest Carson City Five

- 3230 1873-CC VF20 PCGS. CAC. Variety 2-B.** The 1873-CC is the second-rarest half eagle from the Carson City Mint, trailing only the 1870-CC. This smoothly worn example displays CAC endorsement for high-quality surfaces and overall eye appeal. Abrasions are frequent but softened by wear. We note a few light lines and shallow scrapes visible under magnification, but no distracting marks, and the devices are sharp for the assigned grade. Just 7,416 pieces were struck. Population: 4 in 20, 44 finer. CAC: 1 in 20, 2 finer (6/18). NGC ID# 25WL, PCGS# 8331

## INDIAN HALF EAGLES

1908-S Half Eagle, MS62  
CAC-Approved, Prior Generation Holder

- 3231 1908-S MS62 NGC. CAC.** The 1909-O and 1911-D are the only other issues that have lower production totals than the 1908-S (82,200 coins). Overall, this S-mint issue ranks among the more challenging Pratt half eagles, although Mint State examples tend to be more accessible than other San Francisco fives. Strike is a strong suit for the 1908-S, as evidenced by this attractive orange-gold example. Radiantly frosted and showing a normal number of marks for the MS62 grade. Housed in a prior generation holder. NGC ID# 65K3, PCGS# 8512

1909-O Five Dollar Indian, XF45  
Final New Orleans Issue

- 3232 1909-O XF45 PCGS. Variety 1.** The 1909-O is arguably the most famous issue in the entire Indian Head half eagle series. It represents the final emission from the New Orleans Mint and claims a low production of 34,200 coins. This Choice XF example is high-end for the grade. It shows just a touch of friction on the cheekbone and wingtip, with strong detail elsewhere. The interplay of deep orange-gold and lilac hues generates fantastic eye appeal for this key date. Encapsulated in a green label holder. NGC ID# 25ZK, PCGS# 8515

1909-O Five Dollar, AU53  
Lowest Mintage in the Series

- 3233 1909-O AU53 PCGS Secure. Variety 1.** This famous key date needs no introduction as one of the most significant and sought-after rarities in the series. Only 34,200 pieces were struck — the lowest total among Pratt half eagles. The 1909-O is also the only half or quarter eagle of the Indian Head design to be struck at the New Orleans Mint, making it a required issue for type purposes. All examples were produced prior to April 1, when gold coin production at the Louisiana branch mint was discontinued. This example is typically well-struck with characteristic softness on the mintmark, which remains clear despite the strike incompleteness. Bright yellow-gold surfaces are moderately marked and show faint hints of light green color on the obverse. NGC ID# 25ZK, PCGS# 8515

1909-O Half Eagle, AU58  
Only New Orleans Mint Indian Five

- 3234 1909-O AU58 PCGS Secure. Variety 1.** The 1909-O is the only Indian half eagle struck at the New Orleans Mint, making it a must-have issue for branch mint type collectors. The 1909-O also boasts a low mintage of 34,200 pieces, but it is not quite as elusive as that modest production total would suggest. The New Orleans Mint was closed for coinage operations after 1909, which may have alerted contemporary collectors to save the coins for their novelty value.

The present coin is an attractive near-Mint specimen, with strongly impressed design elements that show just the slightest trace of wear on the high points. The pleasing orange-gold surfaces show only a few minor abrasions and the mint luster is unusually strong. PCGS has graded 81 numerically finer examples (6/18). NGC ID# 25ZK, PCGS# 8515

1909-O Indian Half Eagle, MS60  
Single-Year Branch Mint Type Coin

**3235 1909-O MS60 NGC. Variety 1.** Only 34,200 Indian half eagles were struck at the New Orleans Mint in 1909, the first time the design was struck at the famous Southern mint. Since the New Orleans facility was subsequently demoted to an Assay Office, the 1909-O became a single-year branch mint type coin. Because some coins were saved by contemporary collectors, the 1909-O is not as rare as the small production total would suggest, but collector demand still far exceeds the supply for this issue.

The present coin is an impressive Mint State example, with well-detailed design elements that exhibit just a touch of softness on the eagle's shoulder. The orange and rose-gold surfaces show slightly dimmed mint luster and the expected number of minor contact marks for the grade. This lot is an important opportunity for Southern gold collectors. NGC ID# 25ZK, PCGS# 8515

1909-S Five Dollar, Original MS62  
Conditionally Scarce

**3236 1909-S MS62 NGC. CAC.** Rich honey-gold coloration draw the eye of the viewer to this well-preserved 1909-S Indian Head half eagle — a conditionally scarce issue despite its unassuming mintage (297,200 coins). The motifs display crisp definition throughout. Softly frosted surfaces are overtly original. The grade is limited by the small marks on each side. Housed in a prior generation holder with a green CAC approval sticker for quality. Census: 70 in 62, 18 finer. CAC: 16 in 62, 12 finer (6/18). NGC ID# 25ZL, PCGS# 8516

1915-S Half Eagle, MS64  
Major Series Condition Rarity  
Only One Coin Numerically Finer

**3237 1915-S MS64 NGC.** The 1915-S half eagle had a fairly small mintage of 164,000 pieces and a comparably low survival rate in high grade. Mint State examples are elusive and typically only seen in the MS62 and lower grade range. MS63 coins are genuinely scarce, and Choice examples are rare. The 1915-S is also the only issue in the entire series with only a single representative certified in Gem or finer condition, an MS65 NGC coin. In that light, the present Choice example, one of only 13 (1 in 64+) certified by NGC (5/18), becomes a significant condition rarity and an important acquisition for the advanced Indian gold collector. Satiny bronze-gold luster gives a glowing appearance to each side, while no significant abrasions are present. Slight strike weakness is seen on the lower headdress feathers, though the motifs are otherwise well-detailed. NGC ID# 25ZR, PCGS# 8531

1929 Five Dollar Indian, MS63  
Singular Rarity in the Series

**3238 1929 MS63 PCGS Secure.** The final-year 1929 half eagle is the most significant rarity in the series, although its mintage of 662,000 coins would never lead one to suspect that was the case. The issue's lack of availability stems directly from the economic context in which it was produced. By October 1929, the American economy was in freefall — a position it would remain in through the early to mid-1930s. The five dollar gold coin was not needed in circulation, and few 1929 half eagles were distributed to banks. Instead, the majority sat in Treasury vaults and were melted after 1933.

This Select Uncirculated example is strongly struck throughout — a trait often lacking among survivors. Mint luster is softly frosted and radiates over the warm yellow-gold surfaces. Small ticks and grazes appear on each side, but the only marks of note occur below the ED in UNITED. NGC ID# 28E2, PCGS# 8533

## PROOF INDIAN HALF EAGLE

1912 Indian Half Eagle, PR65  
Fine-Grained Sandblast Finish

- 3239 1912 PR65 PCGS Secure.** The 1912 proof Indian half eagle claims a mintage of just 144 pieces, but the number distributed to collectors was certainly even smaller. Unsold specimens were melted for recoinage after the end of the year. The proofs featured an attractive, fine-grained sandblast finish that gave the coins a lighter appearance than their 1911 predecessors. This delightful Gem exhibits sharply detailed design elements throughout and the virtually flawless orange-gold surfaces show unbroken matte luster on both sides. A single dark alloy spot near the eagle's head acts as a pedigree marker. We expect intense competition from series specialists when this lot is called. Population: 10 in 65, 19 finer (6/18). NGC ID# 28E6, PCGS# 8543

## EARLY EAGLES

1799 BD-6 Eagle, AU53 Details  
Small Obverse Stars

- 3240 1799 Small Obverse Stars, BD-6, R.5 — Tooled — ANACS. AU53 Details.** Bass-Dannreuther Die State e/b. This piece is sharply struck and even, showing complete border dentils with no adjustment marks. The uniform wheat-gold surfaces display pleasing eye appeal despite brush marks in the obverse fields that have effaced any deep abrasions. To the unaided eye, this piece shows satiny surfaces and has some type coin appeal due to its sharpness. *From The Kadison Family Collection.* NGC ID# 2624, PCGS# 45729 Base PCGS# 98562

1801 BD-2 Ten Dollar, AU53  
Original Heraldic Eagle Type Coin

- 3241 1801 BD-2, R.2, AU53 PCGS Secure. Original peach-red luster outlines design elements of this lightly circulated Heraldic Eagle type coin. Liberty's forehead and shoulder show a hint of wear, but neither side displays any consequential marks. The 1801 BD-2 is best known for its vertical die lines near the fold of Liberty's cap. At first glance, these appear to be clash marks from the shield, but they are instead interesting damage to the obverse die, reminiscent of the 1804 "Spiked Chin" half cent. Although most 1801 BD-2 tens exhibit these parallel lines, their cause is unknown. Perhaps a metal object, such as a file, was inadvertently struck into the obverse die. A newly fed planchet prevented the object from impacting the reverse die. NGC ID# 2627, PCGS# 45734 Base PCGS# 8564

1803 Capped Bust Ten Dollar  
Small Reverse Stars, BD-3

- 3242 1803 Small Reverse Stars, BD-3, R.4, PCGS Genuine. Bass-Dannreuther Die State c/d. The PCGS number ending in 92 suggests Cleaning as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. In our opinion, this coin has the details of an AU specimen that has been cleaned and polished. The obverse die is common to all six 1803 varieties, while the reverse was previously used to strike 1801 BD-2 eagles. We note some light adjustment marks along the reverse margins and a few small marks above the Liberty's cap. A cigar-shaped strike-through divides the T in LIBERTY. Numerous hairlines exist from the cleaning and the fields are bright and reflective, yet sharp definition remains on the motifs and pleasing orange-gold color adds appeal.

## LIBERTY EAGLES

1846 Ten Dollar, AU58  
A Rarity This Fine

- 3243 1846 AU58 NGC. Only 20,095 eagles were struck in 1846, and these coins circulated extensively. The low survivorship of the issue is almost entirely in circulated grades with few coins in the higher AU range. Only a handful of low-end Uncirculated pieces are known. This near-Mint coin displays sharp detail and bright yellow-gold surfaces. The fields are moderately abraded, but some prooflike mirroring is visible in the protected areas. Census: 4 in 58, 4 finer (5/18). NGC ID# 262W, PCGS# 8594

**1857-O Ten Dollar Liberty, AU53**  
Scarce, Low-Mintage Issue

- 3244** 1857-O AU53 NGC. Variety 1. The 1857-O Liberty eagle claims a modest mintage of 5,500 pieces, making it an elusive issue in all grades. This attractive AU53 specimen exhibits some light wear on the well-detailed design elements and the pleasing orange-gold surfaces show some scattered, minor abrasions on both sides. Census: 12 in 53, 21 finer (6/18). NGC ID# 263U, PCGS# 8623

**1867 Eagle, AU50**  
Underrated, Low-Mintage Issue

- 3245** 1867 AU50 NGC. With a tiny mintage of 3,090 business-strike examples, the 1867 Liberty ten dollar is a scarce, underrated issue in all grades. This attractive AU specimen shows only light wear on the well-detailed design elements and the lightly abraded surfaces retain traces of original mint luster in sheltered areas around the devices. Census: 9 in 50, 27 finer (6/18). NGC ID# 264L, PCGS# 8651

**1870 Ten Dollar, AU55**  
High-End for the Issue

- 3246** 1870 AU55 NGC. Only 3,990 eagles were struck in 1870 at the Philadelphia Mint, and this issue is scarce today in all grades. Only one, low-end Mint State piece is reported at the grading services. This Choice AU example displays sharp devices and original orange-gold color. The surfaces are moderately abraded but retain semiprooflike reflectivity in the protected regions. Census: 13 in 55, 8 finer (6/18). NGC ID# 264T, PCGS# 8657

**1879-CC Ten Dollar, XF Details**  
Only 45 to 60 Pieces Known

- 3247** 1879-CC — Cleaned — PCGS Genuine Secure. XF Details. Variety 1-A. The 1879-CC ten comes from a scant mintage of 1,762 coins. All were struck with a single die pair, which is distinguished by a heavy die line that runs through the E in LIBERTY. This issue has an estimated survivorship of only 45 to 60 coins, just one of which is designated Mint State by the leading certification services (6/18). This XF-level coin displays slightly muted surfaces from an old cleaning but has since retuned orange-gold. The design elements are well-detailed. Population: 6 in 40, 34 finer (6/18).

**1885-S Eagle, MS64**  
Tied for the Finest Certified

- 3248** 1885-S MS64 PCGS Secure. Despite a respectable mintage of 228,000 coins, the 1885-S is an important condition rarity as only nine examples are certified as MS64 by PCGS and NGC, and none have earned a finer grade (6/18). This Choice Mint State piece has brilliant wheat-gold luster with wisps of yellow near the borders. Both sides exhibit minimal, grade-consistent marks. Population: 7 in 64, 0 finer (6/18). NGC ID# 554W, PCGS# 8707

**1897-O Ten Dollar, MS63**  
Conditionally Rare

- 3249** 1897-O MS63 PCGS Secure. CAC. Variety 2. Only a few of the 42,500 1897-O eagles that were produced survive in mint condition. This Select example exhibits brilliant yellow-gold luster with sharp design definition and pristine surfaces. The fields are slightly prooflike, adding to the coin's excellent eye appeal. Population: 22 in 63, 11 finer. CAC: 5 in 63, 4 finer (6/18). NGC ID# 7LHC, PCGS# 8738

## INDIAN EAGLES

1907 Saint-Gaudens Ten Dollar, Unc Details  
Famous Wire Rim Variant  
Only 472 Pieces Distributed

**3250 1907 Wire Rim — Cleaned — PCGS Genuine Secure. Unc Details.** When President Roosevelt tasked sculptor Augustus Saint-Gaudens to participate in the redesign of several denominations, he was insistent that the artist employ an Indian headdress in some regard. In the spring of 1907 it was decided that the motif would appear on the new ten dollar gold coin. Soon after Saint-Gaudens' untimely death later that year, the president mandated that a small quantity of these 1907 Wire Rim tens be produced (the reported net distribution is 472 pieces), even if further modification needed to be made later to reduce the relief for regular circulation strikes. Consequently, this is the version that most closely resembles Saint-Gaudens' artistic intention, and it is highly prized as such.

This is an accessible example for collectors who might not otherwise be in the running for one of these impressive High Relief tens. Subdued yellow-gold surfaces show myriad wispy hairlines from an improper cleaning. Contact marks appear within the headdress feathers, in front of the mouth, and elsewhere, but the appeal of this offering persists.

1908-D No Motto Eagle, MS63  
Lovely Rose-Gold Luster

**3251 1908-D No Motto MS63 PCGS.** Several thin die cracks are visible around the obverse periphery, and both sides show faint metal flowlines at the rims. The interiors are frosty and luminous. This well-struck No Motto 1908-D eagle has original rose-gold luster and exhibits only minor abrasions, making it more appealing than many MS63 coins that we have seen. This issue is scarce in higher grades. NGC ID# 28GH, PCGS# 8854

1909 Ten Dollar Indian, MS65+  
Unusually Smooth Surfaces

**3252 1909 MS65+ NGC.** From a smallish mintage of 184,789 pieces, the 1909 Indian eagle is an underrated issue, outside of series specialists. The 1909 can be located in lower Uncirculated grades with a little patience, but the issue is elusive at the MS65 grade level, and finer coins are condition rarities. This Plus-graded Gem exhibits sharply detailed design elements throughout. The orange-gold surfaces are unusually well-preserved, as most examples seen display many scattered, minor abrasions from rough storage and shipping. Both sides radiate vibrant mint luster, with outstanding eye appeal. Census: 25 in 65 (2 in 65+), 7 finer (6/18). NGC ID# 28GM, PCGS# 8862

**1911-D Ten Dollar, AU58+  
High-End Key Date With CAC Approval**

- 3253 1911-D AU58+ PCGS. CAC.** The first 1911-D eagles were struck on April 26. Ultimately, a paltry 30,100 pieces were minted through the end of the year, making this a series key and placing great pressure on high-end examples. Uncirculated coins are beyond the reach of most collectors. This near-Mint example offers slightly better detail on the obverse than the reverse. Glowing satin luster remains over minimally abraded yellow-gold surfaces. All-original and exceedingly nice for the grade. NGC ID# 28GU, PCGS# 8869

**1915 Ten Indian, MS65  
Elusive in Such Fine Condition**

- 3254 1915 MS65 NGC.** Available in lower grades, the 1915 Indian eagle is scarce in MS65 and rare finer. This Gem displays sharp definition and frosty yellow-gold luster. Only a few light surface grazes are present. Higher-grade examples of this conditionally elusive Philadelphia issue appear infrequently at auction and command prices beyond what many collectors can afford. This Gem is more accessible but lacks nothing in eye appeal. NGC ID# 28H5, PCGS# 8878

1920-S Ten Dollar, MS62  
Heavily Melted Branch Mint Rarity  
A Major Series Key

**3255 1920-S MS62 PCGS Secure.** If we consider the final-year 1933 ten dollar gold piece to be uncollectible, then the rarest potentially accessible key date in the Saint-Gaudens Indian Head eagle series is the 1920-S. Although the San Francisco Mint manufactured a healthy quantity of ten dollar gold coins in 1920, Bowers notes that it "is virtually a certainty that nearly all of the 126,500 pieces minted were held by Treasury Department and melted after 1933." He adds: "Relatively few must have seen actual distribution, either domestically or in international commerce. No hoards are known, not even small ones."

No ten dollar gold coins had been struck at any mint facility since 1916. Production resumed four years later, but the timing was not exactly ideal. In 1920, the United States was going through a post-war recession, and there was little demand for these relatively large gold coins in commerce. So why were any eagles struck in 1920? Part of the reason is that by law, one-third of outstanding gold certificates had to be backed by gold coinage held in reserves. One of the main flaws of the Gold Standard was that it was not responsive to the needs of the American economy during the late-19th and early-20th centuries. This is a perfect example.

Survival estimates for the 1920-S range from 110 to 145 pieces extant. Unsurprisingly, most known examples are in Uncirculated condition, and the few circulated pieces typically grade AU. Distribution across the various Mint State levels is fairly even, with MS62 being the grade with the most submissions at PCGS.

As usual, the TY in LIBERTY and the eagle's legs and talons are softly defined, but detail is good on the lowest headdress feathers. Light yellow-gold surfaces are brightly frosted and appealing for the grade. An expected number of bagmarks are present on each side, one of which is in the shape of a star left of Liberty's forehead from direct contact with another ten dollar gold piece. One other noteworthy tick occurs on the cheek, but the obverse is generally smooth. Population: 9 in 62, 18 finer (6/18). NGC ID# 28H8, PCGS# 8881

## LIBERTY DOUBLE EAGLES

1852-O Twenty, AU50  
Likely from California Gold

**3256** 1852-O AU50 PCGS. **Variety 1.** Deep gold patina resides on the lighter greenish yellow-gold surfaces of this early New Orleans issue that was likely struck from recently mined California gold that made up 90% of the gold deposits at the New Orleans Mint in 1852, according to the gold deposit and delivery records that are housed at the Fort Worth, Texas branch of the National Archives. Scattered marks on the reflective surfaces of this double eagle are consistent with the grade. NGC ID# 268L, PCGS# 8907

1860-O Twenty Dollar Liberty, MS61  
Supremely Challenging O-Mint Issue  
Finest-Certified Example

**3257 1860-O MS61 NGC.** After the San Francisco Mint opened in 1854, most of the bullion from the California gold fields went to that facility for coinage and bullion deposits dropped precipitously at the New Orleans Mint. Accordingly, only small mintages of double eagles were turned out at the New Orleans Mint after that time. Only 6,600 O-mint Liberty double eagles were coined in 1860, the third-smallest production total of the New Orleans series. The coins were all released into circulation at the time of issue and circulated widely in domestic and overseas trade. It is doubtful that any coins were saved by contemporary collectors, as there was little numismatic interest in high-denomination gold coins in general, and branch mint issues in particular. As might be expected, the 1860-O is extremely rare in high grade today. Only two specimens have been certified in Mint State grades, both at NGC. One is the MS60 Prooflike example that was recovered from the wreck of the *S.S. Republic*. The other is the present coin, graded MS61 by NGC.

Collecting double eagles did not become popular in this country until after the Gold Recall of 1933, because the high face value of each coin made setting aside a comprehensive date run of twenties too expensive for all but the most affluent collectors. The 1860-O began appearing at auction soon after the presidential order took effect, however, with a typical offering in the General Walter D. McCaw and Other Collections (Thomas Elder, 1/1934), lot 2250:

"1860. \$20. New Orleans Mint. Extremely fine. A very rare coin with a very small coinage and next to last year at this mint."

The present coin is the finest-certified example of this elusive O-mint date. The design elements are much sharper than the norm for the issue, which is known as something of a strike rarity. Liberty's hair is unusually sharp on this piece and only star 3 shows slight softness on the obverse. The reverse devices are sharply rendered throughout. Like many examples seen, the yellow-gold surfaces display much prooflike reflectivity in the fields and show the expected number of minor contact marks for the grade. The overall presentation is most attractive. This coin boasts the highest available technical quality, strong historic interest, and absolute rarity. We anticipate a record price, since there is no finer 1860-O double eagle that has appeared at public auction, nor is there any finer specimen indicated in any reference. Census: 1 in 61, 0 finer (6/18). NGC ID# 269E, PCGS# 8930

**1861-S Twenty Dollar, AU58**  
Rare in Finer Condition

- 3258 1861-S AU58 PCGS Secure.** Luster remains in the fields of this near-Mint 1861-S double eagle, and the design elements show only light friction. Surface chatter is minimal, leaving the coin with above-average eye appeal for the grade. The 1861-S twenty is scarce in AU58 and only a few dozen Mint State pieces are known, most heavily abraded. Population: 47 in 58 (1 in 58+), 29 finer (6/18). NGC ID# 269K, PCGS# 8935

**1861-S Double Eagle, AU58**  
Lustrous Original Surfaces

- 3259 1861-S AU58 PCGS.** San Francisco double eagle coinage in 1861 was less than one-sixth the production of Philadelphia. The Philadelphia issue is available in many grades and a popular type coin, while the 1861-S is elusive in the upper AU levels and rare in Mint State. This nearly Uncirculated coin displays partially lustrous fields and original peach-gold coloration. Surface chatter accompanies trivial high-point wear. NGC ID# 269K, PCGS# 8935

**1873 Liberty Twenty, MS64**  
Popular Open 3 Variant

- 3260 1873 Open 3 MS64 PCGS Secure.** The 1873 Liberty double eagle, with an Open 3 in the date, was produced in greater numbers than its Closed 3 counterpart. In fact, the issue is probably the most available Type Two double eagle in today's market, making it a popular choice with type collectors. Of course, the coins circulated heavily at the time of issue and high-grade examples are elusive. The 1873, Open 3 is rare in MS64 condition and finer coins are virtually unobtainable.

This attractive Choice example exhibits sharply detailed design elements and well-preserved orange-gold surfaces that show only minor signs of contact. Both sides radiate vibrant mint luster, with outstanding eye appeal. This coin should find a home in a fine collection or Registry Set. Population: 11 in 64, 1 finer (6/18). NGC ID# 26AL, PCGS# 8967

**1873 Open 3 Twenty Dollar, MS63+  
Doubled LIBERTY, FS-101**

- 3261 1873 Open 3, Doubled Die Obverse, FS-101, MS63+ PCGS Secure.** CAC. LIBERTY is boldly die doubled on this Open 3 variety. The current coin is among the finest pieces attributed as FS-301 at PCGS, and it is an above-average Mint State example of the date overall. Bold design elements and frosted orange-gold mint luster produce strong eye appeal, while light, scattered abrasions are in harmony with the grade. Population: 10 in 63 (1 in 63+), 0 finer (5/18). NGC ID# 26AH, PCGS# 148749 Base PCGS# 8967

**1874 Twenty Dollar, MS61+  
One of Two Plus-Graded Coins at NGC**

- 3262 1874 MS61+ NGC.** A number of Uncirculated 1874 double eagles are known, but few grade finer than MS61. This is one of two Plus-graded coins at NGC in this grade (6/18). A hint of reflectivity in the fields and sharp design elements contribute to the high-end appeal, and the straw-gold coloration is original. Moderate abrasions are mainly on the obverse, including a singular mark on Liberty's cheek beneath the eye. NGC lists 24 higher-grade representatives (6/18). NGC ID# 26AN, PCGS# 8970

**1875-CC Twenty Dollar, AU58  
CAC Approval**

- 3263 1875-CC AU58 PCGS. CAC. Variety 5-A.** The base of the 7 is centered over a dentil, the second C in the mintmark is left of the T, and there is a die line above the E in AMERICA. Sharpness of strike is good around the borders but softens in the centers. Vibrant remaining mint frost and original yellow-gold surfaces compensate for strike incompleteness with terrific eye appeal. A lovely CC Type Two twenty. NGC ID# 26AT, PCGS# 8974

**1876-CC Liberty Twenty, Early Die State MS60**

- 3264 1876-CC MS60 PCGS Secure. Variety 3-A.** This plentiful Carson City issue is popular for type purposes, and this Mint State example is pleasing for the grade. Struck from an early state of the dies, each side shows areas of field reflectivity without evidence of die lapping. Also, the usual die crack along the lower reverse is just beginning to appear. The yellow-gold color is original, and grade-limiting abrasions are light and scattered. NGC ID# 26AW, PCGS# 8977

**1881 Liberty Double Eagle, AU Details  
Classic Gold Rarity**

- 3265 1881 — Scratch — PCGS Genuine Secure. AU Details.** The Philadelphia Mint began a policy of limiting twenty dollar gold coinage (in favor of half eagles and eagles) in 1881 that it would follow for most of the decade. Production of Liberty double eagles dropped precipitously in 1881, to a meager 2,199 pieces. As a result, the 1881 is a major rarity in all grades and conditions, with PCGS CoinFacts estimating the surviving population at just 40-60 pieces.

The present coin is an attractive specimen, with just a touch of wear on the strongly impressed design elements. The orange-gold surfaces are lightly abraded, aside from a long scratch through the eagle's left (facing) wing that constitutes the noted damage. Traces of original mint luster are evident in the protected areas. This lot represents an important opportunity for double eagle collectors seeking to fill this challenging hole in their sets.

1882-CC Double Eagle, AU53  
Scarce Die Pair

- 3266** 1882-CC AU53 PCGS Secure. CAC. **Variety 1-A.** Three varieties are documented for the 1882-CC double eagle, and die pair 1-B is seen more frequently than either of the other two varieties, 1-A (as offered here) and 2-B. Wisps of rose patina appear on the light yellow-gold surfaces of this attractive Carson City twenty that shows trivial marks on its still-lustrous surfaces. NGC ID# 26BF, PCGS# 8997

1882-CC Liberty Twenty, AU55  
Upper-End for the Grade

- 3267** 1882-CC AU55 PCGS Secure. CAC. **Variety 1-B.** The 1882-CC double eagle is relatively plentiful in the context of Carson City issues, although the quality of AU-level coins varies widely. Only a limited number of CAC green labels have been awarded to examples of this issue. The present coin displays sharp definition and luminous orange-gold surfaces with lustrous fields. Minor surface chatter is lighter than typical, with strong eye appeal to bolster its Choice About Uncirculated grade. CAC: 27 in 55, 34 finer (6/18). NGC ID# 26BF, PCGS# 8997

1882-CC Twenty Dollar Liberty, AU58  
Lightly Abraded and Lustrous

- 3268** 1882-CC AU58 PCGS. **Variety 1-B.** The point of the 2 in the date is centered over a dentil and the second C in the mintmark is slightly higher than the first, identifying this piece as a Variety 1-B. Only a trace of wear shows over the high points of the design elements and the lightly abraded orange-gold surfaces retain much of their original mint luster. A network of spidery die cracks runs through most of the letters in the reverse legends and a vertical die line is visible in front of Liberty's eye. The overall presentation is most attractive. NGC ID# 26BF, PCGS# 8997

1882-CC Twenty Dollar, MS60  
Uncirculated Examples are Elusive

- 3269** 1882-CC MS60 PCGS Secure. **Variety 1-B.** No double eagles were struck at the Carson City Mint in 1880 or 1881. Production of double eagles resumed in 1882, with a mintage of just 39,140 pieces. The coins were well-produced, but they circulated extensively, and most examples seen today have excessive surface abrasions. The 1882-CC is actually one of the more available CC-mint issues, but Mint State coins are elusive.

The present coin is an impressive Mint State specimen, with well-detailed design elements and an interesting die crack through the bottom of the letters in the denomination. A vertical spike is present in front of Liberty's eye. The pleasing orange-gold surfaces show the expected number of minor contact marks for the grade. Population: 13 in 60, 76 finer (6/18). NGC ID# 26BF, PCGS# 8997

**1883-CC Double Eagle, AU53**  
Smooth Original Surfaces

- 3270** 1883-CC AU53 PCGS. **Variety 2-A.** An available Carson City issue compared to many other double eagles from this mint, popular as a type coin for collectors seeking a single Carson City twenty. This piece is luminous in the fields and sharply detailed on the devices. Original bronze-gold surfaces are remarkably smooth, despite the reputation of Carson City double eagles for being heavily abraded. NGC ID# 26BH, PCGS# 8999

**1883-CC Twenty Dollar, AU53**  
Red-Gold Surfaces

- 3271** 1883-CC AU53 NGC. **Variety 2-A.** The import of a group of 1883-CC double eagles in recent years has been a boon to this area of collecting, allowing more collectors to participate in the market for Carson City gold. This is a marvelous example in original AU53 condition. A rich reddish-gold hue, good strike detail, and partial glowing luster are eminently eye-appealing. NGC ID# 26BH, PCGS# 8999

**1883-CC Liberty Head Twenty, AU55**  
Attractively Lustrous Fields

- 3272** 1883-CC AU55 NGC. **Variety 2-A.** Original luster glows in the protected portions of the fields, and olive-gold patina appears on the relief elements where light high-point wear prevents a Mint State grade. A few light abrasions are seen under a loupe but evade the unaided eye, save for a cluster of marks on Liberty's cheek. An unusually attractive Carson City double eagle for this grade. NGC ID# 26BH, PCGS# 8999

**1884-CC Liberty Twenty, AU58**  
Type Three Branch Mint Issue

- 3273** 1884-CC AU58 PCGS **Secure. Variety 1-A.** The 1884-CC twenty dollar Liberty claims a mintage of 81,139 pieces, making it an available issue and a popular choice with type collectors seeking a Type Three example for their collections. This near-Mint specimen shows little wear on the well-detailed design elements, and the orange-gold surfaces are lightly abraded, aside from a couple of horizontal scratches on the portrait. NGC ID# 26BK, PCGS# 9001

**1884-CC Double Eagle, MS61**  
Frosty Luster, Wheat-Gold Color

- 3274** 1884-CC MS61 PCGS. **Variety 1-A.** Things were trending down in Carson City in 1884. The population was half of what it had been a decade before, the number of advertisements in the local newspaper was lower, and fewer gold deposits were made at the Carson City Mint. Indeed, the facility would shut its doors for four and a half years starting in 1885. Nevertheless, a substantial mintage of 81,139 double eagle was accomplished, these being among the few accessible CC twenties in high grades. This well-struck 1884-CC representative maintains frosty mint luster and vibrant wheat-gold coloration with a touch of rose to accent. Scattered grazes occur over each side, but none overly distract. NGC ID# 26BK, PCGS# 9001

**1889-CC Twenty, AU58**  
Just a Touch of Wear

- 3275** 1889-CC AU58 PCGS. **Variety 1-A.** Light high-point friction is mainly restricted to Liberty's portrait, which has olive-colored toning on the cheek and hair curls. The fields are lustrous with brighter yellow-gold color. Scattered light abrasions appear throughout. The 1889-CC is a popular date in the Carson City series, and coins grading finer than the present are elusive with decent eye appeal. NGC ID# 26BV, PCGS# 9011

**1889-CC Double Eagle, MS61**  
Minimally Abraded, Attractive Surfaces

**3276 1889-CC MS61 PCGS Secure. Variety 1-A.** The Carson City Mint resumed coinage operations in 1889 after a four-year hiatus. Just two denominations were struck, both of which are scarce and highly valued by today's collectors: 1889-CC silver dollars and double eagles. The mintage of double eagles was just 30,945 pieces, most of which circulated. Nearly all Uncirculated specimens have lower Mint State grades, since bagmarks and abrasions accompany virtually all survivors.

This example is a solid MS61 coin with fewer marks than normally seen. A sharp strike and attractive, medium-gold color with faint rose highlights translate to strong eye appeal. The 1889-CC is always in demand by Carson City specialists and double eagle collectors, especially when free of copper alloy spots such as this lustrous twenty. Population: 60 in 61, 64 finer (6/18). NGC ID# 26BV, PCGS# 9011

**1890-CC Double Eagle, AU55**  
Strongly Rendered

**3277 1890-CC AU55 NGC. Variety 1-A.** Late die state examples of Variety 1-A show lapping on the right-side tailfeathers. Slight doubling is apparent on the tops of TWENTY. This semireflective Carson City double eagle maintains substantial luster for a Choice AU representative. The high points of the portrait are the only elements that display mentionable softness; most of the design is strongly brought-up. NGC ID# 26BY, PCGS# 9014

**1890-CC Liberty Double Eagle, AU58**  
Popular Branch Mint Type Issue

**3278 1890-CC AU58 PCGS. Variety 1-A.** The 1890-CC Liberty double eagle claims a fairly generous Carson City mintage of 91,209 pieces and the issue enjoys a higher-than-average survival rate, making it a popular choice with branch mint type collectors. Just a trace of wear shows on the well-detailed design elements of this attractive near-Mint specimen, and the lightly abraded orange-gold surfaces retain much original mint luster. NGC ID# 26BY, PCGS# 9014

**1890-CC Double Eagle, AU58**  
Exceptionally Lustrous and Appealing

**3279 1890-CC AU58 PCGS Secure. Variety 1-A.** An intermediate die state, showing the right-side tailfeathers weakened by die lapping but not the left. This near-Mint 1890-CC double eagle has enough luster and sharpness to be Uncirculated, although a brush of friction on Liberty's cheek prevents such a designation from PCGS. A vibrant yellow-gold cartwheel effect appears in the fields, and the only singular abrasion appears above the NT in TWENTY. NGC ID# 26BY, PCGS# 9014

**1890-CC Liberty Twenty, AU58  
Late Die State**

**3280 1890-CC AU58 NGC. Variety 1-A.** Luster brightens all but the cheek and open fields of this lime-green and wheat-gold Carson City example. Marks are minor for the grade except for a slender abrasion beneath STATES. This piece is from the late die state with lapped right-side tail feathers. Minor die doubling can be seen on TWENTY and PLURIBUS.

Ex: *New York Signature (Heritage, 3/2012)*, lot 4303. NGC ID# 26BY, PCGS# 9014

**1890-CC Double Eagle, MS60  
Frosty Original Luster**

**3281 1890-CC MS60 NGC. Variety 1-A.** The usual late reverse die state, showing the eagle's tailfeathers partially effaced by die lapping. This Uncirculated Carson City double eagle is radiantly lustrous with original wheat-gold color. Scattered abrasions limit the grade, but they are less obtrusive than usual for the MS60 level. The 1890-CC twenty is moderately elusive even in the lower Mint State grades. NGC ID# 26BY, PCGS# 9014

**1890-CC Twenty Dollar, MS61  
Remarkably Lustrous Surfaces**

**3282 1890-CC MS61 PCGS Secure. Variety 1-A.** The 1890-CC twenty is typically seen with thick mint luster and numerous abrasions from bag-to-bag transfer in Europe over the past 125 years. This piece shows pleasing reddish-gold patina and the mint luster is bright. Many 1890-CC double eagles are not fully struck, but this one displays bold definition over all the design elements on each side. NGC ID# 26BY, PCGS# 9014

**1890-CC Twenty, MS61  
Late Die State Variety 1-A**

**3283 1890-CC MS61 NGC. CAC. Variety 1-A.** This late die state has the eagle's right-most tail feathers fragmented from die lapping. Traces of reverse die doubling remain on the tops of the letters in TWENTY DOLLARS. The 1891-CC double eagle had a mintage of 91,209 coins, the fourth highest production of the denomination in Carson City. Surprisingly, only two different die marriages are identified for the 1890-CC double eagles. The three higher mintage issues were the 1874 with six varieties, the 1875 with 16 varieties, and the 1876 with 10 varieties. This pleasing Mint State piece has fully lustrous straw-gold surfaces that host minimal grade-consistent marks. NGC ID# 26BY, PCGS# 9014

**1892-CC Double Eagle, AU55  
Variety 1-A, The Only Dies**

**3284 1892-CC AU55 PCGS. Variety 1-A.** There is a single variety identified for the 1892-CC double eagles, and that die pair remained in service to produce 27,265 of these large gold coins. This Choice AU example has splendid honey-gold surfaces with nearly complete luster and trivial marks on each side. NGC ID# 26C6, PCGS# 9020

**1906-D Liberty Twenty, MS64+  
First Denver Mint Issue**

**3285 1906-D MS64+ PCGS. CAC.** The Denver Mint began coinage operations in 1906, when a mintage of 620,250 Liberty double eagles was produced. This Plus-graded Choice example displays sharply detailed design elements and well-preserved orange-gold surfaces that radiate vibrant mint luster and outstanding eye appeal. PCGS has graded 16 numerically finer examples (6/18). NGC ID# 26D5, PCGS# 9050

## PROOF LIBERTY DOUBLE EAGLE

1892 Twenty Dollar Liberty, PR62 Ultra Cameo  
Only a Couple of Dozen Pieces Believed Known

- 3286** 1892 PR62 Ultra Cameo NGC. An intricately struck apricot-gold specimen, the devices display strong contrast with the mirrored fields. Wispy slide marks in the fields determine the grade. The 1892 is a noted rarity within the Liberty double eagle series. Just 93 proofs were struck in addition to only 4,430 business strikes, far fewer than sufficient to satisfy the many collectors of the series. Undoubtedly, a large number of the proof production was eventually spent or even melted, since proof double eagles did not carry a significant numismatic premium above face until well into the twentieth century. NGC has certified a mere 15 proof 1892 double eagles in all grades. Census: 1 in 62 Ultra Cameo, 9 finer (5/18).  
*Ex: Long Beach Signature (Heritage, 2/2005), lot 9427, where it brought \$26,450; Long Beach Signature (Heritage, 6/2005), lot 8159, where it brought \$26,450 again.*  
**From The Kadison Family Collection.** NGC ID# 26ED, PCGS# 99108

## HIGH RELIEF DOUBLE EAGLES

1907 High Relief Double Eagle, AU55  
Wire Rim, Only Minor Signs of Circulation

- 3287** 1907 High Relief, Wire Rim AU55 PCGS. The Wire Rim (or fin) is scarcely visible on the reverse and only slightly more obvious along the upper-obverse edge. Perhaps 80% of the High Relief mintage shows the feature, which was undesirable to Mint personnel and not solved until late in the year. Banks and the economic community claimed the Wire Rim interfered with stacking and counting procedures.  
This example either saw brief circulation or, more likely, was the pocket piece of a dignitary or privileged owner. The satiny, well-struck surfaces show a few marks and light abrasions, yet mint luster remains and attractive medium-gold color is tinged with olive-gold patina. This pleasing About Uncirculated example is an ideal find for the astute bidder seeking a splendid High Relief at an equally attractive price level, although many contenders are expected for the chance to own this Choice example. NGC ID# 26F2, PCGS# 9135

1907 Saint-Gaudens Twenty, MS63  
High Relief, Wire Rim

**3288 1907 High Relief, Wire Rim MS63 PCGS Secure.** The 1907 Saint-Gaudens High Relief double eagle is always in demand because of its limited mintage (12,367 pieces) and the acknowledged beauty of its design. This coin shows the Wire Rim feature often seen on the coins from early deliveries, caused by metal being extruded between the collar and the die when the coins were struck. The Wire Rim was considered a defect by the economic community (thereby making it a Mint problem as well), as it prevented the coins from stacking properly for counting purposes. Mint personnel worked hard to eliminate this offending feature, and finally succeeded in producing a Flat Rim version of the coin by adjusting the dimensions and upset angle of the planchet. Today, collectors prize the Wire Rim variant for its novelty.

The central design elements of this impressive Select example display sharp three-dimensional detail, as always, and the vivid orange-gold surfaces are lightly marked. Vibrant mint luster radiates from both sides and eye appeal is outstanding. NGC ID# 26F2, PCGS# 9135

SAINT-GAUDENS DOUBLE EAGLES

1908-S Double Eagle, Lovely MS61+  
Lowest Mintage in the Series

**3289 1908-S MS61+ NGC.** Roger Burdette provides a survival estimate of 1,500 coins for this challenging issue, which claims the lowest mintage in the Saint-Gaudens series (22,000 coins struck). The vast majority of those pieces survive in XF-AU grades, but examples are also obtainable through MS62. This high-end MS61 representative features the expected number of bagmarks but is surprisingly lustrous and well-struck. Lovely eye appeal for the grade. NGC ID# 26FA, PCGS# 9149

1924-S Twenty Dollar, MS63+  
Rarely Offered CAC Example

**3290 1924-S MS63+ NGC. CAC.** Although the 1924-S double eagle comes from a mintage of nearly 3 million coins, attractive Uncirculated survivors are elusive. Roger Burdette, in *Saint-Gaudens Double Eagles*, reasons that all but 250,000 coins were likely melted in the mid-1930s. Most survivors today are lightly circulated or bagmarked. A few high-end coins likely were acquired from the San Francisco Mint in 1924 or are leftover pyx coins from Philadelphia. This Plus-graded, CAC-approved Select example displays a bold strike and satiny rose-gold mint luster. The fields are surprisingly clean for the grade, with light abrasions mainly evident on the devices. CAC: 15 in 63, 23 finer (5/18). NGC ID# 26G9, PCGS# 9179

1924-S Twenty Dollar, MS65  
A Major Condition Rarity  
Only One Coin Finer at PCGS

**3291 1924-S MS65 PCGS Secure.** The 1924-S Saint-Gaudens double eagle claims a mintage of more than 2.9 million pieces, but the issue is scarce in all grades in today's market, and coins at the Gem level are major rarities. Most of the large mintage was melted after the Gold Recall of 1933, rendering the official production figures irrelevant. In fact, during the decade of the 1940s, the 1924-S was regarded as the rarest date of the series, with prominent coin dealers like B. Max Mehl and Abe Kosoff estimating the surviving population at just 3-6 pieces. Fortunately for present-day collectors, a number of coins were discovered in European banks, beginning in the 1950s, causing the 1924-S and many other double eagle issues to become more available. Currently, PCGS and NGC combined have certified more than 1,000 coins in all grades, but that total undoubtedly includes many duplicate submissions.

On the other hand, when collectors seek a truly high-quality example of the 1924-S, they find the situation has changed little from the early days of the 1940s. The coins found in European holdings were subjected to the rigors of transport and storage in bags with other large gold coins. Few examples escaped without significant surface marks, and the great majority are in lower Uncirculated grades, below MS64. At the Gem level, the same handful of pristine survivors that were in the hands of collectors in the 1940s constitute the available supply today. PCGS has graded only seven coins in MS65, with a single piece finer at MS67 (5/18). Even these small totals probably include some resubmissions and crossovers.

The present coin is a spectacular Gem, with well-detailed design elements and vibrant mint luster. The light orange-gold surfaces display attractive rose highlights, and only the most minor signs of contact are evident. As in the historic days of the 1940s, specimens of this quality are seldom encountered. NGC ID# 26G9, PCGS# 9179

1925-D Double Eagle, MS64  
Few Known Finer

**3292 1925-D MS64 NGC.** A radiant cartwheel effect delivers hints of rose and mint-green throughout otherwise yellow-gold and peach luster. The strike is sharp, and only light abrasions limit the grade. The 1925-D double eagle was heavily melted in the mid-1930s under President Roosevelt's executive gold recall order. Surviving Mint State coins largely reside in MS62 to MS64, after which there is a dramatic fall-off in availability. NGC and PCGS combined report only 16 Gem or finer 1925-D double eagles, which make infrequent auction appearances for prices well above \$50,000. For a quality collection of Saint-Gaudens double eagles, it is difficult to beat the combination of eye appeal and value that the present Choice example offers. Census: 88 in 64 (3 in 64+, 2 in 64 ★), 10 finer (6/18). NGC ID# 26GB, PCGS# 9181

1926-D Twenty Dollar, MS61  
Heavily Melted Denver Issue

**3293 1926-D MS61 PCGS.** Most of the 1926-D double eagles struck were put into storage and later melted in the mid-1930s. According to research by Roger Burdette in *Saint-Gaudens Double Eagles*, small amounts of this issue found their way into foreign trade shipments but most of the coins available to the public would have come from the Mint Cashier or leftover pyx coins in Philadelphia. The Cashier would have had a maximum of 694 coins of this date and mint on hand for distribution.

These factors translate to a survivorship of 1926-D twenties that is estimated at 600 coins, many of which have been repatriated from European holdings. This Denver issue is elusive in all Mint State grades and is highly sought-after. Well-struck design elements and rich orange-gold luster are the hallmarks of this MS61 coin. Scattered abrasions are as expected for the grade. NGC ID# 26GE, PCGS# 9184

**1927-S Double Eagle, MS62+  
Scarce Late-Date Issue  
About 300 Coins Known**

- 3294 1927-S MS62+ NGC.** The 1927-S is a great rarity in the Saint-Gaudens double eagle series. Production ran from January 5 to October 31, 1927 and totaled more than 3.1 million coins. A couple hundred examples were made available, but the rest were put into storage and nearly all were held there until the Gold Recall of 1933. The 300 or so coins we know of today are likely from coins that were paid out at the time of issue and those that turned up in European holdings in recent decades. Definition is good on this frosty Mint State example. Softness appears on the Capitol and the eagle's talons, but it hardly detracts from the radiant mint luster that swirls over rich yellow-gold surfaces. The only noteworthy mark occurs under Liberty's right (facing) arm. Census: 37 in 62 (3 in 62+), 39 finer (6/18). NGC ID# 26GJ, PCGS# 9188

**COMMEMORATIVE SILVER**

**1936 Wisconsin Territorial Half Dollar  
CAC-Approved MS68+  
A Great Rarity This Fine**

- 3295 1936 Wisconsin MS68+ NGC. CAC.** Although distribution was minimal (25,015 coins), the Wisconsin Territorial Centennial half dollar is usually available through MS67. In MS68, however, this issue becomes scarce, and CAC-approved coins are seldom offered. This Plus-graded CAC coin is second to only one MS69 piece at NGC and PCGS combined, and it shows virtually flawless satin luster cast in lovely orange-gold, lilac, and lemon-yellow hues. A beautiful example in all respects. Census: 47 in 68 (4 in 68+, 7 in 68 ★, 1 in 68+★), 1 finer. CAC: 26 in 68, 0 finer (5/18). NGC ID# BYKU, PCGS# 9447

## COMMEMORATIVE GOLD

# 1915-S Pan-Pac Octagonal Fifty, MS62

## Robert Aitken's Numismatic Masterpiece

### 3296 1915-S Panama-Pacific 50 Dollar Octagonal MS62 PCGS.

The Panama-Pacific Exposition was larger and more prestigious than any previous major fair held in America. The occasion of the event was the completion of the Panama Canal, and the exposition also served to celebrate the rebirth of San Francisco after a devastating earthquake and fire in 1906. Moreover, the series of commemorative coins issued for the Pan-Pac Exposition not only surpassed those of previous expositions in number but also in artistic merit and numismatic significance. Art was a central theme of the Pan-Pac Exposition, and great care was taken in selecting appropriate designs for the commemorative coins, which included four denominations in five different types. The authorizing legislation read in part:

"The words, devices, and designs upon said coins shall be determined and prescribed by the Secretary of the Treasury, and all provisions of law relative to the coinage and legal-tender value of all other gold and silver coins shall be applicable to the coins issued under and in accordance with the provisions of this Act; and one-half of the issue of \$50 gold coins herein authorized shall be similar in shape to the octagonal \$50 gold pieces issued in California in eighteen hundred and fifty-one; and the entire issue of said \$50, \$2.50, and \$1 coins herein authorized shall be sold and delivered by the Secretary of the Treasury to the Panama-Pacific International Exposition Company at par, under rules and regulations and in amounts to be prescribed by him."

From the beginning, Robert Aitken's design for the fifty dollar gold piece was viewed with moderate enthusiasm by the Commission of Fine Arts, but Treasury Secretary William McAdoo was only satisfied with the work after Aitken made minor adjustments that included the removal of a spider web element in the design that McAdoo believed was "not accepted as a symbol of industry, if that was the artist's meaning, but the contrary." Aitken's use of Minerva, goddess of wisdom and agriculture, and her owl, a symbol of wisdom, along with a Roman numeral date, recalled the classic designs of ancient Greek coinage and art, which heavily influenced much of the art and architecture throughout the Exposition grounds.

As the Act of January 16, 1915, dictated, the fifty dollar gold piece was issued in two varieties — one round, the other octagonal, being modeled after the "slugs" struck by the U.S. Assay Office in San Francisco during the California Gold Rush. Aitken prepared only one design for both varieties, a decision that is generally attributed to the swiftness with which the Mint sought to have the coins in production. However, on the octagonal version, in the angles created around the border by the unique planchet shape, Aitken placed swimming dolphins, which were described as representing the uninterrupted water route made possible by the Panama Canal.

Coinage of the fifty dollar gold pieces was limited to 1,500 examples of each variety, of which only 483 round and 645 octagonal pieces were distributed. The remaining coins were melted after the close of the Exposition. Surviving examples of either variety are highly sought-after today and represent the crowning acquisition of any classic commemorative coin collector. This octagonal piece, although graded only MS62, delivers eye appeal suggestive of a higher grade. Both sides are straw-gold and luminous, and only under a loupe do faint lines and few marks become noticeable. Truly an outstanding example of this storied and important classic commemorative issue.

**From The Kadison Family Collection.** NGC ID# BYHP, PCGS# 7452

## TERRITORIAL GOLD

1852 Humbert Ten Dollar, AU58  
K-10a, Extensive Rim Crumbling

**3297** 1852 Humbert Ten Dollar AU58 NGC. K-10a, Low R.4. Struck from a shattered and rusted obverse die that was used far past its expiration date. The U in UNITED resembles II, and there is a heavy die crack that underlines that same word. Pleasing green-gold surfaces have minor abrasions as so often seen on these pieces. The central obverse and reverse designs display some strike weakness. Augustus Humbert operated the provisional mint in San Francisco under the direction of Moffat & Co., and many numismatists believe that these coins should now be considered part of the regular United States gold coinage series. Listed on page 398 of the 2019 *Guide Book*.

*From The Kadison Family Collection.* NGC ID# ANGG, PCGS# 10187

1853 Assay Office Twenty, XF40  
Rare 884 THOUS., K-17 Variety

**3298** 1853 Assay Office Twenty Dollar, 884 Thous. XF40 PCGS. K-17, Low R.7. The United States Assay Office of Gold only struck twenty dollar gold coins of 884 fineness (K-17) between February 23 and March 1, 1853, because the Treasury Department instructed the customs collector to refuse any coins of less than 900 fineness for customs duties. Many of the coins that were struck were subsequently melted and reissued with the required fineness (K-18) later in the year. Accordingly, the K-17, .884 THOUS. twenty dollar gold piece is a rare issue in today's market.

The present coin is a pleasing XF example, with relatively lightly abraded orange and reddish-gold surfaces that retain traces of original mint luster. Light wear shows on the well-detailed design elements and the overall presentation is attractive. Listed on page 399 of the 2019 *Guide Book*. Population: 2 in 40, 15 finer (6/18). *Ex: Central States Signature (Heritage, 4/2015), lot 5522, which realized \$13,512.50.* NGC ID# ANHC, PCGS# 10010

1853 Assay Office Ten Dollar, AU53  
900 Thous., K-18

**3299** 1853 Assay Office Twenty Dollar, 900 Thous. AU53 NGC. K-18, R.2. This olive-gold U.S. Assay Office Twenty exhibits generous amounts of rose-tinged remaining luster. Only lightly circulated, the shield lines and the arrows are still distinct. A couple of minor rim nicks and handling marks on the reverse, but these are less than usual for the grade. The Kagin reference states that about 2.5 million pieces were struck, but the vast majority of these coins were presumably melted over the years. Listed on page 399 of the 2019 *Guide Book*.

*From The Kadison Family Collection.* NGC ID# ANHD, PCGS# 10013

## COINS OF HAWAII

1883 Hawaii Dime, PR66 ★ Cameo  
Among Finest Certified

**3300** 1883 Hawaii PR66 ★ Cameo NGC. As a business strike, the 1883 Hawaii umi keneta or one dime is a scarce single-year type with a mintage of 250,000 pieces, though most of the production was eventually recalled and melted. As a proof, the issue is a great rarity, since only 26 proof sets (1883 Hawaii dime through dollar) were struck. The present lot is a high-grade specimen featuring beautiful peripheral navy-blue and plum-red patina. The portrait, wreath, and crown are frosty and contrast with the glassy and practically pristine fields. As of (5/18), neither service has certified any pieces above the PR66 level. PCGS has certified one as PR66 and another as PR66 Cameo. The NGC Census shows one as PR66+ Cameo and the present PR66 ★ Cameo. PCGS# 544157 Base PCGS# 10981

*End of Session One*

# SESSION TWO

## COLONIALS

1722 Rosa Americana Penny, MS62 Brown  
GEORGIUS, UTILE, Martin 2.8-D.1

- 3301** 1722 Rosa Americana Penny, UTILE, MS62 Brown NGC. M. 2.8-D.1, W-1268, R.5. A sharply struck and slightly granular mahogany-brown piece that retains glimpses of its original lighter brassy olive-tan color. A faint, thin mark on the field near the forehead is mentioned as an identifier. Listed on page 54 of the 2019 *Guide Book*. Census: 2 in 62 Brown, 1 finer (5/18).  
*Ex: Dallas Signature (Heritage, 10/2006), lot 3, which realized \$3,737.50.*  
*From The Kadison Family Collection.* NGC ID# 2ASP, PCGS# 113

- 3302** 1723 Hibernia Halfpenny MS65 Red and Brown NGC. M. 4.74-Gb.11, W-13120, R.4. 11 strings, two reverse stops. The 3 in the date is broad, and the end of the frond aligns with the right edge of the N in HIBERNIA. Lustrous Red and Brown surfaces show extensive die rust (as made) and the strike is slightly soft. However, the preservation of this three-centuries-old Gem is outstanding. Originally produced for circulation in Ireland by William Wood, these halfpennies ended up being used in the American colonies. Listed on page 57 of the 2019 *Guide Book*.  
*From The Kadison Family Collection.* NGC ID# 2ATD, PCGS# 181

- 3303** 1760 Hibernia-Voce Populi Halfpenny MS63 Brown NGC. N. 4, Z. 2-A, W-1382X, R.1. The 1 in the date resembles a J, and heavy die crumbling occurs around POPULI. The surfaces are rich mahogany-brown and slightly flowlined. Minor softness appears on the highest points of the design, but this Select survivor is largely bold. The eye appeal is wonderful. Listed on page 61 of the 2019 *Guide Book*.  
*From The Kadison Family Collection.* NGC ID# 2AUC, PCGS# 262

1760 No P Voce Populi Halfpenny  
MS63 Brown, Zelinka 3-C  
Breen Plate Coin

- 3304** 1760 Hibernia-Voce Populi Halfpenny, No P, MS63 Brown NGC. N. 8, Z. 3-C, W-1382X, R.6. Designated on the NGC insert as the "Breen Plate" coin, and indeed it is a match for the photo pair beneath Breen-222 in his 1988 *Encyclopedia*. A beautiful golden-brown example with refreshingly undisturbed surfaces. The major devices are not fully struck, as is the rule for the type. The reverse die is aligned a few degrees off center toward 12 o'clock, and a few letters in HIBERNIA are partially off the flan. Listed on page 61 of the 2019 *Guide Book*.  
*From The Kadison Family Collection.* NGC ID# 2AUC, PCGS# 262

- 3305** 1767-A French Colonies Copper Sou AU55 PCGS. No RF countermark. Examples of the 1767-A copper sou without a countermark are much scarcer. They were issued at the time of production for circulation in the French colonies, including the Caribbean, unlike countermarked examples, which were dispersed sometime after 1793. This glossy brown Choice AU piece is lightly marked at the upper-left obverse. The reverse is in a late state with peripheral elements drawn to the rims. Listed on page 65 of the 2019 *Guide Book*.  
*From The Kadison Family Collection.* NGC ID# 2AYM, PCGS# 158651

- 3306** 1766 Pitt Halfpenny AU50 PCGS. Betts-519, W-8350, R.3. The Pitt halfpenny was struck to celebrate the repeal of the Stamp Act, detested by merchants on both sides of the Atlantic. William Pitt the Elder was the leading proponent of repeal. This is a handsome and well-defined mahogany-brown representative with attractive eye appeal. Struck from lightly clashed dies. Listed on page 62 of the 2019 *Guide Book*.  
*Ex: Long Beach Signature (Heritage, 9/2005), lot 125; Long Beach Signature (Heritage, 9/2006), lot 12, which realized \$5,750.*  
*From The Kadison Family Collection.* NGC ID# 2AUH, PCGS# 236

- 3307** 1773 Virginia Halfpenny, Period, MS64 Red PCGS Secure. N. 21-N, W-1545, High R.4. A scarcer die marriage, best distinguished from Newman 20-N by a smaller space between the VS in GEORGIVS. Full Red Virginia halfpennies are scarce. This peach-gold Choice copper shows a hint of gunmetal-gray on the high points of King George III. The central reverse displays slight flan granularity, as coined, but post-strike contact is virtually absent. Listed on page 57 of the 2019 *Guide Book*. Population: 39 in 64 Red, 2 finer (6/18). NGC ID# 2ATK, PCGS# 242

**3308** 1773 Virginia Halfpenny, No Period MS63 Brown PCGS. N. 6-X, W-1610, R.3. Eight harpstrings. This smooth chocolate-brown halfpenny is void of significant marks. The strike is a touch incomplete on the center of the shield but most other design details are clear. The sole exception is the left leg of the standing lion. Listed on page 57 of the 2019 *Guide Book*.  
*Ex:* Long Beach Signature (Heritage, 9/2005), lot 138.  
*From The Kadison Family Collection.* NGC ID# 2ATL, PCGS# 243

**3309** 1773 Virginia Halfpenny, No Period MS64 Red and Brown PCGS. N. 3-F, W-1455, High R.4. Seven harpstrings. A fully struck near-Gem with pleasing semireflective fields. Orange-red color illuminates the borders and outlines the devices, while the centers are toned in chocolate-brown hues. There are a couple of minor marks on the face, but they are unimportant. Great eye appeal. Listed on page 57 of the 2019 *Guide Book*.  
*Ex:* Long Beach Signature (Heritage, 9/2005), lot 130.  
*From The Kadison Family Collection.* NGC ID# 2ATL, PCGS# 244

**3310** 1787 Massachusetts Half Cent AU50 PCGS. Ryder 2-A, W-5910, R.3. The lower right star point is weak, the 78 in the date is widely spaced, and the H is close to and well-centered over the eagle's head. Rich mahogany-brown surfaces are profoundly glossy and incredibly smooth. Blending over the high points is minimal relative to the strength of the overall design. Listed on page 71 of the 2019 *Guide Book*.  
*From The Kadison Family Collection.* NGC ID# 2B22, PCGS# 296

**3311** 1788 Massachusetts Cent, Period, MS61 Brown NGC. Ryder 1-D, W-6190, R.3. The H is close above the eagle's head, the 1 in the date is high, and 78 is widely spaced. Glimpses of orange-red color outline portions of the eagle and reverse legends, although the surfaces are generally mahogany-brown. Surprisingly free from marks, and void of planchet defects. Listed on page 71 of the 2019 *Guide Book*.  
*Ex:* ANA Signature (Heritage, 8/2007), lot 19.  
*From The Kadison Family Collection.* NGC ID# 2WNJ, PCGS# 311

**1787 Connecticut Copper, MS62 Brown  
 Miller 4-L, 'Horned Bust' Variety**

**3312** 1787 Connecticut Copper, Horned Bust, MS62 Brown PCGS. M. 4-L, W-2810, R.1. The "Horned Bust" variety is common in VF but rare in Mint State. This is a mid-to-late die state with a banana-shaped die break or "horn" attached to the mailed bust. Shimmering luster emerges from the smooth medium brown surfaces, which exhibit ice-blue tints when rotated beneath a light. The reverse is slightly misaligned toward 4 o'clock, but the date is virtually complete. Listed on page 73 of the 2019 *Guide Book*. Population: 2 in 62 Brown, 0 finer (5/18).  
*Ex:* Milwaukee ANA Signature (Heritage, 8/2007), lot 21, which realized \$3,737.50.  
*From The Kadison Family Collection.* NGC ID# 2B2T, PCGS# 364

**1787 Connecticut Copper, MS62 Brown  
 ETLIR, Miller 30-hh.1  
 Ex: John J. Ford, Jr.**

**3313** 1787 Connecticut Copper, ETLIR, MS62 Brown NGC. M. 30-hh.1, W-3175, R.2. *Ex:* Ford Collection. 136.3 grains, per Ford catalog description. This chocolate-brown representative shimmers with luster, and the devices exhibit bold detail. The planchet is problem-free, and the reverse appears unabraded. Good centering with nearly complete legends, the sole exception is the base of the date, which is partly off the flan. A loupe locates minor faded marks on the neck and in the upper-left obverse field. Listed on page 74 of the 2019 *Guide Book*. Census: 4 in 62 Brown, 2 finer (5/18).  
*Ex:* Thomas Elder, 10/1915, lot 373; John J. Ford, Jr., Part IX (Stack's, 5/2005), lot 334; Long Beach Signature (Heritage, 5/2008), lot 1941, which realized \$6,325.  
*From The Kadison Family Collection.* NGC ID# 2B36, PCGS# 391

**3314** Nova Constellatio Copper, Blunt Rays XF45 PCGS. Crosby 3-C, W-1875, R.3. Crosby 3-C features spaced date digits and an actual 1 in the date, rather than an I. The lower rays point to the N and just to the right of the A in NOVA. The coppers were struck in Birmingham, England for circulation in America. This lightly circulated, deep chocolate-brown survivor retains strong definition and shows a couple of small marks in the left obverse field near the border but is otherwise smooth. Listed on page 66 of the 2019 *Guide Book*.  
*From The Kadison Family Collection.* NGC ID# 2AYZ, PCGS# 807

**3315** (1792-94) Kentucky Token, LANCASTER Edge, MS64 Red PCGS. Breen-1156, W-8810, R.5. The majority of Kentucky tokens have a Plain Edge, but this is an example of the rare LANCASTER edge type. Copper-orange color is impressive, and both sides are remarkably preserved with minimal carbon. The legends are bold, while a touch of softness occurs on the scroll and the reverse stars. Housed in a green label holder. Listed on page 87 of the 2019 *Guide Book*.  
*From The Kadison Family Collection.* NGC ID# AUBN, PCGS# 625

**1795 Talbot, Allum & Lee Cent  
Early American Store Card  
MS65 Brown, W-8620**

- 3316** 1795 Talbot, Allum, & Lee Cent MS65 Brown NGC. Fuld-1, W-8620, R.1. The 1794 and 1795 tokens for New York City merchants Talbot, Allum & Lee were struck in Birmingham, England by Peter Kempson & Co. Although four 1794-dated varieties are known, just one 1795 die pair is confirmed. This lustrous sea-green and mahogany-brown Gem is well-struck and practically void of carbon. Listed on page 88 of the 2019 *Guide Book*. Census: 5 in 65 Brown, 0 finer (5/18).  
*From The Kadison Family Collection.* NGC ID# 2B63, PCGS# 640

- 3317** 1783 Washington & Independence Cent, Draped Bust, No Button, Copper Restrike, Plain Edge PR66 Brown PCGS. Baker-3C, Vlack 14-J, W-10310, Musante GW-106B, Low R.7. The obverse features pale blue and plum-violet colors when rotated beneath a light, while rose, powder-blue, and olive-gold hues grace the reverse. This sharply struck Premium Gem is exceptionally preserved. A few freckles of die rust are as made. British coin dealer W. J. Taylor struck this issue around 1860. Listed on page 92 of the 2019 *Guide Book*.  
*Ex:* ANA Signature (Heritage, 7/2005), lot 5037.  
*From The Kadison Family Collection.* NGC ID# 2B6T, PCGS# 682

**1783 Washington Draped Bust Cent  
Silver Restrike, PR63 Cameo  
Baker-3A, Engrailed Edge**

- 3318** 1783 Washington Draped Bust Cent, Engrailed Edge, Silver Restrike, PR63 Cameo PCGS. Baker-3A, Vlack 17-L, W-10380, Musante GW-107, R.5. Musante (2016) states that GW-107 was "issued by Australian medalist W.J. Taylor sometime in the 1860s." Certainly, it is the best-made variety in the Washington & Independence series. Silver proofs are much rarer than their copper counterparts from the same dies. Attractive electric-blue and chestnut colors endow this sharply struck example. Icy devices contrast with glassy fields. Listed on page 92 of the 2019 *Guide Book*.  
*Ex:* Palm Beach Signature (Heritage, 3/2006), lot 46, which realized \$3,737.50.  
*From The Kadison Family Collection.* NGC ID# 2B6U, PCGS# 388554

- 3319** 1791 Washington Large Eagle Cent MS64 Brown NGC. Baker-15, W-10610, Musante GW-15, R.2. Mint luster and original red color emerge from the protected areas of the design. The exposed fields and well-struck motifs are glossy brown, delivering pleasing eye appeal. The eagle is especially sharp, and there is only a single tick across the vertical shield lines. A lovely example of this privately minted English product. Listed on page 93 of the 2019 *Guide Book*.

*From The Kadison Family Collection.* NGC ID# 2B6Z, PCGS# 702

- 3320** 1791 Washington Small Eagle Cent MS61 Brown NGC. Baker-16, W-10630, Musante GW-17, R.3. Rich chocolate-brown color adorns each side. Minor verdigris occurs on the arrowheads on the reverse, and a few trivial contact marks are noted under close inspection. With that in mind, this remains a pleasing, well-detailed representative. Listed on page 93 of the 2019 *Guide Book*.  
*Ex:* ANA Signature (Heritage, 7/2005), lot 5042.

*From The Kadison Family Collection.* NGC ID# 2B73, PCGS# 705

**1791 Washington Cent, MS64 Brown  
Small Eagle, Baker-16**

- 3321** 1791 Washington Small Eagle Cent MS64 Brown PCGS. Baker-16, W-10630, Musante GW-17, R.3 The 1791 Large and Small Eagle Washington cents were imported to America from England, and inspired the rare 1792 Perkins and Getz varieties. This is a particularly nice Small Eagle cent that boasts a sharp strike and smooth chocolate-brown surfaces. A faint streak in the right obverse field provides the sole imperfection. Listed on page 93 of the 2019 *Guide Book*. Population: 27 in 64 (1 in 64+) Brown, 13 finer (5/18).

*From The Kadison Family Collection.* NGC ID# 2B73, PCGS# 705

- 3322** 1795 Washington Grate Halfpenny, Large Buttons, Reeded Edge, MS64 Brown NGC. Baker-29B, W-10955, Musante GW-49, R.2. Although most of the present Choice Washington copper is chocolate-brown, the initial orange-red color lingers within the legends. The dies are moderately rotated, but the strike is sharp and the planchet was well-made, aside from a small cluster of thin lines (as struck) near Washington's shoulder truncation. Listed on page 95 of the 2019 *Guide Book*.

*From The Kadison Family Collection.* NGC ID# 2B7M, PCGS# 746

## HALF CENTS

- 3323** 1794 Normal Head, C-4a, B-6b, R.3, Fine 15 PCGS Secure. Manley Die State 2.0. The obverse is lightly clashed but shows no sign of the bulge left of the date that appears later. Minimal roughness occurs over smooth chocolate-brown surfaces with intermittent steel accents. The motifs show wear from normal circulation but retain pleasing detail. Variety C-4a is distinguished from C-4b by its Small Letters edge. Our EAC grade VG10. NGC ID# 2223, PCGS# 35036 Base PCGS# 35015

- 3324** 1795 Plain Edge, Punctuated Date, C-4, B-4, R.3, VF20 PCGS. Manley Die State 2.0. The Cohen-4 variety is identified by the comma-like raised metal between the 17 in the date, and the leaf pair below the C in AMERICA. This Very Fine example is at the upper end of what is normally available for this issue. The denomination is weak, but the devices are otherwise well-detailed over steel and golden-brown surfaces. Our EAC grade Fine 12.  
*From The Kadison Family Collection.* NGC ID# 2225, PCGS# 35080 Base PCGS# 1012

**1806 Half Cent, MS63 Brown  
Large 6, Stems, C-4**

- 3325** 1806 Large 6, Stems, C-4, B-4, R.1, MS63 Brown PCGS. CAC. Manley Die State 2.0. A distinctive die marriage due to the oversized 6 in the date, from a punch likely intended for half dollars. The reverse is noteworthy for a lengthy die line from a leaf tip toward the R in AMERICA. A splendid chocolate-brown example with forest-green undertones and plentiful pockets of mint Red. Marks are limited to a vertical tick on the forehead. Certified in a green-label holder. Our EAC grade AU55. NGC ID# 222J, PCGS# 35200 Base PCGS# 1099

- 3326** 1833 C-1, B-1, R.1, MS64 Red and Brown PCGS Secure. CAC. Manley Die State 1.0. Fire-red luster occupies a majority of the obverse and close to half of the reverse. The open fields and high points are brown. No marks are remotely consequential. Lustrous and sharply struck with a couple of unobtrusive spots on Liberty's hair. Our EAC grade MS62. NGC ID# 4FRS, PCGS# 35283 Base PCGS# 1163

**1833 Half Cent, MS64 Red  
C-1, Old Green-Label Holder**

- 3327** 1833 C-1, B-1, R.1, MS64 Red PCGS. Manley Die State 2.0. The 1833 has a relatively low *Guide Book* mintage of 120,000 pieces. The date is available in Mint State, although full Red examples are rare. The present lustrous near-Gem is predominantly orange-gold, with the cheek and open fields slightly mellowed toward steel-gray. The strike is complete, marks are absent, and carbon is minimal. Encapsulated in an old green-label holder. Our EAC grade MS64. Population: 12 in 64 Red, 2 finer (5/18).  
*From The Kadison Family Collection.* PCGS# 35284 Base PCGS# 1164

- 3328** 1835 C-1, B-1, R.1, MS64 Red and Brown NGC. The leaf extends to the right edge of the I in UNITED. The border areas glow with effusive copper-orange color around delicate golden-brown interiors. Strike detail is uniformly strong, and there is minimal evidence of carbon over the well-preserved surfaces. The reverse is rotated slightly, and faint remnants of a fingerprint appear in the left-obverse field. Our EAC grade MS63.  
*From The Kadison Family Collection.* NGC ID# 5LLC, PCGS# 35289 Base PCGS# 1169

- 3329** 1849 Large Date, C-1, B-4, R.2, MS64 Brown PCGS. Glimmers of mint Red reside in the design crevices, but most of this sharply struck Choice half cent is medium brown. Uncommonly free from marks, and carbon is equally minimal. A moderately prooflike example of the first business date of the Braided Hair design. Our EAC grade MS62. NGC ID# 26Y5, PCGS# 35318 Base PCGS# 1218

**LARGE CENTS**

- 3330** 1793 Chain, AMERI., S-1, B-1, R.4 — Environmental Damage — PCGS Genuine. Poor / Fair Details. A granular walnut-brown representative of the introductory AMERI variety. Marks are limited to a couple of hair-thin marks on Liberty's neck. UNITED STATES and LIBERTY are readable. Liberty's profile and the chain are nicely outlined. Our EAC grade Poor 1.  
*Ex: Shawn Yancey, 10/2007.*

**1793 S-2, B-2 Cent, Fair 2  
Chain, AMERICA**

- 3331** 1793 Chain, AMERICA, S-2, B-2, High R.4, Fair 2 PCGS. A glass reveals the microscopic surface granularity that is found on nearly all low-grade 1793 cents, but this piece has a smooth look to the naked eye, with intermingled light olive and blue-steel surfaces. The head and chain are fully outlined with other details indistinct. Our EAC grade Fair 2. NGC ID# 223F, PCGS# 35435 Base PCGS# 1341

- 3332** 1793 Chain, AMERICA, S-3, B-4, Low R.3, Poor 1 PCGS Secure. The consignor writes "It's the S-3; at least I'm willing to say so with 70% certainty." The chain and portrait are apparent, but the legends are mostly absent, with the except of a faint ONE CENT. The medium brown surfaces are lightly granular, and we note several parallel reverse pinscratches, one of which is deeper than the others. Our EAC grade Poor 1.  
*Ex: Steve Ellsworth, 7/2003.* NGC ID# 223F, PCGS# 35438 Base PCGS# 1341

**1793 S-3, B-4 Cent, Fair 2  
Chain, AMERICA**

- 3333** 1793 Chain, AMERICA, S-3, B-4, Low R.3, Fair 2 PCGS. LIBERTY is full, the head is partially outlined, traces of the date remain visible, the chain and denomination are complete, and the legend is mostly present. The reverse has a rim bruise at 10:30. Steel-brown fields and lighter brown devices are evident on this lightly corroded Chain cent that retains a good look. Our EAC grade Poor 1. NGC ID# 223F, PCGS# 35438 Base PCGS# 1341

**3334** 1793 Chain, AMERICA, S-3, B-4, Low R.3 — Corrosion — NGC Details. AG. The straight bust line is diagnostic for the Sheldon-3 variety, the usually seen die marriage for this famous first-year Chain cent. Most of the detail on this example is worn away or obscured by corrosion. Liberty's profile remains visible, the links in the chain are clear, and parts of the central denomination are readable. Typically rough surfaces show a mix of steel and reddish-brown color. Our EAC grade Poor 1. NGC ID# 223F, PCGS# 35438 Base PCGS# 1341

**3335** 1793 Chain, AMERICA, Periods, S-4, B-5, R.3 — Environmental Damage — PCGS Genuine. Poor / Fair Details. The chain is mostly present, and Liberty's profile is apparent. Portions of CENT are legible. The medium brown surfaces are granular, and the reverse has a couple of short, narrow horizontal depressions. Our EAC grade Poor 1.  
*Purchased from Tom Deck, 4/2006.*

1793 S-4, B-5 Cent, Good Details  
Chain, America, Periods

**3336** 1793 Chain, AMERICA, Periods, S-4, B-5, R.3 — Environmental Damage — PCGS Genuine. Good Details. The date and LIBERTY are visible with an outlined head, while the reverse has a bold chain and denomination with weak but visible peripheral lettering. The surfaces of this olive-brown cent are moderately porous. Our EAC grade AG3.

**3337** 1793 Wreath, Vine and Bars Edge, S-6, B-7, R.3 — Damage — PCGS Genuine. VG Detail. The devices are complete with the date and LIBERTY visible. The legend and wreath are fully visible, while the denomination inside the wreath is indistinct. This olive-brown cent has several small rim bumps and surface marks on each side. Our EAC grade AG3.

**3338** 1793 Wreath, Vine and Bars Edge, S-6, B-7, R.3 — Damage — PCGS Genuine. VG Details. Depressions on Liberty's cheek and jaw, on the N in ONE, above the D in UNITED, and beneath the R in AMERICA correspond to the PCGS designation. The deep gunmetal-gray surfaces are also lightly granular. Nicely detailed, though, with all legends distinct. Our EAC grade AG3.

**3339** 1793 Wreath, Vine and Bars Edge, S-6, B-7, R.3 — Damaged — NGC Details. Fine. A mahogany-brown Wreath cent with stone-gray high points. The surfaces are only moderately granular, but each side displays a few noticeable marks, such as on Liberty's nose and neck, on the bow knot, and near ONE CENT. An affordable example of a scarce first-year, single-year type. Our EAC grade AG3.

**3340** 1793 Wreath, Vine and Bars Edge, S-8, B-13, R.3, AG3 PCGS Secure. A large triangular wreath bow helps attribute this deep brown type coin. The surfaces are granular and lack relevant abrasions. When held at arm's length, most of the legends are evident, although CENT and the date are faint. Our EAC grade Fair 2.  
*Ex: Tom Reynolds, 8/2003. NGC ID# 223H, PCGS# 35456 Base PCGS# 1347*

**3341** 1793 Wreath, Lettered Edge, S-11b, B-16b, R.4 — Cleaned — PCGS Genuine Secure. VG Details. LIBERTY and the trefoil are bold, as is a majority of UNITED, AMERICA, and the fraction. Liberty is well-outlined and the eye is distinct. The wear is uneven, due to a moderately off center strike toward 6 o'clock. The tan-brown surfaces are mildly bright, and microgranular near the fraction. A trio of hair-thin marks are noted on the upper portion of the portrait. Our EAC grade AG3.  
*Ex: EAC Sale (3/2002), lot 106; Dan Trollan, 8/2003.*

**3342** 1793 Wreath, Lettered Edge, S-11b, B-16b, R.4 — Excessive Corrosion — PCGS Genuine. VG Details. Close examination reveals considerable remaining detail that is obscured by the heavy corrosion on both sides of this olive-brown Wreath cent. Our EAC grade AG3.

1794 S-18a, B-2a Cent, Fair 2  
Head of 1793

**3343** 1794 Head of 1793, S-18a, B-2a, R.6, Fair 2 PCGS Secure. The Liberty head on the obverse is fully outlined while the date and LIBERTY are obscured on this example. Just enough reverse design detail remains to distinguish between S-18a and S-19a. This piece has the edge style of 1793. The semiglossy surfaces show slight roughness on each side, with a small rim mark at 11 o'clock on the reverse. The surfaces are lightly burnished and toned to medium olive and bluish steel-brown. Our EAC grade Poor 1.  
*Ex: Garry Fitzgerald (1/1987); John D. Wright; EAC Sale (4/2007), lot 14. PCGS# 35510 Base PCGS# 1362*

**3344** 1794 Head of 1794, S-34, B-20, High R.5 — Damage — PCGS Genuine Secure. VG Details. A rim die break above the L in LIBERTY, combined with the die scratch from the left wreath stem, combine to attribute this better Sheldon marriage. A microgranular deep gunmetal-gray cent with several small marks near ONE CENT and the portrait. An edge knock at 5 o'clock provides an identifier. Our EAC grade Good 4.  
*Ex: Chris McCawley, 1/2009.*

**3345** 1794 Head of 1794, S-35, B-21, R.5 — Tooled — PCGS Genuine Secure. VG Details. The biplanar radial obverse crack at 12 o'clock confirms the very scarce Sheldon-35 marriage. This chocolate-brown example has fully readable legends. The surfaces are moderately granular, and the obverse exhibits myriad delicate marks from the removal of verdigris. Our EAC grade Good 4.  
*Ex: Jack Robinson; EAC Sale (4/2002), lot 132.*

**3346** 1794 Head of 1794, S-52, B-44, Low R.6 — Excessive Corrosion — PCGS Genuine. VG Details. The rare S-52 is noted for a closed wreath and a widely spaced 17 in the date. This walnut-brown example is consistently granular, but the legends are generally readable. The obverse is a bit sharper than the reverse. A trivial rim ding on the reverse at 5 o'clock is mentioned as an identifier. Our EAC grade Fair 2.  
*Ex: EAC Sale (5/2011), lot 129.*

**3347** 1796 Liberty Cap, S-85, B-6, Low R.5 — Environmental Damage — PCGS Genuine Secure. VF Details. Breen states that the very scarce S-85 is "usually weak at lower obverse and upper reverse, possibly from axially misaligned dies." On the present example, STATES OF and ONE CENT are lightly brought up. This deep brown example is richly detailed but the surfaces are granular, most notably on Liberty's forehead and upper hair. Our EAC grade VG10.

**1796 Reverse of 1797, NC-1, B-29 Cent, Fair 2**

- 3348 1796 Reverse of 1797, NC-1, B-29, R.6, Fair 2 PCGS Secure.** Grading is always a matter of opinion, but those opinions are quite close on this piece. Noyes grades this example AG3, while Del Bland and Bob Grellman each suggest Fair 2, a grade we agree with. Part of the date and most of LIBERTY are visible on the obverse, with the denomination and most of the legend visible on the reverse. A pleasing and smooth medium to dark brown representative. Our EAC grade Fair 2.  
Ex: Richard V. Punched (6/24/1989); Daniel W. Holmes, Jr. (5/2003); Chris Victor-McCawley (8/29/2008). PCGS# 35873 Base PCGS# 1407

- 3349 1796 Reverse of 1795, NC-2, B-31, R.7 — Damage — PCGS Secure. AG Details.** Incorrectly designated by PCGS as Reverse of 1797. Described in its EAC auction appearance as “seven digs on rev. cause small bulges on obv.” Several light thin marks are also present, but the chocolate-brown surfaces are smooth instead of granular. The portrait is fully outlined, and the top half of the date is clear. The lower-left quarter of the wreath is also visible. Our EAC grade Poor 1.  
Ex: Jim Long; Tom Reynolds; EAC Sale (4/1997), lot 130; M. Scott Barrett; Shawn Yancey.

- 3350 1797 Reverse of 1795, Plain Edge, S-121a, B-3a, Low R.7 — Bent — PCGS Genuine Secure. VG Details.** Incorrectly designated by PCGS as Reverse of 1797. S-121b with a gripped edge is Rarity-3, but the plain edge subvariety S-121a is very rare. The present deep brown cent has unevenly granular surfaces. The surfaces are somewhat wavy, and the central obverse has a flattened appearance. The obverse is fairly sharp, as is MERICA, the fraction, the wreath ribbons, and the U in UNITED. A card from J.R. Grellman is included, confirming the S-121a attribution and stating the grade as Fine 12 Details Damaged, Net Fair 2. Our EAC grade Poor 1.  
Purchased from Mike Iatesta, 1/2006.

- 3351 1797 Reverse of 1797, Stems, NC-2, B-10, R.6 — Environmental Damage — PCGS Genuine Secure. Good Details.** Breen Die State I without a rim die break above D ST. The reverse is very similar to that of NC-3, but the berry opposite the E in UNITED is attached to a leaf tip. This example has mahogany-brown fields and stone-gray high points. Evenly granular, but the sole identifier is a minor reverse rim nick at 12 o'clock. Our EAC grade AG3.  
Purchased from Tom Reynolds, 4/2012.

- 3352 1797 Reverse of 1797, Stems, NC-3, B-11, Low R.6 — Graffiti — PCGS Genuine Secure. VG Details.** The 1 in the denominator is fully west of the fraction bar, and the branch stem is faint beneath the A in STATES. These are the attribution markers for the rare NC-3 variety. This example has sharp legends except for the E in CENT, which is indistinct on all examples of the die marriage. The olive-brown surfaces are evenly granular. A pair of intersecting straight lines on the portrait explains the PCGS designation. Our EAC grade Good 4.  
Ex: Chris Victor-McCawley inventory, December 2006; earlier pedigree given in the Breen cent Encyclopedia as “purchased unattributed from a dealer's stock in 1956 by Walter Breen • Dr. William H. Sheldon, 4/19/1972 • R. E. Naftzger, Jr. • New Netherlands Coin Co. 11/1973: 438 \$350 • Herbert A. Silberman, 11/1977 • Chuck Furjanic, 5/1978 • John D. Wright.”

- 3353 1798 Reverse of 1795, S-156, B-10, High R.5 — Excessive Corrosion — PCGS Genuine Secure. VG Details.** S-155 is the usually encountered Reverse of 1796 marriage, but S-156 has a much narrower date. A walnut-brown representative of this rare Sheldon variety. Both sides are granular, and we note a slight obverse rim knock at 3 o'clock. The date is clear, as is a majority of the reverse legend. Our EAC grade AG3.  
Purchased from Shawn Yancey, 10/2003.

**1799/8 S-188, B-2 Cent, AG3  
Sought-After Key**

- 3354 1799/8 S-188, B-2, R.4, AG3 PCGS Secure.** Sheldon-188 is the only collectible 1799/8 die variety, with the 99 in the date widely spaced and the leaf pair below the I in AMERICA overlapping the wreath stem. Faint outlines appear on the reverse. BERTY, the tops of the date digits, and most of the outline of Liberty's portrait is clear. Deep brown surfaces exhibit slight roughness. The all-important obverse is much sharper than the reverse. Our EAC grade Fair 2 but it should really be graded Good 4 obverse, Basal State 1 reverse. NGC ID# 2247, PCGS# 36131 Base PCGS# 1446

- 3355 1799/8 S-188, B-2, R.4 — Bent — PCGS Genuine. Good Details.** This piece is very slightly bent, and has light corrosion on each side. All of the attribution features are visible on this steel-brown example. Our EAC grade AG3.

- 3356 1799 S-189, B-3, R.2, Fair 2 ANACS.** The upper half of the 799 is readable. Most of LIBERTY is clear, and the reverse legends are partially present. The bust is well outlined, and many leaves in the wreath are distinct. The deep brown surfaces are evenly granular. Marks are insignificant aside from a minor rim bump near the bust tip. Our EAC grade Fair 2. NGC ID# 2246, PCGS# 36140 Base PCGS# 1443

**1799 S-189 Cent, About Good  
Collector Grade Key Date**

- 3357 1799 S-189, B-3, R.2, AG3 PCGS Secure.** The 1799 cent is a famous rarity, and most survivors are well-worn. The present deep brown example is moderately granular but refreshingly unabraded. Wear is even, and the legends are faint but generally readable. The portrait is well-outlined, and a majority of the wreath is apparent. Our EAC grade AG3. NGC ID# 2246, PCGS# 36140 Base PCGS# 1443

**3358 1800/79 Style Two Hair, NC-2, B-11, High R.6 — Environmental Damage — PCGS Genuine Secure. Good Details.** Breen Die State II. The legends are mostly clear, though OF AMERICA and the fraction are faint. An evenly granular example of this rare die pairing. Charcoal-gray with silver-white high points. Graded Good 4 in its 2009 EAC auction appearance. Accompanied by a J.R. Grellman card with details grade Good 5; net grade Good 4 due to light corrosion. Our EAC grade AG3.  
*Ex: 1950s New Haven Collection; William & Linda Zahina, 11/2004; Henry T. Hettger, 8/2005; EAC Sale (4/2009), lot 164; M. Scott Barrett; Tom Reynolds; Shawn Yancey, 4/2012.*

**3359 1800 NC-3, B-16, High R.5 — Excessive Corrosion — PCGS Genuine Secure. Fine Details.** A spike up from the top of the I in AMERICA is the identifier for the desirable NC-3 variety, discovered by Dr. Sheldon in 1947. A granular tan-brown and deep steel-gray cent with faint horizontal pinscratches beneath LIBERTY. Purchased by the consignor from Chris McCawley, 10/2005. Prior pedigree is given in the Breen cent *Encyclopedia* as "G-6 Sharpness of VF-25 but corroded with hairline scratches. Our EAC grade Good 6.  
*Purchased unattributed by Edward Janis; M & G Auctions 1/1997: 236 \$797.50; Thomas D. Reynolds, 4/1997; W. M. "Jack" Wadlington; Chris Victor-McCawley (10/2005).*

**3360 1801 NC-4, B-14, R.7 — Environmental Damage — PCGS Genuine Secure. Good Details.** Although minor corrosion appears on each side of this steel-brown cent with a small patch of lighter brown on the reverse, the surfaces are pleasing in terms of the overall quality. The obverse is smooth with LIBERTY complete and the bottom of the date merged into the border. The legend on the reverse is weak at the top and to the right. This piece is tied for fifth finest of eight examples recorded in the Breen/Bland Condition Census. Our EAC grade Good 4.  
*Ex: Joseph Rose, who purchased this piece as S-219 in 1983; Harmer Rooke Numismatists, Ltd (3/1990), lot 143; Daniel W. Holmes, Jr.; Chris Victor-McCawley (12/2007).*

**3361 1802 No Stems, S-231, B-9, R.1, XF40 PCGS.** The stemless reverse shows a normal second S in STATES. Slight porosity occurs near IB in LIBERTY and the 8 in the date, but the reddish-brown surfaces are largely smooth with small marks from brief circulation. The hair strands are well-detailed, while the wreath leaves are soft. Our EAC grade VF25. NGC ID# 224F, PCGS# 36344 Base PCGS# 1476

**3362 1802 NC-1, B-3, High R.5, Good 4 PCGS Secure.** Breen Die State IV, with a crack through the tops of AMERI. Wear is uneven, with LIBERTY, AMERICA, the fraction, and ONE CENT much sharper than the remaining legends. The date is faint but mostly readable. The medium brown surfaces are microgranular, but marks are few. Rim nicks above the N and I in UNITED are mentioned strictly as identifiers. Our EAC grade AG3.  
*Ex: Nancy Armour; purchased 9/2004 from Henry Hettger. PCGS# 36335 Base PCGS# 1470*

**3363 1804 S-266, B-1, R.2 — Repaired — PCGS Genuine. VG Details.** The obverse rim break is present without the reverse break on this middle die state example. The obverse of this olive-brown cent is extensively burnished while the reverse is untouched with a noticeable scratch inside the wreath. Our EAC grade Fair 2.

**1804 S-266c Cent, VG8  
Two-Cud Die State**

**3364 1804 S-266c, B-1, R.2, VG8 PCGS Secure.** The final major die state with rim breaks above both RTY and MERIC. The sole die marriage for the date. A deep mahogany-brown representative of this Draped Bust key. Slightly sharper on the upper-obverse and lower-reverse than on the lower-obverse and upper-reverse. The surfaces are inoffensively granular and void of consequential marks. Our EAC grade Good 6. NGC ID# 224H, PCGS# 36422 Base PCGS# 1504

**3365 1805 S-269, B-3, R.1, XF45 PCGS Secure.** Breen Die State V. The bold die line southeast of the hair ribbon is diagnostic, as is the pointed 1 in the date. A sharp lavender-brown Draped Bust cent with a moderately granular left-obverse margin. A faint hair-thin horizontal line crosses Liberty's ear. Our EAC grade VF25.  
*Purchased from H. Craig Hamling, 2/2003. NGC ID# 224K, PCGS# 36433 Base PCGS# 1510*

**1807/6 S-272, B-2 Cent, Good 6  
Small 7 Over 6, Blunt 1**

**3366 1807/6 Blunt 1, S-272, B-2, High R.4, Good 6 PCGS.** Although this Draped Bust cent is heavily circulated, the 7/6 overdate remains clear, as do LIBERTY and the reverse legends. Deep brown surfaces are moderately porous, as often seen among S-272 representatives, but appealing olive and steel-blue accents appear on each side. Partial detail is present on the lower curls, and the wreath elements are apparent. Housed in a green label holder. Our EAC grade Good 5.  
*Ex: Jim Long (8/2001). NGC ID# 224N, PCGS# 36439 Base PCGS# 1525*

**3367 1808 S-279, B-3, R.1 — Altered Surfaces — PCGS Genuine Secure. AU Details.** This attractive medium-brown cent has considerable remaining design definition with a line of marks on Liberty's neck and cheek, and with slight smoothing of the surfaces. Faint hairlines indicate that this piece has been cleaned and recolored. Our EAC grade VF20.

1814 Plain 4 S-295 Cent, Unc Details  
Late Die State

- 3368** 1814 Plain 4, S-295, B-2, R.1 — Obverse Damage — NGC Details. Unc. Breen Die State XIV. The borders are heavily eroded, and prominent crumbling is visible at Liberty's throat, chin, and lip. An arcing die crack that connects the 8 in the date to star 11 developed much earlier in this die pair's usage. Although this Sheldon-295 coin displays unworn surfaces and is generally appealing with deep burgundy-brown luster, there are a few pin pricks on Liberty's cheek and neck that prevent a numeric grade from NGC. Our EAC grade XF40.

- 3369** 1816 N-2, R.1, MS63 Red and Brown NGC. Easily identified by the placement of the 6 partly under the curl, and by doubling on the N in ONE. The reverse is rotated, as usual. This is a later die state example with rim breaks over stars 8 through 12. Glossy steel and golden-brown surfaces maintain glints of original mint Red color within the recesses. The strike is moderately uneven. Our EAC grade MS60.

*From The Kadison Family Collection.* NGC ID# 224Z, PCGS# 36527 Base PCGS# 1592

- 3370** 1820 Large Date, N-13, R.1, MS65 Brown NGC. This plentiful variety is often found in Mint State, discovered in quantity as part of the Randall Hoard. Steel-blue accents complement lustrous mahogany-brown surfaces. Smooth aside from a tiny tick on the forehead. The strike is sharp except on a few star centers. Housed in a circa-2000 holder. Our EAC grade MS60. NGC ID# 2256, PCGS# 36673 Base PCGS# 1615

- 3371** 1820 Large Date, N-13, R.1, MS63 Red and Brown PCGS. This lustrous and minimally marked example has more fiery mint Red color than the usual Randall Hoard piece, although olive-gray and steel-blue toning appear sporadically. Shallow strike-throughs (as made) are noted near stars 4 to 6. Our EAC grade MS62.

*Ex: Dallas Signature (Heritage, 4/2007), lot 172.*

*From The Kadison Family Collection.* NGC ID# 2256, PCGS# 36674 Base PCGS# 1616

- 3372** 1820 Large Date, N-13, R.1, MS64 Red and Brown PCGS. A heavy die crack connects the date and stars on this crisply struck near-Gem from the Randall Hoard. Original gold color alternates with blushes of lilac patina. The upper-left obverse field appears to have a partial print fragment, but the surfaces are generally free from contact aside from a minor mark behind Liberty's mouth. Our EAC grade MS62.

*Ex: Baltimore Signature (Heritage, 7/2003), lot 5168; FUN Signature (Heritage, 1/2004), lot 4165.*

*From The Kadison Family Collection.* NGC ID# 2256, PCGS# 36674 Base PCGS# 1616

1829 N-8 Cent, MS64 Brown  
Large Letters

- 3373** 1829 Large Letters, N-8, R.1, MS64 Brown PCGS. Star 1 is close to the bust tip, and BE in LIBERTY are joined on this Large Letters Reverse variety. Strike detail is good on the portrait, and partial star radials are apparent. The O in ONE and the E in CENT are slightly soft. Rich mahogany-brown surfaces show lovely blue-violet and coppery accents. Our EAC grade MS60.

*Ex: Floyd T. Starr Collection (Stack's, 6/1984), lot 228. NGC ID# 225K, PCGS# 36925 Base PCGS# 1663*

- 3374** 1838 N-1, R.1, MS65+ Brown PCGS Secure. CAC. Diagnostics for the N-1 variety include a broken upper-left serif on the E in LIBERTY, doubling on the flag of the 1, repunching on the left side of the 1 in UNITED, and the O in OF is low. Glossy brown surfaces are well-struck in the centers, softening around the edges. Stars 10 to 14 show full radials. Smooth and eye-appealing. Our EAC grade MS63. NGC ID# 225V, PCGS# 37180 Base PCGS# 1741

1845 N-11 Cent, MS65 Red and Brown

- 3375** 1845 N-11, R.3, MS65 Red and Brown PCGS Secure. Grellman Die State b. The vertical lines behind TY in LIBERTY are bold, as are the vertical lines behind ONE. A thin rim break is visible at 9 o'clock on the obverse. Other die lines mentioned in the Grellman reference are no longer visible on this late die state example. This example is nearly equal to the finest known Naftzger coin and finer than the Daniel Holmes coin that was called sixth finest known. Nearly full red mint luster remains on both sides with slight mellowing to light brown. Our EAC grade MS64. PCGS# 405786 Base PCGS# 1863

- 3376** 1851 N-26, R.4, MS66 Brown PCGS Secure. CAC. Grellman Die State b. A better die marriage identified by obscure but distinctive lumps and lines on ONE CENT. The reverse is Red and Brown with orange-gold throughout the legends. The obverse is mostly medium brown but retains the introductory color within LIBERTY and the date, and about the stars. As of (6/18), PCGS has yet to certify any examples as N-26 above the MS65 level. Our EAC grade MS63. PCGS# 406731 Base PCGS# 1892

**1851 N-30 Cent, MS67 Brown  
Extraordinary Condition Census Example**

**3377 1851 N-30, R.2, MS67 Brown NGC.** This is an extraordinarily high-grade Coronet cent irrespective of date or die variety. Indeed, NGC has only graded 18 1851 cents in MS67 Brown for all varieties, and this is the single finest N-30 at that service (5/18). While both sides are predominantly glossy-brown in appearance, flickers of crimson-red luster still adhere to the more protected areas around the devices. The central features are sharply detailed, and we can find no noteworthy blemishes. Our EAC grade MS62. Ex: *New York Signature* (Heritage, 7/2002), lot 5906; *Dallas Signature* (Heritage, 11/2005), lot 132.  
**From The Kadison Family Collection.** PCGS# 406743 Base PCGS# 1892

**3378 1854 N-30, Low R.6, VF35 PCGS Secure.** Newcomb-30 is the rarest 1854 die marriage, identified by the date position and obscure reverse die markers. This golden-brown example is evenly microgranular and has a small obverse rim knock at 2 o'clock. A grading card from J.R. Grellman is included, which confirms the N-30 attribution and provides the grade as 25 details, porous, rim nicks, net 12+. Our EAC grade Fine 15. Purchased from *Bob La Forme* (7/2014). PCGS# 406142 Base PCGS# 1904

**3379 1856 N-8, Upright 5, MS65 Red and Brown NGC.** Newcomb-8 is a slightly better variety with a lump at the top of Liberty's head below star 7. A small, dull point extends down from the upper-left serif of the N in CENT. The stars are characteristically soft, but the centers are well-defined on this Gem 1856 large cent. A mix of copper and golden-brown color blankets each side. Our EAC grade MS64.  
**From The Kadison Family Collection.** PCGS# 403967 Base PCGS# 1920

**FLYING EAGLE CENTS**

**3380 1858 Large Letters MS64 PCGS Secure.** Low Leaves Reverse. Open E in ONE. This impressive Choice specimen offers well-preserved surfaces that show a mix of original red and light brown patina, with vibrant mint luster on both sides. The design elements are well-detailed and the eye appeal is quite strong. NGC ID# 2277, PCGS# 2019

**1858 Flying Eagle Cent, MS65  
Sharp Large Letters Example**

**3381 1858 Large Letters MS65 PCGS Secure.** High Leaves Reverse. Closed E in ONE. Lustrous bronze-gold surfaces present fully struck design features on each side of this Gem Flying Eagle cent. Preservation is excellent, showing few serious marks. The 1858 Large Letters variant is slightly more accessible than its Small Letters counterpart. NGC ID# 2277, PCGS# 2019

**3382 1858 Small Letters MS64 PCGS Secure.** Low Leaves, Open E in ONE. An attractive Choice specimen of this popular issue, with well-detailed design elements and well-preserved copper-red surfaces that radiate satiny mint luster across both sides. A few microscopic specks of carbon are evident on close inspection. NGC ID# 2279, PCGS# 2020

**INDIAN CENTS**

**3383 1861 MS65 PCGS.** This Civil War cent displays vibrant luster and a sharp strike. The lightly blended chestnut-brown and olive-green surfaces show only incidental contact and carbon. An interesting rim-to-rim die crack is noted on the upper-right reverse. NGC ID# 227G, PCGS# 2061

**3384 1864 L On Ribbon MS64 Red PCGS Secure. CAC.** The sharply detailed design elements of this attractive Choice example show the "Longacre doubling" associated with many coins designed by the famous Chief Engraver. The well-preserved original red surfaces are lustrous and appealing. Population: 53 in 64 (1 in 64+) Red, 44 finer. CAC: 5 in 64, 10 finer (6/18). NGC ID# 227M, PCGS# 2081

**3385 1866 Repunched Date, Snow-9, FS-303, MS65 Red PCGS.** Although the variety is undesignated on the PCGS insert, the 66 in the date is clearly repunched north. A lustrous orange-red Gem whose sharp strike and unabraded surfaces ensure exceptional eye appeal. As of (6/18), PCGS has certified 13 examples of FS-303 as Brown, and two as Red and Brown, but none have been certified as Red. PCGS# 37452 Base PCGS# 2087

**3386 1867/67 Snow-1, FS-301, AU58 PCGS Secure.** The 67 in the date is repunched north with a significant spread, identifying the popular *Cherry-pickers'* variety. A whisper of wear on the ribbon and a few minor abrasions confirm a momentary stint in commerce, but the light brown, magenta, and original red surfaces display satiny luster. Population: 3 in 58, 2 finer (6/18). NGC ID# 227R, PCGS# 37459 Base PCGS# 92088

**3387 1869 MS66 Red and Brown NGC. Snow-10.** The 1 in the date is repunched beneath the base and flag. A sharply struck and thoroughly lustrous better-date cent. Carbon is absent and contact is limited to a minute obverse tick or two. Ruby-red, lime-green, and orange-gold shades compete for territory. NGC ID# 227T, PCGS# 2095

**3388 1871 MS65 Red and Brown PCGS.** Bold N in ONE. The 1871 is a low-mintage date, regarded as a semikey to the series. This mark-free and lustrous Gem is primarily peach-gold though the left obverse has slightly mellowed toward brown. Minor spots are located near the O in ONE and the E in UNITED. NGC ID# 227V, PCGS# 2101

**3389 1872 MS65 Brown PCGS.** A satiny, well-struck Gem Brown 1872 Indian cent with rich chocolate-brown and golden-olive toning over lustrous surfaces. No abrasions disrupt the eye appeal. The 1872 is a scarce date in MS65, and few Brown coins are finer. Population: 16 in 65 Brown, 1 finer (6/18). NGC ID# 227W, PCGS# 2103

**3390 1872 MS63 Red and Brown PCGS Secure.** Bold N in ONE. Sharply detailed in most areas, this attractive Select specimen shows some incomplete detail on the points of the lower headdress feathers. The well-preserved surfaces have mellowed to light brown in many areas, but traces of red still cling to some of the devices. NGC ID# 227W, PCGS# 2104

**3391 1873 Open 3 MS65 Red and Brown PCGS Secure. CAC.** This attractive Gem Indian cent was struck after the changeover to the Open 3 design. The design elements are sharply rendered and the well-preserved surfaces show a mix of streaky original red and light brown patina. Population: 85 in 65 Red and Brown, 7 finer. CAC: 20 in 65, 3 finer (6/18). NGC ID# 227Y, PCGS# 2107

**3392 1873 Closed 3 MS65 Red and Brown PCGS Secure. CAC.** This better-date cent approaches full Red, though the high points have mellowed slightly to lilac. Carbon is inconsequential, and contact is confined to a small mark on the cheek near the mouth. Population: 49 in 65 (3 in 65+) Red and Brown, 5 finer. CAC: 16 in 65, 2 finer (5/18). NGC ID# 227X, PCGS# 2110

### 1877 Cent, Unc Details Singular Key Date in the Series

**3393 1877 — Corrosion Removed — PCGS Genuine Secure. Unc Details.** No other issue in the Indian Head series is the subject of as much demand as the singular 1877 key date. This example has the sharpness of an Uncirculated coin. Red color and soft mint luster remain within the recesses. However, evidence of surface alteration appears mainly in the obverse fields.

**3394 1886 Type Two MS65 Red and Brown NGC.** The lowest feather tip points between the C and A in AMERICA, identifying the scarcer Type Two variant. This attractive Gem exhibits well-detailed design elements and well-preserved original surfaces that have mellowed to light brown in many areas. Census: 36 in 65 Red and Brown, 2 finer (6/18). NGC ID# 228E, PCGS# 92155

**3395 1893 MS66 Red NGC.** More than 46.6 million cents were struck in 1893, yet survivors are seldom found in Premium Gem Red condition and are virtually unobtainable in higher grades. This coppery-orange example boasts lovely rose-violet accents and softly frosted mint luster over near-pristine surfaces. Census: 25 in 66 Red, 2 finer (6/18). NGC ID# 228M, PCGS# 2186

**3396 1908-S MS65 Red PCGS Secure.** The original red surfaces of this delightful Gem show no mentionable distractions and both sides radiate vibrant mint luster. The well-detailed design elements are a little soft in areas like the feather tips (as always) and ribbon bow. PCGS has graded 63 numerically finer Red examples (5/18). NGC ID# 2296, PCGS# 2234

**3397 1909-S MS63 Brown PCGS Secure.** The lightly marked original surfaces of this final-year Indian cent have mellowed to a pleasing olive-brown color and the well-detailed design elements show just the slightest softness on the feather tips. From a small mintage of 309,000 pieces. NGC ID# 22B4, PCGS# 2238

### PROOF INDIAN CENTS

**3398 1862 PR65 Cameo NGC.** This attractive Gem showcases delicate purple-lilac toning and offers bold contrast between the devices and well-preserved fields. The *Guide Book* reports a mintage of 1,500 to 2,000 pieces, making the 1862 the most collectible copper-nickel, Oak Wreath Reverse type in this format. Ex: *FUN Signature (Heritage, 1/2005), lot 5180.* From *The Kadison Family Collection.* NGC ID# 229C, PCGS# 82259

**3399 1875 PR66 Brown PCGS. Snow-PR3.** The 5 is lightly repunched north, above the flag. Spectacular shades of violet toning visit both sides of this delightful Premium Gem proof, with razor-sharp definition on the design elements and reflective fields that shine through the patina. Population: 5 in 66 Brown, 0 finer (6/18). NGC ID# 229U, PCGS# 2312

**3400 1880 PR65 Red Cameo PCGS.** Fully struck with lovely tan and gold colors, glassy reflectivity in the fields, and a single tiny contact mark on Liberty's neck. Pleasing cameo contrast is seen on both obverse and reverse. A lovely Gem proof. Population: 4 in 65 Cameo, 9 finer (5/18). NGC ID# 229Z, PCGS# 82329

**3401 1886 Type One PR66 Brown PCGS.** The last feather points between the I and C in AMERICA, identifying the Type One variety. The well-preserved original surfaces of this delightful Premium Gem have mellowed to vivid shades of cerulean-blue and lilac, with sharply detailed design elements and deeply reflective fields underneath. Population: 40 in 66 (4 in 66+) Brown, 17 finer (6/18). NGC ID# 22A7, PCGS# 2345

**3402 1892 PR66 Brown PCGS.** The well-preserved surfaces of this Premium Gem proof have mellowed to steel-brown and violet, with sharply detailed design elements and reflective fields under the patina. Population: 10 in 66 Brown, 0 finer (6/18). NGC ID# 22AE, PCGS# 2363

**3403 1892 PR64 Red Cameo NGC. Snow-PR1.** The 1 in the date is minutely repunched. This orange-gold near-Gem exhibits a full strike and is devoid of contact. A loupe reveals a pinpoint fleck or two, and a small spot on the wreath is located beneath the C in CENT. Ex: *Summer FUN Signature (Heritage, 7/2014), lot 7131, which realized \$1,175.* NGC ID# 22AE, PCGS# 82365

**3404 1899 PR66 Red and Brown PCGS.** Vivid shades of violet and lilac visit the well-preserved surfaces of this stunning Premium Gem proof, with razor-sharp definition on all the design elements and deeply mirrored fields. From a mintage of 2,031 pieces. Population: 48 in 66 (1 in 66+) Red and Brown, 10 finer (6/18). NGC ID# 22AM, PCGS# 2385

### LINCOLN CENTS

**3405 1909-S VDB MS62 Brown PCGS.** An impressive MS62 specimen of this celebrated series key, with well-detailed design elements and lightly marked olive-brown surfaces that show somewhat subdued mint luster. From a series-low mintage of 484,000 pieces. NGC ID# BYKW, PCGS# 2426

**3406 1909-S MS65 Red NGC. CAC.** The 1909-S Lincoln cent is always in demand as a low-mintage, first-year issue. This delightful Gem exhibits sharply detailed design elements and well-preserved original red surfaces, with vibrant mint luster throughout. Census: 49 in 65 Red, 8 finer. CAC: 27 in 65, 7 finer (6/18). NGC ID# 2298, PCGS# 2240

**3407 1910-S MS66 Red PCGS Secure.** A sharply struck Lincoln cent, this 1910-S has full cartwheel luster with brilliant orange mint luster and extraordinary eye appeal. PCGS has certified just six finer examples with the Red designation (6/18). NGC ID# 22B6, PCGS# 2440

**3408 1943-S MS68 NGC.** With its distinctive wartime "steel" composition, the 1943-S Lincoln cent claims a mintage of more than 191 million pieces. The present coin is among the finest survivors, with razor-sharp definition on the design elements and virtually pristine brilliant surfaces. Census: 28 in 68, 0 finer (6/18). NGC ID# 22E8, PCGS# 2717

**1943-S Cent, Top-Grade MS68  
A Registry Set Essential**

- 3409 1943-S MS68 PCGS.** High-grade 1943-S steel cents have survived in quantity, but remarkably few are known as fine as MS68, and none are certified finer (6/18). This top-grade Registry coin displays a sharp strike despite heavy metal flowlines in the fields. Not a single abrasion is seen. The satiny surfaces exhibit traces of light golden toning and offer pleasing eye appeal. Population: 71 in 68, 0 finer (6/18). NGC ID# 22E8, PCGS# 2717

- 3410 1944-D/S FS-511 MS65 Red PCGS.** There are two recognized 1944-D/S varieties, FS-511 and FS-512, but the former trades for a much higher premium, and is the variety recognized in the *Guide Book*. The undermintmark is delicate, but its upper third is apparent above the Denver mintmark. A sharply struck and highly lustrous Gem with exceptional orange-gold color. Each side has a few trivial flecks. NGC ID# 2734, PCGS# 37834 Base PCGS# 2728

- 3411 1955 Doubled Die Obverse, FS-101, AU53 NGC.** All obverse legends exhibit a spectacular spread on the famous 1955 FS-101 variety. This deep walnut-brown representative shows slight wear on the cheekbone but retains noticeable luster. A couple of small gray flecks are east of the date and above the stem of the right wheat ear, but carbon and contact are otherwise trivial.  
*From The Kadison Family Collection.* NGC ID# 4LNH, PCGS# 37910 Base PCGS# 2825

- 3412 1955 Doubled Die Obverse, FS-101 — Environmental Damage — PCGS Genuine Secure. Unc. Details.** The obverse is boldly doubled on all lettering and the date, identifying the famous *Guide Book* variety. This well-detailed example is lightly marked, but the olive-brown surfaces show the slightly corrosive effects of some surface-altering experience, perhaps being buried in the ground for a short time.

**1955 Doubled Die Cent, FS-101  
MS64+ Red and Brown**

- 3413 1955 Doubled Die Obverse, FS-101, MS64+ Red and Brown NGC.** All the obverse legends exhibit dramatic die doubling. The variety was a hobby sensation upon its discovery, although its inclusion in the *Guide Book* had to wait until the 1960 edition. This well-struck, minimally marked, and coruscating Choice cent retains more mint Red than most examples, though the portrait and open fields display deep gunmetal-blue shades. NGC ID# 22FG, PCGS# 37911 Base PCGS# 2826

- 3414 1970-S Large Date, Doubled Die Obverse, FS-101, MS64 Red and Brown NGC.** Strong clockwise die doubling is reminiscent of the more famous FS-101 1955, but the present variety is significantly rarer. It is listed (but unpriced) in the 2019 *Guide Book*. Lustrous and unabraded with a full Red obverse. The reverse displays blushes of lavender, though orange-red emerges near 3 o'clock. NGC ID# 22GN, PCGS# 37998 Base PCGS# 2938

- 3415 1984 Doubled Ear, FS-101, MS68 Red PCGS.** This extremely popular and dramatic variety did not go unnoticed for long. It was discovered in 1984 by Richard Allen. Trapped gas bubbles populate the bright fire-orange surfaces. Both sides are fully struck and mark-free. Population: 25 in 68 Red, 0 finer (5/18). NGC ID# 22HZ, PCGS# 38088 Base PCGS# 3062

**1992-D Lincoln Cent, MS64 Red and Brown  
Close AM, FS-901 Variety**

- 3416 1992-D Close AM, FS-901, MS64 Red and Brown PCGS.** Speculation that the rare Close AM variety was a “test run” for die changes planned for 1993 seems to be confirmed by the fact that all 1993 circulation strikes and proofs indeed possess the Close AM design (with A and M of AMERICA nearly touching), while all other Lincoln cents 1959-1991 have a Wide AM. The rare variety was apparently produced late in 1992 at both the Philadelphia and Denver mints. The designer's initials FG are distant from the lower-right side of the Lincoln Memorial on all Close AM examples. This lustrous, Choice flame-orange example shows blue accents and a linear planchet flaw in the upper-left obverse field. The Close AM is a necessity for major variety collectors — listed in *Cherrypickers'*, the 2019 *Guide Book*, and 100 *Greatest U.S. Modern Coins*. Population: 2 in 64 Red and Brown, 1 finer (5/18). PCGS# 391428 Base PCGS# 83100

**PROOF LINCOLN CENTS**

- 3417 1938 PR67 Red PCGS Secure. CAC.** This spectacular Superb Gem proof exhibits razor-sharp definition on all design elements and the fields are deeply reflective throughout. The virtually pristine surfaces show unbroken original red patina. Population: 51 in 67 (3 in 67+) Red, 0 finer. CAC: 19 in 67, 0 finer (6/18). NGC ID# 22L5, PCGS# 3341

- 3418 1971-S Doubled Die Obverse, FS-101, PR68 Red Deep Cameo PCGS.** LIBERTY is strongly die doubled. The first 1 in the date is also nicely doubled, as is the G in GOD. FS-101 and FS-102 are similar, and both are regarded as the *Guide Book* DDO for the issue. FS-102 shows stronger doubling on IN GOD WE TRUST, but FS-101 has more impressive doubling on the date. This fully struck and flashy pumpkin-gold cent is pristine except for a fleck between the two letters in WE. NGC ID# 22M3, PCGS# 93533 Base PCGS# 93548

**TWO CENT PIECES**

- 3419 1865 Plain 5 MS66 Red and Brown PCGS. CAC.** A high-grade type coin. Sharply struck and lustrous with substantial sun-gold color. Carbon is virtually absent, though the reverse exergue displays wispy contact. CAC: 38 in 66 Red and Brown, 23 in 66 Red, 2 in 67 Red (5/18). NGC ID# 22NA, PCGS# 38248 Base PCGS# 3583

- 3420 1865 Fancy 5 MS66 Red NGC.** The Mint struck 13.6 million two cent pieces in the denomination's second year of issue, making the 1865 a perfect date for type purposes. Glowing copper-orange surfaces display minimal carbon. The olive leaves, shield lines, and wreath are well-struck, and few marks appear on each side. Housed in a circa-2000 holder. Census: 24 in 66 (1 in 66 ★) Red, 2 finer (5/18).

*From The Kadison Family Collection.* NGC ID# 22NA, PCGS# 38258 Base PCGS# 3584

- 3421 1870 MS65 Red and Brown PCGS Secure.** This attractive Gem retains most of its original orange mint luster, with light brown toning on the right side of the obverse. Delicate bluish-brown toning appears on the reverse. The strike is a trifle weak, but the surfaces are pristine. Population: 42 in 65 (1 in 65+) Red and Brown, 8 finer (6/18). NGC ID# 22NE, PCGS# 3607

- 3422 1870 MS65 Red and Brown PCGS Secure. CAC.** The well-preserved original surfaces of this delightful Gem have mellowed to walnut-brown and crimson in some areas, but red still predominates. The design elements are sharply detailed and vibrant mint luster radiates from both sides. Population: 42 in 65 (1 in 65+) Red and Brown, 8 finer. CAC: 21 in 65, 4 finer (6/18). NGC ID# 22NE, PCGS# 3607

## PROOF TWO CENT PIECES

### 1864 Two Cent, PR65 Red and Brown Large Motto Variety

- 3423 1864 Large Motto PR65 Red and Brown PCGS Secure.** Most proof 1864 two cent pieces are Large Motto coins, making this variety a favorite among date collectors. The present Gem is sharp and toned in multiple hues, which include olive, chestnut, violet, and green. The obverse is reflective, while the reverse shows satiny surfaces. No distractions are seen. Population: 41 in 65 (1 in 65+) Red and Brown, 14 finer; 16 in 65 Red, 1 finer; 0 in 65 Red Cameo, 4 finer (6/18). NGC ID# 274T, PCGS# 3622

- 3424 1872 PR64 Red PCGS.** The year 1872 was the final one for which circulation-strike two cents were struck (65,000 coins). The Mint also produced a reported 950+ proofs that year, including this Red near-Gem. Strike detail is expectedly razor-sharp, and the fields are flashy beneath thin lavender-rose accents. Housed in a green label holder.  
*Ex: FUN Signature (Heritage, 1/2015), lot 9388.* NGC ID# 2752, PCGS# 3650

### 1873 Closed 3 Two Cent Piece PR64 Red and Brown

- 3425 1873 Closed 3 PR64 Red and Brown PCGS Secure.** Only proof two cent pieces were struck in 1873. This Closed 3 coin displays sharp detail and original copper-orange coloration with mirrored fields. Traces of chestnut and olive overtones earn the Red and Brown designation, although the overall impression leans heavily toward the Red color category. No significant carbon spotting is seen. NGC ID# 2753, PCGS# 3652

## THREE CENT SILVER

### 1852 Three Cent Silver, MS67 Conditionally Rare Type One Issue

- 3426 1852 MS67 NGC.** A beautifully preserved Type One three cent silver, showing frosty mint luster with lavender and golden toning. The strike is bold, and neither side has a single mentionable abrasion. The 1852 is available through MS66 but is rare in MS67. Only a few finer coins are known, and they are out of reach for many collectors. Census: 21 in 67 (1 in 67+), 1 finer (6/18). NGC ID# 22YZ, PCGS# 3666

### 1852 Three Cent Silver, MS67 Rarely Seen Finer

- 3427 1852 MS67 PCGS Secure.** A spectacular Superb Gem, from the second year of the denomination, this piece exhibits virtually flawless surfaces, with vibrant satiny mint luster under shades of greenish-gold and magenta toning. The design elements are well-detailed and the eye appeal is outstanding. Population: 23 in 67 (1 in 67+), 2 finer (6/18). NGC ID# 22YZ, PCGS# 3666

- 3428 1864 MS62 PCGS Secure.** An attractive MS62 specimen from a business-strike mintage of 12,000 pieces, this coin exhibits sharply detailed design elements and lightly marked surfaces that show some prooflike reflectivity in the fields. Some interesting clash marks are evident on the obverse. Population: 14 in 62, 91 finer (6/18). NGC ID# 22ZE, PCGS# 3684

**3429 1871 MS63 PCGS.** Only 3,400 business-strike silver three cent pieces were struck in 1871. This attractive Select specimen displays sharply detailed design elements and lightly marked surfaces that show some prooflike reflectivity in the fields. Population: 14 in 63, 87 finer (6/18). NGC ID# 22ZM, PCGS# 3692

**3430 1871 MS63 PCGS Secure.** Vivid shades of golden-brown and violet toning blanket the lightly marked surfaces of this attractive Select example, from a small mintage of 3,400 pieces. The design elements are sharply detailed and eye appeal is outstanding. Population: 14 in 63, 87 finer (6/18). NGC ID# 22ZM, PCGS# 3692

## PROOF THREE CENT SILVER

**3431 1861 PR65 Cameo NGC.** Attractive shades of greenish-gold and lavender toning visit the well-preserved surfaces of this impressive Gem proof, with sharply detailed, frosty design elements that contrast boldly with the reflective fields. Census: 4 in 65 Cameo, 0 finer (6/18). NGC ID# 27C8, PCGS# 83710

**3432 1868 PR64+ Cameo PCGS Secure.** A Plus-graded Choice representative, with sharply detailed design elements and deeply reflective fields that contrast boldly with the frosty devices. The well-preserved surfaces are highlighted by delicate shades of pale gold toning. Population: 26 in 64 (3 in 64+) Cameo, 31 finer (6/18). NGC ID# 27CE, PCGS# 83718

**3433 1870 PR65+ PCGS Secure.** Highlights of lavender-gray and pale gold toning enliven the well-preserved surfaces of this delightful Plus-graded Gem, with sharply detailed design elements and reflective fields underneath. Population: 33 in 65 (1 in 65+), 28 finer (6/18). NGC ID# 27CF, PCGS# 3721

**3434 1873 PR61 PCGS Secure.** An impressive PR61 specimen, from a small mintage of 600 pieces, this coin exhibits sharply detailed design elements and reflective fields, under shades of lavender and pale gold toning. The surfaces show minor signs of contact on both sides. NGC ID# 27CJ, PCGS# 3724

**3435 1873 PR64 PCGS Secure.** From a small proof mintage, this attractive Choice example exhibits sharply detailed design elements and reflective fields, under shades of violet and sea-green toning. The surfaces are well-preserved and eye appeal is outstanding. NGC ID# 27CJ, PCGS# 3724

## THREE CENT NICKELS

**3436 1883 MS62 PCGS.** With only 4,000 pieces struck, the 1883 three cent nickel is a better date in all grades and is genuinely scarce in Mint State. This piece displays sharp definition and satiny mint luster. Olive-gold toning over each side yields tinges of iridescence. Population: 18 in 62, 32 finer (6/18). NGC ID# 2765, PCGS# 3751

**3437 1887 MS66 PCGS Secure.** A remarkable Premium Gem representative, from a mintage of just 5,000 pieces, this coin exhibits sharply detailed design elements, with dramatic clash marks on both sides. The surfaces are impeccably preserved and the eye appeal is outstanding. Population: 22 in 66 (1 in 66+), 1 finer (6/18). NGC ID# 22NU, PCGS# 3755

## PROOF THREE CENT NICKELS

**3438 1869 PR66 Deep Cameo PCGS Secure. CAC.** Razor-sharp definition is evident on all of the design elements of this spectacular Premium Gem proof, and the deeply reflective fields contrast profoundly with the frosty devices. The impeccably preserved surfaces add to the terrific eye appeal. Population: 21 in 66 (4 in 66+) Deep Cameo, 2 finer. CAC: 18 in 66, 0 finer (6/18). NGC ID# 275P, PCGS# 93765

**3439 1877 PR62 PCGS Secure.** Only 900 proof three cent nickels were struck in 1877. This impressive MS62 example offers sharply detailed design elements and hazily reflective fields with some minor, scattered signs of contact. NGC ID# 275X, PCGS# 3773

### 1877 Three Cent Nickel, PR65 Cameo High-End for the Grade

**3440 1877 PR65 Cameo NGC. CAC.** A sharp Gem proof with warm golden toning and modest contrast. No contact marks are seen under a loupe, and the fields are attractively reflective. Eye appeal is above average for the issue. In 1877, three cent nickel coinage included only proofs, struck to the extent of 900 pieces, and the quality of these coins was often lacking. This example is outstanding for the grade, as affirmed by CAC. NGC ID# 275X, PCGS# 83773

### 1877 Three Cent Nickel, PR66 Cameo Pleasing Contrast

**3441 1877 PR66 Cameo PCGS Secure.** Only proof three cent nickels were struck in 1877, amounting to 900 coins. Deep Cameo examples of this issue are rare, making high-end Cameos the finest typically available to collectors. This Premium Gem is well-contrasted and sharp, showing mirrored fields and untoned surfaces. No bothersome marks are seen. Population: 70 in 66 (4 in 66+) Cameo, 16 finer; 3 in 66 Deep Cameo, 0 finer (6/18). NGC ID# 275X, PCGS# 83773

### 1881 Three Cent Nickel, PR68 None Graded Finer

**3442 1881 PR68 NGC.** Three cent nickel proof production in 1881 was in keeping with the period (3,575 pieces struck), while circulation-strike output spiked to 1 million coins, up from 21,000 in 1880. This is a virtually flawless representative, unsurprisingly fully struck with mark-free nickel-gray surfaces. Impossible to upgrade. Census: 8 in 68 (1 in 68 ★), 0 finer in this category (5/18). **From The Kadison Family Collection.** NGC ID# 2763, PCGS# 3777

**3443 1881 PR67 Cameo PCGS. CAC.** The 8s in the date are widely repunched. This Superb Gem has light gold toning and a satiny obverse. The reverse possesses a prominently mirrored field. Sharply struck, with nice cameo contrast, and devoid of contact. Population: 40 in 67 (2 in 67+) Cameo, 4 finer. CAC: 35 in 67, 3 finer (6/18). Ex: Long Beach Signature (Heritage, 9/2002), lot 5751, realized \$1,207.50; Baltimore Signature (Heritage, 3/2009), lot 482, realized \$1,380; Long Beach Signature (Heritage, 9/2009), lot 263, realized \$1,265. NGC ID# 2763, PCGS# 83777

**3444 1888 PR67+ NGC. CAC.** Modestly reflective fields and boldly rendered design elements characterize the seemingly flawless surfaces of this high-end Superb Gem proof 1888 three cent nickel. A trace of champagne toning warms the silver-blue surfaces. Census: 26 in 67 (2 in 67+, 3 in 67 ★), 2 finer. CAC: 26 in 67, 0 finer (5/18). NGC ID# 276B, PCGS# 3785

## SHIELD NICKELS

**3445 1866 Rays MS65 PCGS.** This impressive Gem represents the short-lived Rays design and shows a few of the striking problems that led to its demise. The design elements are somewhat soft on the obverse and many prominent die cracks are evident on both sides. The well-preserved, lustrous surfaces add to the overall eye appeal. PCGS has graded 52 numerically finer examples (6/18). NGC ID# 22NX, PCGS# 3790

**3446 1867 No Rays MS66+ NGC.** This Plus-graded Premium Gem was struck after the design was modified to remove the rays from the reverse. The design elements are well-detailed, with a touch of softness on the upper stars, but the virtually pristine surfaces are lustrous and appealing. Census: 31 in 66 (2 in 66+, 1 in 66 ★), 0 finer (6/18). NGC ID# 22NZ, PCGS# 3794

**3447 1880 Good 6 PCGS Secure.** The 1880 Shield nickel claims a small business-strike mintage of 16,000 pieces, making it an elusive key to the series. Collectors prize this issue in all grades and conditions. This well-worn Good 6 example has the obverse rim worn smooth in some places, but the design elements are completely outlined and all the lettering and date are legible. NGC ID# 276E, PCGS# 3810

## PROOF SHIELD NICKELS

### 1877 Shield Nickel, PR63 Proof-Only Issue

**3448 1877 PR63 PCGS.** The 1877 and 1878 Shield nickels were struck only in proof format, and examples are always in demand regardless of the numerical grade. This Select, sharply defined proof exhibits delicate blue-gray toning that subdues the mirrored fields, yet still the piece still exhibits excellent eye appeal. NGC ID# 276U, PCGS# 3831

### 1877 Shield Nickel, PR65 Cameo Excellent Contrast

**3449 1877 PR65 Cameo PCGS Secure.** Delicate gold toning visits the surfaces of this lovely Gem proof that exhibits fully mirrored fields and lustrous, sharply defined devices. Excellent field-to-device contrast is evident, especially on the obverse of this proof-only Shield nickel. NGC ID# 276U, PCGS# 83831

**3450 1878 PR61 PCGS Secure.** An impressive PR61 example, from a mintage of 2,350 pieces, this coin offers sharply detailed design elements and hazily reflective fields, with relatively few signs of contact. Some roughness shows in the reverse field. NGC ID# 276V, PCGS# 3832

**3451 1881 PR67 Cameo NGC.** The Shield nickel design is especially appealing when offered in proof format with Cameo contrast. This Superb Gem is stark black-and-white, featuring thick mint frost over the devices and profound mirroring in the fields. Census: 25 in 67 Cameo (1 in 67 ★), 1 finer (5/18).  
*From The Kadison Family Collection.* NGC ID# 276X, PCGS# 83836

## LIBERTY NICKELS

**3452 1886 MS63 NGC.** The 1886 Liberty nickel is a challenging key to the series. This impressive Select example displays well-detailed design elements, with a touch of the usual softness on the stars and lower wreath. The obverse shows some interesting peripheral die cracks and the lightly marked surfaces are highlighted by shades of pale gold toning. NGC ID# 277U, PCGS# 3847

**3453 1893 MS66 PCGS. CAC.** The 1893 Liberty nickel is scarce in MS66 and rare this fine with a CAC green label. Finer pieces are prohibitively rare. This coin displays frosty mint luster and delicate champagne toning. Several peripheral stars and the lower-left portion of the wreath exhibit strike softness as usual, but the preservation is superb. Population: 39 in 66 (5 in 66+), 1 finer. CAC: 17 in 66, 2 finer (6/18). NGC ID# 2778, PCGS# 3854

**3454 1912-S MS63 PCGS Secure.** A small mintage of 238,000 Liberty nickels was struck at the San Francisco Mint in 1912, the final regular-issue year of the design. This sharply detailed Select specimen offers lightly marked lavender-gray surfaces, with vibrant mint luster and a few hints of pale gold toning. NGC ID# 277R, PCGS# 3875

## PROOF LIBERTY NICKELS

**3455 1885 PR66 PCGS. CAC.** Iridescent cherry-red, lime-green, and apricot-gold shades endow this sharply struck and lustrous Premium Gem. Only a few pinpoint flecks deny perfection. The proof 1885 had a fairly high-mintage but is in demand due to its low mintage business counterpart. Certified in an old green label holder. NGC ID# 277T, PCGS# 3883

**3456 1889 PR67 PCGS.** This virtually pristine Superb Gem with modest, yet appreciable reflectivity is void of even a single noteworthy distraction. Both sides are brilliant with delicate wisps of golden color. Population: 13 in 67, 0 finer (5/18).  
*Ex: FUN Signature (Heritage, 1/2004), lot 5253; New York Signature (Heritage, 7/2004), lot 5469.*  
**From The Kadison Family Collection.** NGC ID# 277X, PCGS# 3887

**3457 1903 PR67 NGC.** Pleasing light blue and rose patina blankets flawless, flashy surfaces. Even close examination fails to disclose any mentionable contact marks. A fully original, conditionally rare Liberty nickel proof from a mintage of 1,790 pieces. Census: 31 in 67 (3 in 67 ★, 1 in 67+ ★), 6 finer (5/18).  
*Ex: New York Signature (Heritage, 7/2004), lot 5486.*  
**From The Kadison Family Collection.** NGC ID# 27MY, PCGS# 3901

## BUFFALO NICKELS

### 1913-S Buffalo Nickel, MS67 Exceptional Type One Specimen

**3458 1913-S Type One MS67 NGC.** The Type One Buffalo nickels did not have the denomination recessed on the exergue, exposing that feature to excessive wear. The design was quickly changed to address that problem, creating a popular one-year design type. This delightful Superb Gem is sharply detailed throughout, with lustrous, impeccably preserved textured surfaces and outstanding eye appeal. Census: 18 in 67 (2 in 67+, 1 in 67 ★), 1 finer (5/18). NGC ID# 22PY, PCGS# 3917

**3459 1914-S MS65 PCGS Secure.** A delightful Gem, this 1914-S Buffalo nickel exhibits a bold, nearly full strike, with fully lustrous nickel-gray surfaces and wisps of gold toning on the reverse. PCGS has certified only 46 finer examples (6/18). NGC ID# 22R6, PCGS# 3926

**3460 1917-S MS63 PCGS.** An attractive Select specimen of this early series branch mint issue, with well-detailed design elements that show just the slightest softness on the bison's tail. The lustrous surfaces are lightly marked and show a few hints of pale gold toning. NGC ID# 22RE, PCGS# 3936

**3461 1918/7-D FS-101 Fine 12 PCGS. CAC.** Smooth pewter-gray surfaces are attractive for the grade on this CAC-approved collector coin. The overdate feature is sharp, and the overall eye appeal of this moderately circulated 1918/7-D Buffalo nickel is excellent. NGC ID# 22RJ, PCGS# 38446 Base PCGS# 3939

**3462 1918/7-D FS-101 Fine 15 PCGS Secure.** Along with the 1916 Doubled Date, the 1918/7-D is key to a *Guide Book* collection of Buffalo nickels. The top and downstroke of the underdigit 7 is apparent as extra thickness on the 8. A late die state with an orange-peel texture to the fields near the rims. The dove-gray surfaces are unblemished and attractive. NGC ID# 22RJ, PCGS# 38446 Base PCGS# 3939

### 1918-S Buffalo Nickel, MS64 Seldom Seen Finer

**3463 1918-S MS64 PCGS Secure.** Finer examples of the 1918-S Buffalo nickel are rarely encountered. This Choice Mint State piece features an above-average strike with pale gold toning on the fully lustrous nickel-gray surfaces. The obverse die has prominent clash marks and die cracks. PCGS has certified only 40 numerically finer examples (6/18). NGC ID# 22RK, PCGS# 3940

**3464 1921 MS66 PCGS Secure.** Vivid shades of magenta and orange-gold toning blanket the well-preserved surfaces of this spectacular Premium Gem, with sharply detailed design elements and vibrant mint luster underneath. PCGS has graded 32 numerically finer examples (6/18). NGC ID# 22RT, PCGS# 3947

### 1924-S Nickel, MS63 Above-Average Strike

**3465 1924-S MS63 PCGS Secure.** Slight central weakness is evident on the obverse of this Select Mint State 1924-S Buffalo nickel that has a strike sharper than normally encountered among the San Francisco Mint Buffalo nickels from the mid-1920s. Both sides are brightly lustrous beneath medium gold toning with a few scattered spots. NGC ID# 22RZ, PCGS# 3953

### 1926-S Buffalo Nickel, MS63 Important Key Issue

**3466 1926-S MS63 PCGS Secure.** The 1926-S Buffalo nickel is an important key date that is especially elusive in Mint State grades. This MS63 shows the usual central weakness, yet the strike is far sharper than usual for the issue. Both sides feature delicate gold toning over bright, lustrous light gray surfaces. NGC ID# 22S7, PCGS# 3959

**3467 1937-D Three-Legged, FS-901, AU58 PCGS Secure.** An attractive near-Mint representative of this extremely popular die polishing error, with only light wear on the design elements and lightly abraded surfaces that retain traces of original mint luster. Highlights of lavender-gray and golden-tan visit both sides. NGC ID# 22SX, PCGS# 38475 Base PCGS# 3982

**3468 1937-D Three-Legged, FS-901, MS61 NGC.** A pleasing Mint State example of this popular die-polishing error, with well-detailed design elements and satiny mint luster under shades of golden-tan and lavender-gray toning. Extensive die erosion is apparent on each side, a diagnostic of the variety. NGC ID# 22SX, PCGS# 38475 Base PCGS# 3982

**3469 1937-D Three-Legged, FS-901, MS62 NGC.** A well-struck, Uncirculated example of this popular *Guide Book* variety, showing dusky golden-gray toning over lightly abraded surfaces. Eye appeal is pleasing for the grade. This variety was created when a heavily worn reverse die was heavily polishing for continued usage, with the inadvertent side effect of effacing the bison's forward right leg. NGC ID# 22SX, PCGS# 38475 Base PCGS# 3982

## PROOF BUFFALO NICKELS

**3470 1913 Type One PR64 PCGS Secure.** This Choice matte proof 1913 nickel represents the first year of the Buffalo design and the only year of the Type One motif. This attractive specimen exhibits razor-sharp definition on all design elements and the well-preserved, textured surfaces show hints of pale gold and lavender toning. From a mintage of 1,520 pieces. NGC ID# 278R, PCGS# 3988

**3471 1936 Type One — Satin Finish PR66 PCGS Secure.** An attractive proof Buffalo nickel, from a mintage of 4,420 pieces, this spectacular Premium Gem displays razor-sharp definition on the design elements. The well-preserved surfaces are untoned, with strong Satin Finish luster characteristics. NGC ID# 278X, PCGS# 3994

**3472 1936 Type One — Satin Finish PR67 PCGS Secure. CAC.** A spectacular Superb Gem Satin Finish proof, with razor-sharp definition on all design elements and impeccably preserved surfaces that are highlighted by attractive shades of pale gold and ice-blue toning. From a mintage of 4,420 pieces. PCGS has graded only 46 numerically finer examples (6/18). NGC ID# 278X, PCGS# 3994

**3473 1936 Type Two — Brilliant Finish PR66 PCGS. CAC.** Pastel honey-gold and powder-blue shades alternate across the pristine surfaces of this well-struck and immaculate Premium Gem. Careful study beneath a loupe fails to locate any mentionable imperfections. Here is a high-grade, brilliant proof type representative. CAC endorsement adds to the coin's considerable credentials. NGC ID# 278Y, PCGS# 3995

**3474 1937 PR67 PCGS.** Each side is fully brilliant at first glance, but hints of pale gold and faint rings of icy blue color appear upon closer inspection. The fields are deeply mirrored, furthering the visual impact.

*Ex: Portland Signature (Heritage, 3/2004), lot 5434.*

**From The Kadison Family Collection.** NGC ID# 278Z, PCGS# 3996

## JEFFERSON NICKELS

### 1942-D FS-501 Nickel, MS63 D Over Horizontal D

**3475 1942-D D Over Horizontal D, FS-501, MS63 PCGS.** The *Cherrypickers' Guide* comments: "This is one of the rarest of the major Jefferson nickel varieties in Mint State." A thin veil of golden patina covers much of this satiny Select example. Strike detail is strong, including the repunched mintmark, and the steps are nearly full. Scattered marks, more prevalent on the reverse than the obverse, limit the technical grade. NGC ID# 22TL, PCGS# 38495 Base PCGS# 4015

### 1942-P Nickel, MS68 ★ Type Two Wartime Silver Alloy Single Finest at NGC

**3476 1942-P Type Two MS68 ★ NGC.** Spectacular pink-red, sun-gold, and lime-green toning adorns this lustrous and immaculate first-year war nickel. A tiny flan flaw on Jefferson's cheek fails to deny the eye appeal. As of (5/18), this is the single highest-graded at NGC, since among the four pieces to attain the MS68 level only the present lot has additionally secured the Star designation, bestowed for superior eye appeal. NGC ID# 22TM, PCGS# 4016

**3477 1946-D/D D Over Inverted D, FS-501, MS66 Full Steps PCGS.** This popular *Cherrypickers'* variety shows the mintmark repunched over a previous, inverted D. The design elements are sharply detailed throughout, including Full Steps definition on Monticello. The lustrous surfaces radiate vibrant mint luster, with a few hints of pale gold toning. Population: 15 in 66 (4 in 66+) Full Steps, 0 finer (6/18). NGC ID# 22U3, PCGS# 38508 Base PCGS# 894029

## EARLY HALF DIME

**3478 1795 V-5, LM-8, R.3, Fine 15 PCGS.** Star 9 is distanced from the Y, and no inner or outer berry is present near UN. Ten die varieties have been identified for the 1795 half dime, this being one of the two most collectible along with LM-10. This well-worn survivor maintains even stone-gray surfaces with good detail on the Flowing Hair portrait. A small planchet defect occurs at the lower-left obverse.

**From The Kadison Family Collection.** NGC ID# 22ZV, PCGS# 38592 Base PCGS# 4251

## BUST HALF DIME

- 3479 1835 Small Date, Small 5C, V-7, LM-10, R.1, MS65 PCGS Secure.** Lavender-gray centers are bounded by sea-green and rose-red borders. This crisply struck and lustrous Capped Bust type coin lacks noticeable marks. Among the dozen die marriages of 1835 half dimes, only two pair a Small Date obverse with a Small 5C reverse. NGC ID# 232H, PCGS# 38719 Base PCGS# 4285

## SEATED HALF DIMES

### 1837 Seated Liberty Half Dime, MS66 ★ No Stars, Large Date, V-1

- 3480 1837 No Stars, Large Date (Curl Top 1) MS66 ★ NGC. V-1.** This variety is distinguished by clear double punching of the date that shows near the denticles. Two separate half moon-like punchings appear below the 8, one of them low enough to cross one of the denticles. The lunule-like punching at the lower tip of the 7 is especially bold on this early die state. Typical for the issue, this coin displays needle-sharp striking definition throughout. Also, the surfaces are uncommonly well-preserved with a colorful sheen and no abrasions of note. The obverse sports cobalt-blue, gold, and a spot of red over the date area, the reverse has a deep crimson center that is bordered with rich turquoise-blue patina. A bright, Premium Gem with the Star designation for the high-grade type collector.  
*Ex: Long Beach Signature (Heritage, 9/2005), lot 2260.*  
**From The Reilly Cody Collection, Part II.** NGC ID# 232M, PCGS# 4311

- 3481 1839 No Drapery MS65 NGC. CAC.** Blue-green, tan-brown, and lilac-red toning encompasses sharply struck and coruscating surfaces. The 1839 is available in Mint State but most such pieces cannot attain Gem status. Housed in a former generation holder. CAC: 8 in 65, 16 finer (5/18).  
*Ex: FUN Signature (Heritage, 1/2008), lot 882, which realized \$1,610.*  
**From The Reilly Cody Collection, Part II.** NGC ID# 232T, PCGS# 4319

- 3482 1840 Drapery MS64 PCGS Secure.** The 1840 Seated Liberty half dime with drapery at Liberty's elbow claims a smaller mintage than its No Drapery counterpart. This attractive Choice example is well-detailed, with just a touch of softness on Liberty's head, where some die striations were not completely struck out. The well-preserved surfaces are lustrous and appealing. Population: 24 in 64, 8 finer (5/18). NGC ID# 232W, PCGS# 4326

- 3483 1841 MS66 NGC.** This is a spectacularly preserved example of a moderately available Seated half dime issue. Brilliant frosted fields are nearly mark-free, and only close scrutiny reveals a faint diagonal tick above and to the right of Liberty's shield. The strike is pinpoint-sharp. Census: 9 in 66 (1 in 66+, 1 in 66 ★), 5 finer (5/18).  
*Ex: Houston Signature (Heritage, 11/2007), lot 60288.*  
**From The Reilly Cody Collection, Part II.** NGC ID# 232Y, PCGS# 4328

- 3484 1844 MS65 PCGS. CAC.** Faint purple toning gravitates to the margins on this Gem half dime, and all of the design features are clear. An elegant example offering grand eye appeal. Population: 14 in 65, 37 finer. CAC: 7 in 65, 26 finer (6/18).  
*Ex: Long Beach Signature (Heritage, 2/2007), lot 2807; Baltimore Signature (Heritage, 3/2009), lot 738, which realized \$1,265.*  
**From The Reilly Cody Collection, Part II.** NGC ID# 2335, PCGS# 4333

- 3485 1845 MS66 PCGS Secure. CAC.** Frosty, untuned surfaces illuminate sharp design elements on this CAC-endorsed Premium Gem, which has no bothersome abrasions. The 1845 half dime is rare this fine, and only a few higher-grade pieces known. An excellent type coin. Population: 21 in 66 (2 in 66+), 6 finer. CAC: 9 in 66, 4 finer (6/18). NGC ID# 2337, PCGS# 4335

- 3486 1847 MS65 NGC. CAC.** Rose-gold and powder-blue toning endow this satiny and nicely struck Gem. Coined from clashed dies, but no abrasions are perceptible. The 1847 is much more available than its 1846 predecessor, but Gems are undeniably elusive. Certified in a prior generation holder. CAC: 6 in 65, 9 finer (5/18).  
*Ex: Dallas Signature (Heritage, 11/2006), lot 468, which realized \$1,035.*  
**From The Reilly Cody Collection, Part II.** NGC ID# 2339, PCGS# 4337

- 3487 1847 MS66 Prooflike NGC. V-4.** At first glance, this Premium Gem has every appearance of a proof. The fields are fully mirrored and faintly striated, and the devices are sharp and frosted. Daniel W. Valentine (1931) identified five die varieties of the 1847 half dime, with V-2 being designated the proof die. Today, the grading services have certified V-1 and V-2 coins as proofs. This coin appears to match the V-4 diagnostics listed in Valentine. While we are not aware of a V-4 coin being certified as a proof, we are aware of at least two semiprooflike examples of this variety, plus this deeply mirrored example. Other than a hint of gold around the borders, this piece is brilliant and shows modest cameo contrast. It is the sole example certified as Prooflike by NGC (4/18).  
*Ex: West Palm Beach FUN (Heritage, 7/2007), lot 466, which realized \$2,990; ANA Signature (Heritage, 2/2014), lot 3240, which realized \$2,467.50.*  
**From The Reilly Cody Collection, Part II.** NGC ID# 2339, PCGS# 4337

### 1853 Seated Half Dime, MS66 Scarce No Arrows Type, Few Are Finer

- 3488 1853 No Arrows MS66 NGC. CAC.** Struck prior to a change in weight for silver coinage in 1853, many No Arrows half dimes may have been melted en masse since they were worth more than their face value as silver bullion. The silver-to-gold ratio was out of balance during the early 1850s. This Premium Gem No Arrows survivor is colorfully toned in shades of blue and pale-rose, with mint luster flashing across partially reflective fields. The strike is sharp throughout, and there are no individually significant marks to mention. Census: 10 in 66, 2 finer. CAC: 5 in 66, 2 finer (5/18).  
**From The Reilly Cody Collection, Part II.** NGC ID# 233M, PCGS# 4351

**1857-O Seated Half Dime, MS66+  
Seldom Seen Finer**

**3489 1857-O MS66+ PCGS. CAC.** A Plus-graded Premium Gem representative of this slightly better date, with sharply detailed design elements throughout and some interesting clash marks on the obverse. The well-preserved surfaces are highlighted by shades of lavender-gray and cerulean-blue toning, with vibrant mint luster underneath. Population: 15 in 66 (2 in 66+), 5 finer. CAC: 9 in 66, 5 finer (5/18).

*From The Reilly Cody Collection, Part II.* NGC ID# 233T, PCGS# 4366

**3490 1859-O MS65 NGC.** This well-struck Gem is awash in swirling luster and is surprisingly vibrant for an O-mint product. Lightly toned in the centers with blue and gold elements scattered around the borders. Census: 14 in 65 (3 in 65+), 6 finer (5/18).

*Ex: Long Beach Signature (Heritage, 2/2011), lot 3354.*

*From The Reilly Cody Collection, Part II.* NGC ID# 233X, PCGS# 4370

**1860 Transitional Half Dime, MS64  
Judd-267, 'Coin Without a Country'**

**3491 1860 Transitional, Judd-267, Pollock-315, R.4, MS64 PCGS Secure.** Although technically a pattern and not part of the Seated half dime series, many collectors seek an example of this so-called transitional issue as part of the regular series. It is listed in the *Guide Book* with that in mind. The regular Stars obverse of 1859 was muled with the Cereal Wreath reverse of 1860, creating a strange situation where UNITED STATES OF AMERICA is omitted. The hollow-centered stars are credited to Anthony Paquet, while Mint Director James Ross Snowden was architect of the issue. This lustrous, near-Gem example is brilliant and frosted with a tinge of golden toning at the borders. There are no marks to mention other than Mint-related roller marks across stars 4, 5, and Liberty's upper portrait. Likewise, stars 9 to 11 are incomplete in the centers as a result. The high points of the wreath and bow are characteristically weak. Population: 21 in 64, 27 finer (6/18). NGC ID# 2346, PCGS# 4373

**1867 Seated Liberty Half Dime, MS66  
Condition Census Example**

**3492 1867 MS66 PCGS Secure. CAC.** The 1867 Seated Liberty half dime claims a meager mintage of 8,000 pieces. This Condition Census example exhibits well-detailed design elements, with dramatic clash marks on both sides. The well-preserved surfaces show highlights of cerulean-blue and pale gold toning, with vibrant mint luster on both sides. Population: 7 in 66, 1 finer. CAC: 5 in 66, 2 finer (5/18). NGC ID# 234L, PCGS# 4390

**1871-S Half Dime, MS66  
None Finer at Either Service**

**3493 1871-S MS66 NGC.** The official mintage of 161,000 pieces is deceiving, since most 1871-S half dimes were sent to China and melted, according to the recent Bowers reference, *A Guide Book of Liberty Seated Silver Coins*. This frosted example has a speckling of deep-gray patina and traces of almond-gold toning, although it appears nearly brilliant to the unaided eye. The strike is weak across the high points of the portrait of Liberty, with die clashing visible throughout the fields on both sides. Two radial die cracks run upward from the rim below the bow. Census: 5 in 66, 0 finer (5/18). NGC ID# 234W, PCGS# 4399

**PROOF SEATED HALF DIMES**

**3494 1858 PR64 NGC.** *Ex: Richmond Collection.* Nearly brilliant with watery, reflective fields. A few wispy lines limit the technical grade but do little to detract from its overall desirability. A layer of light golden color accents each side, and is a touch deeper on the reverse. Census: 22 in 64 (1 in 64+), 27 finer (5/18).

*Ex: Richmond Collection, Part III (David Lawrence Rare Coins, 3/2005), lot 1095; Long Beach Signature (Heritage, 6/2005), lot 5723; Central States Signature (Heritage, 4/2006), lot 1911.*

*From The Reilly Cody Collection, Part II.* NGC ID# 235N, PCGS# 4437

**3495 1858 PR64 NGC.** Significantly, 1858 was the first year that the Mint began to market and sell proofs to the public. Previously, proofs had only been available to insiders. An estimated 300 proof half dimes were struck that year. This near-Gem specimen is minimally toned, showing faint golden accents. The fields are glassy and the design elements razor-sharp.

**1864 Half Dime, PR67 ★**  
**One of the Finest-Graded Examples**

- 3496 1864 PR67 ★ NGC.** This proof issue of 470 pieces had a low corresponding business strike mintage of 48,000 coins, increasing the market pressure on proofs. This Superb example, one of the finest-graded, displays vivid electric-blue peripheral toning that surrounds frosted silver-white and champagne-red central devices. A sharply detailed and seemingly pristine example of this better-date issue. Census: 5 in 67 (1 in 67 ★), 1 finer (4/18).  
*Ex: Houston Signature (Heritage, 12/2014), lot 3501.*  
**From The Reilly Cody Collection, Part II.** NGC ID# 235Z, PCGS# 4447

- 3497 1868 PR66 Cameo NGC.** The elusive nature of the 1868 business strikes, made to the extent of only 88,600 coins, requires the 600 proofs made to serve double duty. A ring of golden-amber color surrounds lightly toned centers on each side. Considerable field-device contrast further contributes to the appeal of near-pristine surfaces. Census: 4 in 66 Cameo (1 in 66 ★), 3 finer (5/18).  
*Ex: Houston Signature (Heritage, 12/2009), lot 358.*  
**From The Reilly Cody Collection, Part II.** NGC ID# 2365, PCGS# 84451

**1869 Seated Liberty Half Dime, PR67 ★**  
**Only 600 Pieces Struck**

- 3498 1869 PR67 ★ NGC.** The peach-gold centers of this spectacular Superb Gem are bounded by bands of powder-blue and lemon-gold toning, with deeply reflective fields underneath. A sharply detailed and flashy proof that boasts outstanding eye appeal. Just 600 proofs were produced. Census: 10 in 67 (1 in 67 ★), 1 finer (5/18).  
*Ex: FUN Signature (Heritage, 1/2010), lot 663.* NGC ID# 2366, PCGS# 4452

- 3499 1869 PR65 Cameo NGC.** Blatant contrast exists between the frosty devices and the flashy fields. Tan-gold accents are noticeable near the rims, while the centers remain brilliant. An exemplary Gem proof, one of 600 pieces struck. Census: 4 in 65 Cameo, 18 finer (5/18).  
*Ex: Summer FUN Signature (Heritage, 7/2010), lot 3454.*  
**From The Reilly Cody Collection, Part II.** NGC ID# 2366, PCGS# 84452

- 3500 1870 PR66 NGC.** Intense violet and blue toning appears on both sides of this Premium Gem. The surfaces are fully mirrored with noticeable cameo contrast hidden beneath the toning. Sharp design motifs complete the picture. Census: 24 in 66 (1 in 66+), 10 finer (6/18).  
*Ex: Sacramento Signature (Heritage, 3/2011), lot 3329, realized \$1,437.50.*  
**From The Reilly Cody Collection, Part II.** NGC ID# 2367, PCGS# 4453

**1871 Half Dime, PR67**  
**Attractive Border Color**

- 3501 1871 PR67 NGC.** With a mintage of 960 pieces, it would seem that the proof 1871 half dime would be relatively available. However, it is less frequently seen than expected because many unsold proofs were melted in July 1873. This is a wonderful piece that has brilliant centers on each side that are surrounded by multicolored iridescence at the margins. The fields show a high degree of die polish and project strong mirroring. Census: 5 in 67, 2 finer (5/18). NGC ID# 2368, PCGS# 4454

**1871 Half Dime, PR67 Cameo**  
**Just One Certified Finer**

- 3502 1871 PR67 Cameo NGC. CAC.** Hints of pale gold toning accent the pristine fields of this Superb Gem proof half dime. Sharply struck devices contrast boldly with the reflective fields to create the dramatic cameo effect. A fairly generous proof mintage of 960 half dimes was achieved in 1871, but few survivors can match the quality of this landmark piece. Census: 9 in 67 Cameo (1 in 67+, 1 in 67 ★, 1 in 67+ ★), 1 finer. CAC: 6 in 67, 0 finer (5/18).  
*Ex: Houston Signature (Heritage, 12/2010), lot 3408.* NGC ID# 2368, PCGS# 84454

- 3503 1873 PR66 PCGS. CAC.** Lovely ocean-blue and rose-gold toning adorns this flashy and undisturbed Premium Gem. The strike is full aside from a few grains on the upper-left portion of the wreath. A scant 600 proofs were issued. Population: 21 in 66 (2 in 66+), 7 finer. CAC: 10 in 66, 3 finer (5/18).  
*Ex: Long Beach Signature (Heritage, 6/2015), lot 3451.*  
**From The Reilly Cody Collection, Part II.** NGC ID# 236A, PCGS# 4456

**1873 Half Dime, PR67  
Flashy and Originally Toned**

- 3504 1873 PR67 NGC.** All 600 proof half dimes struck in 1873 — the final year of the denomination — feature a Close 3 in the date. Both sides of this Superb Gem specimen are flashy and originally toned in magnificent shades of violet, blue, and gold. Eye appeal is tremendous. Census: 9 in 67 (1 in 67+ ★), 1 finer in this category (6/18). NGC ID# 236A, PCGS# 4456

**EARLY DIME**

- 3505 1805 4 Berries, JR-2, R.2, VF25 PCGS Secure. CAC.** The Four Berries 1805 dime is a popular target for early type collectors. This is a charming example with a fully readable E PLURIBUS UNUM. The eagle's wings and Liberty's neck curls are also nicely defined. Dove-gray fields contrast with pearl-white devices. One small mark is noted beneath the M in UNUM. CAC: 3 in 25, 36 finer (6/18). NGC ID# 236S, PCGS# 38769 Base PCGS# 4477

**BUST DIMES**

- 3506 1824/2 Flat Top 1, JR-1, R.3, MS61 PCGS.** All 1824-dated dimes were struck from the same obverse die, which shows portions of an underdigit 2 about the 4 in the date. The "Flat Top 1" refers to the 1 in 10 C, which has a flat top and a defective right foot. On the other variety, the very scarce JR-2, the 1 in 10 C has a normal appearance. The present dime is lightly toned and coruscating with surprisingly unabraded surfaces. The centers display minor inexactness of strike. NGC ID# 2373, PCGS# 38805 Base PCGS# 4502
- 3507 1833 Last 3 High, JR-5, R.1, MS64 PCGS.** The last 3 in the date is high, and the second T in STATES is centered above RI. This collectible variety is featured separately in the annual *Guide Book*. Strongly defined surfaces are richly and attractively toned in original violet, blue, and peach-gold tones that lighten somewhat on the reverse. Soft mint luster shines through.  
**From The Kadison Family Collection.** NGC ID# 237D, PCGS# 38870 Base PCGS# 4523

**SEATED DIMES**

- 3508 1839 No Drapery, F-106a, High R.6, MS65 NGC.** This is a significant offering for Seated dime specialists — an exquisite example of the rare F-106a variant with star 8 repunched and a normal reverse alignment. Gerry Fortin reports one other example in XF and suggests a premium of 200% to 400%. Rich cobalt-blue and plum colors dominate the obverse, while the reverse exhibits light rose patina. A tiny mark is noted on the cheek. A razor-sharp example of the final full year of the No Drapery type. Census: 25 in 65 (1 in 65+, 1 in 65 ★), 38 finer (5/18).  
*Ex:* ANA Signature (Heritage, 4/2006), lot 398.  
**From The Reilly Cody Collection, Part II.** PCGS# 537675 Base PCGS# 4571

- 3509 1853 Arrows MS65 NGC.** *Ex:* Ashland City. The first year of the short-lived Arrows, Legend Reverse subtype has a large mintage of more than 12 million pieces, since hoarded old-tenor silver needed replacement with new-tenor coin. Lustrous and brilliant with a bold strike. The unabraded surfaces display a slight matte texture. Both sides show light to medium clash marks, and a diagonal die crack passes through the left arrowhead.  
*Ex:* FUN Signature (Heritage, 1/2008), lot 962; Internet Coin Auction (Heritage, 5/2008), lot 22213; FUN Signature (Heritage, 1/2009), lot 2166, which realized \$1,610. NGC ID# 2398, PCGS# 4603

- 3510 1856-S F-101, R.5, XF45 NGC.** A single die pair is responsible for the production of 70,000 1856-S dimes, a challenging issue that circulated widely and is rarely seen above this grade level. Full radials appear on the stars, LIBERTY is bold, and excellent eye appeal is the result of original antique golden-gray patina. Census: 6 in 45, 9 finer (5/18). NGC ID# 238W, PCGS# 538089 Base PCGS# 4613

**PROOF SEATED DIMES**

- 3511 1858 F-101, R.5, PR64 NGC.** *Ex:* Richmond Collection. This brilliant proof shows moderate contrast between the frosted devices and mirrorlike fields. A number of small planchet voids and lint marks occur in the fields. It is believed that 300+ proofs were coined in the first year of public proof sales.  
*Ex:* Richmond Collection, Part III (David Lawrence Rare Coins, 3/2005), lot 1250; Long Beach Signature (Heritage, 6/2005), lot 5790; Central States Signature (Heritage, 4/2006), lot 1250.  
**From The Reilly Cody Collection, Part II.** NGC ID# 23CC, PCGS# 538998 Base PCGS# 4747
- 3512 1858 F-101, R.5, PR64 NGC. CAC.** All 1858 proof dimes were struck from one die pair. The obverse shows a downward slanting date, and the reverse has a die line from the M in AMERICA to the rim. 1858 was the first year that proofs were sold to the general public. The mintage is unknown but estimated as 300+ pieces by the *Guide Book*. This Choice proof has a hint of peripheral orange toning and a trace of struck-in grease near the final two stars. CAC: 9 in 64, 1 in 64 Prooflike, 16 finer (4/18).  
*Ex:* Long Beach Signature (Heritage, 6/2010), lot 555, which realized \$1,840.  
**From The Reilly Cody Collection, Part II.** NGC ID# 23CC, PCGS# 538998 Base PCGS# 4747
- 3513 1859 PR64 Cameo PCGS. F-101, R.4.** Upward-sloping date. Thickly frosted devices generate bold contrast against the flashy fields. Peripheral lilac-red and ocean-blue toning is more apparent on the obverse. Merely 800 proofs were issued. Population: 12 in 64 (1 in 64+) Cameo, 22 finer (5/18).  
*Ex:* Tramonta Collection (Bowers and Merena, 10/2005), lot 5403; Summer FUN Signature (Heritage, 7/2010), lot 3479.  
**From The Reilly Cody Collection, Part II.** NGC ID# 23CD, PCGS# 84748

- 3514 1866 PR65 Cameo NGC.** Light gold toning is seen across each side with distinct contrast between the frosted devices and strongly mirrored fields. Fully struck and highly appealing. Census: 12 in 65 Cameo, 17 finer (4/18).  
*Ex:* ANA National Money Show Signature (Heritage, 3/2007), lot 484, where it realized \$1,495.  
**From The Reilly Cody Collection, Part II.** NGC ID# 23CP, PCGS# 84759

**1866 Dime, PR66+ Deep Cameo  
Finest at PCGS**

- 3515** 1866 PR66+ Deep Cameo PCGS Secure. F-102, R.3. The die pair was also used to coin business strikes, though this Premium Gem is undoubtedly a proof. It features an upward-sloping date and a raised lump between shield stripes 6 and 7. The 1866 (8,000 circulation strikes) is a scarce issue, putting added date pressure on proofs (725 pieces minted). This Premium Gem showcases remarkable field-device contrast and pristine untuned surfaces throughout. Population: 3 in 66 (2 in 66+) Deep Cameo, 0 finer (5/18).  
*Ex: Long Beach Signature (Heritage, 9/2010), lot 5095, where it realized \$9,200. NGC ID# 23CP, PCGS# 94759*

- 3516** 1867 Repunched Date, F-103, R.5, PR65 NGC. Repunching is apparent on the 18 in the date. Two proof die pairs are known for the 1867 dime (625 pieces total), F-103 being the usually seen variant. Electric-blue patina dominates this eye-catching Gem proof. Lavender accents appear throughout. The underlying fields are flashy and well-preserved. With only 6,000 circulation strikes minted, this is a terrific alternative.  
*From The Reilly Cody Collection, Part II. NGC ID# 23CR, PCGS# 539019 Base PCGS# 4760*

**1867 Seated Liberty Dime, PR66 ★  
Spectacular Multicolor Toning**

- 3517** 1867 Repunched Date, F-103, R.5, PR66 ★ NGC. CAC. The NGC Star designation is awarded for superior eye appeal, and the present high-grade specimen earns its Star with dramatic multicolor patina. Orange-gold, rose-lilac, lavender, and jade-green are awash across both sides. Boldly impressed save for moderate incompleteness on the upper-left wreath. Just 625 proofs were struck. Census: 14 in 66 (2 in 66 ★), 1 finer. CAC: 5 in 66, 0 finer (5/18).  
*Ex: Sacramento Signature (Heritage, 3/2011), lot 3364. NGC ID# 23CR, PCGS# 539019 Base PCGS# 4760*

- 3518** 1870 F-101, R.3, PR65 PCGS Secure. Golden-brown and ocean-blue toning encompasses this well-struck and prominently mirrored Gem. An undisturbed and desirable specimen. The *Guide Book* states 1,000 proofs were produced, but it is unlikely that all sold, and the Mint may have melted remainders. NGC ID# 23CU, PCGS# 539025 Base PCGS# 4763

- 3519** 1875 PR66 Cameo NGC. F-101, R.3. The 1 and 5 in the date are repunched, as is the O in ONE. The 1875 dime is widely available in almost any grade thanks to a massive mintage of 10.3 million circulation strikes, but proofs (700 pieces) are much scarcer. This Premium Gem with Cameo contrast is mostly brilliant, peripheral accents of gold being the only hint of color. Expectedly clean and razor-sharp with watery fields. Census: 13 in 66 Cameo (2 in 66 ★), 6 finer (6/18). NGC ID# 23CY, PCGS# 84772

**1878 Dime, PR66+  
Type Two Reverse, Finest at PCGS**

- 3520** 1878 Type Two Reverse, F-101, R.3, PR66+ PCGS. This Plus-designated Premium Gem is the sole finest non-Cameo proof at PCGS, a distinction that makes it equally as important as the rarer Cameo coins of the same numeric grade, none of which are Plus-designated. The strike is razor-sharp, although there is a planchet irregularity on Liberty's head. A splash of vivid blue and violet toning at the upper-right obverse contrasts with brilliance seen elsewhere on that side. The reverse shows uniform lavender-gray patina. Population: 10 in 66 (1 in 66+), 0 finer (5/18). NGC ID# 23D3, PCGS# 539041 Base PCGS# 4775

**1880 Seated Dime, PR67  
Toned Cameo Example**

- 3521** 1880 PR67 Cameo NGC. CAC. F-101, R.3. A defect shows on the bottom loop of the second 8 in the date and there is a die chip on the right upright of the M in DIME, diagnostic of the F-101 variety. The sharply detailed frosty design elements of this delightful Superb Gem contrast boldly with the reflective fields, and the well-preserved surfaces are enhanced by shades of burnt-orange, greenish-gold, and cerulean-blue toning. Census: 19 in 67 Cameo (1 in 67+, 3 in 67 ★), 1 finer. CAC: 5 in 67, 0 finer (5/18). NGC ID# 23D5, PCGS# 84777

**1882 Dime, PR67 Cameo  
Glassy, Unmarked Fields**

- 3522** 1882 PR67 Cameo PCGS. F-101, R.3. This is the only die pair known for the 1882 proof, of which 1,100 coins were struck. All show repunching on the base of the 2. Both sides are brilliant, exhibiting glassy, unmarked fields around frosty relief elements. A single spot of toning appears in the right obverse field. Void of contact. Population: 10 in 67 (2 in 67+) Cameo, 1 finer in this category (5/18). NGC ID# 23D7, PCGS# 84779

**3523 1884 PR65 Cameo PCGS Secure. F-101, R.3.** Plum-red, electric-blue, and olive-green toning invigorates the margins of this beautiful and crisply struck Gem. The motifs are icy and the reflective fields show only trivial imperfections. A desirable proof type coin. NGC ID# 23D9, PCGS# 84781

**3524 1884 PR67 Cameo PCGS. F-101, R.3.** This scintillating Superb Gem proof boasts deeply mirrored fields against white frost over the devices. A nearly flawless representative, fully brilliant without a hint of color on either side. From a mintage of 875 pieces. Population: 24 in 67 (2 in 67+) Cameo, 1 finer (5/18).  
Ex: *Pittsburgh Signature* (Heritage, 8/2004), lot 5694.  
**From The Kadison Family Collection.** NGC ID# 23D9, PCGS# 84781

**1885 Dime, PR67 Cameo  
Colorful Rim Toning, Brilliant Centers**

**3525 1885 PR67 Cameo PCGS. CAC. F-101, R.3.** If the complete strike and blatant field-device contrast were not enough confirm the proof origin of this lovely Superb Gem, the repunched flag on the 1 and a couple of die defects on the wreath should suffice. These are diagnostic of the F-101 die pair, with which all proofs were struck. Blue, gold, and crimson rim toning cedes to brilliant interiors, where the cameo effect is most profound. Population: 15 in 67 (1 in 67+) Cameo, 2 finer. CAC: 13 in 67, 0 finer (5/18). NGC ID# 23DA, PCGS# 84782

**3526 1886 PR66 Cameo PCGS Secure. F-103, R.3.** Rich cherry-red, golden-brown, and forest-green toning fills the borders of this well-struck and impressive Premium Gem. Thickly frosted motifs contrast with smooth, glassy fields. A high-grade survivor from the low proof mintage of 886 pieces. NGC ID# 23DB, PCGS# 84783

**1886 Dime, PR67 Cameo  
None Finer at PCGS**

**3527 1886 PR67 Cameo PCGS. CAC. F-103, R.3.** Brilliant save for daubs of gold rim toning, this profoundly contrasted proof displays glassy, mirrored fields set against frost-white devices. Free of all but the most inconsequential lines, this Superb Gem Cameo is identified by two pinpoint planchet chips — one by the F in OF, the other in the right-hand field opposite the drapery folds beneath Liberty's elbow, yet they do not distract in the least from the gleaming appeal. High-end for the grade. Population: 4 in 67 Cameo, 0 finer. CAC: 4 in 67, 0 finer (5/18). NGC ID# 23DB, PCGS# 84783

**1890 Dime, PR67 Deep Cameo  
Sole Finest at PCGS**

**3528 1890 PR67 Deep Cameo PCGS. CAC. F-103, R.4.** This 1890 proof Seated dime is the finest of the date certified at PCGS, and it is a wonder to behold. Each side is brilliant with stark field-device contrast. There are no contact marks, nor would any be expected at this lofty level. Population: 1 in 67 Deep Cameo, 0 finer. CAC: 1 in 67, 1 finer (5/18).  
Ex: *Central States Signature* (Heritage, 4/2012), lot 3835. NGC ID# 23DE, PCGS# 94787

**BARBER DIMES**

**3529 1893-O MS65 NGC.** An attractive Gem representative of this popular branch mint issue, with sharply detailed design elements and well-preserved brilliant surfaces throughout. Satiny mint luster adds to the outstanding eye appeal. Census: 8 in 65 (1 in 65+), 6 finer (6/18). NGC ID# 23DR, PCGS# 4801

**3530 1895-S MS64+ PCGS Secure.** Some faint mint-made roller marks are visible on Liberty's cheek beneath a loupe, despite the reverse wreath being needle-sharp. Both sides of this high-end near-Gem display frosty luster with original olive-green and russet toning. Higher-grade 1895-S Barber dimes are rare. Population: 40 in 64 (3 in 64+), 12 finer (6/18). NGC ID# 23DX, PCGS# 4808

**1902 Dime, MS67  
Tied for the Finest Certified**

**3531 1902 MS67 PCGS Secure.** Just four examples of this issue have achieved the MS67 grade at PCGS and NGC, and this piece has unbeatable eye appeal. Both sides have bold design features and brilliant frosty luster. Delicate gold and emerald toning frames the violet-gray interior regions. Population: 3 in 67, 0 finer (6/18). NGC ID# 23EJ, PCGS# 4827

**1902-O Dime, MS65**  
**Exceptional Eye Appeal**

- 3532 1902-O MS65 PCGS. CAC.** With a mintage of 4.5 million pieces, the 1902-O Barber dime should be easier to locate in Gem Uncirculated than it is. Coins in this grade are rare, and only a few finer examples are known. This piece has original surfaces with subtle golden-olive patina on the obverse and light reddish-gold toning on the reverse. Faint clash marks can be seen on the reverse. Population: 13 in 65, 2 finer. CAC: 3 in 65, 2 finer (6/18). NGC ID# 23EK, PCGS# 4828

**1903-S Barber Dime, MS66**  
**Only One Finer at PCGS**

- 3533 1903-S MS66 PCGS Secure.** This important Premium Gem represents a conditionally rare issue that is nearly impossible to obtain in grades above MS64. Only 20 coins examined by PCGS have achieved the MS65 or finer grade assessment. A splendid representative of this low-mintage issue, this piece features a sharp strike with satin luster beneath gold and iridescent toning. Population: 12 in 66 (2 in 66+), 1 finer (6/18). NGC ID# 23EP, PCGS# 4832
- 3534 1909-D MS65 PCGS.** The 1909-D had a low mintage of only 954,000 coins, and few survive at the top grade levels. This lovely Gem exhibits peripheral gold and lilac toning on otherwise brilliant surfaces. Population: 16 in 65, 27 finer (6/18). NGC ID# 23FC, PCGS# 4851
- 3535 1912 MS67 PCGS Secure.** A spectacular Superb Gem Barber dime, with sharply detailed design elements and impeccably preserved surfaces that radiate vibrant mint luster on both sides. Shades of champagne-gold and lavender toning add to the outstanding eye appeal. Population: 12 in 67 (2 in 67+), 0 finer (6/18). NGC ID# 23FM, PCGS# 4860

**PROOF BARBER DIMES**

- 3536 1896 PR66 Cameo NGC.** Shades of cerulean-blue and silver-gray toning enhance the impeccably preserved surfaces of this delightful Premium Gem proof, with sharply detailed design elements underneath. The deeply reflective fields contrast boldly with the frosty devices to create an unusual toned cameo effect. Census: 18 in 66 Cameo (2 in 66 ★), 15 finer (6/18). NGC ID# 23G9, PCGS# 84880

**1899 Barber Dime, PR67 Cameo**  
**Glittering, Superb Contrasted Proof**

- 3537 1899 PR67 Cameo NGC.** This is an impeccable, well-mirrored proof with a completely untuned appearance overall. The contrast displayed by this late '90s issue is not as dramatic as those from earlier in the decade, but quite beautiful in its own right. A razor-sharp strike accompanies the virtually mark-free, frosted devices and glassy fields. Census: 7 in 67 Cameo (1 in 67+), 1 finer (5/18). Ex: *Central States Signature (Heritage, 5/2004)*, lot 6696. From *The Kadison Family Collection*. NGC ID# 23GC, PCGS# 84883

- 3538 1907 PR66 PCGS Secure.** A sharply detailed Premium Gem Barber dime from a proof mintage of just 575 pieces, this coin exhibits bold cameo contrast between the frosted devices and deeply reflective fields. The well-preserved surfaces are highlighted by shades of greenish-gold and cerulean-blue toning. Population: 27 in 66 (1 in 66+), 19 finer (5/18). NGC ID# 23GM, PCGS# 4891

**MERCURY DIMES**

**1916-D Mercury Dime, XF Details**  
**Unrivalled Key to the Series**

- 3539 1916-D — Environmental Damage — PCGS Genuine Secure. XF Details.** Subdued, silver-gray surfaces show areas of microscopic pitting and corrosion, particularly on the obverse. The reverse is less affected, with considerable sharpness on the bands and fascies. Despite the environmental factors, the 1916-D is far and away the key date and mintmark in the Mercury dime series, and always in demand as such regardless of condition. This example retains XF definition throughout both sides, and it is certified genuine.

**1916-D Mercury Dime  
Uncirculated Details**

- 3540 1916-D — Cleaned — PCGS Genuine Secure. Unc Details.** Most examples of the key date 1916-D dime are in heavily circulated grades. At PCGS, the median grade is Good 4, and about 90% of the certified popular is in XF40 or lower condition. Uncirculated examples are very scarce relative to demand. This lightly toned steel-blue and straw-gold example has a slightly bright cheek, and the left obverse field shows a hint of granularity.

**1918-D Dime, MS64 Full Bands**

- 3541 1918-D MS64 Full Bands PCGS Secure.** Despite a substantial mintage of more than 22 million coins, few 1918-D Mercury dimes are certified with the Full Bands designation. In fact, fewer than 20% of all PCGS certified 1918-D dimes carry that important strike designation. This piece is highly lustrous with brilliant and frosty silver surfaces that host a few splashes of gold toning on the obverse. PCGS has only certified 32 finer Full Bands examples of this issue (6/18). NGC ID# 23H6, PCGS# 4919

**1919-D Mercury Dime, MS64+ Full Bands  
Lustrous, Toned Example**

- 3542 1919-D MS64+ Full Bands PCGS Secure.** This Plus-graded Choice example displays fully split and rounded bands on the fascies, and the other design elements are sharply detailed as well. The well-preserved surfaces are visited by attractive shades of lime-green and ice-blue toning. Vibrant mint luster adds to the outstanding eye appeal. PCGS has graded 22 numerically finer Full Bands examples (5/18). NGC ID# 23H9, PCGS# 4925

- 3543 1920 MS67 Full Bands PCGS.** Attractive shades of greenish-gold and lavender toning visit the impeccably preserved surfaces of this spectacular Superb Gem. The design elements are sharply detailed and the bands on the fascies are fully split and rounded. Population: 35 in 67 Full Bands, 0 finer (6/18). NGC ID# 23HB, PCGS# 4929

- 3544 1921 AU58 PCGS Secure.** From a small mintage of 1.2 million pieces, the 1921 Mercury dime is seldom encountered in Mint State grades. Only the slightest trace of wear shows on this attractive near-Mint example and the lightly abraded surfaces retain much of their original mint luster. Population: 51 in 58, 16 finer (6/18). NGC ID# 23HE, PCGS# 4934

**1921 Mercury Dime, MS65+ Full Bands  
Conditionally Rare Key Date**

- 3545 1921 MS65+ Full Bands PCGS Secure.** The 1921 Mercury dimes, from Philadelphia and Denver, are low-mintage, key-date issues that follow the 1916-D and the two overdates as the fourth and fifth rarest dates in the series. This brilliant Gem features a bold strike and delicate gold toning on its fully brilliant and frosty silver surfaces. NGC ID# 23HE, PCGS# 4935

- 3546 1925-S MS64 Full Bands PCGS Secure.** The well-preserved surfaces of this attractive Choice example radiate vibrant mint luster and show highlights of greenish-gold toning. The design elements are sharply detailed, with Full Bands definition on the fascies. NGC ID# 5LX3, PCGS# 4953

**1927-D Dime, MS65 Full Bands  
Important Strike Rarity**

- 3547 1927-D MS65 Full Bands PCGS Secure.** Only a small percentage (about 30%) of all certified 1927-D dimes have earned the Full Bands designation. High-grade examples with that strike designation are especially elusive. A few splashes of gold toning appear on the brilliant and highly lustrous silver surfaces of this lovely Gem. Population: 33 in 65 (3 in 65+) Full Bands, 16 finer (6/18). NGC ID# 23HV, PCGS# 4963

- 3548 1928-D MS65 Full Bands PCGS Secure.** A spectacular Gem representative of this popular branch mint issue, with sharply detailed design elements and fully split and rounded bands on the fascies. The well-preserved surfaces are lustrous and appealing. Population: 77 in 65 Full Bands, 34 finer (6/18). NGC ID# 23HY, PCGS# 4969

- 3549 1929-D MS67 Full Bands PCGS Secure. CAC.** Spectacular shades of burnt-orange and amber toning visit the obverse of this delightful Superb Gem, with vibrant mint luster throughout. The surfaces are impeccably preserved and the design elements are sharply detailed with Full Bands definition on the fascies. Population: 58 in 67 (5 in 67+) Full Bands, 3 finer. CAC: 23 in 67, 1 finer (6/18). NGC ID# 5LXC, PCGS# 4975

**1945 Dime, MS63 Full Bands  
Major 20th Century Strike Rarity**

- 3550 1945 MS63 Full Bands PCGS.** David Hall provides a compelling anecdote on the CoinFacts website for the 1945 Mercury dime with Full Bands, relating to the origin of the designation and the status of this issue as one of the great 20th century strike rarities. Of the 159.1 million coins struck, a few hundred are known with full separation on the central bands. This Select example has radiant mint frost over brilliant surfaces that show the faintest trace of gold color. A major key date for the specialist.  
*Ex: Dallas Signature (Heritage, 11/2005), lot 1185. NGC ID# 5A98, PCGS# 5057*

- 3551 1945-S Micro S, FS-512, MS66 Full Bands PCGS Secure.** Satiny, untuned luster provides a modest cartwheel effect on this sharp Premium Gem, yielding no bothersome abrasions or other distractions. The Micro S variety is in the *Guide Book*. With Full Bands, this variety is rare finer the MS66. NGC ID# 37PD, PCGS# 145415 Base PCGS# 5063

**PROOF MERCURY DIME**

- 3552 1936 PR66 PCGS Secure.** Razor-sharp definition is evident on all the design elements of this spectacular Premium Gem proof, with deeply reflective fields and impeccably preserved brilliant surfaces. From a small proof mintage of 4,130 pieces. NGC ID# 27DG, PCGS# 5071

**TWENTY CENT PIECE**

- 3553 1875 MS63 PCGS Secure.** From a mintage of just 38,500 pieces, this impressive Select specimen offers well-detailed design elements and lightly marked surfaces, with highlights of lavender-gray toning. The 1875 twenty cent piece is an elusive issue in high grade. NGC ID# 23R5, PCGS# 5296

**PROOF TWENTY CENT PIECES**

**1878 Twenty Cent, PR62  
Appealing for the Grade**

- 3554 1878 PR62 PCGS Secure. BF-1, R.3.** Circulation-strike twenty cent piece coinage was halted in 1876, but proofs were struck for collectors through 1878. The final-year proof is a popular type coin and is essential for a date set. This lower-end example is fully struck and reflective, showing remarkably good eye appeal for the grade. Under a loupe, minor hairlines are visible in the fields. The interiors are brilliant, surrounded by amber and violet border toning. NGC ID# 27H5, PCGS# 5306

**1878 Twenty Cent Piece, PR63  
Final Issue of the Denomination**

- 3555 1878 PR63 PCGS Secure.** The last two years of the short-lived twenty cent piece consisted of proof strikes only, with a mintage of 510 proofs in 1877 and 600 in 1878. The denomination was plagued with problems from the start, including its similarity in size and appearance to the quarter dollar. The denomination was useful in the West, where there was a shortage of coinage, but of no use in the east where it was nothing more than a substitute for two dimes or four nickels. This Select proof has delicate gold toning over its silver-gray surfaces with fully mirrored fields. NGC ID# 27H5, PCGS# 5306

**EARLY QUARTER**

- 3556 1806 B-3, R.1 — Environmental Damage — PCGS Genuine. XF Details.** Tompkins Die State 3/4. A narrow diagonal streak of granularity extends from the I in UNITED to the middle clouds. The portrait is moderately granular near the ear and on the shoulder. The deep gray surfaces are otherwise unblemished. The right wing exhibits little if any evidence of wear, but the strike is blunt on Liberty's hair, the eagle's body, and the E in LIBERTY.

**BUST QUARTERS**

**1825/4/(2) B-2 Quarter, Choice AU  
Colorful Border Toning**

- 3557 1825/4/(2) B-2, R.2, AU55 PCGS Secure.** Tompkins Die State 1/1, without reverse die cracks. Star 8 is near the edge of Liberty's cap, and 25 C. is close to the fletchings and stem. Browning-2 is the most collectible die variety for the year 1825. Examples are available across most grade levels and serve as excellent Capped Bust, With Motto type coins. This Choice AU quarter is untuned in the centers and shows rings of cobalt-blue, crimson, and gold around the edges. Strong motifs exhibit light merging. Minimally marked. NGC ID# 23RS, PCGS# 38975 Base PCGS# 5336

- 3558 1834 B-3, R.3, AU58 NGC.** Tompkins Die State 2/2. Bars clashed at the ear. It is likely that this variety was actually struck in 1835, as the reverse die appears in earlier states for both the 1834 B-4 and 1835 B-1. This pewter-gray example approaches Uncirculated condition, the devices showing a hint of rub over the high points. Luster emerges from the star recesses and reverse legends.  
**From The Reilly Cody Collection, Part II.** NGC ID# 23RZ, PCGS# 38994 Base PCGS# 5353

## SEATED QUARTER

- 3559** 1890 MS65 NGC. CAC. Briggs 2-B. Cherry-red, gold, and blue toning endows both sides, with the deepest shades around the reverse periphery. A lustrous Gem that boasts uncommonly unabraded surfaces. The strike shows softness only on star 8. Although the Philadelphia mintage was the highest since 1878, only 80,000 pieces were produced. CAC: 4 in 65, 19 finer (6/18). NGC ID# 23VP, PCGS# 5523

## PROOF SEATED QUARTERS

### 1859 Quarter, Toned PR64 Attractive Coloration

- 3560** 1859 PR64 PCGS Secure. CAC. Briggs 2-B. CAC-approved proof 1859 quarters are rare. This Choice non-Cameo displays subtle contrast on both sides, but the prevailing feature is original olive-gold, lilac-gray, and blue toning that encompasses each side. This proof is fully struck and free of distractions, being immensely attractive for the grade. Population: 60 in 64, 18 finer; 7 in 64 (1 in 64+) Cameo, 10 finer; 0 in 64 Deep Cameo, 2 finer. CAC: 9 in 64, 5 finer (6/18). NGC ID# 23WL, PCGS# 5555

- 3561** 1862 PR64 PCGS Secure. Briggs 5-E. Medium dappled golden-brown and blue-green toning graces this intricately struck Choice specimen. Virtually void of hairlines, and on the verge of commanding a Cameo designation. The light die doubling on QUAR is usual for proofs of this scarce, low-mintage date. NGC ID# 23WP, PCGS# 5558

### 1863 Quarter, PR64 Cameo Only 460 Examples Struck

- 3562** 1863 PR64 Cameo PCGS. CAC. Briggs 4-D. Only 460 proof quarters were struck in 1863, making the issue elusive in all grades. This impressive Choice example displays sharply detailed design elements and deeply mirrored fields that contrast boldly with the frosty devices. The brilliant surfaces show only a few minor hairlines and contact marks, with a curving lint mark in the field near star 6. Population: 24 in 64 (4 in 64+) Cameo, 8 finer. CAC: 8 in 64, 2 finer (5/18). NGC ID# 23WR, PCGS# 85559

### 1866 With Motto Quarter, PR64 Deep Cameo Boldly Contrasted

- 3563** 1866 PR64 Deep Cameo PCGS. Briggs 2-B. A ring of golden rim toning surrounds both sides of this otherwise brilliant Choice proof, with strong frost-white contrast between sharply struck motifs set against deeply mirrored fields. A diagonal die line through the upright of the R in LIBERTY confirms the proof die pair. We note a few light lines on the obverse that intermix with die polish lines in the fields. Some faint slide marks across Liberty's knees may account for the near-Gem designation, since the eye appeal is that of an even finer grade. Population: 3 in 64 Deep Cameo, 8 finer (5/18). *From The Kadison Family Collection.* NGC ID# 3TXU, PCGS# 95565

- 3564** 1872 PR65 PCGS Secure. Briggs 3-C. The multicolor obverse has an orange-gold center with maroon and ocean-blue patina throughout the periphery. The reverse is patinated in dusky steel-blue and rose-red shades. A needle-sharp Gem with original eye appeal and one minor mark centered on the right obverse field. NGC ID# 3TWH, PCGS# 5571

- 3565** 1873 Arrows PR63 PCGS Secure. Briggs 5-D. The proof 1873 quarter has a mintage of 600 Closed 3, No Arrows pieces and 500 Open 3, Arrows pieces. The latter issue trades at a higher level, since the Arrows, Motto design lasted just two years. The present specimen exhibits undeniable cameo contrast, though the coin is undesignated as such by PCGS. Snow-white fields and devices are framed by peach-gold and lavender borders. NGC ID# 23XR, PCGS# 5574

- 3566** 1874 Arrows PR63 PCGS Secure. Briggs 5-D. Honey-gold centers are framed by broad aquamarine margins. The fully struck and prominently mirrored surfaces show relatively few hairlines. An elusive two-year proof subtype with a combined mintage of 1,200 pieces. NGC ID# 23XS, PCGS# 5575

### 1875 Quarter, PR65 Cameo Frosty Devices, Peripheral Patina

- 3567** 1875 PR65 Cameo PCGS Secure. Briggs 4-E. Type One Reverse. An ocean-blue periphery encircles the lightly dappled chestnut-brown and stone-gray obverse center. The reverse shows only a trace of golden toning near AMERICA. A prominently mirrored and undisturbed Gem. The icy motifs are well-struck, though several stars lack a full impression. The proof mintage of 700 pieces was accomplished by three die pairs. Briggs 4-E has a low date and shows repunching on the 5 within the loop. Population: 9 in 65 Cameo, 3 finer (5/18). NGC ID# 23X7, PCGS# 85576

**3568 1878 PR66 NGC. Briggs 4-D.** Type Two Reverse. Sea-green and lilac toning blankets this delightful Premium Gem. A bold strike and reflective fields further ensure the eye appeal. No detractions are apparent. Just 800 proofs were coined. NGC ID# 23XA, PCGS# 5579

**3569 1880 PR65 PCGS. Briggs 2-B.** Type One Reverse. Exquisitely toned in powder-blue, golden, rose, and straw-gold shades. The fields are seamless and reflective. An intricately struck and undisturbed Gem. Housed in a first-generation "rattler" holder. *Ex: Auction '84 (Stack's, 7/1984), lot 1244; Jascha Heifetz Collection (Superior, 10/1989), part of lot 3400.* NGC ID# 23XC, PCGS# 5581

**3570 1881 PR64+ Cameo NGC. Briggs 2-B.** Total quarter dollar production was low in 1881, as it was for nearly the entire decade, with 12,000 circulation strikes and 975 proofs minted. Date pressure heightens demand for these carefully produced collector coins. This near-Gem proof with Cameo contrast is entirely brilliant, enhancing the white-on-black effect. Few minute lines are seen. NGC ID# CFBL, PCGS# 85582

**3571 1882 PR65 NGC. Briggs 2-B.** An impressive Gem proof with sharply detailed design elements and well-preserved reflective fields, under shades of golden-brown and cerulean-blue toning. The surfaces are well-preserved and eye appeal is terrific. Census: 42 in 65 (1 in 65+, 2 in 65 ★), 56 finer (5/18). NGC ID# 23XE, PCGS# 5583

**3572 1882 PR64 Cameo NGC. CAC.** Dusky butter-gold toning fails to deny the contrast between the intricately detailed devices and the reflective fields. Despite a proof mintage of 1,100 pieces, examples of the present quality are very scarce. CAC: 9 in 64, 25 finer (5/18). *Ex: Central States Signature (Heritage, 4/2010), lot 2620, which realized \$1,265.*  
**From The Reilly Cody Collection, Part II.** NGC ID# 23XE, PCGS# 85583

#### 1885 Quarter, PR67 Cameo Low Total-Production Issue

**3573 1885 PR67 Cameo NGC. Briggs 3-B.** This is a spectacular Superb Gem with Cameo contrast enhanced by the lack of toning. Just a hint of golden color appears on the obverse, but it does not obscure the profound depth of field. A couple of lint marks are present, but there are no signs of contact. Proofs are subject to date pressure from collectors, given the low circulation-strike production. Census: 6 in 67 Cameo, 4 finer (5/18). NGC ID# 23XH, PCGS# 85586

**3574 1890 PR63 Deep Cameo PCGS Secure. Briggs 3-C.** Blue, red, and peach-gold toning encircle the reverse border. The obverse margin shows only light chestnut toning. Strong Deep Cameo contrast ensures the eye appeal of this fully struck Select specimen. Patient rotation reveals faint obverse field hairlines. Only 590 proofs were produced. NGC ID# 23XN, PCGS# 95591

#### 1891 Quarter, PR66 Cameo Stark Contrast, Border Toning

**3575 1891 PR66 Cameo PCGS. CAC.** Excellent contrast and final-year-of-issue status make this Premium Gem Cameo proof an ideal Seated Liberty type coin. The interiors exhibit a hint of champagne toning, surrounded by border hues of amber, violet, and ocean-blue. Eye appeal is pleasing, and the only strike weakness is seen on several left-hand stars. Population: 13 in 66 Cameo, 8 finer; 3 in 66 Deep Cameo, 1 finer. CAC: 8 in 66, 8 finer (6/18). NGC ID# 597E, PCGS# 85592

### BARBER QUARTERS

**3576 1896-S VG8 PCGS Secure.** A pleasing VG8 example of this low-mintage series key, with the date and legends still legible and many letters in the motto still visible. The design elements are completely outlined and the dove-gray surfaces are lightly abraded. NGC ID# 23Y9, PCGS# 5615

**3577 1897-S AU55 PCGS Secure. CAC.** The 1897-S Barber quarter is a better date in high grade. This Choice AU example is ideal for quality-conscious collectors and features a rarely seen CAC green label. Lavender-gray and sea-green interiors cede to vivid gold, crimson, and olive border toning. Eye appeal is exceptional for the grade. Population: 22 in 55, 57 finer. CAC: 3 in 55, 13 finer (6/18). NGC ID# 23YC, PCGS# 5618

**3578 1901-S AG3 PCGS Secure.** A well-worn example of this popular key issue, from a small mintage of 72,664 pieces. The central design elements are completely outlined and the date and most of the legends remain legible, but the motto on the scroll and LIBERTY are worn smooth. NGC ID# 23YR, PCGS# 5630

#### 1909-O Quarter, AU53 Strong Detail, Difficult in High Grades

**3579 1909-O AU53 PCGS.** Most 1909-O quarters survive in heavily circulated condition. This is one of the most challenging issues in the Barber series to locate in AU grades. Strike typically poses a problem, but this AU53 quarter shows complete star radials, defined forecurls, and strong detail on the arrow fletchings. Accents of gold and gunmetal patina frame minimally toned centers. Population: 4 in 53, 61 finer (5/18). NGC ID# 23ZJ, PCGS# 5655

**3580 1916-D MS67 NGC. CAC.** A spectacular Superb Gem from the final year of the design, with well-detailed design elements and vibrant mint luster, under vivid shades of champagne-gold, violet, and amber toning. Census: 13 in 67 (2 in 67+, 1 in 67 ★), 1 finer. CAC: 11 in 67, 0 finer (6/18). NGC ID# 2426, PCGS# 5674

## PROOF BARBER QUARTERS

- 3581 1894 PR64+ Cameo PCGS Secure.** A Plus-graded Choice example from a proof mintage of 972 pieces, this coin exhibits sharply detailed design elements and deeply mirrored fields that contrast dramatically with the frosty devices. Only minor signs of contact are evident. Population: 21 in 64 (1 in 64+) Cameo, 49 finer (5/18). NGC ID# 2429, PCGS# 85680
- 3582 1898 PR66 PCGS Secure.** Attractive shades of cerulean-blue and pale gold toning visit the impeccably preserved surfaces of this delightful Premium Gem proof, with sharply detailed design elements and deeply reflective fields on both sides. Population: 23 in 66 (1 in 66+), 24 finer (6/18). NGC ID# 242D, PCGS# 5684
- 3583 1903 PR66 Cameo PCGS.** Only 755 proofs were struck of this issue, and this is one of the most attractive untoned examples known. The coin was struck from heavily polished dies as evidenced by a curve of the polish accenting Liberty's jawline. Brilliant throughout, the fields show unfathomable depth of mirrored reflectivity with considerable mint frost over the devices, all of which create a strong cameo effect on each side. Population: 14 in 66 (1 in 66+) Cameo, 21 finer (6/18).  
*Ex: Long Beach Signature (Heritage, 1/2004), lot 5787, where it brought \$3,335.*  
**From The Kadison Family Collection.** NGC ID# 242J, PCGS# 85689
- 3584 1904 PR66 Cameo NGC. CAC.** A virtually stone-white Premium Gem that boasts obvious white-on-black distinction. The strike is nearly full, save for hints of minor softness in the upper-right shield corner and immediately adjacent feathers. Only 670 proofs were struck, and few survivors remain in comparable quality. Census: 6 in 66 Cameo (1 in 66+, 1 in 66 ★), 6 finer. CAC: 4 in 66, 5 finer (5/18).  
*Ex: FUN Signature (Heritage, 1/2013), lot 4233, which realized \$2,585.* NGC ID# 242K, PCGS# 85690

## STANDING LIBERTY QUARTERS

### 1917 Type One Quarter, MS67 Full Head Glistening, Unabraded Luster

- 3585 1917 Type One MS67 Full Head NGC.** At the MS67 Full Head grade level, collectors expect near-perfection for a Type One Standing Liberty quarter, and this piece delivers just that. Intricate sharpness spans the entire design, and the unmarked surfaces glisten with original cartwheel luster. Brilliant interiors cede to light golden peripheral toning. Census: 66 in 67 (3 in 67+ Full Head, 1 in 67 ★, 1 in 67+ ★), 0 finer (5/18).  
*Ex: ANA Signature (Heritage, 7-8/2008), lot 303, which realized \$3,450.*  
**From The Kadison Family Collection.** NGC ID# 242Z, PCGS# 5707
- 3586 1918 MS66 PCGS Secure.** The 1918 Standing Liberty quarter is virtually as scarce in high grade as the branch mint counterparts are, and it is rare above MS66. This Premium Gem example is a trifle weak at the temple and thus lacks a Full Head designation, but the shield rivets, date, and toes are better-defined. The surfaces are unabraded and frosty with light golden toning. A dash of russet color appears around Liberty's head. Population: 26 in 66 (3 in 66+), 3 finer (6/18). NGC ID# 3TWT, PCGS# 5720

- 3587 1918/7-S FS-101 — Cleaned — PCGS Genuine Secure. Fine Details.** The underdigit 7 is unmistakable within the 8. This and the Denver mint nickel overdate are consistently popular errors created during the first year of World War I. The present steel-gray and chestnut-gold key date quarter has a slightly cloudy appearance but lacks mentionable marks, aside from a thin, light mark beneath the V in TRVST.

### 1918/7-S Quarter, VF20 Collector-Grade Representative

- 3588 1918/7-S FS-101 VF20 PCGS Secure.** The clashed and eroded state of the dies is partially masked by wear on this midgrade coin. The date numerals are worn, but the overdate feature is yet plain. Hints of amber-gold and olive toning are present in the protected areas, leaving much of each side with a bright slate-gray hue. The 1918/7-S is the single scarcest issue in the Standing Liberty quarter series overall, and it is the only major die variety. NGC ID# 243A, PCGS# 395949 Base PCGS# 5726
- 3589 1918-S MS65 PCGS Secure.** This frosty Gem nearly qualifies for a Full Head designation, and the date area is sharp. Typical of the 1918-S, however, the central portion of each side shows considerable weakness. A loupe reveals microscopic incuse marks in these areas, although such are mostly just characteristics of unstruck planchet surface and not abrasions on the coin. Both sides are frost-white aside from a dash of russet toning along the upper-obverse border. NGC ID# 2439, PCGS# 5724
- 3590 1919-D MS60 PCGS.** Traces of straw-gold and stone-gray toning visit this otherwise brilliant representative. Liberty's shield and head show expected minor incompleteness. Lustrous and minimally abraded with exceptional eye appeal for the third-party grade. Encapsulated in an old green label holder. NGC ID# 243C, PCGS# 5730
- 3591 1919-D MS64 PCGS Secure.** This bright, minimally marked 1919-D quarter displays satiny luster and untuned surfaces. Liberty's head is weak as usual, but the date numerals are sharp. Neither side exhibits clash marks or lapping, but a heavy die crack runs horizontally through the date. NGC ID# 243C, PCGS# 5730
- 3592 1919-S MS63 PCGS Secure.** Liberty's head is weak at the temple, but the shield rivets and the leading edge of the eagle's left (facing) wing are well-defined. The date numerals are flat but clear. Satiny luster is mostly light golden in color, although blue-green freckles appear over the upper obverse. NGC ID# 243D, PCGS# 5732
- 3593 1920 MS67 NGC.** Even though the 1920 has the highest mintage in the Standing Liberty quarter series, its availability in the better grades of Uncirculated is no greater than later dates with significantly lower mintages. This specimen is well-struck, showing decent (though not full) definition on Liberty's face. Most of the rivets are strong, with only the two near Liberty's midsection showing minor softness. The first digit of the date is also weak. Lustrous surfaces are well-preserved, revealing no mentionable contact marks, and are visited by splotches of medium-intensity multicolored toning, especially at the borders. Census: 24 in 67 (7 in 67 ★, 1 in 67+ ★), 0 finer (6/18).  
*Ex: Atlanta ANA Signature (Heritage, 4/2006), lot 623, realized \$1,437.50.* NGC ID# 243E, PCGS# 5734

**3594 1920-D MS65 PCGS Secure.** An attractive Gem specimen, with well-detailed design elements that show just a touch of the usual softness on the head and shield rivets, and well-preserved, lustrous surfaces. A few hints of pink and pale gold toning add to the considerable eye appeal. Population: 36 in 65, 42 finer (6/18). NGC ID# 243F, PCGS# 5736

**3595 1921 MS65 PCGS.** The 1921 is a low-mintage semikey. About 95% of the 1.9 million coins minted were struck without Full Head detail. The shield exhibits a bold impression, though Liberty's temple and the date are incomplete. Softly frosted luster glows from beneath dusky gunmetal and golden patina. Beautifully preserved and rare any finer. NGC ID# 243H, PCGS# 5740

#### 1923-S Quarter, MS65 Vibrant, Frosted Mint Luster

**3596 1923-S MS65 PCGS Secure.** The mintage of just over 1.3 million coins sets the semikey 1923-S apart from surrounding dates and mints, with the sixth-lowest production of the series. This Gem example lacks a full head with some flatness in the ear area, and the second, third, and fourth rivets are softly struck. Frosted mint luster illuminates areas of deep-blue and pale-violet toning. PCGS reports just 44 numerically finer non-Full head examples (6/18). NGC ID# 243K, PCGS# 5744

#### 1924 Standing Liberty Quarter, MS66+ Attractive Full Head Example

**3597 1924 MS66+ Full Head PCGS Secure. CAC.** This Plus-graded Premium Gem exhibits sharply detailed design elements, with Full Head definition and all shield rivets showing. A die crack travels through Liberty's head and the B and E in LIBERTY. The impeccably preserved, brilliant surfaces radiate vibrant mint luster from both sides. Overall eye appeal is terrific. Population: 74 in 66 (10 in 66+) Full Head, 13 finer. CAC: 15 in 66, 6 finer (5/18). NGC ID# 243L, PCGS# 5747

**3598 1924-D MS65 Full Head PCGS Secure.** This charming Gem Standing Liberty quarter exhibits full details on Liberty's head and only a touch of softness shows on the shield rivets. A die crack travels through the letters in LIBERTY, but the lustrous surfaces are free of significant marks. Delicate hints of pale gold toning add to the outstanding eye appeal. Population: 58 in 65 Full Head, 26 finer (6/18). NGC ID# 243M, PCGS# 5749

**3599 1926-S MS64 PCGS Secure.** Softly frosted luster is mostly untuned on this near-Gem 1926-S quarter, and only a few small marks are seen. Typical of the issue, Liberty's head, the shield rivets, and the central torso and eagle exhibit moderate strike weakness. There is a bit of amber-colored residue near and about the same size of the mintmark. NGC ID# 4462, PCGS# 5758

**3600 1930 MS67 PCGS.** This bright, thickly frosted Superb Gem is extraordinarily preserved for this otherwise obtainable P-mint issue. The strike is well above-average for the type, if slightly shy of Full Head definition. A few tiny nicks on Liberty's left (facing) leg, and one small notch on the eagle's lower torso, are the only blemishes. Population: 7 in 67, 0 finer (5/18).

*From The Kadison Family Collection.* NGC ID# 2445, PCGS# 5778

## WASHINGTON QUARTERS

**3601 1932-D MS64+ PCGS. CAC.** Close examination of this Plus-graded, CAC-approved near-Gem fails to reveal any noticeable distractions, and the overall eye appeal easily rivals that of many MS65 coins on the market. This piece displays sharp detail and satiny luster with bits of olive and russet toning on each side near the borders. Washington's cheek is clean. Finer examples of this key issue are scarcely offered. NGC ID# 2448, PCGS# 5791

**3602 1932-S MS65 PCGS.** The two mintmarked 1932 issues are known to even casual hobbyists as the keys to the long-lived Washington quarter series. The 1932-S has the lowest mintage but is nonetheless more available in better grades than its chief rival, the 1932-D. The present Gem exhibits booming luster and sharp devices. Dappled olive and khaki-gold toning further attests to the originality. PCGS lists only four finer representatives (6/18). NGC ID# 2449, PCGS# 5792

#### 1943 Washington Quarter, MS68 Registry Grade Example

**3603 1943 MS68 NGC.** Nearly 100 million Washington quarters were struck at the Philadelphia Mint in 1943 and this delightful MS68 specimen is among the finest survivors. The design elements are well-detailed and the impeccably preserved surfaces radiate vibrant mint luster from both sides, creating terrific eye appeal. Census: 4 in 68 (2 in 68 ★), 0 finer (5/18). NGC ID# 2455, PCGS# 5820

**3604 1943-S Doubled Die Obverse, FS-101, MS66 PCGS Secure.** All of the obverse legends are strongly die doubled, but GOD and TRUST exhibit the most prominent spread. One of three World War II DDO quarter varieties to receive *Guide Book* distinction. Unabraded and lustrous with light butter-gold toning and a hint of granularity in the right obverse field. The strike is bold in the centers though incomplete at portions of the borders. NGC ID# 2457, PCGS# 145154 Base PCGS# 5823

## PROOF WASHINGTON QUARTER

**3605 1938 PR68 NGC.** A delightful PR68 specimen from a mintage of 8,045 pieces, this coin offers virtually flawless surfaces and razor-sharp definition on all of the design elements. The fields are deeply reflective and some hints of greenish-gold toning add to the outstanding eye appeal. Census: 15 in 68 (4 in 68 ★), 0 finer (6/18). NGC ID# 27HR, PCGS# 5977

## EARLY HALF DOLLARS

- 3606** 1794 O-101a, T-7, High R.3 — Tooled, Whizzed — NCS. **Good Details.** Tompkins Die State 1/5. The central devices on the O-101a reverse are weak due, in part, to sinking of the die, and the surfaces show fine granularity that masks some of the small marks that dot the well-worn fields and devices. NCS notes accompanying tooling and whizzing of the surfaces. Although worn and despite the handwork, the date is fully visible and pleasing silver-gray toning deepens to olive-gray at the margins.

*From The Terry Brand Estate, Part X.* NGC ID# 24E6, PCGS# 39201 Base PCGS# 6051

### 1794 O-101a Half Dollar, VG Details

- 3607** 1794 O-101a, T-7, High R.3 — Damaged — NCS. **VG Details.** Tompkins Die State 1/5. The late die state is clearly visible on this example despite considerable circulation, with the biplanar surface bounded by two die cracks at the upper-reverse. The peripheries are sharply defined surrounding the central devices with grade-consistent wear. Four prominent rim indents earn the Damaged designation from NCS.

*From The Terry Brand Estate, Part X.*

### 1794 Flowing Hair Half, VG10 O-101a, Well-Defined Motifs

- 3608** 1794 O-101a, T-7, High R.3, VG10 NGC. Tompkins Die State 1/5. Areas of feather detail remain on the wings and the dentils are present throughout both sides, with only nominal weakness at the lower-right obverse as usual. The date and stars are sharp, and Liberty's portrait shows a crisp outline. Deep-gray toning visits the margins to frame overall golden-gray surfaces, which reveal scattered light lines and tiny marks under magnification. We note a minor obverse rim ding at 5 o'clock.

*From The Terry Brand Estate, Part X.* NGC ID# 24E6, PCGS# 39201 Base PCGS# 6051

### 1794 Flowing Hair Half, VG10 O-101a, Middle Die State

- 3609** 1794 O-101a, T-7, High R.3, VG10 NGC. Tompkins Die State 1/3. Actually a middle die state of Overton-101, since the die crack through F in OF has not yet turned left through the adjacent olive leaves and does not extend through the top single leaf to the second S in STATES. This is a sharply struck example for the assigned grade, with bands of olive-gold toning joining pale-blue patina at the margins. The date, rims, and stars are sharply defined for the VG level. This is an attractive representative of O-101, by far the most frequently available die marriage among 11 varieties of the first-year 1794 issue.

*From The Terry Brand Estate, Part X.* NGC ID# 24E6, PCGS# 39201 Base PCGS# 6051

### 1794 Flowing Hair Half, Good 6 Scarce Overton-104 Die Pair

- 3610** 1794 O-104, T-11, R.5, Good 6 NGC. Tompkins Die State 1/1. Warm-gray toning accents both sides, with golden undertones and generally smooth silver surfaces. Some weakness at the borders exists below the date and along the right-hand stars, and at AMER of AMERICA. Marks are limited to a few light lines around the chin and neck, yet this is a Choice example for the assigned grade.

*From The Terry Brand Estate, Part X.* NGC ID# 24E6, PCGS# 39204 Base PCGS# 6051

### 1794 O-104 Half, Fine Details Final Die Pair for the Year

- 3611** 1794 O-104, T-11, R.5 — Damaged — NCS. **Fine Details.** Tompkins Die State 1/1. The O-104 variety is unique among 1794 halves for its reverse master die, which consisted solely of the eagle's portrait. Subtle changes in the eagle are apparent, particularly on the underside of the right (facing) wing and the splay of the eagle's tailfeathers. A number of small pock marks, old digs, and rim irregularities exist on both sides of this example, some of which may be planchet related. The date is full, and the surfaces display natural old-silver toning.

*From The Terry Brand Estate, Part X.*

**1794 O-104 Half Dollar, VF Details  
Even Wear, Attractively Toned**

- 3612 1794 O-104, T-11, R.5 — Obverse Scratched — NCS. VF Details.** Tompkins Die State 1/1. Although all 1794 varieties are scarce, the O-104 is moderately available in lower circulated grades. VF examples are seldom seen, and finer pieces are rare. No Mint State examples of the O-104 die pair are confirmed. This pleasing example has solid VF definition with medium-gray toning that deepens around the raised devices. Evenly worn, a loupe reveals numerous small marks and lines including some Mint-related adjustment marks along the obverse border. An old short scrape to the left of 1 in the date is noted by NCS.  
*From The Terry Brand Estate, Part X.*

- 3613 1795 2 Leaves, O-102, T-26, R.4, Fine 12 PCGS.** Tompkins Die State 1/2. Pleasing lilac-gray and gold toning covers both sides of this smoothly worn O-102 half. The motifs are generally well-outlined for the grade, with full rims except at the right obverse edge, where the stars and dentils merge. A lens reveals tiny marks and a few light lines, plus a depressed area along Liberty's forehead that extends into the adjacent field.  
*From The Kadison Family Collection.* NGC ID# 37NX, PCGS# 39215 Base PCGS# 6052

- 3614 1795 2 Leaves, O-105a, T-25, R.4, VG10 PCGS Secure.** A problem-free Flowing Hair type coin, ideal for the early silver collector. Wear is even with all stars and letters strongly outlined. Dentilation is complete throughout the obverse and the lower reverse. The cream-gray surfaces display faint hairlines but lack visible abrasions. NGC ID# 24E7, PCGS# 39221 Base PCGS# 6052

- 3615 1795 2 Leaves, A Over E in STATES, O-113a, T-14, R.4, VG8 PCGS.** The A in STATES is entered over an errant E. The variety is mentioned in the *Guide Book* without a separate listing. This stone-gray example shows nearly complete border dentils. The stars, letters, and motifs are well-outlined. Smooth save for unobtrusive marks near the chin and beak. Struck from a clashed obverse die.  
*Ex: FUN Signature (Heritage, 7/2015), lot 3907, which realized \$1,645.* NGC ID# 24E7, PCGS# 39254 Base PCGS# 39252

**1801 O-101 Half Dollar, VF25  
Low-Mintage, Early Series Key Issue**

- 3616 1801 O-101, T-2, R.3, VF25 PCGS Secure.** Tompkins Die State 2/3. The Heraldic Eagle design was introduced in the gold series around 1797, during the year when half dollars were struck with the outgoing Small Eagle reverse. No more half dollars were struck until 1801, although it is possible the dies were prepared a few years earlier. The O-101 (T-2) dies show considerable rust pits as if they were stored over several years in the primitive Mint conditions until needed in 1801. This dove-gray example shows areas of deep-gray and brownish-tan toning. Moderate wear determines the assigned grade, since only tiny marks occupy the pleasing surfaces. Just 30,289 pieces were struck of both 1801 varieties combined. NGC ID# 24ED, PCGS# 39267 Base PCGS# 6064

- 3617 1803 Large 3, Small Reverse Stars, O-102a, T-2, High R.3, XF45 NGC.** Tompkins Die State 3/4. Luster fills the legends, curls, plumage, and stars of this charming cream-gray Draped Bust half. LIBERTY is clashed near the eagle's tail, but marks are absent and the eye appeal exceeds the numerical grade. NGC ID# 24EF, PCGS# 39272 Base PCGS# 6066

- 3618 1805/4 O-102, T-5, R.3, VF30 PCGS Secure. CAC.** Much of the underdigit 4 is obvious, including the serif, stand, upright, and left corner. This midgrade Draped Bust half is impressively free from marks. Liberty's cheek and shoulder show wear, and the strike is incomplete on the shield and upper-reverse stars, but the rich sea-green and lavender-gray surfaces are clearly original. NGC ID# 24EH, PCGS# 39292 Base PCGS# 6070

**1805 O-109 Half Dollar, XF45  
Condition Census Quality**

- 3619 1805 O-109, T-14, R.4, XF45 PCGS.** Tompkins Die State 1/1, without cracks. Deep olive-green, stone-gray, and mahogany-brown toning graces this well-defined early half dollar. Marks are unimportant aside from a couple of faint diagonal lines on the shield. A few small mint-made lint marks are noted near the profile and branch. Moderate adjustment marks on the upper reverse are as made. Overton-109 is a difficult variety to acquire in high grades. A single Uncirculated example is known, and this piece ranks fifth on Tompkins' Condition Census.  
*Ex: FUN Signature (Heritage, 1/2015), lot 4816, which realized \$2,614.38.* NGC ID# 24EG, PCGS# 39282 Base PCGS# 6069

- 3620 1806 Knob 6, Small Stars, O-107, T-3, High R.4, XF40 PCGS.** The obverse is cream-gray with sea-green and rose-red undertones. The reverse exhibits similar but deeper shades. Crisscross adjustment marks (as made) are present on the lower obverse. Striking weakness is localized to the bust tip, and opposite on the right-side stars and clouds above the eagle. The obverse field is faintly hairlined.  
*Ex: Denver Signature (Heritage, 8/2006), lot 3272, which realized \$1,092.50. NGC ID# 37BW, PCGS# 39307 Base PCGS# 6075*

**1806 O-109 Half Dollar, AU50  
Pointed 6, No Stem**

- 3621 1806 Pointed 6, No Stem, O-109, T-15, R.1, AU50 NGC.** Tompkins Die State 1/3. Bright luster remains within the recesses of this early half dollar toned in lively shades of lilac and silver-gray patina. The hair strands are well-struck, but much of the eagle is soft. Light friction appears on Liberty's high points — the uppermost hair detail and ribbons — as well as on the bust drapery lines. A small area of dark toning appears at the rim right of the date. Great eye appeal and originality.  
*Ex: Houston Signature (Heritage, 12/2014), lot 4052, which realized \$3,201.88. NGC ID# 24EJ, PCGS# 39310 Base PCGS# 6073*

**1806 O-115, T-17 Draped Bust Half, AU55  
Repunched Pointed 6, With Branch Stem**

- 3622 1806 Pointed 6, Stem, O-115, T-17, R.1, AU55 NGC.** Tompkins Die State 3/1. This is one of the most plentiful varieties among 1806 half dollars, an ideal candidate for type collections. The obverse is immediately recognized by the repunched TY in LIBERTY, and that obverse also appears on O-114, 116, and 117. Although weakly defined at the centers, as often for the variety, this piece has nearly full satin luster with delicate peripheral gold toning and dark steel toning across the shield. Struck from an early-to-mid die state with a delicate crack from the base of the date to the outer-left star points, plus a faint crack connecting stars 4, 5, and 6. NGC ID# 24EJ, PCGS# 39317 Base PCGS# 6071

**1806 O-115, T-17 Half Dollar, AU55  
Repunched TY in LIBERTY**

- 3623 1806 Pointed 6, Stem, O-115, T-17, R.1, AU55 NGC.** Tompkins Die State 2/1. Struck from an early die state, this Choice About Uncirculated O-115 lacks most of the die cracks and clashing of later strikes, although a singular die crack runs from above the outside of stars 1 and 2 to below the date. The reverse die was uncracked and unclashed. Steel-gray surfaces retain plentiful mint luster and display auburn-brown accents, plus pleasing bluish-gray toning at the borders. The 6 in the date is repunched with an extra tip of a previous 6 just to the right of the primary digit. We note a few small marks inside of obverse star 2. NGC ID# 24EJ, PCGS# 39317 Base PCGS# 6071

**1807 O-102 Draped Bust Half, Colorful AU53  
Light Toning, Luster Remains**

- 3624 1807 Draped Bust, O-102, T-8, R.2, AU53 NGC.** Tompkins Die State 2/2, an early to middle state of the dies. Aquamarine and gold toning at the margins yields to stone-gray patina on the obverse, but the reverse is more comprehensively toned in iridescent rainbow shades. All of the motifs retain sharp definition despite numerous light marks and slight wear from circulation. Overton-102 is a readily available Draped Bust die marriage, and favored among type collectors for that reason. NGC ID# 24EM, PCGS# 39339 Base PCGS# 6079

**1807 Draped Bust Half, AU50  
O-103, Scarce in About Uncirculated**

- 3625 1807 Draped Bust, O-103, T-11, R.3, AU50 PCGS.** Tompkins Die State 2/2. The obverse has a fine die crack from star 7 to LI and the top of the head. No reverse die cracks are evident. A delightful example, this scarce 1807 Draped Bust half dollar has bright, untuned silver surfaces that retain hints of luster. The devices are slightly subdued, and both sides show multiple die clashing. NGC ID# 24EM, PCGS# 39340 Base PCGS# 6079

## BUST HALF DOLLARS

### 1807 Capped Bust Half Dollar, XF45 Large Stars, O-114'a'

- 3626** 1807 Capped Bust, Large Stars, O-114'a', High R.5, XF45 PCGS. This is a late die state example of the Overton-114 die pair. It shows extensive cracks on each side, in addition to the diagnostic lump below the 7. Violet accents accompany the deep gray patina that covers each side. Strike detail is good with expected rub over the exposed areas. Tied at the lower end of Stephen Herrman's Condition Census for the O-114'a' variety. NGC ID# 24EN, PCGS# 39361 Base PCGS# 6088

### 1809 O-114a Bust Half, XF40 Important Late State Example

- 3627** 1809 Normal Edge, O-114a, R.5, XF40 PCGS Secure. Rich old-silver toning deepens to smoke-gray shades at the margins throughout both sides of this attractive and scarce O-114a Bust half. The characteristic weak chin on Liberty reveals light planchet striations, while weakness at the eagle's left (facing) wing shows vertical file marks that contribute to a soft central strike. The diagnostic bisecting die crack runs vertically through the shield and eagle's neck to the edge above TE in STATES, and meanders through the tail feathers, arrow fletchings, and talons before grazing the lowest olive leaf to the bottom edge. The finest O-114a in Steve Herrman's Spring 2018 Census grades XF45, with several examples tied at that level (5/18). PCGS# 39401 Base PCGS# 6092
- 3628** 1811 Small 8, O-110, R.1, AU58 NGC. Identifying characteristics for this die pair include T3 centered directly over the I in PLURIBUS, and the bases of AM(ERICA) joined. Overton-110 is possibly the most available variety for the year. This near-Mint 1811 half dollar features brilliant interiors framed by soft daubs of blue, crimson, and gold toning. Struck slightly off-center toward 1 o'clock. NGC ID# 24EU, PCGS# 39434 Base PCGS# 6097
- 3629** 1812 Large 8, O-109, R.3, MS62 PCGS. This variety is attributed by the low round lump to the left of star 10, and the A and M of AMERICA nearly touching. We do not call this coin O-109a (despite the "die defects" at the lower right wing) because it has complete milling on both sides. Well-struck with only localized softness on the eagle's right wing. Bright silver-gray surfaces are devoid of significant contact marks. Bold die clashing occurs on each side.  
Ex: FUN Signature (Heritage, 1/2005), lot 7169; ANA Signature (Heritage, 7/2005), lot 6252.  
From The Kadison Family Collection. NGC ID# 4FVJ, PCGS# 39455 Base PCGS# 6100

### 1813 O-110 Bust Half Dollar, MS63 Dramatically Clashed Late Die State

- 3630** 1813 O-110, R.1, MS63 PCGS. Brightly lustrous surfaces display wisps of pale gold toning, while prominent obverse die clashing leaves little doubt about the late die state. Nearly all examples of this variety have clash marks between the date and bust, and left and right of the bust. On this coin, three distinct sets of clash marks are visible. The stars and date are drawn to the rim, and the milling nearly disappears along the edge of the obverse. In his Spring, 2018 edition of *Auction & Mail Bid Prices Realized for Bust Half Dollars*, Stephen Herrman lists three MS64 examples, plus two MS63 specimens to make up the Overton-110 Condition Census. We believe this coin is tied at the lower end of the Census as well (5/18).  
Ex: Long Beach Signature (Heritage, 2/2005), lot 6967.  
From The Kadison Family Collection. NGC ID# 24EZ, PCGS# 39472 Base PCGS# 6103

- 3631** 1814 O-104a, R.2, AU55 PCGS. The late die state of Overton-104 is cracked extensively on both sides in the peripheries. This Choice AU example shows moderate die erosion in the margins and is a trifle weak on the left-hand stars. Light wear and mottled gunmetal-gray toning characterize each side. NGC ID# 24F3, PCGS# 39479 Base PCGS# 6105
- 3632** 1818/7 Large 8, O-101a, R.1, AU53 PCGS Secure. The top of a 7 looms above the second 8 in the date. Faint golden-brown toning visits the borders of this primarily cream-gray Bust half dollar. The well-defined surfaces exhibit substantial luster, and a lens fails to locate any detrimental marks. NGC ID# 24FA, PCGS# 39541 Base PCGS# 6115
- 3633** 1818 O-112, R.1, MS62 PCGS. A die line between the bases of the RI in AMERICA is Dr. Glenn Peterson's pick-up point for Overton-112. Rich navy-blue, plum-red, and olive-gold toning fills the borders of this lustrous and lightly abraded early Bust type coin. NGC ID# 24F9, PCGS# 39529 Base PCGS# 6113
- 3634** 1821 O-103, R.2, MS62 PCGS. Formerly from Stack's March Sale, Part II of March 1984 (lot 982), where it was called "Choice Brilliant Uncirculated. Sharply struck, with magnificent surfaces." Now MS62 PCGS, this smooth and frosted coin shows traces of reddish-gold toning around the margins. Both the A and E in STATES are missing serifs, lower-right and left respectively on the two letters, confirming the O-103 die pair. Only a few light marks are seen on the coin. NGC ID# 24FF, PCGS# 39578 Base PCGS# 6128
- 3635** 1821 O-106, R.1, MS62 PCGS. A nearly horizontal die line above the base of the shield is the pick-up point for Overton-106, one of only seven die marriages for the date. This well-struck example displays ocean-blue, lilac, and straw-gold toning. The satiny surfaces are refreshingly free from abrasions. NGC ID# 24FF, PCGS# 39584 Base PCGS# 6128
- 3636** 1822 O-104, R.3, MS62 NGC. Light to medium chestnut-gold and jade-green toning visits this minimally marked Capped Bust half. Luster dominates the margins and motifs. The strike is good except on the eagle's claws and branch stem. NGC ID# 24FG, PCGS# 39589 Base PCGS# 6129

**3637 1823 O-112, R.1, MS62 NGC.** Exquisite peach-gold and ocean-blue patina endows the borders of this lustrous O-112 half dollar. Liberty's profile is widely strike doubled, but the only reportable imperfection is a Mint-made planchet flaw near the obverse center on Liberty's neck.

Ex: *Philadelphia ANA (Stack's Bowers, 8/2012), lot 9052, which realized \$1,586.25.* NGC ID# 24FJ, PCGS# 39618 Base PCGS# 6131

**3638 1827 Square Base 2, O-134, R.4, MS62 PCGS.** Star 13 nearly touches the curl, and the left side of the I is centered under the T on this scarce variety. The centers are bright and lustrous, framed by rings of blue, orange, and gold patina around the borders. A late die state example with the stars drawn to the rims, and evidence of lapping to remove clash marks.

From *The Kadison Family Collection*. NGC ID# 483Y, PCGS# 39733 Base PCGS# 6144

**3639 1828 Curl Base 2, No Knob, O-101, R.1, MS63 NGC.** Cobalt-blue and russet-brown toning fills the peripheries of this unmarked and attractive Capped Bust type coin. The strike is good, and luster brightens design elements. A partly filled F in OF confirms the available Overton-101 marriage. Certified in a circa-2000 holder. NGC ID# 6E93, PCGS# 39754 Base PCGS# 6148

**3640 1834 Large Date, Large Letters, O-102, R.1, MS63 PCGS.** The 3 in the date is broadly recut, and the obverse field is raised near Liberty's chin. Deep green, golden-brown, and steel-gray patina embraces minimally marked surfaces. A retained lamination (as struck) occurs between obverse stars 8 and 9. A late die state with the stars drawn toward the rim.

Ex: *FUN Signature (Heritage, 7/2007), lot 892, which realized \$1,782.50.* NGC ID# 24FY, PCGS# 39906 Base PCGS# 6164

## REEDED EDGE HALF DOLLARS

**3641 1838 GR-13, R.1, MS62 NGC.** Sea-green, red, and powder-blue patina encompasses this well-struck and minimally marked Reeded Edge type coin. The obverse is prooflike and the reverse is satiny. The die crack through the left (facing) wingtip is characteristic of GR-13. NGC ID# 24G5, PCGS# 531094 Base PCGS# 6177

**3642 1839-O GR-1, R.1, XF40 PCGS Secure.** This variety constitutes about 95% of all known 1839-O half dollars. The mintmark is lightly recut at the lower left. Die cracks appear around the obverse, including a bold one through the date, and the reverse is completely shattered. Minimally toned silver-gray surfaces are well-detailed, and glints of luster remain despite a stay in circulation. NGC ID# 24G7, PCGS# 531106 Base PCGS# 6181

## SEATED HALF DOLLARS

**3643 1842 Small Date, Large Letters, WB-101, Die Pair 6, R.3, MS62 NGC.** Light to medium plum-red toning is prevalent, though blushes of sea-green emerge from the margins. A well-struck and inoffensively abraded example. Several hair-thin cracks cross the reverse. Housed in a circa-2000 holder. Census: 4 in 62 (1 in 62+ ★), 6 finer (5/18).

Ex: *Long Beach Signature (Heritage, 6/2002), lot 7218; FUN Signature (Heritage, 1/2008), lot 1538, which realized \$1,150.* NGC ID# 24GT, PCGS# 572011 Base PCGS# 6240

**3644 1852 WB-101, Die Pair 2, R.4, MS62 NGC.** Myriad diagonal die lines within the eagle's shield confirm this scarce die pairing. A better date, the 1852 has a mintage of only 77,130 pieces, since silver deposits dwindled once the bullion content of silver coin exceeded face value. This satiny and unmarked representative has a crisp strike except on the upper-obverse margin. Peripherally toned forest-green and lavender-red. Census: 13 in 62, 20 finer (5/18). NGC ID# 24HL, PCGS# 572083 Base PCGS# 6268

**3645 1853 Arrows and Rays, WB-101, AU58 PCGS Secure. CAC.** Satiny luster remains in the fields on this near-Mint Arrows and Rays type coin, while a CAC green label affirms the outstanding eye appeal for the grade. Delicate greenish-gold toning covers both sides, yielding occasional glimpses of lilac and blue. The strike is sharp and trivial high-point wear is all that is observable. NGC ID# 24JJ, PCGS# 572085 Base PCGS# 6275

**3646 1855-S Arrows, WB-101, Die Pair 1, R.5 — Environmental Damage — PCGS Genuine. AU Details.** The 1855-S was the first half dollar issue from the nascent San Francisco Mint, and is also the only Arrows, No Motto S-mint issue. Survivors are much rarer than indicated by the mintage of less than 130,000 pieces, since few if any were saved by numismatists until decades later. This deep gunmetal-gray example has an intermittently granular reverse and a couple of scuffs on the field above the eagle's head.

**3647 1866-S No Motto, Small Thin S, WB-101, Die Pair 1, R.4, XF40 PCGS.** The late die state that shows clash marks within the reverse shield. A minimally marked cream-gray example of this final No Motto issue. All letters in LIBERTY are bold, and a majority of the stars exhibit centers. Just 60,000 pieces were struck, and most survivors are in well-circulated grades. NGC ID# 5V4T, PCGS# 572170 Base PCGS# 6315

**3648 1866 Motto, WB-101, MS64 NGC.** Ex: Dick Osburn Collection. Satiny mint luster produces pleasing eye appeal on this near-Gem, being largely brilliant but with glimpses of gold and peach toning around the margins. The strike is sharp. With Motto 1866 half dollars are rare in this and finer grades. Census: 7 in 64 (1 in 64+), 17 finer (5/18).

Ex: *Houston Signature (Heritage, 11/2012), lot 3676, which realized \$2,585.* PCGS# 572171 Base PCGS# 6319

**3649 1873 Large Arrows, WB-106, MS62 PCGS Secure.** Both sides of this Uncirculated Large Arrows coin are prooflike, complementing well-struck design elements that show trivial weakness only on Liberty's temple. Russet-gold interiors cede to lavender and blue borders. Scattered light abrasions account for the grade. NGC ID# 24L7, PCGS# 572211 Base PCGS# 6343

**3650 1875-CC WB-101, Die Pair 10, R.3, MS62 PCGS.** Grade-limiting abrasions are light and unobtrusive on this Uncirculated 1875-CC half dollar. Some strike weakness is visible on the eagle's left (facing) foot and Liberty's temple, but the border stars are better-defined. Mint State examples of this Carson City issue are elusive. PCGS# 572227 Base PCGS# 6350

### 1875-CC Half Dollar, MS63 Bright and Fully Struck

**3651 1875-CC WB-101, Die Pair 4, R.4, MS63 PCGS.** The 1 and 7 are directly over dentils, two vertical die lines extend down from the chin, and the fletching tip aligns with the right edge of first C in the mintmark. This brilliant Select example with frosty luster is in a late die state with extensive cracks through the lower-right reverse elements. Bright and minimally marked with full strike definition. PCGS# 572227 Base PCGS# 6350

**3652 1875-S Very Small S, WB-101, Die Pair 16, R.3, MS64 PCGS.** With a mintage of 3.2 million pieces, the 1875-S is one of the more frequently encountered issues in the Seated half series. This near-Gem has the frosted mint luster this issue is known for, and each side displays scattered russet-brown and sea-green toning that is several shades deeper in hue around the margin. The coin is a bit softly struck on the high points of Liberty's hair and on the surrounding stars, but it is highly lustrous and attractively toned.  
*Ex: Long Beach Signature (Heritage, 9/2003), lot 7085, where it brought \$891.25; FUN Signature (Heritage, 1/2005), lot 7349, where it realized \$862.50. NGC ID# 24KE, PCGS# 572229 Base PCGS# 6351*

**3653 1880 Closed Bud, WB-102, MS64+ PCGS Secure.** Dappled gold, green, and powder-blue toning enriches this semiprooflike near-Gem. The boldly struck surfaces show only trivial imperfections. The commercial mintage was only 8,400 pieces, and examples of the present quality are highly elusive. NGC ID# 24KT, PCGS# 572262 Base PCGS# 6362

## PROOF SEATED HALF DOLLARS

**3654 1862 PR63 PCGS Secure. WB-101.** The 1862 Seated Liberty half dollar claims a fairly low business-strike mintage of 253,000 pieces, putting considerable date-collector pressure on the small supply of proofs. Only 550 proofs were struck, and probably some of them went unsold and were melted for recoinage. This sharply detailed Select specimen displays deeply reflective fields and spectacular highlights of burnt-orange, powder-blue, and violet toning. Population: 61 in 63, 75 finer (5/18). NGC ID# 27TN, PCGS# 6416

**3655 1863 PR64 PCGS Secure.** Blue, lavender, and wheat-gold toning embraces this crisply struck and coruscating near-Gem. The surfaces are slightly subdued and lack distracting hairlines. A low-mintage date with a proof mintage of only 460 pieces. NGC ID# 27TP, PCGS# 6417

**3656 1864 PR64 NGC.** Uniform, intermediate almond-gold toning accompanies this crisply struck and well-preserved near-Gem. Thorough evaluation is required to locate the few trivial hairlines. Struck in the penultimate year of the Civil War with a meager proof mintage of 470 pieces. NGC ID# 27TR, PCGS# 6418

**1864 Half Dollar, PR64+  
Rose and Gold Patina**

**3657 1864 PR64+ PCGS Secure.** The 1864 is a low-mintage issue in proof format with only 470 pieces struck, yet examples remain accessible through most grade levels. The historic date is also a popular one with collectors. Flashy fields reside beneath a uniform overlay of rose and gold patina. A loupe turns up a few minor wispy lines. Lovely in all respects. NGC ID# 27TR, PCGS# 6418

**1872 Half Dollar, PR64 Cameo  
Elusive Contrasted Proof**

**3658 1872 PR64 Cameo PCGS.** Deeply reflective fields are a bit inhibited by subtle cloudiness across the surfaces, but overall this near-Gem proof has the attractive look of fine ivory, with the devices well-frosted and pristine. Delicate swirling lines are visible with a glass, accounting for the assigned grade. Untoned and white save for a golden-white translucence that is both distinctive and appealing. Population: 11 in 64 (1 in 64+) Cameo, 10 finer (6/18).  
*Ex: ANA Signature (Heritage, 8/2014), lot 4477, where it brought \$1,997.50. NGC ID# 27U7, PCGS# 86430*

**3659 1873 Arrows PR63 Cameo PCGS Secure.** Large Arrows. The U.S. Mint adopted the metric system in 1873, and minutely increased the statutory weight of half dollars to 6.25 grams. As in 1853, arrowheads identified the new tenor coinage, but were dropped in 1875, creating a two-year design subtype. The borders display sun-gold toning, while the frosty devices exhibit impressive contrast with the glittering fields. Population: 15 in 63 (1 in 63+) Cameo, 18 finer (5/18). NGC ID# 27UU, PCGS# 86434

**3660 1878 PR64 Cameo NGC. WB-101.** Type Two Reverse. This is a sharply detailed champagne-toned proof with a crescent of deep blue and iridescent toning that extends clockwise from 4 o'clock to 10 o'clock, covering about 30% of the surface. The reverse shows a few hints of lilac. Census: 32 in 64 Cameo (1 in 64+, 1 in 64 ★), 26 finer (6/18).  
*Ex: Summer FUN Signature (Heritage, 7/2007), lot 929, realized \$1,552.50. NGC ID# 27UD, PCGS# 86439*

**1880 Half Dollar, PR65 Cameo  
Popular Low-Mintage Year**

**3661 1880 PR65 Cameo PCGS.** Only 8,400 business strikes and 1,355 proofs were struck in 1880. This is a glittering, deeply mirrored, and fully brilliant Gem. Distraction-free aside from a tiny mint-made strike-through below the eagle's left (facing) wing. The motifs are heavily frosted and produce bold contrast against the watery, reflectivity in the fields. Population: 28 in 65 (2 in 65+) Cameo, 13 finer (5/18).  
*Ex: Long Beach Signature (Heritage, 9/2003), lot 7117; FUN Signature (Heritage, 1/2006), lot 2778. NGC ID# 27UF, PCGS# 86441*

**3662 1883 PR64 Cameo PCGS.** The central devices are remarkably frosty, creating intense cameo contrast with the deeply mirrored fields. The surfaces are ringed with coppery-gold and blue toning on both sides. Field contact marks limit the grade, including minor hairlines. Identifiable by a minute depression on Liberty's dress, right breast, and a short curling lint mark between the knee and the final star. Population: 46 in 64 (1 in 64+) Cameo, 28 finer (6/18). Ex: *Long Beach Signature (Heritage, 6/2004)*, lot 7259, realized \$1,265; *Long Beach Signature (Heritage, 2/2006)*, lot 1319, realized \$1,495. NGC ID# 27UJ, PCGS# 86444

**3663 1884 PR63 PCGS Secure.** Repunching above the left serif of 1 in the date confirms the proof dies for this Select example. A dusting of faint golden toning covers both sides. As expected for a proof, the strike is sharp throughout both sides. A mark runs from Liberty's forehead to the cheekbone, and a light scuff in the lower-right field are reflected in the assigned grade. NGC ID# 27UK, PCGS# 6445

**3664 1886 PR64 Cameo PCGS.** A splendid Choice Cameo proof, the obverse exhibits champagne toning with deeper peripheral iridescence. The reverse is mostly brilliant with a few splashes of gold toning. Nice contrast appears between the fields and devices. Population: 27 in 64 (1 in 64+) Cameo, 20 finer (6/18). Ex: *New York Signature (Heritage, 3/2012)*, lot 3441, realized \$2,185. NGC ID# 27UM, PCGS# 86447

**3665 1890 PR64 PCGS.** Each side showcases attractive medium gold, lilac, and blue coloration. The fields beneath the toning are nicely mirrored, generating a modest cameo effect for this lovely Choice proof. However, PCGS has not formally acknowledge that trait. The 1890 is a popular, low-mintage date with only 12,000 circulation strikes plus 590 proofs. Ex: *New York Signature (Heritage, 6/2005)*, lot 5745, where it brought \$1,092.50. NGC ID# 27US, PCGS# 6451

## BARBER HALF DOLLARS

**3666 1892 MS65 NGC.** In 1892, many examples of the first-year Barber half dollar were saved as novelties, resulting in a fairly significant Mint State population for collectors today. This issue is a popular type coin in Gem condition. The present example offers frosty luster and sharp design elements. Delicate champagne toning graces each side.

Ex: *Long Beach Signature (Heritage, 1/2008)*, lot 642, which realized \$2,530. NGC ID# 24LF, PCGS# 6461 Base PCGS# 6461

### 1892 Barber Half Dollar, MS66 Excellent First-Year Example

**3667 1892 MS66 PCGS Secure.** An impressive Premium Gem from the first year of the Barber design, this coin exhibits well-detailed design elements and well-preserved surfaces, under attractive shades of lavender-gray toning. Satiny mint luster shines through the patina, adding to the considerable eye appeal. Population: 53 in 66 (10 in 66+), 14 finer (5/18). NGC ID# 24LF, PCGS# 6461 Base PCGS# 6461

**3668 1893 MS64 PCGS.** Original, frosty mint luster yields russet and olive-gold toning in the margins on this otherwise pearl-gray near-Gem. The strike is sharp and abrasions are minimal. The 1893 half dollar is scarce in finer condition. Population: 41 in 64 (4 in 64+), 33 finer (6/18). NGC ID# 24LK, PCGS# 6465

**3669 1896-S AU58 PCGS Secure.** Only light wear shows on the strongly impressed design elements of this attractive near-Mint specimen and the surfaces are lightly abraded, aside from a shallow groove in the right obverse field. The surfaces show a mix of satiny luster and prooflike reflectivity in the fields. Population: 10 in 58 (1 in 58+), 66 finer (6/18). NGC ID# 24LX, PCGS# 6476

### 1897 Half Dollar, Frosty MS65 Elusive in This Grade

**3670 1897 MS65 PCGS.** As with most of the series, the 1897 Barber half dollar circulated extensively, and few high-end Mint State pieces were set aside for numismatic purposes. Gem examples are scarce and finer coins are rare. This MS65 representative displays frosty, shimmering mint luster and a sharp strike with no distracting abrasions. Each side displays delicate toning that ranges from pale champagne to deeper olive-gold. Population: 26 in 65 (1 in 65+), 16 finer (6/18). NGC ID# 24LY, PCGS# 6477

### 1897-S Half Dollar, MS63 Incredible Eye Appeal

**3671 1897-S MS63 NGC.** The 1897-S is one of the important issues in the Barber half dollar series, known for its scarcity in Mint State grades from a low mintage of 933,900 coins. Most survivors are circulated and often have minor to serious problems. This amazing piece has brilliant and untuned silver surfaces with reflective fields surrounding the lustrous devices. Census: 7 in 63 (1 in 63+), 39 finer (6/18). NGC ID# 24M2, PCGS# 6479

**3672 1908-D MS64 PCGS Secure.** The obverse stars are sharp on this Choice 1908-D half dollar, although the eagle's right (facing) shoulder and talons exhibit minor softness. Satiny luster shows olive-gold, russet, and amber toning on the obverse with an olive-gray reverse. No significant abrasions are seen. NGC ID# 24N5, PCGS# 6513

**3673 1911 MS65 PCGS Secure. CAC.** Ex: Pryor Collection. A delightful Gem Barber half dollar from the celebrated James B. Pryor Collection, this coin exhibits sharply detailed design elements and well-preserved, lustrous surfaces, with a few highlights of pale gold toning. Population: 49 in 65 (1 in 65+), 13 finer. CAC: 10 in 65, 4 finer (6/18). NGC ID# 24ND, PCGS# 6521

## PROOF BARBER HALF DOLLARS

**3674 1893 PR63 Cameo PCGS Secure.** An impressive Select proof from the second year of the Barber design, this example is sharply detailed throughout, with frosty devices that contrast noticeably with the deeply reflective fields. The lightly marked surfaces are visited by attractive shades of pale gold toning with a few specks of amber. Population: 16 in 63 Cameo, 79 finer (5/18). NGC ID# 6UKV, PCGS# 86540

**1894 Half Dollar, PR65 Cameo**  
**Intense Border Toning, Boldly Contrasted**

- 3675 1894 PR65 Cameo PCGS.** A popular 19th century type coin in proof format and the third year of issue for the Barber half dollar design, this 1894 example displays deep-mirrored reflectivity in the fields. The frost-white centers of each side retain much of the original mint brilliance while the margins are enveloped in smoky-gold and cobalt-blue toning. This is an unhairlined Gem that shows a few lint marks in the fields on each side, but no significant distractions and a needle-sharp strike. Population: 16 in 65 (1 in 65+) Cameo, 28 finer (5/18).  
*Ex: Central States Signature (Heritage, 5/2004), lot 7574.*  
**From The Kadison Family Collection.** NGC ID# 24NW, PCGS# 86541

**1895 Half Dollar, PR65 Cameo**  
**Just 880 Proofs Struck**

- 3676 1895 PR65 Cameo PCGS Secure.** The central devices are thickly frosted, especially the eagle, standing out starkly against glassy fields. Hints of golden patina appear around the reverse periphery, while the interior of that side and nearly the entire obverse remain brilliant. A total of 880 proofs were struck in 1895. The majority of coins lack comparable contrast. Population: 14 in 65 (2 in 65+) Cameo, 25 finer (5/18). NGC ID# 24NX, PCGS# 86542
- 3677 1896 PR64 PCGS Secure.** Rich green and orange-gold colors encompass both sides. A bold strike and a contact-free appearance further testify to the quality of this deeply patinated near-Gem. The proof mintage was a mere 762 pieces. NGC ID# 24NY, PCGS# 6543
- 3678 1899 PR64 PCGS Secure.** Deep green, cherry-red, and gold toning embraces this boldly struck and original Choice half dollar. A hair-thin diagonal mark on the upper half of the shield provides an identifier. The fields appear flawless. From a proof mintage of 846 pieces. NGC ID# 6C4V, PCGS# 6546
- 3679 1904 PR64 Cameo PCGS Secure.** A sharply detailed Choice proof Barber half dollar, with reflective fields and minimal signs of contact. Spectacular shades of burnt-orange and violet toning tend to accentuate the field/device contrast, rather than obscuring it. Population: 5 in 64 Cameo, 17 finer (5/18). NGC ID# 24P8, PCGS# 86551

**1909 Half Dollar, PR66 Cameo**  
**Rarely Seen With Such Contrast**

- 3680 1909 PR66 Cameo NGC.** About 16% of all 1909 proof Barber half dollar submissions seen by NGC have been awarded a Cameo designation. None have been certified Ultra Cameo. This Premium Gem specimen is brilliant with deeply reflective fields and a modest degree of frost over the devices — a rare attribute for proofs of this period. One of 650 pieces struck. Census: 7 in 66 Cameo, 14 finer (5/18). NGC ID# 24PD, PCGS# 86556

**WALKING LIBERTY HALF DOLLARS**

- 3681 1916-S AU55 PCGS Secure.** The lightly abraded surfaces of this Choice AU Walking Liberty half retain traces of original mint luster in sheltered areas and the well-detailed design elements show only slight wear. From a small mintage of 508,000 pieces. NGC ID# 24PN, PCGS# 6568
- 3682 1916-S AU58 PCGS.** This coin is graded near-Mint in an old green label, plastic collar holder, which was used by PCGS briefly in 1989. The coin is fully lustrous, sharp, and essentially untuned. A careful search for high-point wear turns up remarkably little evidence. The eye appeal of this well-preserved coin rivals that of many Mint State pieces. NGC ID# 24PN, PCGS# 6568
- 3683 1917 MS66 NGC.** This brilliant Premium Gem displays frosty mint luster and sharply defined motifs. A tiny patch of reddish color appears on the eagle's wing. Although 12 million 1917 halves were struck, the issue is conditionally elusive at this level. Census: 38 in 66 (1 in 66+, 1 in 66 ★), 4 finer (5/18).  
*Ex: ANA Signature (Heritage, 7/2005), lot 10004.*  
**From The Kadison Family Collection.** NGC ID# 24PP, PCGS# 6569
- 3684 1917-S Obverse AU55 PCGS.** Barely a brush of high-point friction is visible on this Choice AU 1917-S half dollar, showing the mintmark on the obverse. A trace of light golden toning graces satiny, mostly unabraded surfaces, and eye appeal is outstanding for the grade. NGC ID# 26G7, PCGS# 6572

**1917-S Half Dollar, AU58**  
**Obverse Mintmark**

- 3685 1917-S Obverse AU58 PCGS.** The 1917-S Obverse Mintmark Walking Liberty half dollar is more challenging in high grades than both its 1917-S Reverse Mintmark counterpart and the 1917-D with the similar mintmark placement. An average certified example grades about XF40. This near-Mint survivor is bright and frosty. The strike is mostly strong, and minimally marked surfaces remain brilliant. A lovely example of this popular semikey. Housed in an old green label holder. NGC ID# 26G7, PCGS# 6572

- 3686 1918 MS64 NGC.** Luminous surfaces show minimal marks on this near-Gem 1918 half dollar, with a silvery-gray hue overall that yields olive and russet toning near the borders. The strike is sharp and eye appeal is pleasing.  
*Ex: Long Beach Signature (Heritage, 9/2011), lot 3485, which realized \$1,092.50. NGC ID# 24PX, PCGS# 6574*
- 3687 1918-D MS62 PCGS Secure.** Highlights of sea-green, lavender, and amber toning enhance the lightly marked surfaces of this attractive MS62 specimen, with vibrant mint luster throughout. The strike is better-than-average, with clear separation between Liberty's thumb and fingers and bold definition on the head and eagle's leg. NGC ID# 24PW, PCGS# 6575
- 3688 1919 AU58 PCGS.** Light golden toning covers satiny, lustrous fields on this near-Mint coin. Barely a trace of high-point friction is discernible, although mild strike weakness is visible on the central devices. Housed in an old green label, plastic collar holder from 1989. NGC ID# 24PY, PCGS# 6577
- 3689 1927-S AU58 PCGS.** This bright, satiny near-Mint example shows warm golden toning and barely a touch of high-point friction. Moderate strike weakness in the centers is typical of the 1927-S. The San Francisco Mint had a reputation for producing weak strikes throughout the 1920s. NGC ID# 24RA, PCGS# 6587
- 3690 1927-S AU58 NGC.** Dappled sky-blue and violet toning graces the softly lustrous surfaces of this near-Mint 1927-S half dollar. Swirling luster invigorates the fields, and the devices show just a trace of friction. Mild strike weakness is visible on Liberty's branch hand and the eagle's trailing leg.  
*Ex: Houston Signature (Heritage, 11/2007), lot 61001, which realized \$690. NGC ID# 24RA, PCGS# 6587*
- 3691 1933-S MS64 NGC.** Blushes of sun-gold color complement mostly silver-gray surfaces awash in soft mint frost. Liberty's head, branch hand, and skirt lines display bold detail, as do the eagle's leg feathers. The exceptional impression and challenging nature of this date are sure to make this near-Gem popular with collectors. NGC ID# 24RE, PCGS# 6591
- 3692 1933-S MS64+ PCGS Secure.** This Plus-graded Choice example is sharply detailed, with clear separation between Liberty's thumb and fingers on the wreath hand. The well-preserved surfaces radiate vibrant mint luster and display delicate highlights of magenta and golden-tan toning. NGC ID# 24RE, PCGS# 6591

**1938-D Walking Liberty Half, MS67  
Low-Mintage Issue, None Certified Finer**

- 3693 1938-D MS67 PCGS.** The strike is well above average on this Superb Gem 1938-D Walking Liberty half, with about 75% feather definition on the eagle's leg and visible thumb separation on the branch hand. Liberty's facial features are complete with only minor loss of definition on the surrounding hair and cap. A thin overlay of gold patina in the right obverse field visits the otherwise brilliant-silver surfaces, which show only a few isolated, tiny ticks but no marks of any significance. Neither PCGS nor NGC show a numerically finer certification. Population: 47 in 67 (3 in 67+), 0 finer (5/18). NGC ID# 24RV, PCGS# 6605

- 3694 1944-S MS66+ PCGS. CAC.** This high-end Premium Gem displays virtually pristine fields and shows frosty, champagne-tinted mint luster. The area of Liberty's branch hand and the eagle's trailing leg show moderate strike weakness but no distracting abrasions. The 1944-S half dollar is rarely offered finer with only eight such coins reported at PCGS (6/18). NGC ID# 24SE, PCGS# 6623 Base PCGS# 6623

**PROOF WALKING LIBERTY  
HALF DOLLARS**

**1936 Walking Liberty Half, PR65  
Briefly Toned, Brightly Mirrored**

- 3695 1936 PR65 PCGS Secure.** A sparse dusting of russet toning adds natural appeal but does little to diminish the brilliant silver flash that dominates this glittering Gem proof. The 1936 is easily the scarcest of the Walking Liberty proofs, a short set of dates that is eminently collectible in Gem or finer grades — although such a set would be a challenge if it was to match the quality of this lovely proof. NGC ID# 27V4, PCGS# 6636

**1939 Half Dollar, PR68  
Outstanding Quality, Great Eye Appeal**

- 3696 1939 PR68 NGC.** This outstanding, Superb Gem proof is entirely brilliant with deep-mirrored, chromelike surfaces that display essentially no noticeable marks, hairlines, or other flaws. The strike is sharp throughout both sides, and the overall appearance is both visually and technically impressive. NGC reports just one numerically finer 1939 proof, graded PR69. Census: 98 in 68 (1 in 68+, 20 in 68 ★), 1 finer (5/18).  
*From The Kadison Family Collection.* NGC ID# 5ESU, PCGS# 6639

- 3697 1942 PR68 PCGS Secure.** A magnificent PR68 example, from a mintage of 21,120 pieces, this coin exhibits razor-sharp definition on all the design elements and the virtually perfect brilliant surfaces include deeply reflective fields. Eye appeal is terrific. Population: 67 in 68 (3 in 68+), 1 finer (6/18). NGC ID# 282G, PCGS# 6642

**FRANKLIN HALF DOLLARS**

- 3698 1956 MS67 Full Bell Lines PCGS.** This stunning Superb Gem features a bold strike as the Full Bell Lines on the reverse suggest. Heavily dappled gold toning appears on both sides of this lovely example that is tied for the finest certified. Population: 39 in 67 (2 in 67+) Full Bell Lines, 0 finer (6/18). NGC ID# 6L33, PCGS# 86671

- 3699 1962-D MS66 Full Bell Lines PCGS. CAC.** Only a few handfuls of Full Bell Lines 1962-D Franklin halves trickle into grades finer than MS65. This Premium Gem is among the finest at PCGS, a sharp, frosty coin with dappled olive-green and medium russet toning laid over each side. Peering through the patina with a glass, only a few insignificant ticks are observed. Population: 43 in 66 (1 in 66+) Full Bell Lines, 0 finer. CAC: 4 in 66, 0 finer (6/18).  
Ex: *New York Signature (Heritage, 10-11/2015)*, lot 3356, where it brought \$3,172.50. NGC ID# 24TS, PCGS# 86683

## PROOF FRANKLIN HALF DOLLARS

- 3700 1950 PR67 PCGS.** A delightful Superb Gem from the first Franklin half dollar proof issue, this coin offers sharply detailed design elements, deeply reflective fields, and impeccably preserved surfaces with highlights of sea-green and magenta toning. PCGS has graded one numerically finer example with this degree of contrast (5/18). NGC ID# 27VA, PCGS# 6691
- 3701 1950 PR67 PCGS.** A delightful Superb Gem representative of the first proof Franklin half dollar issue, with sharply detailed design elements and deeply reflective surfaces on both sides. A few hints of pale gold toning are evident at certain angles but the coin appears fully brilliant when viewed straight-on. PCGS has graded one numerically finer non-Cameo example (5/18). NGC ID# 27VA, PCGS# 6691

1950 Half Dollar, PR67  
Inaugural Proof Strike

- 3702 1950 PR67 NGC. CAC.** This was the first year Franklin half dollars were struck in proof format. Each side of this wholly brilliant, impeccably preserved specimen is completely free of contact, no doubt meriting the CAC approval sticker for quality within the grade. NGC reports six finer non-Cameo submissions (5/18). NGC ID# 27VA, PCGS# 6691

1950 Franklin Half Dollar, PR67  
Exemplary Quality

- 3703 1950 PR67 PCGS. CAC.** The Mint resumed coinage of proof sets in 1950, but the proof Franklin half dollars were not up to the high standards of later years. This attractive Superb Gem is a welcome exception to the rule, with impeccably preserved brilliant surfaces and full definition on the bell lines. Even this remarkable specimen shows evidence of over-extended die usage, with shallowly mirrored fields rather than the deep mirrors usually seen on proof issues.  
Ex: *Central States Signature (Heritage, 4/2015)*, lot 4716. NGC ID# 27VA, PCGS# 6691

- 3704 1952 PR64 Ultra Cameo NGC. CAC.** Razor-sharp definition is evident on all the design elements of this attractive Choice proof example, and the deeply reflective fields contrast profoundly with frosted devices. The surfaces show a few minor hairlines and a few hints of pale gold toning. Census: 7 in 64 Ultra Cameo, 26 finer. CAC: 6 in 64, 8 finer (6/18). NGC ID# 27VC, PCGS# 96693

- 3705 1959 PR68 Cameo PCGS Secure.** This spectacular PR68 specimen exhibits razor-sharp definition on the frosty design elements, which contrast dramatically with the deeply mirrored fields. The virtually flawless surfaces add to the terrific visual appeal. Population: 68 in 68 Cameo, 1 finer (6/18). NGC ID# 27VJ, PCGS# 86700

## EARLY DOLLARS

1795 B-4, BB-14 Flowing Hair Dollar, VF Details  
Mint Silver Plug

- 3706 1795 Flowing Hair, Two Leaves, Silver Plug, B-4, BB-14, R.3 — Plugged, Whizzed — NCS. VF Details.** The soft outline of a Mint-inserted silver plug is visible at the center on both sides of this B-4, BB-14 dollar. The coin was subsequently holed at E of LIBERTY, plugged, and whizzed to the disguise the non-Mint repair, with areas of porosity and minor staining. Some of the lettering and design elements were strengthened in the process. The B-4, BB-14 variety is the "Hidden Star" die pair, with star 13 positioned fully below the point of the bust. NGC ID# 24WZ, PCGS# 39992 Base PCGS# 6854

1797 Draped Bust Dollar, Fine 12  
B-3, BB-71, 10x6 Stars

- 3707 1797 10x6 Stars, Large Letters, B-3, BB-71, R.2, Fine 12 PCGS Secure.** Bowers Die State III. Struck on a slightly small planchet, with narrow rims and dentils. A lightly toned, silver-gray example, this 10x6 Stars variety is perhaps slightly scarcer than the B-1, BB-73 9x7 Stars Large Letters die marriage. The low-rimmed reverse shows more wear than the obverse, as usual, with parts of the legend merging to the edge and few dentils still visible. Myriad tiny marks are visible with a lens. NGC ID# 24X4, PCGS# 40004 Base PCGS# 6865

**1798 Heraldic Eagle Dollar, XF40  
Pointed 9, Wide Date, B-12, BB-120**

- 3708 1798 Large Eagle, Pointed 9, Wide Date, B-12, BB-120, R.4, XF40 PCGS Secure.** Bowers Die State IV. A late die state (but not yet terminal) of the obverse, which shows numerous long, strong die cracks. The reverse is cracked at various points throughout the legend, while the field stars are always weak on BB-120, as inherited from a previous use of the reverse on BB-119. Deep, gunmetal-gray toning in the fields offsets the raised devices, which show areas of light-gray patina. A few scattered, small marks are visible with magnification and do not distract. This example nears the Condition Census for the scarce variety, which includes a pair of XF45 coins in the Bowers' list of notable specimens. NGC ID# 24X6, PCGS# 40037 Base PCGS# 40018

- 3709 1798 Large Eagle, Pointed 9, Close Date, B-9, BB-121, R.4 — Cleaned — PCGS Genuine Secure. XF Details.** Bowers Die State IV. This microgranular slate-gray representative is generally well-defined, though most of UNUM is faint. Marks are absent except for a vertical line across Liberty's cheek and neck.

**1798 Large Eagle Dollar, VF30  
B-14, BB-122, Pointed 9**

- 3710 1798 Large Eagle, Pointed 9, B-14, BB-122, R.3, VF30 PCGS. CAC.** Bowers Die State IV. This lightly worn, evenly struck Large Eagle type coin displays original olive-gray and lilac toning over smooth, unblemished surfaces. No adjustment marks are seen, and the central devices retain most major details. The CAC endorsement adds to the appeal of this outstanding midgrade Draped Bust dollar. Housed in a green label holder. NGC ID# 24X6, PCGS# 40039 Base PCGS# 40018

- 3711 1798 Large Eagle, Pointed 9, Close Date, B-25b, BB-123, R.4, VF25 PCGS.** Bowers Die State IV. Several obverse die cracks typify the latest die state of the scarce BB-123 variety, with cracks that run through the stars, Liberty, the date, and across the drapery. Additional radial die cracks join and cross paths with other cracks. This variety is known for its blundered Line Star Pattern reverse, with the field star placement too high, so some star tips overlap the clouds. This well-defined VF example displays golden-brown toning with silver-gray high points, and is generally well-struck despite the advanced state of the dies. NGC ID# 24X6, PCGS# 40040 Base PCGS# 40018

- 3712 1799/8 15 Stars Reverse, B-3, BB-141, R.3 — Cleaned — ANACS. XF40 Details.** Bowers Die State II+. Raised flaws appear below RT in LIBERTY, and a crack through ME is in its preliminary stage. The BB-141 variety features the prominent 1799/8 overdate, and the leftmost cloud is enlarged with two points from an underlying star peaking though. Design detail is clear with trivial blending. Silver-gray surfaces were cleaned at some point in the past. Housed in a small-sized holder.  
**From The Kadison Family Collection.** NGC ID# 24X8, PCGS# 40064 Base PCGS# 6883

- 3713 1799 7x6 Stars, B-5, BB-157, R.2, VF20 PCGS.** Bowers Die State II, cracked through STATES. This midgrade circulated Heraldic Eagle dollar displays an even strike and even wear. No adjustment marks are present, and the tan-gray surfaces are smooth and problem-free. An appealing collector-grade type coin. NGC ID# 24X7, PCGS# 40049 Base PCGS# 6878

- 3714 1799 7x6 Stars, B-5, BB-157, R.2 — Cleaned — NGC Details. XF.** Bowers Die State III. Careful rotation beneath a light reveals delicate hairlines, but this richly detailed Heraldic Eagle type coin lacks any noticeable abrasions. Glimmers of luster emerge from the design recesses, and hints of sun-gold and powder-blue patina overlie the cream-gray surfaces.

- 3715 1799 7x6 Stars, B-14, BB-167, R.3, VF25 PCGS Secure.** Bowers Die State II. Much interior detail remains intact in Liberty's hair and drapery and the white devices stand out dramatically against the lightly abraded, slate-gray fields. Population (for the variety): 1 in 25, 5 finer (6/18). NGC ID# 24X7, PCGS# 40058 Base PCGS# 6878

- 3716 1800 Wide Date, Low 8, B-10, BB-190, R.3, VF25 PCGS.** Bowers Die State VI. Several die cracks occupy the legend on the reverse and wind their way toward the eagle. The obverse is free of cracks but lapped. Despite the dodgy state of the reverse die, sharp definition remains on the central motifs and the margins are strong for the assigned grade. Pleasing golden-tan toning yields to peripheral steel-gray accents. Marks are minor overall, though we note a thin line near obverse star 3. Housed in a green label holder.  
*Ex: Summer FUN Signature (Heritage, 7/2016), lot 3697, which realized \$2,467.50.* NGC ID# 24X9, PCGS# 40076 Base PCGS# 6888

- 3717 1800 Wide Date, Low 8, B-10, BB-190, R.3, VF30 NGC.** Bowers Die State VI. Two die cracks through the C in AMERICA confirm the attribution of this minimally marked midgrade Heraldic Eagle type coin. Pockets of luster are surprisingly extensive, despite high-point wear on Liberty's cheek and shoulder. The pearl-white surfaces are microgranular. NGC ID# 24X9, PCGS# 40076 Base PCGS# 6888

**1801 B-4, BB-214 Dollar, XF Details  
Scarce Variety, Strong Eye Appeal Remains**

- 3718 1801 B-4, BB-214, R.4 — Improperly Cleaned — NCS. XF Details.** Bowers Die State III. The numerals in the date are closely spaced and the first 1 nearly touches Liberty's curl to confirm the B-4, BB-214 Close Date variety. This example was lightly cleaned at one time, yet it displays a measure of pleasing, silver-gray patina that deepens to blue-gray at the margins and around the raised devices. Faint hairlines remain beneath the toning and across lightly worn, well-defined motifs. NGC ID# 24XA, PCGS# 40086 Base PCGS# 6893

**1803 Large 3 Dollar, VF35  
B-6, BB-255, Attractive Type Coin**

- 3719 1803 Large 3, B-6, BB-255, R.2, VF35 PCGS.** Bowers Die State III. This Choice mid-grade 1803 representative reveals numerous pockets of remaining mint luster when rotated under a light. Gentle golden-brown toning near the borders further increases the eye appeal. Moderate wear on the cheek and shoulder is appropriate for the grade, yet abrasions are few and the rims show full dentils. This is a richly detailed yet affordable example of the Large 3 type, with the 3 narrowly repunched at the base and top.  
*Ex: Long Beach Signature (Heritage, 9/2006), lot 2424; ANA Signature (Heritage, 8/2007), lot 952.*  
**From The Kadison Family Collection.** NGC ID# 24XD, PCGS# 40101 Base PCGS# 6901

**SEATED DOLLARS**

- 3720 1841 AU58 PCGS. OC-4, R.1.** The 1841 Seated Liberty dollar is an available issue from a mintage of 173,000 pieces. This attractive near-Mint specimen shows just a touch of wear on the well-detailed design elements and the lightly abraded surfaces are toned in shades of lavender-gray and golden-tan. NGC ID# 24YB, PCGS# 6927
- 3721 1842 MS61 NGC. OC-3, R.2.** A semiprooflike example of this early Seated dollar date. Wheat-gold and ocean-blue toning enrich the borders, while the fields and motifs are brilliant save for a narrow streak of autumn-brown patina on the reverse. Minor obverse hairlines and moderate chatter on the upper reverse field account for the grade.  
*Ex: Richard J. Chouinard Collection / Long Beach Signature (Heritage, 2/2005), lot 7354, which realized \$1,265. NGC ID# 24YC, PCGS# 6928*
- 3722 1853 — Cleaned — NGC Details. AU. OC-1, R.2.** A Top 30 Variety. Dubbed the “Chin Whiskers” variety, all 1853 Seated dollar circulation strikes exhibit die lines from Liberty’s chin. Golden-gray and gunmetal patina covers each side, but the effect conceals a long-ago cleaning. Detail is strong with minimal evidence of blending. From a mintage of 46,110 coins. NGC ID# 24YS, PCGS# 6941
- 3723 1853 AU50 PCGS. OC-1, R.2.** Osburn-Cushing Die State c/b. The “Chin Whiskers” obverse, with parallel die lines beneath the chin that vaguely resemble a goatee (an Osburn-Cushing Top-30 Variety). Well-struck for the grade and issue, with crisp definition on the motifs set against smooth, minimally abraded fields. Blue toning overlays golden-gray surfaces. We note small rim bumps at 3 o’clock on the obverse and 5 o’clock on the reverse, but there are no other marks of consequence for the assigned grade. Housed in a previous generation green label holder. NGC ID# 24YS, PCGS# 6941

**1859-S Dollar, AU50  
Low-Mintage, Popular Branch Mint Issue**

- 3724 1859-S AU50 PCGS Secure. OC-2, R.4.** Osburn-Cushing Die State a/a. The low mintage of just 20,000 pieces is only partially responsible for the scarcity of the 1859-S, which saw limited domestic availability from export to the Orient. Pale golden-gray surfaces show a few light marks and hair-thin lines, but the rims are strong for the grade and the strike is good for this often weakly struck issue. A scarce mintmarked Seated dollar, always in demand and challenging at the About Uncirculated level. Population: 23 in 50, 63 finer (5/18). NGC ID# 24YZ, PCGS# 6948
- 3725 1870-CC — Repaired — PCGS Genuine Secure. AU Details. OC-1, Low R.4.** Blue borders encompass stone-gray fields and devices. A moderately circulated representative of the introductory Carson City silver dollar issue. The left and right obverse fields are extensively smoothed. The reverse is microgranular. The only apparent abrasions are a couple of short thin lines beneath the mintmark.
- 3726 1871 MS61 PCGS Secure. OC-10, R.2.** Osburn-Cushing Die State a/b. Dappled olive-gray and gold toning imbues softly lustrous and partially reflective surfaces of this attractive Mint State Seated dollar. Subtle die markers within the reverse scroll and the centered date position confirm the OC-10 variety. More than a million pieces were struck, and the star centers are usually rounded on the 1871 (as is the case here), yet on balance the coin is bold and clearly original. Tiny marks are scattered across the obverse fields and portrait. NGC ID# 5DNV, PCGS# 6966

**1873 Seated Dollar, MS63  
Surprisingly Smooth Surfaces**

- 3727 1873 MS63 PCGS Secure. OC-2, R.2.** The mintage of the 1873 is less than one-third of its 1871 and 1872 predecessors, due to the advent of the Trade dollar. Select examples are very scarce, yet collectible. This satiny and refreshingly unabraded representative displays dusky tan-brown and forest-green patina across the obverse margin. The reverse and the figure of Liberty are only lightly toned. Population: 21 in 63, 29 finer (5/18). NGC ID# 24ZM, PCGS# 6971

## PROOF SEATED DOLLARS

### 1864 Seated Dollar, PR62 Popular Date With Collectors

- 3728 1864 PR62 PCGS. OC-P1, High R.4.** Osburn and Cushing estimate that 235 of the 470 proof Seated dollars struck in 1864 survive. OC-P1 is the usually seen die pair with a centered date that slopes slightly downward, and the lowest horizontal shield line extends into the left border. Silvery surfaces show glimpses of pale dusky patina. Faint ticks are scattered in the fields, limiting the grade but having little effect on the appeal. NGC ID# 252J, PCGS# 7007

- 3729 1871 PR62 PCGS Secure. OC-P1, R.2.** Red, green, and caramel-gold toning is apparent across both borders, though more extensive on the reverse. The motifs are luminous, though PCGS has demurred on a Cameo designation. Obverse field hairlines emerge beneath a lens. The strike is bold aside from incompleteness at the top of the eagle's left (facing) wing. NGC ID# 252T, PCGS# 7019

- 3730 1873 PR62 PCGS Secure. OC-P1, R.3.** The eagle and Liberty are frosty, but the untuned fields display a few too many hairlines to secure a Cameo designation. A well-struck representative of the final-year issue, which had a proof mintage of only 600 pieces. IN GOD WE TRUST is die doubled, as always seen on 1873 proofs. NGC ID# 252V, PCGS# 7021

## TRADE DOLLARS

### 1874-CC Dollar, Dusky MS62

- 3731 1874-CC MS62 NGC.** Micro CC. No period after FINE. An overlay of dusky lavender-gray and gold patina does not diminish the brilliance of the underlying surfaces. The eagle is strongly defined, while areas of softness occur over Liberty and the obverse stars. Faint marks appear on each side, defining the MS62 assessment. The 1874-CC proves challenging across all Mint State grade levels. NGC ID# 2532, PCGS# 7035

### 1874-CC Trade Dollar, MS62 Original, Frosty Luster

- 3732 1874-CC MS62 PCGS Secure.** Tall CC, Period After FINE. A blush of amber toning appears along the upper-obverse border, leaving the remainder of this Mint State Carson City Trade dollar essentially brilliant. Scattered abrasions limit the grade but eye appeal is pleasing, benefiting from a sharp strike. The 1874-CC Trade dollar is collectible in the lower Mint State grades but is rare in Choice or better condition. This MS62 is ideal for most collecting purposes. NGC ID# 2532, PCGS# 7035

### 1875-CC Trade Dollar, MS61 Carson City Type Coin

- 3733 1875-CC Type One Reverse MS61 PCGS Secure.** Period After FINE. The Type One reverse has a berry under the eagle's right (facing) talons. The 1875-CC overall is a fairly plentiful Carson City Trade dollar in Mint State, but high-grade examples are often out of reach for many collectors. This MS61 coin is frosty and brilliant with minimal abrasions for the grade. Liberty's head exhibits the only mentionable strike weakness. NGC ID# 2535, PCGS# 40108 Base PCGS# 7038

### 1875-CC Trade Dollar, MS62 Type One Reverse, Dappled Patina

- 3734 1875-CC Type One Reverse MS62 NGC.** Period after FINE. A majority of the 1.5 million Trade dollars struck at the Nevada branch mint in 1875 feature a berry under the eagle's claw, as here. Dappled patina in shades of peach-gold and lavender-rose provides elegant eye appeal and covers scattered grade-limiting marks. Strike detail is uneven with softness on Liberty's foot and the eagle's right (facing) leg and talon. NGC ID# 2535, PCGS# 40108 Base PCGS# 7038

**3735 1875-CC Type Two Reverse AU58 NGC.** Period after FINE. Lightly toned and partly lustrous with a single mentionable mark near star 5. A auction archives study by Mark Borckardt determined that only about one in eight '75-CC dollars have a Type Two Reverse. The present die pair is also of interest for the unfinished "beard" beneath Liberty's jaw, and die gouges through the second S in STATES and the first A in AMERICA. Housed in a circa-2000 holder. PCGS# 40109 Base PCGS# 7038

**1875-S/CC Trade Dollar, MS60  
FS-501, Always In-Demand *Guide Book* Variety**

**3736 1875-S/CC FS-501 MS60 ANACS.** Type One Reverse, Large S over Tall CC mintmark. Two varieties exist of the 1875-S/CC Trade dollar, and together they represent the only overmintmark of the series. Both Trade dollar specialists and Carson City collectors seek an example, which are scarce in any Mint State grade and highly sought in Uncirculated condition. This example is housed in a small, early generation ANACS holder. Medium, silver-gray toning and peach highlights cover smooth, minimally marked and partially reflective surfaces. The strike shows only slight weakness on Liberty's hair and the eagle's right (facing) talon. NGC ID# 2536, PCGS# 145813 Base PCGS# 7040

**1876-CC Trade Dollar, Unc Details  
No Berry Reverse, Chopmarked**

**3737 1876-CC Type Two Reverse — Chopmarked — NGC Details. Unc.** Tall CC. The Type One Obverse (scroll end points left), Type Two Reverse (no berry) design is the one usually seen for the 1876-CC Trade dollar. This example has the sharpness and luster of an Uncirculated coin, but a chopmark on Liberty's midsection near the hand prevents a numeric grade. Delicate shades of pale blue, lavender, and gold grace lightly marked surfaces. The strike detail is good, if slightly uneven. A scarce Carson City issue in high grades.

**3738 1876-CC Type Two Reverse — Cleaned — PCGS Genuine Secure. Unc. Details.** Tall CC. This brown, gunmetal-gray, and green Carson City type coin has a good strike and satiny mint luster. No bagmarks are apparent, but a loupe reveals faint horizontal hairlines near Liberty's raised arm. Nonetheless, an impressive Carson City Trade dollar.

**3739 1876-CC Doubled Die Reverse, FS-801, AU50 NGC.** A dusky dove-gray example of the famous *Guide Book* variety. The eagle's beak and right (facing) wingtip are widely die doubled, as is the branch above FINE. Impressively free from marks aside from slight obverse rim knocks at 5:30 and 8:30. Certified in a circa-2000 holder. NGC ID# 253A, PCGS# 145815 Base PCGS# 97042

**3740 1876-S Type One Obverse, Type One Reverse, MS63 NGC.** Large S. Gold, powder-blue, and lavender toning embraces this lustrous and nicely struck Select type representative. Close inspection yields minor obverse field marks and the infrequent reverse abrasions. NGC ID# 4EMM, PCGS# 40114 Base PCGS# 7043

**1877-CC Dollar, MS61  
Accessible Mint State Example**

**3741 1877-CC MS61 NGC.** The bulk of the 534,000 Trade dollars struck at the Carson City Mint in 1877 were produced between June and August, with another small batch delivered in December. Some were melted stateside, but most suffered various forms of attrition overseas. Only a few hundred examples survive today, including 100 to 125 in Mint State. Blushes of gold complement the silver and lavender-gray patina that colors this MS61 representative. Full lines are apparent on the stars, and the olive leaves are crisp, but Liberty and the eagle show areas of softness. NGC ID# 253D, PCGS# 7045

**PROOF TRADE DOLLARS**

**3742 1873 PR62 Cameo PCGS Secure.** Luminous legends and motifs display contrast with darkly mirrored fields. Sea-green undertones outline the protected areas. The strike is full aside from minor incompleteness on the eagle's right (facing) claw. Contact is confined to a few thin field lines near 7:30 on the reverse. Population: 16 in 62 Cameo, 35 finer (5/18). NGC ID# 27YJ, PCGS# 87053

**1874 Trade Dollar, PR64  
Elusive in Proof Format**

**3743 1874 PR64 PCGS Secure.** No period after FINE. The 1874 proof Trade dollar suffered an unusually high rate of attrition and is considered to be among the most challenging issues struck between 1873 and 1883. This pleasing near-Gem exhibits dusky shades of lavender-gray and olive-gold patina. There are a couple of wispy fields marks and a few points of softness, but the overall appeal is terrific. NGC ID# 27YK, PCGS# 7054

**3744 1876 PR63 PCGS Secure.** Type One Obverse and Type Two Reverse, the most prevalent subtype combination for proofs of this year. Vibrant brown and cobalt-blue toning envelops sharply struck and slightly cloudy surfaces. No marks or hairlines are apparent. NGC ID# 27YM, PCGS# 7056

**3745 1878 — Questionable Color — PCGS Genuine Secure. Proof, Unc Details.** A sharply struck specimen with pastel wheat-gold and powder-blue patina. The surfaces appear lacquered, most noticeably in the reverse field below the banner. The 1878 was the first proof-only Trade dollar issue. It is somewhat scarcer than its 1879 to 1883 successors, since only 900 pieces were struck.

**3746 1879 PR62 PCGS Secure.** Trade dollars were struck only in proof format from 1879 through 1885, although the final issues in 1884 and 1885 were produced under questionable circumstances and in extremely small quantities. The 1879 had the second-largest mintage of the proof-only series at 1,541 pieces struck, and proved irresistible to speculators. Cloudy, golden-gray patina floats over the mirrored surfaces of this sharply struck example. Some light swirling lines and tiny marks exist beneath the toning. Strike doubling is visible throughout the reverse elements. NGC ID# 27YR, PCGS# 7059

**3747 1880 PR62 PCGS Secure.** The 1880 Trade dollar was a proof-only issue struck specifically for collectors near the end of that controversial series, and it was produced in generous numbers. The 1,987-piece mintage was well-received by both dealers and the collecting public. This sharp PR62 survivor is colorfully toned over glistening, mirrored fields in variegated shades of blue, yellow-gold, reddish-orange, violet, and olive-tan. A few light lines are hidden by the toning, yet they account for the assigned grade. The eye appeal is outstanding. NGC ID# 27YS, PCGS# 7060

**1881 Trade Dollar, PR62 Cameo  
Attractive Border Toning**

**3748 1881 PR62 Cameo PCGS Secure.** This modestly contrasted proof Trade dollar showcases full design sharpness and reflective fields. Gold-tinted interiors reveal light field lines under a loupe, while the borders show lovely multicolor toning. The patina gives this lower-end proof above-average eye appeal for the grade. Suitable for type purposes. NGC ID# 27YT, PCGS# 87061

**1882 Trade Dollar, PR62+ Cameo  
Stark Contrast**

**3749 1882 PR62+ Cameo PCGS Secure.** The deeply mirrored fields of this Plus-graded Cameo proof showcase liquidlike glimmers when tilted beneath a light, complementing frosty relief elements. A couple of the upper-obverse stars exhibit trivial strike softness. Scattered contact marks in the fields limit the grade but are not overly bothersome. A light golden hue warms each side. NGC ID# 27YU, PCGS# 87062

**1883 Trade Dollar, PR64  
Final Official Proof Issue**

**3750 1883 PR64 PCGS Secure.** Intricate sharpness characterizes the frosted devices and stars of this Choice proof, contrasting slightly with mirrored fields that show limited grade-lowering lines. Both sides are light golden in color with splashes of sea-green toning. Some delicate rose accents are visible in the margins. The 1883 proof is the final official issue in the Trade dollar series and the last date of the type that is usually considered collectible. NGC ID# 5DP8, PCGS# 7063

*End of Session Two*

# SESSION THREE

## MORGAN DOLLARS

- 3751 1878 8TF Alligator Eye, VAM-14.1A, MS65+ PCGS. CAC.** Mingled shades of ocean-blue, violet-red, and gold patina create a spectacular play of colors when this remarkably unabraded Gem is tilted in the light. The design elements are well-detailed and vibrant mint luster shines through the patina.  
*Ex: Dallas Signature (Heritage, 3/2013), lot 3755, which realized \$2,056.25. NGC ID# 253H, PCGS# 133796 Base PCGS# 7072*

### 1878 Morgan Dollar, MS66 Seven Tailfeathers, Reverse of 1878

- 3752 1878 7TF Reverse of 1878 MS66 PCGS.** The arrow feathers are parallel on the Reverse of 1878. This issue was struck in considerable numbers after the short-lived 8 Tailfeather coins and the subsequent restamping of the 8 Tailfeather dies with the 7 Tailfeathers hub, which created the various 7/8 Tailfeathers varieties. The Reverse of 1878 coins constituted the bulk of the mintage of 1878. Despite the large mintage, examples in MS66 are elusive. This Premium Gem offers brilliant surfaces with swirling cartwheel luster and few abrasions. Population: 55 in 66 (9 in 66+), 0 finer (5/18).  
*Ex: Dallas Signature (Heritage, 10/2006), lot 1258.*  
**From The East End Collection.** NGC ID# 2TY3, PCGS# 7074

- 3753 1878 7TF Reverse of 1879 MS65 NGC.** Brilliant, silver-white surfaces show only a few minor bagmarks, while the strike is sharp front-to-back, top-to bottom. Only inconsequential, shallow luster grazes on Liberty's cheek argue against an even finer grade, which is often sought but seldom granted at the Gem level. NGC reports just 11 numerically finer certifications (5/18).  
**From The East End Collection.** NGC ID# 253L, PCGS# 7076

- 3754 1878-CC MS65 PCGS Secure.** Razor-sharp definition is evident on all design elements of this first-year Morgan dollar from the famous Carson City Mint. The surfaces are well-preserved and the fields exhibit a mix of satiny luster and prooflike reflectivity. Overall eye appeal is terrific. NGC ID# 253M, PCGS# 7080

- 3755 1878-CC MS65 PCGS. VAM-9, EDS.** The obverse of this first-year Morgan dollar is sharply struck, but the lower reverse shows incomplete detail, possibly due to a clogged die. The well-preserved surfaces are lustrous and appealing. The mintmark is high and tilted right and the fourth star from the bottom on the right side has a broken tip, identifying the popular VAM-9. NGC ID# 253M, PCGS# 7080

- 3756 1878-CC MS65 NGC.** Dazzling cartwheel luster engulfs this Gem first-year Carson City Morgan and produces magnificent eye appeal. Only a few trivial surface grazes are visible. This issue's availability declines substantially in finer grades. NGC ID# 253M, PCGS# 7080

### 1878-CC Morgan Dollar, MS66 First-Year Carson City Issue

- 3757 1878-CC MS66 PCGS. VAM-9.** This is a brilliant and boldly struck Premium Gem with full cartwheel luster and well-preserved surfaces. As such, it makes an outstanding representative of the popular first-year Carson City Morgan dollar issue. There is no sign of the die doubling that accompanies many dollar varieties from the year, although the lower wreath is distinguished by a series of lengthy raised die lines seen on VAM-9, which also has a right-leaning CC mintmark. PCGS reports just six numerically finer examples (6/18).  
*Ex: Dallas Signature (Heritage, 7/2006), lot 2716, where it brought \$4,312.50.*  
**From The East End Collection.** NGC ID# 253M, PCGS# 7080

### 1878-CC Morgan Dollar, MS65 Prooflike All-Brilliant, Bold Contrast

- 3758 1878-CC MS65 Prooflike PCGS.** The fields display pronounced mirroring, while the devices and legends boast undiminished mint frost. The result is blatant Prooflike contrast. Each side features sharply impressed motifs. The surfaces have a few scattered bagmarks, expected for the grade, but are much more attractive than often encountered for this popular Carson City issue.  
*Ex: Dallas Signature (Heritage, 11/2005), lot 3023.*  
**From The East End Collection.** NGC ID# 253M, PCGS# 7081

- 3759 1879 MS66 NGC.** This is a lustrous, white Gem example of the conditionally rare 1879, which is only occasionally available in Premium Gem condition and virtually unavailable when any finer. Brilliant throughout, the nearly unmarked surfaces of this coin exude soft-frosted mint luster. The sharp strike delivers well brought-up devices with only a hint of softness above the ear and on the eagle's talons. The 1879 is scarce in such a superior state of preservation. Census: 84 in 66 (4 in 66+, 2 in 66 ★), 5 finer (5/18).  
**From The East End Collection.** NGC ID# 253S, PCGS# 7084

**3760 1879 MS65 Prooflike PCGS.** The brilliant, flashy fields and frosty devices provide a first-glance appearance of a proof, although cartwheel luster is also evident. Refreshingly devoid of marks. The 1879 dollar was minted in great quantity, but only a tiny percentage of Mint State examples are Prooflike, and few among those are Gems. Certified in an old green-label holder. Population: 25 in 65 (1 in 65+) Prooflike, 2 finer (5/18). NGC ID# 253S, PCGS# 7085

**1879-CC Morgan Dollar, AU53  
Attractive Multicolor Toning**

**3761 1879-CC AU53 PCGS.** With a small mintage of 756,000 pieces, the 1879-CC is the first truly scarce issue in the Morgan dollar series. This attractive AU53 example exhibits some light wear on the high points of the hair and eagle's breast. The lightly abraded surfaces are blanketed in shades of golden-brown, silver-gray, and magenta toning. NGC ID# 253U, PCGS# 7086

**1879-CC Silver Dollar, MS61  
Capped Die, VAM-3**

**3762 1879-CC Capped Die, VAM-3, Top 100, MS61 NGC.** A Top 100 Variety. The date is doubled and the mintmark shows the remnants of a partially effaced small CC below the larger primary mintmark. This sharp Mint State coin exhibits essentially brilliant surfaces that show the minimum number of minor contact marks for the grade. Cartwheel luster is present and softly frosted. NGC ID# 253U, PCGS# 133869 Base PCGS# 7088

**3763 1879-O MS65 PCGS Secure.** From a mintage of 2.8 million pieces, the 1879-O Morgan dollar becomes elusive in grades above the MS65 level. This delightful Gem exhibits sharply detailed design elements for a New Orleans issue, with well-preserved brilliant surfaces. PCGS has graded 28 numerically finer examples. (5/18). NGC ID# 253X, PCGS# 7090

**1879-O Dollar, High-End MS65**

**3764 1879-O MS65 PCGS. CAC.** Virtually untoned save for a hint of faint golden color on the obverse devices. Although minor central strike softness is noted on Liberty's hair and on the eagle's feathers, the impression is bolder than usually seen. Both the fields and devices are impressively unabraded, and the overall appeal is comparable to a Premium Gem example. There are 28 finer submissions at PCGS, and seven at CAC (5/18).  
*Ex: FUN Signature (Heritage, 1/2008), lot 5274. NGC ID# 253X, PCGS# 7090*

**1879-S Morgan Dollar, Pristine MS68  
Unseen in Higher Grades**

**3765 1879-S MS68 NGC.** The 1879-S, along with the three subsequent S-mint dollar issues, is one of the most popular for type representation given its widespread high-grade availability. This spectacular, mark-free Superb Gem fails to show any noteworthy flecks. The relief elements display a full impression, and the eye appeal is tremendous. None are graded higher at NGC or PCGS (5/18).  
*From The East End Collection. NGC ID# 253X, PCGS# 7092*

**1879-S Dollar, MS68  
Nearly Flawless**

**3766 1879-S MS68 NGC.** An exceptional example of this popular type issue. Frosty devices and slightly reflective fields produce a degree of contrast. The surfaces are as close to perfection as possible. Liberty's cheek and neck are free of the usual nicks and scuffs. Among select group of top-graded 1879-S dollars at both services.  
*Ex: Central States Signature (Heritage, 4/2006), lot 3247, which realized \$3,737.50. NGC ID# 253X, PCGS# 7092*

**1879-S Morgan Dollar, MS68  
Type Collector Favorite**

- 3767 1879-S MS68 NGC.** With a large mintage of 9.1 million pieces and a remarkably high survival rate in high grades, the 1879-S Morgan dollar is a favorite choice of type collectors. This magnificent MS68 example exhibits razor-sharp definition on all design elements, and the impeccably preserved surfaces radiate vibrant mint luster. NGC and PCGS have certified a few examples in this grade with the Plus or Star designations, but neither service reports a coin in MS69 (6/18). NGC ID# 253X, PCGS# 7092

**1880 Silver Dollar, MS66 Prooflike  
Registry Set Quality**

- 3768 1880 MS66 Prooflike NGC.** This early P-mint Morgan is seldom found with mirrored fields. Even non-Prooflike Premium Gem examples are rare. This magnificent coin displays a bold strike and brilliant pristine surfaces. Appreciable cameo contrast defines each side. A breathtaking Registry-quality example. Census: 6 in 66 Prooflike, 0 finer (5/18).  
*Ex: Long Beach Signature (Heritage, 9/2004), lot 8341; Jack Lee Collection, Part III / Dallas Signature (Heritage, 11/2005), lot 3072.*  
**From The East End Collection.** NGC ID# 253Y, PCGS# 7097

- 3769 1880/79-CC Reverse of 1878, VAM-4, MS65 PCGS.** A Top 100 Variety. One of only two 1880-CC Reverse of 1878 VAMs, the other is VAM-7. VAM-4 is also popular due to its prominent overdate. A dusting of tan patina precludes full brilliance. A nicely struck and lustrous Gem with a smooth reverse and only minor obverse grazes.  
*Ex: Long Beach Signature (Heritage, 2/2005), lot 9978; Dallas Signature (Heritage, 11/2005), lot 3099, which realized \$2,530.*  
**From The East End Collection.** NGC ID# AP7P, PCGS# 133876 Base PCGS# 7108

- 3770 1880/79-CC Reverse of 1878, VAM-4, MS65 PCGS.** A Top 100 Variety. Light to medium silver-gray toning visits this lustrous and well-struck Carson City dollar. Exceptionally free from marks, the surfaces show a hint of granularity, as made from lightly rusted dies. VAM-4 is the famous *Guide Book* variety that pairs the most prominent overdate of the series with an obsolete Second Reverse. NGC ID# AP7P, PCGS# 133876 Base PCGS# 7108

- 3771 1880-CC 8 Over High 7, VAM-5, MS65+ PCGS Secure.** A Top 100 Variety. This Plus-graded Gem is sharply detailed throughout, with the remnants of an undertype 7 placed high below the second 8 in the date and a small die gouge between the branch and the top arrow feather. The lustrous surfaces are well-preserved and the slanting top arrow feather identifies the Reverse of 1879. NGC ID# 2542, PCGS# 133877 Base PCGS# 7102

- 3772 1880-CC 8 Over Low 7, VAM-6, MS65 Prooflike NGC.** A Top 100 Variety. Though not certified as such, an obvious underdigit 7 is seen within the second 8 in the date. This nicely mirrored Gem is well-struck and has a frosty, snow-white appearance. The fields are exceptionally unabraded, though the portrait displays delicate grazes.  
*Ex: Central States Signature (Heritage, 5/2007), lot 4528; Long Beach Signature (Heritage, 2/2009), lot 1702, which realized \$1,265.* NGC ID# 35BH, PCGS# 41135 Base PCGS# 7105

- 3773 1880-CC MS65 Prooflike PCGS.** This spectacular Gem exhibits sharply detailed frosty design elements and deeply reflective prooflike fields on both sides. The well-preserved surfaces are mostly brilliant, with a few subtle hints of pale gold and lavender toning. Overall eye appeal is outstanding. PCGS has graded 14 numerically finer Prooflike specimens (5/18). NGC ID# 2542, PCGS# 7101

- 3774 1880-CC Reverse of 1879, 8/7 Dash, VAM-8, MS66 PCGS. CAC.** A die line at the bottom of the eagle's left (facing) wing and another through the M in AMERICA are the key identifiers of this VAM variety. The present coin is otherwise a typical 1880-CC dollar — brilliant, frosty, and eye-appealing. Some central strike weakness is noted, but the surfaces are beautifully preserved. NGC ID# 2542, PCGS# 41142 Base PCGS# 7100

- 3775 1880-O MS63+ Prooflike PCGS.** Large quantities of 1880-O Morgan dollars exist through near-Gem condition, but seldom do they exhibit the prooflike reflectivity demonstrated by this brilliant, high-end MS63+ example. The legends and central motifs are sharply struck and thickly frosted, standing out against glassy, minimally marked fields. A series of reeding marks appear on the chin. NGC ID# 2543, PCGS# 7115

- 3776 1880-O MS63 Prooflike PCGS. CAC.** Small or Micro O. A snow-white Select New Orleans dollar. The strike is above average, and the reverse is well-preserved. Delicate distributed obverse marks do not challenge the designated grade. The '80-O is readily available in lustrous Mint State, but Prooflike pieces are very scarce. CAC: 5 in 63 Prooflike, 1 finer (6/18). NGC ID# 2543, PCGS# 7115

**1880-S Dollar, MS68  
Thickly Frosted and Unmarked**

- 3777 1880-S MS68 NGC.** This Superb Gem is incredibly well-preserved and eye-appealing. The devices are thickly frosted, and while the fields only show a modest degree of semiprooflikeness, it is enough to generate noticeable cameo contrast. Fully struck and expectedly devoid of marks. NGC reports five submissions finer (5/18).  
**From The East End Collection.** NGC ID# 2544, PCGS# 7118

- 3778 1880-S MS67 Prooflike PCGS.** Large S. Glimpses of cherry-red toning adorn the borders, but this flashy Superb Gem is otherwise brilliant. A good strike and exceptionally smooth surfaces confirm the lofty third-party grade. The 1880-S is among the most available Morgan issues, but type demand ensures consistent collector interest in examples of the present quality. NGC ID# 2544, PCGS# 7119

**3779 1880/9-S VAM-11, Medium S, MS67 PCGS. CAC.** A Hot 50 Variety. Strong mint luster sweeps the brilliant surfaces of this high-grade silver dollar. Nearly pristine aside from a few delicate grazes on the portrait. VAM-11 is identified by die fill within the upper half of the final date digit.

Ex: *Long Beach Signature* (Heritage, 9/2006), lot 5018, which realized \$2,530.

**From The East End Collection.** NGC ID# 2544, PCGS# 133988 Base PCGS# 7122

**3780 1881 MS66 PCGS.** Exceptionally clear, frost-white surfaces with satiny luster complement a sharp strike on this better-date Morgan dollar. While the PCGS population has increased substantially at the MS66 level over the past 20 years, very few coins are certified any finer. This highly attractive Premium Gem remains in its older blue label holder from a previous appearance in one of our auctions. This is a real opportunity for the dollar enthusiast to acquire an unquestionably high-end example of a conditionally elusive Philadelphia date. PCGS reports just five numerically finer 1881 silver dollars (6/18).

Ex: *ANA Signature* (Heritage, 4/2006), lot 957, where it realized \$6,325.

**From The East End Collection.** NGC ID# 2546, PCGS# 7124

**3781 1881-CC MS66 PCGS.** A delightful Premium Gem Morgan dollar, from a small Carson City mintage of 296,000 pieces. This coin exhibits sharply detailed design elements and well-preserved brilliant surfaces, with vibrant mint luster on both sides.

**From The East End Collection.** NGC ID# 2549, PCGS# 7126

#### 1881-CC Dollar, All-Brilliant MS67 Perennially Popular

**3782 1881-CC MS67 NGC.** This brilliant and semiprooflike Superb Gem is well-struck and void of significant marks. The 1881-CC is a perennial favorite among collectors for several reasons: its Carson City origin, its mintage below 300,000 pieces, and its availability in attractive Mint State grades, courtesy of the GSA hoard. Rare any finer.

Ex: *New York Signature* (Heritage, 6/2005), lot 5987.

**From The East End Collection.** NGC ID# 2549, PCGS# 7126

#### 1881-CC Dollar, MS67 Scintillating Cartwheel Luster

**3783 1881-CC MS67 NGC.** One can just imagine this brilliant Superb Gem dollar falling from a Carson City press 137 years ago looked exactly as it does now — untuned with swirling cartwheel luster and virtually no marks to speak of. Fully rendered motifs and smooth, scintillating fields are readily appealing. NGC reports four finer submissions (6/18). NGC ID# 2549, PCGS# 7126

#### 1881-S Morgan Dollar, MS68 Ultimate Type Coin

**3784 1881-S MS68 NGC.** The ultimate type coin issue in the Morgan dollar series was struck to the extent of 12.7 million pieces and is collectible through this incredibly high-grade level. Each side delivers the full strike and exceptional surface preservation one would expect. Mint brilliance is uninhibited, and the overall quality and eye appeal are terrific. A single coin is graded higher at NGC (6/18). NGC ID# 2549, PCGS# 7130

#### 1882-CC Dollar, MS67 Among the Finest at NGC

**3785 1882-CC MS67 NGC.** The obverse of this highly lustrous Carson City dollar features variegated blue, amber, gold, and copper iridescence, while the mostly brilliant reverse shows just a few tan accents near the borders. Although many thousands of 1882-CC dollars were released through the GSA sales in the 1970s, few match the quality of this Superb Gem, which ranks among the finest examples at NGC (6/18).

Ex: *Long Beach Signature* (Heritage, 9/2006), lot 5079; *FUN Signature* (Heritage, 1/2007), lot 6990; *Central States Signature* (Heritage, 4/2009), lot 3004; *Long Beach Signature* (Heritage, 9/2013), lot 6591; *Long Beach Signature* (Heritage, 6/2014), lot 5098, which realized \$3,818.75. NGC ID# 254S, PCGS# 7134

**3786 1882-CC MS66 Prooflike PCGS Secure.** A delightful Premium Gem Morgan dollar from the famous Carson City Mint, this coin offers well-detailed design elements, with just a touch of the usual softness on the hair above the ear and the eagle's talons. The well-preserved brilliant surfaces show much prooflike reflectivity in the fields. PCGS has graded one finer Prooflike specimen (6/18). NGC ID# 254B, PCGS# 7135

**3787 1882-O MS65+ PCGS Secure. CAC.** The 1882-O Morgan dollar is a plentiful issue in MS65 condition, but finer coins are scarce. This Plus-graded Gem is sharply detailed and lustrous, with well-preserved surfaces that show highlights of golden-tan toning. NGC ID# 254C, PCGS# 7136

**1882-O Dollar, Lightly Toned MS66  
Finest Collectible Grade for the Issue**

- 3788 1882-O MS66 PCGS.** Seldom is the 1882-O dollar found in this high grade, and most collectors can forget about trying to acquire a finer example in MS67. Those come on the market once every four or five years. This Premium Gem is remarkably clean, showing a couple of microscopic ticks on the cheek and a small handful of shallow, undistracting grazes in the right obverse field — all in-line with the grade. Although satiny and largely brilliant, traces of gold and lavender-gray patina appear over each side. Population: 76 in 66 (5 in 66+), 7 finer (6/18). NGC ID# 254C, PCGS# 7136

**1882-O Silver Dollar, MS66  
Elusive So Fine**

- 3789 1882-O MS66 NGC.** This is a virtually brilliant Premium Gem that provides vibrant cartwheel luster and unusually clean surfaces. A sharp strike further increases the eye appeal. The 1882-O is often regarded as a common date in Uncirculated condition, but remarkably few coins merit MS66 classification. Census: 13 in 66 (2 in 66 ★), 2 finer (6/18).  
*Ex: Palm Beach Signature (Heritage, 3/2006), lot 1081, which realized \$6,037.50.*  
**From The East End Collection.** NGC ID# 254C, PCGS# 7136

- 3790 1882-O/S Strong, Recessed, VAM-4, MS64 PCGS.** A Top 100 Variety. An untoned and lustrous near-Gem that has a good strike and lightly abraded fields. One of three different O/S reverses known for the year. Presumably, New Orleans was in dire need of reverse dies, and existing S-mint dies were overmintmarked at Philadelphia and shipped to the Southern facility. The devices are lightly pebbled from die rust, as made and characteristic of this popular overmintmark VAM.  
*Ex: Palm Beach Signature (Heritage, 3/2006), lot 1082, where it realized \$3,450.*  
**From The East End Collection.** NGC ID# 254D, PCGS# 133891 Base PCGS# 7138

**1882-S Dollar, MS68  
None Graded Higher**

- 3791 1882-S MS68 NGC.** The 1882-S is one of the most plentiful early Morgan dollars in Mint State. Only in the lofty grade of MS68 does this issue become a challenge to locate. Vibrant luster radiates over this fully struck Superb Gem. The untuned surfaces are immaculately preserved. None graded higher (6/18).  
*Ex: Houston Signature (Heritage, 12/2009), lot 1027; Long Beach Signature (Heritage, 6/2010), lot 1099; New York Signature (Heritage, 11/2013), lot 4259. NGC ID# 254F, PCGS# 7140*

- 3792 1883 MS67 PCGS.** *Ex: New York City Set.* This intricately struck Superb Gem approaches full brilliance, but has a whisper of golden color on each side as well as a few deep-gray speckles. The frosted surfaces are lustrous and pleasingly undisturbed. The devices are faintly pebbled with die rust, as made. PCGS reports just four numerically finer examples (6/18).  
*Ex: Palm Beach Signature (Heritage, 3/2006), lot 1087, where it brought \$2,990.*  
**From The East End Collection.** NGC ID# 254G, PCGS# 7142

**1883-CC Morgan Dollar, MS67  
Frosty and Brilliant**

- 3793 1883-CC MS67 NGC.** Snow-white, frosty mint luster engulfs the nearly unmarked surfaces of this Superb Gem Carson City dollar. The devices are well-struck, and Liberty's cheek is clean. The 1883-CC is an available date due to the GSA sales of the 1970s, which distributed more than 755,000 examples to collectors and dealers. However, Superb Gem coins are conditionally elusive.  
**From The East End Collection.** NGC ID# 254J, PCGS# 7144

- 3794 1883-S MS63 PCGS.** Abrasions are at a minimum for the grade, and this Select 1883-S Morgan dollar is vibrantly lustrous. Both sides show warm golden toning and a bold strike. The 1883-S is a much better date in Uncirculated condition. NGC ID# 254K, PCGS# 7148

**1883-S Morgan Dollar, MS64**  
Rare in Finer Grades

- 3795 1883-S MS64 PCGS.** Brilliant, satiny surfaces show only a few light marks, and the only mentionable strike weakness occurs above Liberty's ear. The 1883-S is a semikey date in Uncirculated condition but is collectible at the Choice level. Finer pieces are rare. PCGS lists just 25 examples in Gem and higher grades, Prooflike, and Deep Mirror Prooflike pieces included (6/18).

*From The East End Collection.* NGC ID# 254K, PCGS# 7148

- 3796 1884 MS66+ PCGS Secure. CAC.** The 1884 Morgan dollar was produced in large numbers and examples in MS66 condition are not too difficult to locate, but the issue is scarce in finer grades. This Plus-graded Premium Gem offers well-detailed design elements, with some faint die cracks within the reverse legends. The well-preserved surfaces radiate vibrant mint luster and THE eye appeal is outstanding. NGC ID# 254L, PCGS# 7150

- 3797 1884 MS67 NGC.** Brilliant, Superb Gem surfaces complement a sharp strike and set this silver-white 1884 apart from lesser examples. The 1884 has never been in short supply except at the very finest grade levels, where it is a notable condition rarity. Both the PCGS and NGC populations are low in MS67 or finer grades. NGC Census: 36 in 67 (3 in 67 ★), 2 finer (5/18).

*From The East End Collection.* NGC ID# 254L, PCGS# 7150

**1884-CC Dollar, Frosty MS67**  
Few Finer Pieces Known

- 3798 1884-CC MS67 PCGS.** This needle-sharp Superb Gem has impressive cartwheel luster and bright, snow-white surfaces. Both sides exhibit virtually flawless preservation. The 1884-CC is among the most available Carson City dollars in better grades, thanks to the GSA hoard. However, the demand for high quality pieces is nearly insatiable, and Superb Gems are elusive. PCGS lists three finer non-Prooflike pieces, plus one Prooflike and three Deep Mirror Prooflike coins in MS67 (6/18).

Ex: Long Beach Signature (Heritage, 6/2006), lot 2344, which realized \$5,175.

*From The East End Collection.* NGC ID# 8BBF, PCGS# 7152

- 3799 1884-CC MS66 Deep Mirror Prooflike PCGS.** A brilliant high-grade Carson City type coin. The crisply struck devices demonstrate contrast with the flashy fields. Scattered contact in the fields and chin merit only passing mention. Much of the mintage for the '84-CC emerged from GSA sales, yet the issue is scarce in the present condition.

*From The East End Collection.* NGC ID# 254M, PCGS# 97153

- 3800 1884-O MS67 NGC.** While the San Francisco Mint cut back on silver dollar production because it lacked storage capacity, the New Orleans Mint did little more than strike silver dollars in abundance. The mintage topped 9.7 million pieces at the Southern mint, essentially to comply with requirements of the Bland-Allison Act. Most of the mintage did not circulate, was indifferently struck, and carelessly stored. Top-quality examples exist if struck from fresh dies, such as the surfaces of this Superb Gem suggest. The coin is entirely brilliant, sharply struck, and miraculously well-preserved for the issue. PCGS and NGC have each certified just one numerically finer example (6/18).

*From The East End Collection.* NGC ID# 254N, PCGS# 7154

**1884-O Dollar, MS66 Deep Mirror Prooflike**  
Brilliant Cameo Contrast

- 3801 1884-O MS66 Deep Mirror Prooflike PCGS Secure.** The 1884-O Morgan dollar is available overall, but Deep Mirror Prooflike pieces are scarce in MS66 and nearly uncollectible finer. This Premium Gem is untoned and cameo-contrasted on both sides. The surface preservation lives up to its assigned grade, and the strike is sharp. Population: 63 in 66 (3 in 66+) Deep Mirror Prooflike, 1 finer (6/18). NGC ID# 256X, PCGS# 97155

- 3802 1884-S AU58 PCGS.** From an adequate mintage of 3.2 million pieces, the 1884-S Morgan dollar is surprisingly scarce in high grade. This attractive near-Mint specimen shows only the slightest trace of wear on the high points of the design, and the lightly abraded surfaces retain much original mint luster. NGC ID# 254P, PCGS# 7156

- 3803 1884-S — Cleaned — NGC Details. Unc.** The 1884-S is a scarce date in Uncirculated condition. This piece is unworn and semiprooflike, although hairlines on each side prevent a numeric grade. Bold design elements and brilliant luster show the expected scattering of minor abrasions.

- 3804 1885 MS67 PCGS.** Although the 1885 is found with some regularity in Superb Gem condition, it is rare in any numerically finer grade. Registry Set collectors would do well to examine this frosted, vibrantly lustrous and brilliant MS67 in detail, since it approaches a finer grade both in technical quality and eye appeal. VAM enthusiasts will note the dash below the second 8 in the date.

*From The East End Collection.* NGC ID# 254R, PCGS# 7158

- 3805 1885-CC MS66 PCGS. VAM-2A.** The N from IN is clashed in front of Liberty's neck. This nicely struck and lustrous low-mintage Carson City dollar is carefully preserved and shows only a hint of straw-gold and silver-gray toning.

*From The East End Collection.* NGC ID# 254S, PCGS# 7160

- 3806 1885-CC MS66 NGC.** Frosty, untuned luster is original across both sides of this Premium Gem 1885-CC dollar. A touch of softness is visible on the eagle's breast and the hair above Liberty's ear, and the latter shows faint roller marks still visible under a loupe. A lack of abrasions confirms the high grade. NGC ID# 254S, PCGS# 7160

**3807 1885-CC MS66+ NGC.** A widespread distribution of 1885-CC Morgan dollars during the 1970s accounts for the issue's collectibility through MS66 condition, but anything finer than this high-end Premium Gem would be well-beyond the reach of most collectors. Natural shades of lavender, peach-gold, and blue patina blanket the obverse. The reverse remains brilliant. Well-struck. NGC ID# 254S, PCGS# 7160

**3808 1885-CC MS66+ PCGS. VAM-3.** Light chestnut-gold toning graces this lustrous Carson City silver dollar. The reverse is virtually perfect, and the obverse shows only a few delicate marks. The centers are sharply struck. A low-mintage issue made readily collectible by the GSA sales of the 1970s. NGC ID# 254S, PCGS# 7160

#### 1885-O Morgan Dollar, MS66+ Deep Mirror Prooflike Example

**3809 1885-O MS66+ Deep Mirror Prooflike NGC.** A Plus-graded Premium Gem representative of this popular New Orleans Mint type issue, with well-detailed design elements that show just the slightest trace of blending on the hair above the ear. The virtually pristine surfaces include deeply reflective prooflike fields and richly frosted devices. Only a small fraction of the certified population qualifies for the Deep Mirror Prooflike designation. Census: 21 in 66 (1 in 66+) Deep Mirror Prooflike, 1 finer (5/18). NGC ID# 254T, PCGS# 97163

#### 1885-S Dollar, MS66 Scarce in This High Grade

**3810 1885-S MS66 NGC.** The 1885-S is plentiful through MS65, but Premium Gems are scarce and represent the finest coins typically available to collectors. This piece is among the finest seen by NGC. Brilliant, radiant luster engulfs each side, illuminating well-struck design elements and a pristine cheek on Liberty. Under a loupe, only the most insignificant luster grazes are visible in the fields. The reverse is semiprooflike. Census: 14 in 66 (1 in 66 ★), 0 finer (6/18).

*Ex: Dallas Signature (Heritage, 11/2006), lot 1289, which realized \$4,600.*

**From The East End Collection.** NGC ID# 254U, PCGS# 7164

**3811 1885-S Doubled 5, VAM-2, MS65 PCGS.** The VAM-2 variety is an interesting one, with 5 in the date repunched and remnants of a secondary 5 visible just above the flag of the primary digit. Regardless of variety, the 1885-S is scarce in Gem condition or finer. This brilliant, silver-white example displays flashy cartwheel luster throughout smooth and attractive surfaces that show only a few minor field abrasions. Some light, parallel planchet striations angle downward across Liberty's cheek — not fully eliminated by strike, since this 1885-S is (as usual) a bit weak over the high points of Liberty's portrait. The Gem surfaces and strong eye appeal more than compensate for the light strike. PCGS reports just 67 numerically finer examples (6/18).

**From The East End Collection.** PCGS# 42660 Base PCGS# 7164

**3812 1886-O MS61 NGC.** The 1886-O Morgan dollar is not difficult to locate in lower Mint State grades, but it is conditionally rare at the higher levels of Mint State. This well-detailed MS61 specimen offers pinkish-gray surfaces that are lightly marked for the grade. Original mint luster is slightly dimmed by the toning. NGC ID# 254W, PCGS# 7168

**3813 1886-O MS61 PCGS.** The 1886-O Morgan dollar is an elusive issue in high grade. This impressive Mint State specimen is well-detailed, with just a trace of the usual blending on the hair above the ear. The surfaces are lustrous and lightly abraded for the grade, with a few hints of pale gold toning. NGC ID# 254W, PCGS# 7168

**3814 1886-O MS62 PCGS.** An important issue in the Morgan dollar series, the 1886-O had a mintage that exceeded 10 million coins, yet few survive in Mint State grades. This brilliant and untoned example has full silver luster and minimal marks for the grade, exhibiting the eye appeal of a finer-grade coin. NGC ID# 254W, PCGS# 7168

**3815 1886-O MS62 PCGS.** This pleasing MS62 specimen displays a sharp strike for a New Orleans issue, with just the slightest trace of blending on the hair above the ear. The surfaces show the expected number of minor contact marks for the grade and retain much of their original mint luster. NGC ID# 254W, PCGS# 7168

**3816 1886-O MS62 PCGS.** The 1886-O is a high-mintage issue, and plentiful in VF, but Mint State examples are surprisingly scarce, a situation similar to the 1896-O. This lustrous and original example exhibits consistent medium straw-gold toning. The strike is fairly sharp, and marks are relatively minor for the MS62 level. Unusual for a Generation 4.2 PCGS holder, the coin is rotated more than 90 degrees CCW within the holder. NGC ID# 254W, PCGS# 7168

**3817 1886-O MS63 PCGS.** As noted by Bowers in his silver dollar *Encyclopedia*, the 1886-O Morgan dollar issue was poorly produced, even though the New Orleans Mint coined silver dollars exclusively in that year. This example is not an exception, and the centers are especially weak. The coin's good points include attractive, shimmering luster and minimally abraded surfaces for the grade. *Ex: Central States Signature (Heritage, 4/2007), lot 4740.* NGC ID# 254W, PCGS# 7168

**1886-S/S Morgan Dollar, MS66  
VAM-2, Repunched Mintmark**

- 3818 1886-S/S VAM-2, Top 100, MS66 PCGS.** A Top 100 Variety. Reasonably available in MS64, the 1886-S becomes scarce in Gem condition and is rare finer. This sharp, brilliant Premium Gem has a virtually flawless reverse, while the obverse possesses only inoffensive grazes in the field. The mintmark was initially entered with a pronounced tilt to the right, then largely effaced and repunched at the proper angle. The serifs from the initial punch remain evident, identifying the VAM-2 variety. Population: 51 in 66 (7 in 66+), 5 finer (6/18).  
**From The East End Collection.** NGC ID# 254X, PCGS# 133906 Base PCGS# 7170

- 3819 1887/6 VAM-2 MS65 NGC.** A Top 100 Variety. The curve of the base of an underdigit 6 is apparent on both sides of the bottom of the 7. A snow-white Gem that boasts dazzling luster and minimal marks. The central strike is above average for the issue, though shy of complete. Portions of the coin display a dappled texture, as struck.  
**From The East End Collection.** NGC ID# 2552, PCGS# 133908 Base PCGS# 7174

- 3820 1887 MS67 NGC.** The fields are brilliant and reflective, while the central motifs are nicely frosted, a combination that gives this Superb Gem 1887 excellent eye appeal. It is a solid representative of the MS67 level, where marks are simply not a factor and the strike shows only brief blending above the ear. As one would expect, the dies were used beyond their normal life throughout such a large mintage (more than 20 million pieces struck in total) and this example exceeds the typical MS62 to MS64 grade by a huge margin. NGC has certified just three numerically finer coins (6/18).  
**From The East End Collection.** NGC ID# 27Y3, PCGS# 7172

- 3821 1887/6-O VAM-3 MS63 PCGS.** The 1887/6-O was discovered not long after its Philadelphia overdate counterpart was confirmed. This lustrous and lightly toned New Orleans dollar shows only wispy contact, and may be held back in grade solely by an incomplete strike in the centers.  
**From The East End Collection.** NGC ID# 2552, PCGS# 133912 Base PCGS# 7178

- 3822 1887/6-O VAM-3 MS63 PCGS. CAC.** A Top 100 Variety. The telltale curve near the base of the 7 is a remnant of an underdigit 6. A lustrous and brilliant Select example of the New Orleans overdate. The strike is above average. The reverse is surprisingly free from contact, while the obverse displays the expected number of delicate marks. CAC: 33 in 63, 23 finer (6/18). NGC ID# 2552, PCGS# 133912 Base PCGS# 7178

**1887/6-O Dollar, Near-Gem  
Exceptionally Smooth**

- 3823 1887/6-O VAM-3 MS64 PCGS.** A Top 100 Variety. According to VAMworld.com, the 1887/6-O was discovered in February 1973 by Bob Reithe, about 15 months after Ted Clark first identified the VAM-2 1887/6. Perhaps Reithe thought he had cherrypicked an 1887/6 before turning the coin over and spotting the New Orleans mintmark. This lustrous, high-end near-Gem has faint golden toning and a tiny spot below the arrowheads. PCGS still reports just one numerically finer example (6/18).  
*Ex: Houston Signature (Heritage, 12/2013), lot 4126.* NGC ID# 2552, PCGS# 133912 Base PCGS# 7178

- 3824 1887-O MS64 Deep Mirror Prooflike PCGS.** The outer edges of the obverse display several shades of attractive toning, including hues of copper-gold, teal, sea-green, and plum. A hint of blue patina is present on the obverse. This near-Gem exhibits a bold strike. A number of minor grazes are present on the cheek of Liberty. PCGS records only 10 finer coins in Deep Mirror Prooflike (6/18). NGC ID# 2552, PCGS# 97177

**1887-O Dollar, MS64 Deep Mirror Prooflike  
Brilliant and Deeply Reflective**

- 3825 1887-O MS64 Deep Mirror Prooflike PCGS. CAC.** This fabulous, deeply mirrored O-Mint is nearly untoned save for some faint speckles of milky color. Most of the design elements are adequately struck, except for the usual weakness in the centers. A few minor marks are noted on Liberty's cheek. While the 1887-O is surprisingly available in Choice Deep Mirror Prooflike condition, PCGS has certified just 10 numerically finer examples. CAC: 23 in 64, 2 finer (6/18).  
*Ex: Dallas Signature (Heritage, 11/2005), lot 3314, where it brought \$2,242.50.*  
**From The East End Collection.** NGC ID# 2552, PCGS# 97177

**1888 Morgan Dollar, MS67**  
**A Single Coin is Graded Higher**

- 3826 1888 MS67 NGC.** More than 19 million Morgan dollars were struck at the Philadelphia Mint in 1888 — a staggering number. Yet, the issue is surprisingly scarce at this grade level. Complete mint brilliance and vibrant, swirling luster characterize this Superb Gem. The strike is bold throughout, and there are only a handful of minute ticks. Census: 89 in 67 (2 in 67+, 3 in 67 ★), 1 finer (5/18).  
**From The East End Collection.** NGC ID# 26KE, PCGS# 7182

- 3827 1888-O MS66 PCGS.** This piece is tied for the finest numerically graded at PCGS, and is exceeded by just 38 MS66+ examples (6/18). Both sides are brilliant and fully lustrous with pristine, nearly mark-free surfaces. NGC ID# 2556, PCGS# 7184

**1888-O Dollar, MS65 Deep Mirror Prooflike**  
**Profound Field Reflectivity**

- 3828 1888-O MS65 Deep Mirror Prooflike PCGS.** The 1888-O dollar is plentiful through MS65 condition, and it is even accessible with Prooflike contrast. But Deep Mirror Prooflike examples are scarce, and the highest readily obtainable examples compare to this piece. This Gem maintains the deep field reflectivity and thickly frosted devices that one would expect to find in a DMPL dollar. The strike is fully defined. Population: 66 in 65 (2 in 65+) Deep Mirror Prooflike, 6 finer (5/18).  
**From The East End Collection.** NGC ID# 462J, PCGS# 97185

- 3829 1888-S MS65 PCGS.** The 1888-S Morgan dollar is a better date in the series, from a small mintage of 657,000 pieces. This attractive Gem offers sharply detailed design elements and lustrous, well-preserved surfaces, with ample eye appeal. PCGS has graded 36 numerically finer examples (6/18).  
**From The East End Collection.** NGC ID# 2557, PCGS# 7186

**1889 Silver Dollar, MS66+**  
**Uncommon This Fine**

- 3830 1889 MS66+ PCGS Secure.** In MS66, Prooflike and Deep Mirror Prooflike 1889 dollars are major rarities, but frosty, uncontrasted coins such as the present are still accessible for quality-conscious collectors. This high-end example is untoned and vibrantly lustrous, showing only trivial strike softness above Liberty's ear. PCGS lists six finer non-Prooflike pieces (6/18). NGC ID# 2558, PCGS# 7188

- 3831 1889-CC XF40 NGC.** This is a pewter-gray example of the Carson City series key, showing color that gradually deepens toward the borders. Light wear leaves each side problem-free and attractive for the grade. An outstanding collector coin. NGC ID# 2559, PCGS# 7190

**1889-CC Dollar, XF45**  
**Most Elusive Carson City Morgan**

- 3832 1889-CC XF45 PCGS.** After a long layoff, the Carson City Mint was reopened for coinage operations in October of 1889. The famous Western facility struck only 350,000 Morgan dollars in the few months remaining in the year, making the 1889-CC a challenging issue in all grades today. This lightly worn, lightly abraded Choice XF specimen is attractively toned in shades of lavender and golden-brown. NGC ID# 2559, PCGS# 7190

- 3833 1889-CC — Repaired — NGC Details. AU.** Light to medium butter-gold and steel-gray toning embraces this well-defined key-date Carson City dollar. Both sides appear unabraded to the unaided eye. Close evaluation reveals smoothed surfaces, most apparent in the field in front of Liberty's neck.

**1889-O Dollar, MS65**  
**Conditionally Rare O-Mint Issue**

- 3834 1889-O MS65 PCGS.** Ex: DCT Collection. Although none of the three other Morgan dollar issues struck in 1889 challenge the 1889-CC, this New Orleans dollar is the second most elusive issue for the year in high grades. Coins graded higher than this Gem are major rarities. Both sides are brilliant and typically defined over the centers. Satiny mint luster glistens softly throughout. PCGS reports only 13 finer submissions (5/18).  
**From The East End Collection.** NGC ID# 255A, PCGS# 7192

- 3835 1889-S MS65 PCGS.** Semireflective surfaces display a pinpoint-sharp strike and strong silver mint luster. Only light field chatter and tiny marks exist on the untuned, attractive surfaces. A loupe reveals faint die polish lines that confirm the partially prooflike nature of the Gem fields. Just 700,000 pieces were struck.  
**From The East End Collection.** NGC ID# 255B, PCGS# 7194

**1889-S Morgan Dollar, MS66**  
**Just One Piece Certified Finer**

- 3836 1889-S MS66 PCGS.** The 1889-S — with a mintage of just 700,000 pieces — was at one time considered one of the rare Morgan dollars. The Redfield Hoard and numerous Treasury releases increased its numbers. Still, relatively few MS66 examples have been graded (just over 100 coins at PCGS), and a mere one piece is numerically finer at either service (6/18). This Premium Gem displays radiant luster, and just a wisp or two of barely discernible light tan color. The design elements are well-impressed, save for nominal weakness on the hair over Liberty's ear. A few minor luster grazes are noted on the obverse, and a light toning spot is visible in the lower-right (facing) reverse quadrant.  
 Ex: ANA Signature (Heritage, 4/2006), lot 1065, where it brought \$4,743.75.  
**From The East End Collection.** NGC ID# 255B, PCGS# 7194

- 3837 1890 MS65 Prooflike NGC.** With more than 16 million pieces struck, the 1890 is not well-known for having prooflike or deep mirror prooflike surfaces — nor is it a standout with normal surfaces — because of frequent bagmarks. This example has the best of both worlds, with minimally marked, mirrored fields and no heavy abrasions. Brilliant silver surfaces show no toning whatsoever and frost-white central motifs. This issue is overlooked for its scarcity with Gem Prooflike surfaces. Less than two dozen pieces are certified by both services combined at the MS65 Prooflike level, with one PCGS coin certified finer. NGC shows no Prooflikes finer than this example. Census: 4 in 65 Prooflike, 0 finer (5/18).  
**From The East End Collection.** NGC ID# 255C, PCGS# 7197

- 3838 1890-CC MS63 PCGS. VAM-3.** The 90 in the date is repunched south. A brilliant Choice Carson City dollar save for a small dash of struck-in grease on Liberty's jaw. The strike is good and the deeply mirrored fields are splendidly smooth. A single moderate mark on the lower cheek determines the grade. NGC ID# 255D, PCGS# 7198

- 3839 1890-CC MS64 PCGS. VAM-5.** The second C in the mintmark is clearly repunched north. Lightly toned and lustrous with a bold strike and pleasing preservation. A better Carson City issue, due to its scant participation in the GSA sales.  
 Ex: Dallas Signature (Heritage, 11/2005), lot 3386, which realized \$1,725.  
**From The East End Collection.** NGC ID# 255D, PCGS# 7198

- 3840 1890-CC MS64 PCGS. VAM-3.** Very Far Date. Doubled 90 In Date. Despite its large mintage of more than 2.3 million pieces, the 1890-CC was only minimally represented in the GSA sales, and it becomes scarce in full Gem condition. This near-Gem example shows a few light scuffs on Liberty's neck and the cheek, yet other abrasions are few and far between. A sharp strike adds to the substantial eye appeal, as does a small presence of golden-gray patina in the centers. NGC ID# 255D, PCGS# 7198

- 3841 1890-CC MS64 PCGS.** This Choice 1890-CC dollar is better-struck in the centers than most, showing mostly brilliant, frosty mint luster and few abrasions. Higher-grade examples are elusive and out of reach for many collectors. NGC ID# 255D, PCGS# 7198

**1890-CC Dollar, MS65**  
**Thick Mint Frost**

- 3842 1890-CC MS65 PCGS.** Just shy of 4,000 1890-CC dollars were distributed by the General Services Administration, limiting the number of high-grade coins available to present-day collectors. Gems are obtainable, but anything finer is rare. The central relief elements are well-defined, and each side remains wholly brilliant with thick, frosty luster. A mark on the cheek is the only notable blemish. PCGS reports 16 better-graded submissions (5/18).  
**From The East End Collection.** NGC ID# 255D, PCGS# 7198

- 3843 1890-CC MS63 Deep Mirror Prooflike PCGS.** Outstanding contrast exists between the deep, untuned silver mirrors and the thickly frosted devices. While a few scattered abrasions may preclude a finer designation, this sharply struck Select coin retains its eye-stopping appeal, and is a superlative representative of this popular Carson City issue.  
 Ex: Baltimore Signature (Heritage, 3/2009), where it brought \$1,265.  
 NGC ID# 45YV, PCGS# 97199

- 3844 1890-S MS66 NGC.** The 1890-S Morgan dollar is still collectible at the MS66 threshold, but finer coins are condition rarities. This delightful Premium Gem exhibits sharply detailed design elements and well-preserved lustrous surfaces, with terrific eye appeal. Census: 58 in 66 (4 in 66+), 1 finer (6/18). NGC ID# 255F, PCGS# 7202

- 3845 1890-S MS66 PCGS.** This Premium Gem 1890-S displays dynamic, flashy brilliance, while silver-white luster radiates splendid cartwheel effects. Well-struck and carefully preserved, the coin is nearly defect-free, save for a few inconsequential luster grazes. Just eight examples of this San Francisco issue have been graded numerically finer by PCGS (6/18), despite a mintage of more than 8.2 million pieces.

Ex: *Dallas Signature* (Heritage, 11/2006), lot 1356, where it brought \$3,220.

**From The East End Collection.** NGC ID# 255F, PCGS# 7202

- 3846 1891 MS65 PCGS.** Many 1891 silver dollars were struck from reclaimed Trade dollar silver. This is an attractive, frosted Gem example with exceptionally smooth, unabraded surfaces and a sharp strike throughout both sides. The coin is entirely white with strong cartwheel luster and terrific eye appeal. PCGS has certified just three numerically finer examples (6/18).

**From The East End Collection.** NGC ID# 255G, PCGS# 7204

- 3847 1891 MS65 PCGS.** The 1891 Morgan dollar was a high-volume issue, with a mintage of nearly 8.7 million pieces. Unfortunately, quality control was relaxed to achieve the large production, and the typical example seen exhibits weak striking details and lackluster surfaces. This well-detailed Gem is a welcome exception, with creamy surfaces that display vibrant mint luster and strong eye appeal. PCGS has graded only three finer coins, a situation that has not changed since this coin last appeared in a Heritage auction (6/18).

Ex: *Summer FUN Signature* (Heritage, 7/2012), lot 4357, where it realized \$5,175. NGC ID# 255G, PCGS# 7204

---

**1891-CC Silver Dollar, MS65**  
**Seldom Seen Finer**

- 3848 1891-CC MS65 PCGS Secure.** The 1891-CC Morgan dollar is one of the more available issues from the Carson City Mint, with a mintage of more than 1.6 million pieces. The issue becomes elusive in grades above the MS65 level, however. This attractive Gem offers well-detailed design elements and well-preserved, lustrous surfaces that show some peripheral highlights of emerald-green toning. PCGS has graded 38 numerically finer examples (5/18). NGC ID# 255H, PCGS# 7206

---

**1891-CC Dollar, MS65**  
**Fresh Eye Appeal**

- 3849 1891-CC MS65 PCGS.** This frosty Gem radiates thick mint luster over untuned surfaces. Eye appeal resembles that of a freshly struck coin. Without a couple of insignificant luster grazes behind the head, this piece would likely achieve an even higher grade. There are curious raised die lines, as struck, in the reverse field through the motto. PCGS has graded 38 pieces finer (5/18).

Ex: *Long Beach Signature* (Heritage, 9/2006), lot 5344.

**From The East End Collection.** NGC ID# 255H, PCGS# 7206

---

**1891-CC Morgan Dollar, MS65**  
**Rarely Seen in Finer Grades**

- 3850 1891-CC MS65 PCGS.** The 1891-CC Morgan dollar was a well-produced issue and examples are always in demand. This impressive Gem displays vivid shades of gold, lavender, and blue-gray toning, with most of the color on the obverse. The design elements are sharply detailed, and the well-preserved surfaces exhibit vibrant mint luster. PCGS has graded 38 finer examples (6/18). NGC ID# 255H, PCGS# 7206

---

**1891-O Dollar, MS65**  
**Satiny, Attractively Toned**

- 3851 1891-O MS65 PCGS.** Deep sea-green, lilac-gray, and golden toning covers this satiny and carefully preserved New Orleans Gem. The 1891-O is readily available in most Uncirculated grades but Gems are highly elusive. The eagle's breast and the hair above the ear show softness, as usual for the issue. None are graded finer at PCGS (6/18).

Ex: *Long Beach Signature* (Heritage, 5-6/2012), lot 4358, where it brought \$4,600. NGC ID# 255J, PCGS# 7208

- 3852 1891-S MS65 PCGS. CAC.** Whispers of maroon, electric-blue, and gold visit the highly lustrous surfaces of this sharply struck Gem. A few minor grazes may prevent an even finer grade. The 1891-S Morgan dollar is scarce in finer grades. NGC ID# 255K, PCGS# 7210

**1891-S Morgan, Clean MS66  
Brilliant and Attractive**

- 3853 1891-S MS66 PCGS. CAC.** Ex: New York City Set. A frosty and lustrous beauty with brilliant silver surfaces and sharp design features on both sides. This coin has limited peers, as indicated by the population data, and finer examples are downright rare. The 1891-S Morgan dollar is a better date in high grade despite a mintage in excess of 5 million coins.

Ex: *Palm Beach Signature* (Heritage, 3/2006), lot 1190, which realized \$5,175.

**From The East End Collection.** NGC ID# 255K, PCGS# 7210

- 3854 1892 MS65 NGC.** No longer under the parameters of the Bland-Allison Act, Mint production of silver dollars declined dramatically in 1892. Barely over 1 million Morgan dollars were struck in Philadelphia for the year, while each of the branch mints exceeded that total by a moderate amount. This Gem P-Mint dollar is as close to the finest grade most can hope to acquire, since finer pieces are prohibitively rare. The surfaces are smooth, brilliant, and sharply struck with a lustrous, creamy texture and tremendous eye appeal. NGC has certified just one numerically finer example (6/18).

**From The East End Collection.** NGC ID# 255L, PCGS# 7212

- 3855 1892-CC MS62 PCGS.** This brilliant Carson City dollar has frosty silver luster with untuned obverse and reverse surfaces. Delicate clash marks are visible in the fields of this pleasing piece.

Ex: *Beverly Hills Signature* (Heritage, 11/2014), lot 4673; where it brought \$1,527.50 NGC ID# 255M, PCGS# 7214

- 3856 1892-CC MS62 NGC.** Frosty, untuned mint luster cartwheels freely around this Mint State 1892-CC silver dollar. The central devices are better-struck than typical, and light abrasions are not overly bothersome. The reverse fields are nearly pristine. NGC ID# 255M, PCGS# 7214

- 3857 1892-CC MS63 NGC.** A pleasing Select example from the famous Carson City Mint, this coin exhibits well-detailed design elements, with some incomplete detail on the eagle's talons and arrows. The lightly marked surfaces are lustrous and appealing. NGC ID# 255M, PCGS# 7214

**1892-CC Silver Dollar, MS64  
Late-Series Carson City Issue**

- 3858 1892-CC MS64 NGC.** A highly lustrous, virtually fully brilliant late-date CC-mint dollar. A few light grazes on the cheek and in the field prevent Gem classification, and mild strike softness occurs on the hair above Liberty's ear. Struck from clashed dies with peripheral die cracks on each side. This issue's availability declines rapidly in finer grades.

Ex: *Dallas Signature* (Heritage, 11/2005), lot 3462, which realized \$2,990.

**From The East End Collection.** NGC ID# 255M, PCGS# 7214

**1892-CC Dollar, Frosty Near-Gem**

- 3859 1892-CC MS64 PCGS.** The central hair strands over the ear and the eagle's left (facing) talon are incomplete, but detail is sharp elsewhere throughout this frosty near-Gem dollar. Wisps of golden color accent the otherwise brilliant surfaces. Clash marks and die cracks are noted on each side, adding a degree of visual interest. A couple of luster grazes and minute ticks are all that stand in the way of a full MS65 assessment. NGC ID# 255M, PCGS# 7214

**1892-CC Dollar, MS64  
Frosty, High-End Example**

- 3860 1892-CC MS64 PCGS Secure. CAC.** This frosty near-Gem is clearly high-end for the grade, and the CAC approval sticker is entirely deserved. Liberty's cheek and the adjacent fields show few abrasions. The only overt bagmark occurs through the eagle's right (facing) wing. Each side is completely brilliant. Highly lustrous with central softness that is more apparent on the reverse. NGC ID# 255M, PCGS# 7214

**1892-CC Dollar, MS64 Prooflike**  
**Brilliant With Traces of Golden Color**

- 3861 1892-CC MS64 Prooflike PCGS.** Both sides are fully prooflike with mirrored fields and lightly frosted devices. Shallow field marks prevent a Gem grade but do not distract. Largely brilliant surfaces show a slight trace of pale gold toning around the borders. Population: 86 in 64 (4 in 64+) Prooflike, 14 finer (5/18).  
*Ex: Charlotte ANA Signature (Heritage, 2007), lot 1237; Long Beach Signature (Heritage, 9/2013), lot 5815; Beverly Hills Signature (Heritage, 11/2014), lot 4679. NGC ID# 255M, PCGS# 7215*

**1892-O Morgan Dollar, MS65**  
**Rare in Higher Grades**

- 3862 1892-O MS65 PCGS Secure.** The 1892-O Morgan dollar is known as a strike-rarity and this attractive Gem exhibits just a touch of the typical softness on the hair above the ear, where some die striations were not completely struck out. The well-preserved, creamy surfaces radiate vibrant mint luster, with outstanding eye appeal. PCGS has graded only seven numerically finer examples (5/18). NGC ID# 255N, PCGS# 7216

**1892-O Dollar, MS65**  
**Remarkably Clean**

- 3863 1892-O MS65 PCGS.** This brilliant 1892-O Morgan dollar boasts exceptionally clean surfaces, including the obverse fields and Liberty's cheek. Strike characteristics are typical for this New Orleans issue with slight softness in the centers on both sides. PCGS reports seven higher grading events (5/18).  
*Ex: Palm Beach Signature (Heritage, 3/2006), lot 1202.*  
**From The East End Collection.** NGC ID# 255N, PCGS# 7216

- 3864 1892-S AU50 PCGS.** The 1892-S Morgan dollar is one of the most challenging issues of the series in high grade. This impressive AU example is lightly worn and lightly abraded, with lustrous surfaces under low-intensity shades of pale gold and lavender-gray toning. NGC ID# 255P, PCGS# 7218

- 3865 1892-S AU53 PCGS.** From a smallish mintage of 1.2 million pieces, the 1892-S Morgan dollar is extremely challenging in high grade. This attractive AU53 specimen offers well-detailed design elements, with just a touch of wear, and lightly abraded surfaces with satiny mint luster throughout. NGC ID# 255P, PCGS# 7218

- 3866 1893 MS63 NGC. CAC. VAM-3.** The repeal of the Sherman Silver Purchase Act contributed to the low-mintage for the 1893 silver dollar. This is a brilliant and lustrous Select example. The fields are exceptionally smooth, and even the portrait displays only minimal marks for the designated grade. NGC ID# 255R, PCGS# 7220

- 3867 1893 MS64 PCGS. VAM-2.** The top of the 3 is repunched. The 1893 is the first in a short series of low-mintage Philadelphia issues, culminating in the proof-only 1895. The present brilliant and lustrous near-Gem is exceptionally smooth despite a narrow vertical tick on the eagle's breast.  
**From The East End Collection.** NGC ID# 255R, PCGS# 7220

- 3868 1893 MS64 PCGS.** The 1893 Morgan dollar is a low-mintage issue that becomes scarce in grades above the MS64 level. This sharply detailed Choice example offers well-preserved, lustrous surfaces that show a few highlights of sea-green and magenta toning around the peripheries. NGC ID# 255R, PCGS# 7220

- 3869 1893 MS64+ PCGS Secure. VAM-2.** The top of the 3 is lightly repunched. A thoroughly lustrous and essentially brilliant near-Gem. The central strike is shy of complete, but marks are surprisingly inconsequential. Among the lowest mintage Philadelphia issues. NGC ID# 255R, PCGS# 7220

**1893 Dollar, MS65**  
**Scarce Low-Mintage Semikey**

- 3870 1893 MS65 NGC.** This entirely brilliant and highly appealing Gem enjoys smooth surfaces and abundant frosty mint luster. Liberty's cheek is particularly clean, and the strike is good with typical softness over Liberty's ear and on the eagle's breast. From a low mintage of 378,000 coins, the semikey 1893 is scarce so well-preserved and rare any finer. Census: 83 in 65 (3 in 65+), 3 finer (5/18).  
*Ex: FUN Signature (Heritage, 1/2005), lot 11611; Dallas Signature (Heritage, 10/2006), lot 1549.*  
**From The East End Collection.** NGC ID# 255R, PCGS# 7220

- 3871 1893-CC XF45 NGC.** A lightly worn Choice XF specimen from the final year of coinage operations at the Carson City Mint, this coin offers pleasing lavender-gray surfaces with scattered minor abrasions on both sides. NGC ID# 255S, PCGS# 7222

**1893-CC Dollar, AU50  
Appealing Antique Patina**

- 3872 1893-CC AU50 PCGS. CAC.** According to Bowers: "The 1893-CC dollar has always been a collectors' favorite, due to its scarcity and its position as the last Carson City Mint coin of its denomination. In terms of availability in Mint State, it is third rarest after 1889-CC (rarest) and 1879-CC." This lightly circulated example has lovely original antique patina and relatively strong design detail. NGC ID# 255S, PCGS# 7222

**1893-CC Dollar, Choice AU  
Series Semikey**

- 3873 1893-CC AU55 PCGS Secure. VAM-2.** Per VAMworld.com: "Late die state [VAM-2] specimens are particularly desirable as these are believed to be among the very last coins struck at the Carson City Mint." The present Choice AU example is a late die state, as it is double clashed and displays numerous wispy cracks. The virtually brilliant and partly lustrous surfaces are lightly abraded overall, though a thin line is noted east of the arrowheads. NGC ID# 255S, PCGS# 7222

- 3874 1893-O AU58 PCGS.** By mintage, the 1893-O is the scarcest New Orleans issue in the Morgan dollar series, and it runs neck-and-neck with the 1895-O for scarcity in circulated grades. This is a lightly toned near-Mint example of the issue, with plentiful silver luster remaining around the more protected areas and only a few tiny, microscopic marks. The strike is sharp and it is fair to say this Borderline Uncirculated piece outshines most lower Mint State pieces. NGC ID# 255T, PCGS# 7224

**1893-S Silver Dollar, Fine 12  
Collector-Grade Key Date**

- 3875 1893-S Fine 12 PCGS. VAM-1.** A collector-grade example of this famous key date. Most of the coin is cream-gray, though areas of deep gunmetal toning accompany portions of the borders. The wings display considerable plumage detail, and the inner hair detail is also prevalent. Relatively unabraded, and a worthy addition to an advanced holding of the series. NGC ID# 255U, PCGS# 7226

- 3876 1894 AU58 PCGS.** Hints of lavender and sea-green toning visit the lightly abraded surfaces of this attractive near-Mint specimen. The sharply detailed design elements show just a trace of high-point wear and both sides retain much of their original mint luster. NGC ID# 255V, PCGS# 7228

**1894 Dollar, MS62  
Soft Mint Luster**

- 3877 1894 MS62 NGC.** The hallmark of the 1894 is its low mintage of only 110,000 pieces. That total is deceptive, however, as the date remains somewhat collectible through lower Uncirculated grade levels. This piece displays soft mint luster over mostly untuned surfaces, though occasional streaks of pale golden color are noted. Sharp, but not quite fully struck at the centers.  
*Ex: Summer FUN Signature (Heritage, 1/2012), lot 4420, where it brought \$3,737.50* NGC ID# 255V, PCGS# 7228

- 3878 1894-O MS61 PCGS.** The 1894-O is a better date in all grades but particularly in Mint State. This Uncirculated coin is well-struck and brilliant. Moderate abrasions on the obverse limit the grade, but vibrant cartwheel effect prevails. NGC ID# 255W, PCGS# 7230

- 3879 1894-O MS62 PCGS.** Close study of Liberty's cheek reveals faint marks and lines that limit the grade, but this 1894-O Morgan dollar is otherwise remarkably well-preserved for the MS62 level. Softly frosted luster is untuned and original. The usual strike softness is visible on the eagle's breast and the hair above Liberty's ear. NGC ID# 255W, PCGS# 7230

- 3880 1894-O MS62 PCGS.** Gunmetal-gray, olive, and lilac toning covers much of this MS62 coin, with gold undertones. Abrasions are at a minimum for the grade, although moderate central strike weakness occurs on each side. The 1894-O is a better date in Uncirculated condition. NGC ID# 255W, PCGS# 7230

**3881 1894-S MS63 PCGS.** Frosty, brilliant surfaces show a few minor marks, but the fields are remarkably unabraded for an 1894-S. This Select Uncirculated example is sharply struck and essentially untuned, with just a few wisps of almond-gold in the centers and plentiful eye appeal. Only 1,260,000 pieces were struck in a year when Morgan dollars were low-mintage issues at all three mints. NGC ID# 255X, PCGS# 7232

**3882 1894-S MS64 PCGS. CAC.** Frosty and brilliant, this handsome example shows just a touch of softness above Liberty's ear, but it is sharp in virtually all other areas. A few light marks attest to the near-Gem grade. The 1894-S ranks as a scarce issue in high Uncirculated grades despite a fairly generous mintage of 1.26 million pieces. Presumably, a large portion of the mintage was destroyed pursuant to the provisions of the Pittman Act of 1918, which resulted in more than 270 million dollars melted into bullion. Ex: *FUN Signature* (Heritage, 1/2006), lot 6864; *Palm Beach Signature* (Heritage, 3/2006), lot 1224. **From The East End Collection.** NGC ID# 255X, PCGS# 7232

**3883 1895-O AU55 PCGS Secure.** The lightly toned, silver-gray surfaces are moderately abraded, yet this 1895-O is substantially finer than most. Bright silver luster remains at the margins and extends inward toward the central devices. The strike is sharp for the issue, and only a bit of wear over the high points accounts for the Choice About Uncirculated grade. Just 450,000 pieces were struck, and the issue is always in demand by date collectors as well as series specialists. NGC ID# 255Y, PCGS# 7236

**3884 1895-O AU55 PCGS.** Only 450,000 Morgan silver dollars were struck at the New Orleans Mint in 1895, making the issue quite elusive in high grade. This Choice AU specimen exhibits just a trace of wear on the strongly impressed design elements. The surfaces are lightly abraded and the luster is only slightly dimmed. NGC ID# 255Y, PCGS# 7236

**3885 1895-O AU55 PCGS.** An untuned example of this better New Orleans issue, showing bright, satiny surfaces that still have luster in the fields. Abrasions are at a minimum aside from light high-point wear on the devices. The strike is slightly above average for the issue. NGC ID# 255Y, PCGS# 7236

#### 1895-O Morgan Dollar, AU58 Popular Branch Mint Semikey

**3886 1895-O AU58 PCGS Secure.** The 1895-O Morgan dollar was produced in small numbers (450,000 pieces) and many examples were released into circulation at the time of issue. As a result, the 1895-O is difficult to locate in high grade today, and in Mint State is beyond the reach of many collectors. This attractive AU58 coin shows a trace of friction over the well-detailed design elements, and the lightly abraded surfaces retain much original mint luster. NGC ID# 255Y, PCGS# 7236

**3887 1895-O AU55 Prooflike NGC.** The branch mint issues of 1895 are popular with date collectors who seek a single example from each production year. As the Philadelphia Mint only coined proof dollars in 1895, all but a few collectors must seek out an example from either New Orleans or San Francisco. In all circulated grades, the New Orleans Mint coins carry lower values, while in Mint State grades they are worth more. This is an unusual example with brilliant silvery-gray surfaces and NGC-designated prooflike fields, although they are somewhat marred by light abrasions. Except where lightly worn, the design elements are all boldly defined. Census: 25 in 55 Prooflike, 40 finer (5/18). **From The East End Collection.** NGC ID# 255Y, PCGS# 7237

#### 1895-S Dollar, AU58 Bright Semikey, CAC Approval

**3888 1895-S AU58 PCGS. CAC.** A mintage of 400,000 coins ensures this issue's semikey status, but the lack of a circulation-strike Philadelphia issue heightens demand for the 1895-S across all levels. This bright, borderline-Uncirculated Morgan dollar retains considerable mint frost over minimally toned, lightly abraded surfaces. Well-struck motifs show trivial friction. NGC ID# 255Z, PCGS# 7238

#### 1896 Dollar, CAC-Approved MS67 Nearly Uncollectible Finer

**3889 1896 MS67 PCGS. CAC.** Ex: New York City Set. In 1896, Morgan dollar production at all mints returned to pre-1893 levels. The 1899 Philadelphia issue excepted, every date from 1896 through 1921 boasted a mintage of more than 1 million coins. The 1896 (nearly 10 million pieces struck) is among the more plentiful issues from this period, ideal for type purposes. Circulated examples abound, and even Gems are obtainable for a modest sum. In MS67, however, the 1896 develops conditional scarcity and is rare finer. This untuned example is free of both bothersome strike softness and distracting abrasions. The surfaces are richly frosted from rim to rim. Ex: *Palm Beach Signature* (Heritage, 3/2006), lot 1233, which realized \$6,325.

**From The East End Collection.** NGC ID# 2562, PCGS# 7240

**1896 Dollar, MS67**  
**Frosty, Virtually Brilliant**

- 3890 1896 MS67 PCGS. CAC.** Examples of the 1896 Philadelphia Mint Morgan dollar are obtainable through the MS66 grade level. Comparable Superb Gems are scarce. This eye-appealing representative features virtually all-brilliant surfaces. Frosty luster abounds, and the strike is boldly impressed. There are only two finer coins at PCGS (6/18).  
*Ex: New York Signature (Heritage, 10/2014), lot 3900, where it realized \$3,818.75 NGC ID# 2562, PCGS# 7240*

**1896-S Morgan Dollar, MS62**  
**Better Date in High Grade**

- 3891 1896-S MS62 PCGS.** In high grade, the 1896-S Morgan dollar is not nearly as available as its mintage of 5 million pieces would suggest. This impressive MS62 specimen exhibits sharply detailed design elements and vibrant mint luster throughout. The brilliant surfaces show the expected number of minor contact marks for the grade and a network of spidery die cracks travel through the reverse legends. NGC ID# 2564, PCGS# 7244

**1896-S Dollar, MS63**  
**Brightly Lustrous**

- 3892 1896-S MS63 NGC.** The bright, lustrous finish on this piece is characteristic of 1896-S dollars. Each side is frosted and brilliant with a few light rose-gray accents. The strike is strong, but not entirely complete in the centers. Each side displays peppered abrasions, as expected at this grade level, however there are no singularly mentionable marks.  
*Ex: FUN Signature (Heritage, 1/2013), lot 6292, which brought \$3,422.78. NGC ID# 2564, PCGS# 7244*

**1897-O Dollar, Untoned MS63**  
**Conditionally Scarce Southern Issue**

- 3893 1897-O MS63 NGC.** This conditionally scarce New Orleans Morgan dollar is plentiful in circulated and lower Mint State grades but becomes challenging in Select Uncirculated condition. The average certified grade is AU55, but that reflects only higher-value coins being sent in for certification. This Select Mint State example is brilliant with shimmering mint luster and minimally scattered marks.  
*Ex: Summer FUN Signature (Heritage, 7/2012), lot 4441, which realized \$3,680.00. NGC ID# 2565, PCGS# 7248*

- 3894 1897-O AU58 Deep Mirror Prooflike NGC.** The sharply detailed design elements of this remarkable near-Mint specimen show some almost undetectable wear on close inspection, and the deeply reflective prooflike fields show the usual number of minor hairlines and abrasions for the grade. Census: 6 in 58 Deep Mirror Prooflike, 10 finer (6/18). NGC ID# 562N, PCGS# 97249

**1897-S Dollar, MS67**  
**An Important Condition Rarity**

- 3895 1897-S MS67 PCGS.** Beginning with distributions from the San Francisco Mint in the 1920s, the 1897-S has been treated as a common date in the Morgan dollar series. This is an assessment that still holds true today, but only for coins in circulated and lower Mint State grades. Survivors that grade as high as MS67 number only 39 pieces at the major grading services, and there are just two examples finer (6/18). Both sides are nearly untoned with reflective glimmers in the fields. The design features are sharply struck, and they are free of readily evident abrasions with luster that provides a semiprooflike sheen as the coin turns under the light.  
*Ex: Palm Beach Signature (Heritage, 3/2006), lot 1241; Dallas Signature (Heritage, 11/2006), lot 1462, which realized \$5,462.50. From The East End Collection. NGC ID# 2567, PCGS# 7250*

- 3896 1897-S MS66 Prooflike PCGS.** While 1897-S dollars often display partial or fully prooflike fields, it is a challenging format to locate in Premium Gem condition. This is a brilliant example that displays nearly unabraded, flashy mirrors and lightly frosted devices, with a smooth cheek on Liberty. Viewed at a slight backward tilt, the coin reveals considerable white-on-black cameo effect. As with most '97-S dollars, the strike is sharp and the eye appeal is far above average, since these were especially well-produced coins. The surfaces are extraordinarily attractive and clear of distractions (seemingly high-end for the MS66 grade). Population: 49 in 66 (5 in 66+) Prooflike, 4 finer (6/18).  
*Ex: Dallas Signature (Heritage, 11/2005), lot 3585, where it realized \$2,530. From The East End Collection. NGC ID# 267S, PCGS# 7251*

**1898 Dollar, Untoned MS67  
Among the Finest Certified**

- 3897 1898 MS67 PCGS.** This Superb Gem is one of the finest examples known of this plentiful date. While the 1898 is available in nearly any desired grade, that was not always the case. It was scarce until much of the original mintage was released in the early 1960s. Both sides are well-detailed and display frosty luster. Near-perfect surfaces are entirely brilliant and exceptionally eye-appealing.  
*Ex: Palm Beach Signature (Heritage, 3/2005), lot 6320; Dallas Signature (Heritage, 4/2007), lot 92; FUN Signature (Heritage, 1/2011), lot 6139; New York Signature (Heritage, 11/2013), lot 3750; New York Signature (Heritage, 2/2014), lot 5271. NGC ID# 2568, PCGS# 7252*

**1898 Silver Dollar, MS67  
Rare Top-Grade CAC Coin**

- 3898 1898 MS67 PCGS. CAC.** The 1898 Morgan dollar is elusive in MS67, with only a few Prooflike and Deep Mirror Prooflike pieces known so fine. No MS68 coins are reported. This top-grade CAC example displays a sharp strike and brilliant, frosty surfaces. Only a few unobtrusive grazes are visible beneath a loupe, leaving the coin with outstanding eye appeal. CAC: 15 in 67, 0 finer (6/18).  
*From The East End Collection.* NGC ID# 2568, PCGS# 7252
- 3899 1898-O MS67 PCGS.** A highly lustrous example, unusually well-struck example of this issue. The 1898-O can be found in MS67 condition with patience, but finer coins are virtually unobtainable. PCGS has graded no coins in higher numeric grades (6/18).  
*Ex: Dallas Signature (Heritage, 10/2006), lot 1644, where it brought \$1,495.*  
*From The East End Collection.* NGC ID# 2569, PCGS# 7254
- 3900 1898-O MS67 NGC.** Like many issues from the late 1890s, the 1898-O is only moderately scarce in MS67, yet virtually uncollectible any finer. This Superb Gem example fills all of the requirements for such a lofty grade, with lustrous, visually impressive silver-white surfaces and a needle-sharp strike. Abrasions amount to no more than a couple of fleeting luster grazes. NGC reports just one numerically finer example, while PCGS has not granted a finer grade (6/18).  
*From The East End Collection.* NGC ID# 2569, PCGS# 7254

- 3901 1898-O MS67 NGC.** *Ex: Lincoln Highway Hoard.* Found in a quaint house in Pennsylvania Amish country near the famed Lincoln Highway, the hoard of more than 8,000 Morgan silver dollars was reportedly secured directly from the release of the U.S. Treasury hoard in the early 1960s. This Superb Gem 1898-O is a brilliant and frosted example, sharply struck with only a few tiny ticks across the smooth, lustrous surfaces. NGC has certified just one numerically finer 1898-O (6/18). NGC ID# 2569, PCGS# 7254

- 3902 1898-O MS67 PCGS. CAC.** Wisps of pale-gold toning grace the amazing surfaces of this Superb Gem. Both sides exhibit bold design definition with only slight weakness over Liberty's hair and minimal abrasions. This beauty is tied for the finest that PCGS has certified, while NGC reports just a single finer example. CAC (both services combined): 86 in 67, 0 finer (6/18). NGC ID# 2569, PCGS# 7254

**1898-S Morgan Dollar, MS66  
Only Four Coins Graded Higher**

- 3903 1898-S MS66 PCGS.** S-mint personnel accomplished a production of 4.1 million Morgan dollars in 1898. Survivors are typically found in MS63 and MS64, while comparable Premium Gems are scarce. Anything finer is basically uncollectible, with three higher-graded coins at PCGS and one at NGC (5/18). Vibrant mint frost over brilliant surfaces gives this piece terrific mint-fresh appeal. The strike is strong, and there are predictably few marks.  
*From The East End Collection.* NGC ID# 256A, PCGS# 7256

- 3904 1899 MS66 PCGS.** *Ex: PCGS Tour.* Per Bowers: "The PCGS tour of silver dollars took place in 1990 and 1991 and featured some of the finest certified coins, borrowed from various collections." The strong suit for the 1899 Philly dollar has always been its low mintage of 330,000 pieces. While available in typical Mint State grades, the 1899 is a challenging issue in MS66 condition. This well-struck high-grade representative displays only a hint of golden toning, and is exceptionally free from abrasions. Housed in a green label holder.  
*Ex: Palm Beach Signature (Heritage, 3/2006), lot 1252, which realized \$3,450.*  
*From The East End Collection.* NGC ID# 256C, PCGS# 7258

- 3905 1899-O MS67 PCGS.** The frost-white fields and devices approach perfection throughout this impeccably preserved Superb Gem 1899-O. We note a few tiny abrasions above and below IN GOD WE TRUST, yet they are of minor consideration of the gleaming surface quality that prevails in all other areas. The strike is exceptionally sharp for a New Orleans dollar struck in huge quantity (more than 12.2 million pieces). PCGS reports just one coin numerically finer, while NGC has not had an example achieve a finer grade (6/18).  
*From The East End Collection.* NGC ID# 256C, PCGS# 7260

- 3906 1899-O MS67 NGC. CAC.** The 1899-O Morgan dollar is an available issue through the MS66 grade level, but MS67 examples are scarce, and finer coins are virtually unobtainable. This sharply detailed Superb Gem exhibits impeccably preserved brilliant surfaces, with vibrant mint luster and terrific eye appeal. No numerically finer coins have been graded at NGC (6/18).  
*From The East End Collection.* NGC ID# 256C, PCGS# 7260

**3907 1899-S MS65 PCGS.** An impressive Gem, this 1899-S Morgan silver dollar is fully brilliant and untuned with excellent eye appeal. This piece exhibits well-detailed design motifs. NGC ID# 256D, PCGS# 7262

**3908 1899-S MS65 PCGS.** The 1899-S Morgan dollar claims a mintage of 2.5 million pieces and the issue becomes scarce in grades above the MS65 level. This attractive Gem offers well-detailed design elements and well-preserved surfaces, with vibrant mint luster on both sides.

**From The East End Collection.** NGC ID# 256D, PCGS# 7262

---

**1899-S Morgan Dollar, Brilliant MS66  
Rarely Offered Finer**

**3909 1899-S MS66 PCGS.** The 1899-S is a better date in Uncirculated grades, although many Mint State pieces are well-preserved and worthy of a Gem grade. Nonetheless, Premium Gems are in short supply, and finer examples of this date are genuinely rare. This piece is brilliant and largely unabraded, showing satiny cartwheel luster. The usual strike softness is visible on the eagle's breast and the hair above Liberty's ear. PCGS lists 11 finer non-Prooflike coins and two finer Prooflike pieces (6/18).

*Ex: Denver Signature (Heritage, 8/2006), lot 2728, which realized \$3,737.50.*

**From The East End Collection.** NGC ID# 256D, PCGS# 7262

---

**1900 Dollar, MS67  
Among the Finest Graded**

**3910 1900 MS67 NGC.** Thousands of Mint State 1900 Morgan dollars were distributed from Treasury holdings during the early 1960s, so the issue is plentiful in most grades. This represents the pinnacle of collectibility for the date. Neither NGC nor PCGS have graded a coin in MS68. Radiant mint brilliance and strong central detail are readily appealing traits. Design detail is slightly soft on the lower obverse. Most importantly, there are no marks worthy of mention. Census: 49 in 67 (2 in 67+), 0 finer (5/18).

**From The East End Collection.** NGC ID# 256F, PCGS# 7264

---

**1900 Silver Dollar, Top-Graded MS67**

**3911 1900 MS67 PCGS.** The 1900 Morgan dollar is plentiful in Gem condition and remains accessible through MS66. Demand vastly outpaces supply at the Superb Gem level, where none are graded higher. Soft mint frost shimmers across mostly brilliant, unmarked surfaces. A hint of color appears on the cheek and in the adjacent field. Well-struck. Population: 66 in 67 (5 in 67+), 0 finer (5/18).

**From The East End Collection.** NGC ID# 256F, PCGS# 7264

---

**1900-O Dollar, MS67  
Untuned With Vibrant Satin Luster**

**3912 1900-O MS67 NGC.** Brimming with vibrant satin mint luster and well-struck, this brilliant Superb Gem shows a couple of trivial ticks under a loupe in the left obverse field before Liberty's face. Because the 1900-O is plentiful in lower Mint State grades, it fails to command the respect it merits at the MS67 level. But, in fact, neither service has graded an example finer. Census: 78 in 67 (3 in 67+, 2 in 67 ★), 0 finer (5/18).

*Ex: Long Beach Signature (Heritage, 6/2006), lot 2699.*

**From The East End Collection.** NGC ID# 256F, PCGS# 7266

---

**1900-O Morgan Dollar, MS67  
Conditionally Scarce**

**3913 1900-O MS67 PCGS.** *Ex: Bermuda.* Although a number of 1900-O dollars were distributed at the time of issue, many bags of this date remained in Treasury vaults as late as the 1960s. The issue is relatively plentiful overall, but Superb Gem examples are scarce. This MS67 coin is among the finest pieces reported at PCGS. Bright, untuned luster complements exceptional preservation, with only a few tiny ticks noted on Liberty's cheek. The central high points are well brought up. Population: 87 in 67 (5 in 67+), 0 finer (6/18).

*Ex: Palm Beach Signature (Heritage, 3/2006), lot 1265, which realized \$5,175.*

**From The East End Collection.** NGC ID# 256F, PCGS# 7266

**1900-O Dollar, MS67**  
**Fantastic Registry Opportunity**

- 3914 1900-O MS67 NGC.** Although the 1900-O ranks among the most plentiful dates in the Morgan dollar series, Superb Gems must be considered major rarities. In fact, NGC and PCGS have never graded one finer. Both sides show pristine, virtually mark-free surfaces and sharp design features. Satiny fields and slightly frosted devices create a semiprooflike effect. Census: 78 in 67 (3 in 67+, 2 in 67 ★), 0 finer (6/18).  
*Ex: Long Beach Signature (Heritage, 2/2008), lot 1477; Central States Signature (Heritage, 4/2013), lot 4990, which realized \$2,585.00. NGC ID# 256F, PCGS# 7266*

**1900-O/CC Silver Dollar, MS66**  
**VAM-8B, Late Die State, Top 100**

- 3915 1900-O/CC VAM-8B MS66 PCGS.** A Top 100 Variety. The CC mintmark is plainly visible behind the primary O, with rust lumps around. VAM-8B shows heavy clash marks on the obverse around the portrait. This Premium Gem is well-struck, brilliant, and free of bothersome abrasions. Liberty's cheek is especially clean. Eye appeal is pleasing. Across all varieties, the 1900-O/CC Morgan is scarce in MS66 and rare finer.  
***From The East End Collection.*** NGC ID# 256G, PCGS# 133961 Base PCGS# 7268
- 3916 1901 AU58 PCGS.** A true "slider," this Borderline Uncirculated 1901 Morgan dollar exhibits nearly full mint luster over brilliant surfaces. There is no obvious wear, other than trivial slide marks on the devices. Among the finest circulated examples known. NGC ID# 256J, PCGS# 7272

**1901 Morgan Dollar, Untoned MS61**  
**Flashy Luster, Good Eye Appeal**

- 3917 1901 MS61 PCGS.** This brightly untoned example displays flashy cartwheel luster on both sides. The design elements are well-struck but show the usual flat breast feathers of the C4 reverse. The obverse is moderately abraded, while the reverse shows a small number of wispy marks. A brilliant representative of this noted conditional rarity that has good eye appeal for the grade.  
*Ex: ANA Signature (Heritage, 4/2006), lot 1182.*  
***From The East End Collection.*** NGC ID# 256J, PCGS# 7272
- 3918 1901 Doubled Die Reverse, VAM-3, AU53 PCGS Secure.** VAMworld.com states "this amazing VAM has an incredibly doubled reverse. The eagle's tail feathers are strongly doubled. The variety has crossed over into the mainstream Morgan sets as a 'must have' and is listed in the *Guide Book*." Remaining cartwheel luster accompanies lightly toned and minimally worn surfaces. Only a mark on the cheekbone merits mention. NGC ID# 256J, PCGS# 133965 Base PCGS# 7302
- 3919 1901 Doubled Ear, VAM-5, AU58 PCGS Secure.** A Hot 50 Variety. Occasional glimpses of lemon-gold toning deny full brilliance. This momentarily circulated example displays a few minor marks in the left obverse, but the eye appeal is undeniable. The 1901 has a high mintage but is conditionally rare. VAM-5 is pursued by specialists due to die doubling on Liberty's ear and eye. NGC ID# 779K, PCGS# 134027 Base PCGS# 7272
- 3920 1901-S MS65 PCGS.** This sharply struck 1901-S is brilliant with lustrous, minimally abraded surfaces and outstanding eye appeal. The mintage of nearly 2.3 million pieces is far lower than those of surrounding years (regardless of mint), and the 1901-S was never put aside in large Uncirculated quantities. It approaches semikey status, although even today it is less highly regarded than some similarly scarce issues. PCGS reports just 42 numerically finer examples, while NGC has seen just five finer pieces (6/18).  
***From The East End Collection.*** NGC ID# 256L, PCGS# 7276
- 3921 1901-S MS65 PCGS.** Dappled golden-gray obverse toning allows cartwheel silver luster to shine through the thin patina, while the reverse is nearly brilliant. Parallel planchet striations are visible in the lightly struck area of Liberty's ear and the hair strands above the ear. Struck with the reverse rotated 15° clockwise. This Gem example shows only a few minor marks and no significant field abrasions. PCGS reports just 42 numerically finer certifications (6/18). NGC ID# 256L, PCGS# 7276

**1902 Dollar, Smooth MS67**  
**Among the Finest at Both Services**

**3922 1902 MS67 NGC.** The 1902 is seldom found in MS66 or finer condition. Superb Gem examples are rare. This is an absolutely splendid example. It features a smooth, unblemished cheek on the obverse and no obvious or mentionable abrasions on the reverse. Brilliant throughout with the usual satin mint luster for which this P-mint issue is well-known. Census: 19 in 67 (1 in 67+, 1 in 67 ★), 0 finer (5/18).

*Ex: Dallas Signature (Heritage, 11/2005), lot 3635.*

**From The East End Collection.** NGC ID# 256M, PCGS# 7278

**1902 Silver Dollar, MS67**  
**Tied for Finest at Both Services**

**3923 1902 MS67 PCGS.** This brightly lustrous Superb Gem 1902 Morgan dollar is conditionally rare and among the finest certified at both services. The hair above Liberty's ear and the eagle's breast feathers are slightly soft, as usual, but the overall eye appeal is outstanding. Faint traces of light tan color emerge from the outer peripheries. Population: 32 in 67 (2 in 67+), 0 finer (5/18). NGC ID# 256M, PCGS# 7278

**3924 1903 MS66 Prooflike NGC.** The 1903 issue is rare with mirrored fields with any degree of reflectivity unusual for the issue. Most 1903 Morgan dollars tend to be satiny, and few examples are available that have designated Prooflike fields. This Premium Gem displays the excellent surfaces demanded by its high grade. Marks are limited to a few light, grade-consistent abrasions. As such, it is rare with none finer in Prooflike or Deep Mirror Prooflike at either service. NGC Census: 5 in 66 Prooflike, 0 finer (5/18).

*Ex: November Signature (Heritage, 11/2005), lot 3649, where it brought \$1,955.*

**From The East End Collection.** NGC ID# 256R, PCGS# 7285

**1903-O Morgan Dollar, MS67**  
**None Graded Higher**

**3925 1903-O MS67 NGC.** Most of the 4.4 million 1903-O Morgan dollars struck sat in vaults until they were eventually melted under the terms of the Pittman Act of 1918. The issue was long-considered a major rarity before quantities began being released during the early 1960s. Today, the 1903-O is largely available through MS66 condition, but it becomes conditionally scarce at this high level. The fields and cheek on this brilliant, satiny Superb Gem are essentially unmarked, and the strike is strong as can be for a New Orleans dollar. Census: 51 in 67 (3 in 67+), 0 finer (5/18).

**From The East End Collection.** NGC ID# 256S, PCGS# 7286

**1903-O Dollar, MS67**  
**Former Rarity**

**3926 1903-O MS67 NGC.** The 1903-O Morgan dollar only became collectible after millions of coins stored at the Treasury were finally released into the hands of collectors 60 years after their production. This Superb Gem is brilliant and untuned with frosty luster and exceptional eye appeal. Census: 51 in 67 (3 in 67+), 0 finer (5/18).

*Ex: Summer FUN Signature (Heritage, 7/2012), lot 4450, where it realized \$3,220.* NGC ID# 256S, PCGS# 7286

**3927 1903-S AU55 PCGS.** Hints of original luster remain in the fields of this slate-gray 1903-S dollar. Light high-point wear defines the grade, but no major abrasions are seen. Eye appeal is pleasing. An excellent collector-grade example of a better San Francisco issue. NGC ID# 256T, PCGS# 7288

1903-S Dollar, AU58  
Semikey in High Grades

- 3928 1903-S AU58 PCGS.** Well-preserved examples of the 1903-S can be difficult to come by. The issue is a challenging semikey in all but the lowest grade levels. This piece approaches Mint State, showing the slightest trace of rub over the high points and subdued luster in the exposed fields. Detail remains sharp, and the surfaces are mostly bright silver with blue, gold, and crimson rim toning. NGC ID# 256T, PCGS# 7288

- 3929 1904 MS65 PCGS.** The 1904 Morgan dollar is a better date in high grade and the issue becomes elusive in grades above the MS65 level. This attractive Gem offers well-detailed design elements and well-preserved lustrous surfaces on both sides. PCGS has graded 37 numerically finer examples (5/18).

*From The East End Collection.* NGC ID# 256U, PCGS# 7290

- 3930 1904-O MS67 NGC.** The final New Orleans silver dollar issue is plentiful in bagmarked Mint State, but Superb Gems are rare. This lustrous and virtually brilliant high-grade example has a slightly incomplete central strike, but noticeable marks are absent. Housed in a circa-2000 holder.

*Ex: Atlanta ANA Signature (Heritage, 4/2006), lot 1188, which realized \$3,737.50.*

*From The East End Collection.* NGC ID# 256V, PCGS# 7292

- 3931 1904-S AU58 PCGS.** Only the slightest trace of wear shows on the high points of this attractive near-Mint Morgan dollar. The surfaces are lightly abraded with much original mint luster remaining intact. The 1904-S is a better date from late in the Morgan dollar series. NGC ID# 256W, PCGS# 7294

- 3932 1921-S MS66 NGC.** At the three Mints then in operation, close to 100 million Morgan dollars were coined. San Francisco contributed 21,695,000 pieces to that total, and nearly all were lightly struck with poor central design definition. Although weakly detailed in the center, as almost always seen, this example is actually sharper struck than most. The surfaces are fully brilliant with frosty silver luster, and are virtually mark-free. Census: 69 in 66 (3 in 66+, 4 in 66 ★), 1 finer (6/18).

*Ex: Dallas Signature (Heritage, 11/2005), lot 3678, realized 3,737.50.*

*From The East End Collection.* NGC ID# 256Z, PCGS# 7300

PROOF MORGAN DOLLARS

1885 Morgan Dollar, PR63+  
Nicely Patinated

- 3933 1885 PR63+ PCGS Secure.** Researchers have identified two different obverse dies used to strike 930 1885 proof Morgan dollars. This one shows repunching on 85, plainest below the loop of the 5. An area of central brilliance remains on the reverse, but the rest of this high-end Select dollar is richly patinated in crimson, gold, and lavender tones. Few marks for the grade. NGC ID# 27ZE, PCGS# 7320

1886 Dollar, PR64  
Lovely Toning, CAC Approval

- 3934 1886 PR64 NGC. CAC.** Most 19th century collectors preferred proofs, so proof mintage figures provide a window into the ebb and flow of numismatic activity from the 1860s to the end of the century. The mintage in 1886 was 886 proofs, ranking 18th of 27 issues from 1878 to 1904. A hint of contrast is hidden beneath the lovely rose and blue toning over both sides of this Choice proof representative. Housed in a prior generation holder. CAC: 5 in 64, 10 finer (6/18). NGC ID# 27ZF, PCGS# 7321

1887 Dollar, Toned PR63

- 3935 1887 PR63 PCGS Secure.** Odds are good this proof Morgan dollar was struck in either March or December 1887. Of the 710 proofs minted for the year, 380 were produced in March and another 200 were minted in December. Olive-gold and blue patina over reflective fields characterizes both sides of this Select proof. A razor-sharp strike, as here, is often expected of a proof Morgan dollar but not always found. NGC ID# 27ZG, PCGS# 7322

**1888 Morgan Dollar, PR63**  
**Reflective Fields Beneath Light Patina**

- 3936 1888 PR63 PCGS Secure.** The mintage of 833 proof Morgan dollars for the year 1888 includes a single coin produced for inclusion in the Mint Cabinet. Faint traces of lavender and golden patina fail to limit the field reflectivity, an integral part of what makes this Select proof so appealing. Wispy marks define the grade. NGC ID# 27ZH, PCGS# 7323

**1890 Dollar, PR63 Cameo**  
**Excellent Eye Appeal**

- 3937 1890 PR63 Cameo PCGS Secure.** Dave Bowers writes in his *Silver Dollar Encyclopedia* that 1890 proof Morgan dollars "are often nicer than those of the years immediately preceding and following. Most Proofs have very attractive cameo contrast." This is such a coin, showing thin daubs of toning over reflective fields and frosted devices. NGC ID# 27ZK, PCGS# 87325

- 3938 1893 PR62 PCGS Secure.** An impressive PR62 Morgan dollar, from a mintage of 792 pieces, this coin exhibits well-detailed design elements that show a touch of the usual softness on the hair above the ear and deeply reflective fields. Subtle hints of pale gold toning enhance the lightly marked surfaces. NGC ID# 27ZN, PCGS# 7328

**1894 Dollar, PR62 Cameo**  
**A Challenging Date in High Grades**

- 3939 1894 PR62 Cameo PCGS Secure.** With the second lowest circulation-strike mintage in the series, the 1894 is one of the most challenging Philadelphia issues to acquire in high grades. Proofs are more affordable alternatives for those seeking sharp, unworn examples. This representative shows scattered wispy lines, but the attractive Cameo contrast overcomes that minor concern. Frosty devices stand out appealingly against the mirrored fields, delivering lovely visual quality. NGC ID# 2577, PCGS# 87329

- 3940 1896 PR63 PCGS Secure.** The lightly marked surfaces of this attractive Select proof Morgan dollar are blanketed in shades of violet, cerulean-blue, sea-green, and pale gold toning. The design elements are sharply detailed and the deeply mirrored fields shine through the toning. NGC ID# 27ZT, PCGS# 7331

**1899 Dollar, PR64**  
**Original Toning**

- 3941 1899 PR64 PCGS Secure.** This near-Gem proof dollar is perfect for those concerned with originality. Both sides display rich shades of rose-violet, powder-blue, and mint green. The fields are flashy under the rich patina, and few marks are present. This is one of 846 proofs struck in 1899. NGC ID# 27ZX, PCGS# 7334

- 3942 1904 PR63 PCGS Secure.** Only 650 proof Morgan dollars were struck in 1904. This attractive Select specimen exhibits well-detailed design elements and lightly marked reflective fields, under shades of greenish-gold and cerulean-blue toning. NGC ID# 2824, PCGS# 7339

**1904 Morgan Dollar, PR64**  
**Dappled Multicolor Patina**

- 3943 1904 PR64 NGC.** Iridescent blue, green, and lavender toning adorns this sharply struck and flashy near-Gem. Rotation beneath a light reveals only a few stray field lines below the chin. A total of 650 pieces were struck for the final year of regular Morgan dollar proof production. NGC ID# 2824, PCGS# 7339

**PEACE DOLLARS**

- 3944 1927 MS65 PCGS. VAM-3.** The TR in TRVST and the designer's monogram are lightly die doubled. Medium golden-gray toning drapes lustrous and exceptionally unabraded surfaces. Strike detail is good on Liberty's portrait and the eagle. The legends on each side are less distinct. NGC ID# 257S, PCGS# 7370

- 3945 1934-S MS61 NGC.** A key date in any Uncirculated condition, the 1934-S saw most of its 1 million-piece mintage released into circulation. This attractive, softly lustrous silver-gray example has light bagmarks and a solitary reeding mark tucked away in Liberty's forecurls. The strike is sharp on the peripheries and only slightly less-so in the centers. The eye appeal exceeds its numeric grade. NGC ID# 257Z, PCGS# 7377

- 3946 1935-S MS65 PCGS Secure. CAC.** Four rays below ONE. Traces of golden toning accent frosty, luminous surfaces on this CAC-approved Gem. The strike is well-executed, and only a few trivial grazes are seen beneath a loupe. The 1935-S Peace dollar is available in this grade but elusive finer, particularly with CAC approval. NGC ID# 2583, PCGS# 7379

**1935-S Peace Dollar, MS66  
Few Finer Pieces Known**

- 3947 1935-S MS66 PCGS Secure.** A hint of delicate golden toning warms the frosty, unabraded surfaces of this luminous Premium Gem. Well-struck design elements add to the eye appeal, making this coin easily earn a CAC endorsement. The 1935-S Peace dollar is elusive in MS66, and PCGS has seen only three Superb Gems finer, all graded MS67 (6/18). NGC ID# 2583, PCGS# 7379

**GOLD DOLLARS**

- 3948 1849 No L, D-1, Normal Stars, MS64 PCGS.** The stars near 3 and 6 o'clock are widely repunched, diagnostic of the ephemeral No L variety. An exquisite Choice example that features an intricate strike, vibrant luster, and unblemished canary-gold surfaces. Population: 76 in 64 (6 in 64+), 46 finer (6/18). NGC ID# 25B7, PCGS# 521670 Base PCGS# 7501

**1849-D Gold Dollar, AU55  
Clean Surfaces**

- 3949 1849-D AU55 PCGS Secure. Variety 1-B.** The 1849-D is requisite for a Dahlonega type set, since the Open Wreath design was coined only that year. A minimal mintage of 21,588 pieces ensures its scarcity. This canary-gold Choice AU representative shows slight wear on the high points of Liberty's curls, but luster illuminates the recessed regions, and both sides are impressively free from contact. A later die state with reverse clashes and cracks. NGC ID# 25BD, PCGS# 7507
- 3950 1849-O Open Wreath MS62 PCGS. Variety 2.** This honey-gold New Orleans representative has fewer marks than expected for the MS62 level. The luster is particularly vibrant around the peripheries. The strike is good despite slight merging of detail on the hair near Liberty's ear.  
*Ex: Philadelphia Signature (Heritage, 8/2012), lot 4375; Houston Signature (Heritage, 12/2012), lot 4694, which realized \$1,645. NGC ID# 25BE, PCGS# 7508*

**1851-C Gold Dollar, MS62  
Charlotte Mint Type Coin**

- 3951 1851-C MS62 PCGS Secure. Variety 1.** The 1851-C has the highest mintage of any Charlotte gold dollar issue, yet the production of its 1851 Philadelphia cousin was more than 80 times greater. The '51-C is scarce in all grades, and becomes rare in nice mint condition. This unblemished example shows only trivial incompleteness of strike on the A in DOLLAR and opposite on the hair east of the ear. Yellow-gold centers cede to broad sea-green margins. Population: 23 in 62 (1 in 62+), 32 finer (5/18). NGC ID# 25BL, PCGS# 7514
- 3952 1852-O MS62 NGC. Variety 1.** Peach-tinged borders cede to straw-gold centers. This New Orleans representative is sharply struck and shows only unimportant indications of contact. Cartwheel luster is especially evident at the borders. Census: 48 in 62, 31 finer (6/18). NGC ID# 25BT, PCGS# 7520
- 3953 1853 MS65 PCGS.** This frosted, well-produced Gem represents the ideal type coin for a Type One gold dollar. More than 4 million pieces were struck, and Mint State examples abound. Relatively few pieces achieve the full Gem grade, and fewer still are finer. Flashy mint luster and a pinpoint-sharp strike attend the obverse, while the reverse shows slight weakness at 18 in the date. PCGS reports 80 numerically finer pieces (6/18). NGC ID# 25BU, PCGS# 7521
- 3954 1853-O MS63 PCGS. Variety 1.** The high date variant of this New Orleans type issue. Lime-green and orange-gold tints accompany original and lustrous surfaces. The strike is sharp in the centers though the dentils show blending. No marks are noticeable, and the eye appeal is superior for the designated grade. Population: 74 in 63 (1 in 63+), 51 finer (6/18). NGC ID# 25BX, PCGS# 7524
- 3955 1856-S/S FS-501 AU53 PCGS.** The 1856-S is the sole San Francisco Type Two issue, struck while other mints had begun production of the Type Three design. Despite a mintage of only 24,600 pieces, two reverse dies are known, including the present widely repunched mintmark variety. An original caramel-gold example with minimal wear and pleasing surfaces. NGC ID# 25C8, PCGS# 145703 Base PCGS# 7536
- 3956 1874 MS66+ PCGS Secure.** This Plus-graded Premium Gem representative exhibits sharply detailed design elements, with some interesting clash marks on the obverse. The well-preserved orange-gold surfaces radiate satiny mint luster with outstanding eye appeal. Population: 75 in 66 (8 in 66+), 40 finer (6/18). NGC ID# 25DC, PCGS# 7575

**1876 Gold Dollar, MS64 Prooflike  
Exceptional Surfaces**

**3957 1876 MS64 Prooflike NGC.** Only 3,200 pieces were struck of the 1876, meaning the initial die polish never wore away from many of coins produced. As a result, once in a while this date is available with prooflike fields. The last one we offered was an MS61 Prooflike in our 2014 Summer FUN Signature. This is a uniformly bright example that has balanced mirrors from side-to-side. The surfaces are bright yellow-gold with no obvious marks and a strong strike throughout. Census: 8 in 64 (1 in 64 ★) Prooflike, 1 finer (5/18). NGC ID# 25DE, PCGS# 77577

**3958 1879 MS64 PCGS.** Starting with the 1879 date, gold dollars are more available to collectors in Mint State than in circulated grades since many pieces were purchased by dealers and speculators. The mintage of 3,000 pieces survives to a much greater extent than earlier issues that saw at least some normal circulation. This near-Gem example is partially prooflike with gleaming orange-gold surfaces and a sharp strike with faint die clashing on the reverse. NGC ID# 25DH, PCGS# 7580

**1881 Gold Dollar, MS67+  
Low-Mintage, Better Survival Rate**

**3959 1881 MS67+ NGC. CAC.** The 1881 gold dollar boasts a low mintage of 7,620 pieces, but the issue was heavily saved at the time of issue, making it relatively available in high grade today. This Plus-graded Superb Gem is sharply detailed and impeccably preserved, with orange-gold surfaces that show a mix of satiny luster and prooflike reflectivity in the fields. Census: 70 in 67 (5 in 67+, 2 in 67 ★), 36 finer. CAC: 33 in 67, 25 finer (5/18). NGC ID# 25DK, PCGS# 7582

**3960 1886 MS65+ NGC.** This Plus-graded Gem displays sharply detailed design elements and dramatic clash marks on both sides. The pleasing orange-gold surfaces show a mix of satiny luster and prooflike reflectivity. From a mintage of 5,000 pieces. Census: 19 in 65 (1 in 65+), 26 finer (6/18). NGC ID# 7HS8, PCGS# 7587

**3961 1886 MS66 NGC.** A rare Premium Gem example of this low-mintage issue (5,000 coins produced), that shows semiprooflike fields and a sharp strike. No singular contact marks are visible beneath a loupe. Census: 13 in 66, 13 finer (5/18). NGC ID# 7HS8, PCGS# 7587

**3962 1888 MS65 PCGS. CAC.** This is one of 15,501 gold dollars coined in 1888. The denomination would be abolished soon after in 1889. Each side radiates gleaming mint frost over warm yellow-gold surfaces. Clean and strongly struck. A couple of alloy spots are noted. Housed in a former generation holder. NGC ID# 25DT, PCGS# 7589

**CLASSIC QUARTER EAGLES**

**3963 1836 Script 8 — Cleaned — NGC Details. Unc. Breen-6143, Variety 11, R.2.** Star 6 nearly touches the curl, and no berry is present on the reverse branch stem. Strike detail is strong on the stars, feathers, talons, and fletchings. The only noticeable softness appears over the centers (curls and shield). Wispy marks over yellow-gold surfaces indicate a prior cleaning. NGC ID# 25FU, PCGS# 7694

**3964 1837 AU53 NGC. Breen-6145, Variety 16, R.2.** An nearly unblemished and original butter-gold representative. Luster fills the borders, and wear is mostly confined to Liberty's forehead and upper curls. The 1837 mintage was less than one-tenth of its 1836 predecessor. Housed in a circa-2000 holder. NGC ID# 25FX, PCGS# 7695

**1839-O Quarter Eagle, Unc Details  
Exceptionally Sharp, First O-Mint Gold Issue**

**3965 1839-O — Scratches — NGC Details. Unc. Breen-6153, Variety 28, R.4.** Low Date, Close Fraction. The 1839-O claims a mintage of 17,781 coins, and two die varieties are known. This one is slightly scarcer overall, and much scarcer in high grades. Most importantly, the 1839-O quarter eagle represents the first gold issue struck at the New Orleans Mint, which opened the year before. For an issue that normally comes softly struck, this Uncirculated example is exceptional. The stars, curls, and feathers are nearly full. Brightly lustrous yellow-gold surfaces show faint marks on each side, and the reverse is heavily cracked. The noted scratches are thin and occur across the portrait and left obverse field.

**LIBERTY QUARTER EAGLES**

**3966 1843-D Large D VF35 PCGS. Variety 4-I.** The Large D is significantly scarcer than the Small D. This Dahlonega example retains traces of luster and is well-defined on the plumage and the hair above the ear. We note an intermittent horizontal mark between 3 and 9 o'clock on the reverse and a few thin marks on the portrait. Ex: *New Millennium Collection (Heritage, 11/2003), lot 7155; Long Beach Signature (Heritage, 2/2013), lot 4747, which realized \$1,997.50.* PCGS# 97730

**1850 Two and a Half, MS63  
Surprisingly Scarce**

- 3967 1850 MS63 PCGS Secure. CAC.** The mintage for the 1850 quarter eagle was substantial with more than a quarter-million pieces produced. However, the average grade of certified survivors today is AU55. Surprisingly few pieces exist in mint condition. This piece has lovely softly frosted mint luster and light green-gold color. This is a coin worthy of serious consideration by gold collectors. Population: 20 in 63 (1 in 63+), 4 finer. CAC: 2 in 63, 1 finer (5/18). NGC ID# 25HG, PCGS# 7755

**1859-S Quarter Eagle, AU55  
Low-Mintage San Francisco Issue**

- 3968 1859-S AU55 PCGS Secure.** The mintage for the 1859-S quarter eagle was a meager 15,200 pieces and the issue circulated heavily in the hard-money economy of the region. Most examples seen today are heavily circulated. This attractive Choice AU specimen is lightly worn, and the still-lustrous orange-gold surfaces show only scattered, minor abrasions. Population: 10 in 55, 26 finer (5/18). NGC ID# 25JN, PCGS# 7790

- 3969 1861 New Reverse, Type Two, MS64 PCGS Secure.** The 1861 Liberty quarter eagle with the New Reverse is much more available than its Old Reverse counterpart and the issue is a popular choice for type collectors. This impressive Choice example is sharply detailed throughout, with dramatic clash marks on the reverse. The well-preserved yellow and rose-gold surfaces radiate vibrant mint luster, with terrific eye appeal. NGC ID# 25JX, PCGS# 7794

- 3970 1876 AU58 PCGS.** Only 4,176 quarter eagles were struck in 1876 at the Philadelphia Mint, and Uncirculated survivors are scarce. This near-Mint coin displays original straw-gold color and semiprooflike fields. Weakness of strike is seen on the eagle's left (facing) leg and the hair curls around Liberty's face. NGC ID# 7JS6, PCGS# 7824

- 3971 1884 MS62 NGC.** The 1884 is an underappreciated, low-mintage quarter eagle issue. A mere 1,950 business strikes fell from the dies. This sharply struck Mint State example shows substantial luster and no heavy marks, although scattered field chatter accounts for the assigned grade. As expected from such a small mintage, the surfaces are moderately reflective, since the dies remained fresh from start to finish of the brief run.  
*Ex: Long Beach Signature (Heritage, 2/2007), where it brought \$1,955.* NGC ID# 25L8, PCGS# 7836

- 3972 1886 MS61 NGC.** From a mintage of just 4,000 pieces, this attractive Mint State specimen exhibits sharply detailed design elements and lustrous yellow-gold surfaces that show fewer-than-expected contact marks for the grade. Vibrant mint luster adds to the outstanding eye appeal. Census: 31 in 61, 37 finer (6/18). NGC ID# 25LA, PCGS# 7838

- 3973 1892 MS63 PCGS.** A tiny commercial mintage of 2,440 pieces distinguishes the elusive 1892 from the several more-available dates that close the Liberty quarter eagle series. This is a lightly abraded, lustrous, and crisply struck representative of a popular-yet-undervalued issue that, to this day, defies pricing logic given the minuscule mintage. Population: 26 in 63, 35 finer (6/18).  
*Ex: Long Beach Signature (Heritage, 9/2010), lot 5220; FUN Signature (Heritage, 1/2011), lot 6738.* NGC ID# 25LG, PCGS# 7844

- 3974 1898 MS62 Prooflike NGC.** This remarkable Liberty quarter eagle exhibits sharply detailed design elements and well-preserved yellow-gold surfaces, with reflective prooflike fields on both sides. Eye appeal is outstanding. Census: 2 in 62 Prooflike, 5 finer (6/18). NGC ID# 25LN, PCGS# 77850

- 3975 1899 MS65 PCGS.** Frosty yellow-gold luster adorns sharp devices and shimmering fields on this Gem 1899 quarter eagle. Under a loupe, a few small marks are seen on Liberty's jaw and neck, but the eye appeal remains pleasing. Finer pieces are scarce. NGC ID# 25LP, PCGS# 7851

- 3976 1906 MS66 NGC.** Vibrantly lustrous with a glittering, jewel-like quality, this Premium Gem 1906 is a terrific type coin for a high-end set. Mint-green and rose highlights pulse across the sharply struck frosted surfaces, which show only the tiniest of marks and a hair-thin mint strike-through near star 5. NGC ID# 7JW8, PCGS# 7858

**INDIAN QUARTER EAGLES**

**1908 Indian Quarter Eagle, MS65+  
Shimmering Original Luster**

- 3977 1908 MS65+ NGC.** Frosty luster shimmers beneath a light and shows no bothersome abrasions. A full MS66 grade might have been achieved were it not for a few faint lines in the reverse fields. The headdress feathers on the obverse are intricately defined, and the softness on the eagle's wing on the reverse is from incomplete engraving of the die, not strike deficiency. Lovely peach, lilac, and straw-gold hues adorn each side. Eye appeal is outstanding. NGC ID# 288Y, PCGS# 7939

**1911-D Indian Quarter Eagle, AU55  
Strong D**

**3978 1911-D AU55 PCGS Secure.** With a mintage of 55,680 pieces, the 1911-D is the low-mintage key to the Indian quarter eagle series. This attractive Choice AU specimen exhibits only light wear on the well-detailed design elements and the all-important mintmark remains bold. The lightly abraded orange-gold surfaces are lustrous and appealing. NGC ID# 7KR7, PCGS# 7943

**3979 1914-D MS64 NGC.** The 1914-D Indian quarter eagle is a scarce issue in higher grades. This well-detailed Choice example displays lightly marked orange-gold surfaces, with a few hints of rose and lilac. Vibrant mint luster adds to the considerable eye appeal. NGC has certified 52 numerically finer examples (6/18). NGC ID# 2899, PCGS# 7947

**3980 1925-D MS65 PCGS.** Beautifully toned green and orange-gold surfaces. A lustrous and well-preserved Gem. The strike is sharp except on the lower portions of the headdress. An outstanding type representative. Housed in a green label holder.  
*Ex: Central States Signature (Heritage, 4/2016), lot 5752, which realized \$1,645. NGC ID# 7KRD, PCGS# 7949*

**THREE DOLLAR GOLD PIECES**

**3981 1854-O XF45 PCGS. Variety 2.** The reverse is lapped and a die crack travels through the ribbon ends on this late die state representative. The 1854-O is always popular; it boasts a low mintage of 24,000 coins and is the only New Orleans issue in the series. Red and olive-gold surfaces exhibit wispy abrasions and softness over the high points. NGC ID# 25M5, PCGS# 7971

**1855-S Three Dollar, Choice XF  
Popular Early S-Mint Issue**

**3982 1855-S XF45 PCGS.** Coins struck at the San Francisco Mint in its nascent period are all highly desirable, especially those with low mintages like the 1855-S three dollar (6,600 pieces). Most survivors are well-circulated, as "hard money" was heavily favored in the Western economy. This yellow-gold Choice XF example is strongly struck with even blending over the high points. Myriad marks throughout. NGC ID# 7K5D, PCGS# 7973

**3983 1857 AU55 PCGS.** The mintage of 20,891 pieces circulated to a much larger extent than most three dollar gold issues, and circulated survivors outnumber Mint State coins by a ratio of more than 6 to 1. This Choice About Uncirculated example displays still-lustrous medium-gold color with only light marks and discernible high-point wear. Strong eye appeal adds to the coin's many positive attributes. NGC ID# 7K5G, PCGS# 7976

**3984 1859 AU58 NGC.** An impressive near-Mint specimen from the scarce 1859 issue, this sharply struck piece exhibits bright, yellow-gold surfaces with nearly full luster and only a few light marks of little consequence. The AU58 grade level provides a wonderful combination of quality and price, a good value for budget-oriented collectors.  
*Ex: Beverly Hills Signature (Heritage, 11/2011), lot 4246, where it realized \$2,300. NGC ID# 7K5K, PCGS# 7979*

**3985 1874 AU58 NGC.** A lustrous near-Mint example of this available issue, ideal for type purposes. Yellow-gold surfaces exhibit soft orange-gold overtones on each side, with grade-consistent abrasions. The usual striking softness is seen on the wreath bowknot. NGC ID# 7KDE, PCGS# 7998

**3986 1878 MS60 PCGS.** A lemon-gold type representative with minimal marks for the designated grade. Luster dominates in the protected areas. The strike shows slight blending on the high points of Liberty's hair. Housed in a green label holder.  
*Ex: FUN Signature (Heritage, 1/2012), lot 6293, which realized \$1,955. NGC ID# 25MZ, PCGS# 8000*

**3987 1882 Repunched Date, FS-301, AU55 PCGS.** The 2 in the date is lightly but widely repunched. The low business mintage of 1,500 pieces was struck from a single die pair. This lightly worn example displays substantial lemon-tinged luster. A loupe reveals only a few peripheral hair-thin reverse marks. Housed in a green-label holder.  
*Ex: FUN Signature (Heritage, 1/2007), lot 5751, which realized \$2,530. NGC ID# 4DXC, PCGS# 145710 Base PCGS# 8004*

**3988 1888 MS61 PCGS.** Only 5,000 three dollar gold coins were struck for "circulation" in 1888. Really, the coins were manufactured so that those who wanted to give them as gifts could do so. The denomination was unseen in circulation by that point and would later be abolished in 1890. This is a frosty, well-struck example without the usual reflectivity seen on these low-mintage business strikes. Minimally marked. Housed in an old green label holder. NGC ID# 25NB, PCGS# 8010

**EARLY HALF EAGLES**

**1802/1 Five Dollar, AU Details  
BD-2, Centered Overdate, Only Minor Marks**

**3989 1802/1 BD-2, High R.4 — Bent, Improperly Cleaned — NCS. AU Details.** Bass-Dannreuther Die State b/b. The underdigit 1 is centered within the 2 in the date, and a diagnostic, lumpy die break exists above the left (facing) wing tip to confirm the BD-2 variety. The surfaces are a bit glossy and finely granular from the cleaning, but not heavily marked or hairlined. This greenish-gold example shows evidence of a slight bend below Liberty's cheek, with a minor raised area above the shield. Perhaps just 100 or so pieces survive in all grades combined.  
**From The Kadison Family Collection.** PCGS# 519885 Base PCGS# 8083

**1808 Draped Bust Left Five Dollar, AU Details  
BD-3, Normal Date, Close 5D**

- 3990** 1808 Close 5D, BD-3, R.4 — Filed Rims — PCGS Genuine. AU Details. Bass-Dannreuther Die state a/d. The reverse has been lapped to remove clash marks in the shield. Identifying markers for the BD-3 variety include the date spaced evenly between the bust and dentils, and the A in STATES is centered over the LU in PLURIBUS. About 100 to 125 examples are believed extant, derived from a mintage of 10,000 to 15,000 coins. Each side is bright yellow-gold with myriad marks over minimally worn surfaces. The noted rim filing occurs above STATES, but it does not overly distract from this early five dollar gold piece. As-made adjustment marks are also occasionally seen.

## CLASSIC HALF EAGLES

- 3991** 1834 Plain 4 AU58 NGC. Breen-6501, McCloskey 3-B, R.1. A nicely struck sun-gold first-year Classic half eagle. Marks are surprisingly few. The borders and motifs show bright mint luster. Glimpses of gray toning accompany the right-side stars and the AM in AMERICA. NGC ID# 25RR, PCGS# 8171
- 3992** 1836 AU53 PCGS. Breen-6510, McCloskey 3-C, R.2. A partly lustrous lemon-gold Classic type coin. Evenly struck, and evident marks are limited to a couple of thin lines above the 18 in the date. The curls and wingtips display only a hint of wear. McCloskey 3-C can be identified by minor repunching on the L and R in LIBERTY. NGC ID# 25RY, PCGS# 8174

## LIBERTY HALF EAGLES

- 3993** 1839 AU53 NGC. Considered by many to be a one-year type, the obverse design of the 1839 half eagle is slightly different than those of subsequent years, the most notable difference seen in the curvature of Liberty's neck. This Almost Uncirculated example displays original orange-gold color over both sides, with nearly complete detail. A visually appealing example of this first-year issue. NGC ID# 25S7, PCGS# 8191
- 3994** 1843-C XF40 PCGS Secure. Variety 2. A tiny spur off the lower-right serif of the E in AMERICA is diagnostic. The 1843-C half eagle has a Small Letters reverse, unlike its Philadelphia, Dahlonga, and most of its New Orleans counterparts. In all, 44,227 pieces were struck and about 250 examples survive. This problem-free example is incompletely defined but features attractive orange-gold and violet hues on the reverse. NGC ID# 429H, PCGS# 8214
- 3995** 1844-D — Scratch — PCGS Genuine Secure. XF Details. Variety 11-G. The peak of the 1 is recut, as usual for this Dahlonga five dollar gold issue. The 1844-D (88,982 coins struck) is a collectible Georgia half eagle. About 400 or 500 pieces are extant, mostly in VF to XF condition. This well-struck orange-gold example shows myriad abrasions. The noted impairment occurs in the field behind the lowest curls.

**1851-C Five Dollar, AU50  
Underrated Among Charlotte Issues**

- 3996** 1851-C AU50 PCGS Secure. Variety 1. The 1851-C half eagle claims a mintage of 49,176 pieces, but the issue is more elusive than its production total would indicate. In fact, the 1851-C is an underrated "sleeper" outside of series specialists. This attractive AU specimen offers well-detailed design elements that exhibit some light wear on the high points and lightly abraded orange-gold surfaces that retain traces of original mint luster. Population: 14 in 50, 26 finer (5/18). NGC ID# 25U6, PCGS# 8247

- 3997** 1852-D XF40 PCGS Secure. CAC. Variety 32-V. The 2 is far from the bust, and the mintmark touches the tip of the fletching. It is believed that 400 or 500 examples survive, making the 1852-D half eagle an excellent option for type purposes. This deep orange-gold XF40 survivor maintains glints of luster within the legends and good detail over typically struck devices. Much of the dentilation is indistinct. NGC ID# 25UC, PCGS# 8252

**1854-C Half Eagle, AU53  
Scarce North Carolina Issue**

- 3998** 1854-C AU53 NGC. Variety 1. Bold mintmark. A bisecting crack from the rim through S(TATES) to the eagle's wing is diagnostic. This was the first year that five branches of the U.S. Mint were engaged in half eagle production. The Charlotte facility struck 39,283 pieces, of which fewer than 200 examples survive. Indeed, this is one of the most challenging late-date Charlotte fives to locate. Perhaps 20% of the population grades AU or better. The outer elements and Liberty's portrait are strong, but the central reverse is much softer, as usual. Honey-gold surfaces retain traces of luster and show minimal abrasions. An excellent all-around example. NGC ID# 25UH, PCGS# 8257

**1856-C Five Dollar, AU55**  
**Sharp Definition**

**3999 1856-C AU55 NGC. Variety 1.** With a mintage of 28,457 coins and a survival rate about 200 pieces, the 1856-C half eagle is an issue that goes unnoticed by many collectors, although dedicated Charlotte Mint specialists recognize its true scarcity. This moderately marked khaki-gold example displays a far better strike than usual with minimal blending over the high points. Softness occurs on the date and lower stars, but the middle curls, feathers, talons, and olive leaves are surprisingly crisp. NGC ID# 25UW, PCGS# 8267

**4000 1861 MS61 PCGS.** A fully lustrous light yellow-gold example of the No Motto type, and the one issue that is most plentiful in Mint State grades. This piece has sharp design motifs and pleasing surfaces for the grade. NGC ID# 25VK, PCGS# 8288

**4001 1882-CC AU50 NGC. Variety 1-A.** Hints of luster remain in the protected portions of the fields, and both sides of this AU Carson City five have uniform wheat-gold color. Scattered small contact marks accompany the grade. Under a loupe, trivial strike softness is visible on the eagle's neck and the hair curls around Liberty's face. NGC ID# 25XH, PCGS# 8359

**4002 1891-CC AU58 NGC. Variety 1-A.** A briefly circulated Carson City type coin. The olive-gold centers are framed by peripheral russet-red. Well-struck and minimally abraded. Luster dominates the borders and fills the devices. NGC ID# 25Y5, PCGS# 8378

**4003 1892-CC AU58 NGC. Variety 1-A.** A popular Carson City issue from the penultimate year of production at the legendary Old West facility. This pumpkin-gold Borderline Uncirculated representative shows surprisingly few marks. The strike is sharp, and Liberty's eyebrow shows only a hint of wear. Luster fills the margins and motifs. NGC ID# 25Y7, PCGS# 8380

**4004 1893-CC AU58 NGC. Variety 1-A.** A well-struck, barely circulated final-year Carson City half eagle, showing lustrous fields and remarkably smooth wheat-gold surfaces. Higher-grade examples of the 1893-CC five are elusive, and this piece surpasses its grade in terms of eye appeal. NGC ID# 25YB, PCGS# 8384

**4005 1901-S MS65+ PCGS.** The 1901-S is often written off as a common date, but this issue is conditionally scarce in this phenomenal state of preservation. Each side is smooth and frosty with bold strike definition. Rich orange-gold color adds to the eye appeal. The coin is a blatantly high-end Gem, as confirmed by the PCGS Plus designation. NGC ID# 25YX, PCGS# 8404

**4006 1903-S MS65+ NGC.** Delicate blue toning appears on the brilliant yellow-gold surfaces of this sharply defined Gem. Trivial copper toning spots are barely visible on the obverse of this beauty. NGC has assigned their Plus designation to just four examples graded MS65, and they have certified 50 numerically finer pieces (6/18). NGC ID# 25Z3, PCGS# 8408

**4007 1905-S MS64 NGC.** A generous mintage of 880,700 Liberty half eagles was achieved in 1905 at the San Francisco Mint, but this issue is surprisingly difficult to locate in high grade today. The present coin is a delightful Choice example, with vibrant mint luster and razor-sharp design elements. Census: 7 in 64, 3 finer (6/18). NGC ID# 25Z7, PCGS# 8412

**INDIAN HALF EAGLES**

**1908-D Five Dollar Indian, MS64**  
**Appealing, CAC Approved**

**4008 1908-D MS64 PCGS. CAC.** While the first-year Philadelphia issue was heavily saved at the time of release, the 1908-D Indian half eagle is usually only available through MS64 and is rare at the Gem level. This piece has original orange-gold and straw-yellow hues with luminous luster. The lower headdress feathers are a trifle weak, but the eye appeal is nonetheless pleasing. CAC-approved in a green label holder. PCGS lists just a dozen numerically finer coins (6/18). NGC ID# 93KW, PCGS# 8511

**4009 1909-D MS64 PCGS.** Sharply struck and coruscating with peach-gold centers and rich peripheral russet and aquamarine toning. Smooth aside from a single thin line on the upper-right reverse field. A popular Denver Mint type coin. Certified in a green label holder. NGC ID# 28DJ, PCGS# 8514

**4010 1914 MS63 PCGS.** The popular 1914 Indian half eagle was produced on the brink of the first World War, with a mintage of nearly a quarter-million pieces. This impressive Select specimen displays sharply struck design elements and lustrous orange-gold surfaces with a few scattered, minor signs of contact. NGC ID# 28DU, PCGS# 8527

**4011 1914 MS63 PCGS Secure.** While many 1914 fives have a granular texture, this Select Uncirculated example is smooth and satiny with surprisingly strong mint luster and a bold strike. Marks are limited to a few light marks on the exposed fields. Attractive wheat-gold color displays pale-green overtones for strong eye appeal. NGC ID# 28DU, PCGS# 8527

**1914 Half Eagle, MS64**  
**First-Generation Holder**

**4012 1914 MS64 PCGS.** The 1914 is approximately ten times scarcer at the MS64 level than the 1909-D, yet it trades at only a moderate premium above "type" prices. Most certified examples are in AU55 to MS63 grades, and lack the consistent olive-gold color present on this lustrous and minimally marked near-Gem. The strike is surprisingly sharp on the plumage and headdress. Certified in a first-generation "rattler" holder. NGC ID# 28DU, PCGS# 8527

**1914 Five Dollar, MS64  
Rare Any Finer**

**4013 1914 MS64 PCGS.** A deep orange-gold hue provides color to this near-Gem half eagle. Both sides show near-complete design detail. Frosted mint luster and minimal surfaces abrasions round out the appeal. The 1914 Indian half eagle becomes scarce any finer than MS64, putting greater demand on coins of this quality. PCGS shows 34 higher submissions (6/18). NGC ID# 28DU, PCGS# 8527

**4014 1914-D MS63 NGC.** The 1914-D is the final half eagle struck at the Denver Mint, an important consideration for type purposes. This orange and rose-gold Select specimen offers well-detailed design elements and lustrous surfaces that show the expected number of minor scuffs and contact marks. NGC ID# 28DV, PCGS# 8528

**4015 1916-S MS62 NGC.** Essential for an Indian half eagle date set, the 1916-S is scarce by demand (although moderately available in MS62). This example displays olive-gray accents over orange-gold coloration. The omnipresent bagmarks that accompany most 1916-S half eagles are in evidence but less severe than often seen, and the strike shows only minor weakness on the eagle's shoulder. Mint luster glows beneath the toning. NGC ID# 28DY, PCGS# 8532

**1916-S Five Dollar, MS63  
Final San Francisco Coinage**

**4016 1916-S MS63 PCGS.** This frosty orange-gold example displays a sharp strike and light field abrasions that define the grade. The 1916-S is the only Indian half eagle of this date from any mint, and it represents the last coinage of the denomination until 1929. After 1916, gold production at San Francisco was almost entirely focused on double eagles, save for a couple of spurts of ten dollar pieces in 1920 and 1930. NGC ID# 28DY, PCGS# 8532

**LIBERTY EAGLES**

**4017 1846/5-O XF40 PCGS. Variety 3.** During the 1990s, this die pair was promoted as an 1846/5 overdate. The round die lump within the interior of the 6 was believed to be the ball of an underdigit 5. Specialists are presently skeptical of its overdate status, but the variety remains popular with New Orleans collectors. This is an unmarked green-gold representative with even wear and a pleasing appearance. NGC ID# 262Y, PCGS# 8596 Base PCGS# 8595

**4018 1847 AU58 NGC.** Just a trace of wear shows on the well-detailed design elements of this impressive near-Mint Liberty eagle. The orange-gold surfaces are lightly abraded and retain much original mint luster. NGC has graded 67 numerically finer examples (6/18). NGC ID# 262Z, PCGS# 8597

**4019 1847-O AU50 NGC. Variety 1.** In an older NGC holder, this About Uncirculated 1847-O eagle displays partially lustrous fields and sharp devices. The straw-yellow color is original. Typical of New Orleans gold from this period, the surfaces are moderately abraded. NGC ID# 2632, PCGS# 8598

**4020 1854 AU53 NGC.** Mintage figures at the Eastern mints dropped considerably once the San Francisco Mint began operation in 1854. At Philadelphia, just 54,250 eagles were coined in 1854, down from an average of about 300,000 coins in each of the previous five years. This attractive example retains considerable luster with minimally abraded yellow-gold surfaces. NGC ID# 263G, PCGS# 8613

**4021 1856-S AU55 NGC.** Medium S mintmark. Frequent small abrasions dot the medium-gold surfaces, but bright mint luster remains at the margins. Two tiny obverse rim nicks are noted. The mintage of 68,000 pieces makes this issue more available than many branch mint tens, but few fully Mint State coins exist. The present Choice AU example will suit most collectors with its vibrant eye appeal and sharply struck motifs. Census: 60 in 55, 47 finer (6/18). NGC ID# 263S, PCGS# 8621

**4022 1859 XF45 NGC.** Hints of orange patina appear on the light yellow-gold surfaces of this Choice XF 1859 eagle that exhibits myriad abrasions on both sides. The mintage was a mere 16,013 coins, and few survive today. NGC ID# 263Z, PCGS# 8628

**4023 1860-O AU58 NGC. Variety 2.** Ex: *S.S. Republic*. The final Southern gold ten dollar issue until 1879. Only 11,100 pieces were struck, and lightly marked near-Mint examples are scarce. The nicely struck butter-gold surfaces are slightly subdued. NGC has certified four 1860-O tens with a pedigree to the 1865 *S.S. Republic* shipwreck, three as AU58 and one as MS60. Census: 23 in 58, 6 finer (6/18). NGC ID# 2645, PCGS# 98631

**1862 Ten Dollar Liberty, XF45  
Small Mintage and Survivorship**

**4024 1862 XF45 PCGS.** The uncertain outcome during the early years of the Civil War prompted substantial hoarding of gold and silver coins, and small mintages at Philadelphia, including a mere 10,995 eagles in 1862. Few examples have survived. Among them is this Choice XF example that has grade-consistent marks and retains traces of luster. An important opportunity for the advanced collector. Population: 27 in 45, 65 finer (6/18). NGC ID# 2649, PCGS# 8635

**4025 1879-S MS62 PCGS.** The high mintmark variant of this better issue. The 1879-S is less rare in Mint State than its San Francisco predecessors, but much more challenging than most succeeding S-mint issues, such as the 1881-S. A caramel-gold representative with distributed moderate field abrasions and a concealed mark behind Liberty's mouth. Population: 27 in 62, 7 finer (6/18). NGC ID# 265R, PCGS# 8686

**4026 1880-S MS63 PCGS Secure. Breen-7000.** Tall S. A Tiny S variety, with the mintmark placed much closer to the N in TEN, is also known. Sea-green borders encompass pumpkin-gold centers. The lustrous surfaces are less abraded than is customary for the Select level. Population: 79 in 63 (3 in 63+), 7 finer (6/18). NGC ID# 265V, PCGS# 8690

**4027 1881 MS64 PCGS.** A lovely Choice Mint State example, this 1881 eagle has light yellow surfaces and minimal marks. A condition rarity at this grade level. Population: 37 in 64 (4 in 64+), 1 finer (6/18). NGC ID# 265W, PCGS# 8691

#### 1883-CC Ten Dollar, AU50 Problem-Free Better Date

**4028 1883-CC AU50 PCGS. Variety 1-B.** A lightly circulated but problem-free better-date Carson City ten. Peach-tinged luster emerges from the legends. The portrait and open fields are olive-gold. No marks are remotely consequential. Four die pairs are identified despite a scant mintage of 12,000 pieces. Variety 1-B has a wide level mintmark, while Variety 1-A features a wide uneven mintmark, and Varieties 2-C and 3-D have a closely spaced mintmark. NGC ID# 2667, PCGS# 8700

#### 1891-CC Ten, MS62 Excellent Type Candidate

**4029 1891-CC MS62 NGC. Variety 2-B.** Five obverse dies and four reverse dies are identified for the 103,872-coin mintage of 1891-CC eagles, and those dies were used to create five distinct varieties. Slightly less than 300,000 eagles were minted in Carson City throughout the history of that facility, and the 1891 coinage represents a little over one-third of the total, making this issue the ideal candidate for a CC type set. This Mint State example has minimal marks on its frosty yellow-gold luster. NGC ID# 266U, PCGS# 8720

#### 1891-CC/CC Ten Dollar, MS62 FS-501, Repunched Mintmark

**4030 1891-CC/CC FS-501 MS62 PCGS Secure. Variety 4-C.** The mintmark is nicely repunched east. Varieties 3-C and 4-C share this reverse, but Variety 4-C is readily identified by a diagonal die line below Liberty's jaw. About 40% of the issue is FS-501, and perhaps 25% of the issue is Variety 4-C. Variety 5-D is the rarest '91-CC. A crisply struck and thoroughly lustrous Carson City type coin. The lemon-gold surfaces display fewer marks than anticipated for the MS62 level. NGC ID# 266U, PCGS# 145728 Base PCGS# 8720

**4031 1895 MS64 NGC.** The 1895 is less available than the 1893 or 1894, but it is still an accessible ten dollar issue. Only in MS64 does the date become scarce. Gems are rare with four submissions each at NGC and PCGS (6/18). Swirling luster radiates over each side. The strike is good, and marks are unobtrusive. NGC ID# 2678, PCGS# 8732

#### 1901-S Ten Dollar, MS66 Ideal Liberty Type Coin

**4032 1901-S MS66 NGC.** The 1901-S (2.8 million coins struck) is the ideal issue to represent the Liberty Head ten dollar type. Examples are collectible even in this near-flawless state. A strong lens is needed to bring tiny ticks into view. Both sides showcase radiant cartwheel luster over smooth, fully defined, peach-gold surfaces. NGC counts 20 finer submissions in its *Census* (5/18). NGC ID# 267S, PCGS# 8749

**4033 1906 MS64 PCGS. CAC.** Gleaming satiny luster shimmers over attractive yellow-gold surfaces. The strike is razor-sharp, and both sides have only trivial abrasions. Although the 1906 is relatively plentiful in most grades, the number of survivors drops precipitously in grades above MS63. Population: 47 in 64 (4 in 64+), 12 finer. CAC: 5 in 64, 3 finer (5/18).  
*Ex: Long Beach Signature (Heritage, 9/2008), lot 3952; Central States Signature (Heritage, 4-5/2009), lot 3883.* NGC ID# 7JHG, PCGS# 8759

**4034 1907 MS64 PCGS. CAC.** The 1907 is always popular as the final year of the Liberty Head design, at least for ten dollar gold coin production. Examples become scarce any finer than this CAC-approved near-Gem. The strike is nearly complete, with the exception of the curls over the ear and the olive leaves. Warm honey-gold surfaces are aglow in soft mint frost. PCGS reports 39 finer submissions (5/18). NGC ID# 2688, PCGS# 8763

**4035 1907 MS62 Prooflike NGC.** Although NGC has certified more than 25,000 examples of the 1907 Liberty eagle, only nine submissions have earned the Prooflike designation. Two of those grade MS61, five grade MS62, and two grade MS63 (6/18). Both sides of this brilliant light yellow example have numerous trivial marks that prevent a higher grade. NGC ID# 2688, PCGS# 78763

**4036 1907-D MS63 PCGS.** The 1907-D Liberty eagle is available in MS63 but elusive finer. This example displays sharp design elements and satiny lemon-gold luster with remarkably clean fields for the grade. The eye appeal is outstanding. The 1907-D ten is scarce in finer condition. NGC ID# 268A, PCGS# 8764

## INDIAN EAGLES

**4037 1907 No Motto MS62 NGC.** A frosty and fully lustrous Mint State example of the No Motto subtype that is an important component of an advanced 20th century type collection. Brilliant yellow-gold surfaces host minimal, trivial marks. NGC ID# 28GF, PCGS# 8852

**4038 1907 No Motto MS62 PCGS.** A pleasing MS62 representative of the short-lived No Motto design, with well-detailed design elements and lightly marked orange-gold surfaces. Frosty mint luster adds to the considerable eye appeal. NGC ID# 28GF, PCGS# 8852

**4039 1907 No Motto MS62 PCGS.** The traditional choice for type purposes, the 1907 is the most plentiful No Motto Indian eagle. This piece is Uncirculated and well-struck. Straw-gold surfaces exhibit scattered abrasions that limit the grade. NGC ID# 28GF, PCGS# 8852

**4040 1907 No Motto MS63 NGC.** A splendid representative of the first-year Indian eagle, this piece has frosty yellow-gold luster and minimal marks with excellent eye appeal. NGC ID# 28GF, PCGS# 8852

**4041 1907 No Motto MS63 PCGS.** A pleasing lemon-yellow example of the No Motto Indian eagle, this piece represents the first of just two years for the design that continued part way into 1908. Trivial marks are evident on the Indian's jaw and elsewhere, preventing a higher grade. NGC ID# 28GF, PCGS# 8852

### 1907 No Motto Ten Dollar, MS64 Ideal Type Coin

**4042 1907 No Motto MS64 NGC.** A softly frosted, well-struck yellow-gold example of the ideal No Motto type coin in the Indian eagle series. This piece is attractive with light surface marks, all of which are perfectly acceptable for the grade. This No Periods design was the final product of the Mint's efforts to fine-tune Saint-Gaudens' design, which was originally submitted in high relief. NGC ID# 28GF, PCGS# 8852

**4043 1908 No Motto MS61 PCGS.** With a mintage of 33,500 pieces, the 1908 No Motto Indian eagle represents the final year of this short-lived design type. This well-detailed Mint State example displays lustrous orange-gold surfaces with the expected number of minor contact marks for the grade. NGC ID# 28GG, PCGS# 8853

### 1908 No Motto Ten, MS62 Attractive Original Luster

**4044 1908 No Motto MS62 PCGS.** Softly frosted straw-gold luster is original on this Uncirculated No Motto type coin, illuminating well-struck design elements. Scattered abrasions limit the grade but none are individually bothersome. The 1908 No Motto issue comes from a low mintage of 33,500 coins, one of the smallest production totals in the series. NGC ID# 28GG, PCGS# 8853

### 1908-D Ten Dollar, MS62 Sought-After No Motto Issue

**4045 1908-D No Motto MS62 PCGS.** Although 210,000 No Motto eagles were struck at Denver in 1908, this issue is elusive in grades above MS62. This is the scarcest regular No Motto issue in high grade (excluding, of course, the Wire Rim and Rolled Rim 1907 varieties). Frosty original luster with straw-gold color characterizes this piece. The design elements are well-struck, and the surfaces show only light, scattered abrasions. NGC ID# 28GH, PCGS# 8854

### 1909-S Indian Ten, MS63+ Conditionally Challenging Issue

**4046 1909-S MS63+ PCGS Secure.** The 1909-S has a higher mintage than its Philadelphia and Denver counterparts, but is rarer in Mint State. At PCGS, a majority of submissions have been certified in circulated grades, and most Uncirculated pieces are either MS61 or MS62. Thus, the present lustrous apricot-gold example is exceptional in its quality, since the sharply struck surfaces show relatively few marks. The mintmark is repunched, evident on the lower serif, not to be confused with the more significant Breen-7108 RPM. Population: 74 in 63 (7 in 63+), 85 finer (5/18). NGC ID# 28GP, PCGS# 8864

**4047 1910 MS64 PCGS.** Sixty years after their production, many previously exported 1910 eagles began to return from European bank holdings. Today, the issue is available through MS63, scarce in MS64 and MS65, and rare any finer. Good detail is apparent throughout this frosty near-Gem. Textured fields lack serious flaws. NGC ID# 28GR, PCGS# 8865

**4048 1910-S MS62 PCGS.** The 1910-S Indian eagle is a collectible issue in MS62 condition, but finer coins are somewhat scarce. This attractive MS62 example exhibits well-detailed design elements and lustrous orange-gold surfaces, with a number of scattered minor contact marks on both sides. NGC ID# 268D, PCGS# 8867

**4049 1911 MS64 PCGS.** Fine-grained surfaces are characteristic of 1911 tens, and function as a useful means of capturing and intensifying the mint luster as it encounters the many microscopic facets that occupy the fields. This is a Choice orange-gold example, with sharply struck stars and central motifs. A few light grazes and tiny marks do not inhibit the strong eye appeal. NGC ID# 28GT, PCGS# 8868

**4050 1911 MS64+ NGC.** The strike is needle-sharp on this high-end, near-Gem 1911 ten. The upper bonnet seems to have an extra dimension and the eagle's shoulder is sharply defined, amplified by lively mint luster that radiates from the central elements. Rose and lilac accents embellish medium-gold coloration that flows across finely granular surfaces so typical of the 1911. An extremely Choice coin for the grade with no marks to mention and outstanding visual impact. NGC ID# 28GT, PCGS# 8868

**4051 1911-S AU50 NGC.** The 1911-S Indian eagle claims a small mintage of 51,000 pieces, making the issue challenging in high grade. This impressive AU specimen exhibits some light wear over the high spots, like the eagle's shoulder. The orange-gold surfaces show myriad minor abrasions, but none are individually distracting. NGC ID# 28GV, PCGS# 8870

**4052 1911-S AU58 PCGS.** S-mint eagles from this period prove challenging in high grades. The 1911-S claims a mintage of 51,000 coins and is seldom seen in Mint State. This khaki and reddish-gold example is Borderline Uncirculated with notably strong detail on the lowest headdress feathers and softness over the forecurls and wing tip. Lightly abraded. NGC ID# 28GV, PCGS# 8870

**4053 1912 MS64 PCGS.** The 1912 Indian eagle is available in MS64 but scarce finer. This near-Gem displays a bold strike and frosty original luster that yields lovely wheat-gold color. Under a loupe, some light abrasions on the Indian's cheek and the eagle's wing prevent Gem classification. NGC ID# 28GW, PCGS# 8871

**4054 1912-S MS61 NGC.** Like its contemporaries, this San Francisco eagle issue proves challenging in grades finer than MS62 or MS63, but it is still accessible in this condition. The highest points of the design are slightly incomplete, but the overall impression is good. Soft mint frost over lightly abraded peach-gold surfaces contributes to the appeal. NGC ID# 269G, PCGS# 8872

**4055 1912-S MS61 PCGS Secure.** An impressive Mint State Indian eagle, from a mintage of 300,000 pieces, this coin offers well-detailed design elements and the pleasing orange-gold surfaces show the expected number of minor contact marks for the grade. NGC ID# 269G, PCGS# 8872

**4056 1912-S MS61 PCGS.** A cluster of minor contact marks on the Indian's cheek limits the grade of this attractive ten dollar, which is lightly marked in other areas. The design elements are sharply detailed and the orange-gold surfaces radiate vibrant mint luster. NGC ID# 269G, PCGS# 8872

**4057 1912-S MS62 PCGS.** From a substantial mintage, the 1912-S Indian eagle is reasonably available at the MS62 grade level, but it is elusive in higher Mint State grades. This attractive specimen offers well-detailed design elements and lightly marked orange-gold surfaces that retain much original mint luster. NGC ID# 269G, PCGS# 8872

**4058 1914 MS63 NGC.** Less available than its mintage implies, the 1914 eagle joined the ranks of many gold coins that found safety in European holdings. Others were tucked away domestically in collections, and still others were hoarded during the war, the Great Depression, or succumbed to the Gold Recall. This Select Uncirculated example never saw circulation in commerce, and its finely granular, orange-gold surfaces are lightly abraded. A few small, reddish alloy spots dot each side. The strike is sharp, accented by bold mint luster. NGC ID# 28H2, PCGS# 8875

**4059 1914-D MS63 PCGS.** From a mintage of 343,500 pieces, the 1914-D Indian eagle is easily located in most grades, making it a popular choice with branch mint type collectors. This well-detailed Select example displays lustrous orange-gold surfaces that show some scattered, minor contact marks. NGC ID# 28H3, PCGS# 8876

**4060 1915 MS63 NGC.** The 1915 Indian eagle is an available issue in Mint State grades, making it a popular choice with type collectors. This well-detailed Select specimen shows just a touch of the usual softness on the eagle's shoulder and the lustrous surfaces exhibit scattered, minor contact marks, the worst being a scrape in the right reverse field. NGC ID# 28H5, PCGS# 8878

**4061 1915-S AU50 PCGS Secure.** Only 59,000 1915-S eagles were struck, making this one of the better dates in the series. That is especially true of high-grade coins, which is why most collectors are delighted with comparable examples in AU condition. Minor friction occurs over the high points, but detail remains good. Yellow-gold surfaces exhibit partial luster and small peppered abrasions. NGC ID# 28H6, PCGS# 8879

**4062 1916-S MS62 PCGS. CAC.** The 1916-S was the final gold eagle struck at any mint until 1920. Production amounted to 138,500 pieces, and Mint State coins are scarce in the context of the series. This piece displays bright yellow-gold mint luster and a good strike. Light, scattered abrasions are as expected for the grade, although none are overly detracting. NGC ID# 28H7, PCGS# 8880

**4063 1932 MS64 PCGS Secure.** An attractive Choice example of this popular type issue, with well-detailed design elements and well-preserved orange-gold surfaces that radiate vibrant mint luster from both sides. Overall eye appeal is outstanding. NGC ID# 28HB, PCGS# 8884

## LIBERTY DOUBLE EAGLES

### 1850 Double Eagle, AU50 Inaugural-Year Issue

**4064 1850 AU50 NGC.** Few double eagles are as popular and numismatically significant as the 1850 twenty dollar gold piece — the inaugural issue in the series. Thankfully, massive quantities of California gold were converted into a substantial mintage of 1.1 million coins, and examples remain accessible to present-day collectors. This is a well-struck, minimally circulated first-year type coin with lovely khaki-gold coloration. Eye appeal is excellent. NGC ID# 268F, PCGS# 8902

**1851-O Double Eagle, AU Details  
Excellent Louisiana Mint Type Coin**

**4065 1851-O — Cleaned — NGC Details. AU. Variety 1.** Die chips in front of the eye, and the mintmark slightly left of center over the N are diagnostic. This is the most collectible double eagle from the New Orleans Mint (315,000 coins struck). A relatively strong impression shows good definition on the curls and most stars, though detail softens a touch toward the lower obverse. Yellow-gold surfaces are lightly abraded and bright from cleaning. NGC ID# 268J, PCGS# 8905

**4066 1852 XF45 NGC.** From a large mintage of over 2 million pieces, this Choice XF Type One double eagle shows some light wear on the hair and wing tips, but much interior detail is still intact. The orange-gold surfaces are lightly abraded for the grade. NGC ID# 268K, PCGS# 8906

**1852 Double Eagle, AU55  
Strong Type One Representative**

**4067 1852 AU55 PCGS Secure.** Definition is strong for a Type One twenty, taking into account a slight bit of friction over the high points. In particular, Liberty's curls and the stars are crisp, though the reverse is a touch softer. Remaining luster shines from the recessed areas, brightening lightly marked yellow-gold surfaces. The Philadelphia Mint struck more than 2 million double eagles in 1852 using the massive amounts of gold mined in California. NGC ID# 268K, PCGS# 8906

**1852 Twenty Dollar, AU58  
Lightly Worn, Lightly Abraded Specimen**

**4068 1852 AU58 NGC.** Frosty original luster remains in the fields of this near-Mint coin, which shows refreshingly smooth green-gold surfaces for a Gold Rush-era double eagle. Only a brush of high-point friction prevents a Mint State grade, and the eye appeal surpasses that of many lower-end Uncirculated coins that we have seen. The 1852 is available in AU condition but is elusive finer. NGC ID# 268K, PCGS# 8906

**4069 1852-O — Cleaned — NGC Details. AU. Variety 1.** The only known dies. From a mintage of 190,000 coins, the 1852-O is one of the earliest and few collectible double eagle issues from the New Orleans Mint. Although the surfaces are somewhat muted, they nevertheless retain strong detail over minimally worn devices. Few singular marks are apparent. NGC ID# 268L, PCGS# 8907

**4070 1853 — Cleaned — PCGS Genuine. AU Details.** This early series Type One double eagle shows some light wear on the design elements, but most interior detail remains intact. Only scattered, minor abrasions are evident, but the luster is dimmed by the noted cleaning.

**4071 1853 AU55 NGC.** Much mint luster remains across bright, yellow-gold surfaces of this lightly abraded, sharply struck Choice About Uncirculated twenty. More than 1.2 million pieces were struck, making the 1853 a staple among gold accumulators and type collectors. A few tiny marks exist on the bottom edge of the neck truncation, and a small flat spot on the rim above star 7 is of minor note. NGC ID# 268M, PCGS# 8908

**1853 Liberty Double Eagle, AU58  
Elusive Issue Any Finer**

**4072 1853 AU58 PCGS Secure.** This attractive near-Mint specimen represents the popular Type One design, with just a trace of wear on the well-detailed design elements and lightly abraded orange-gold surfaces that retain traces of original mint luster. The 1853 is a scarce issue in Mint State grades, but circulated specimens can be found without much difficulty. Population: 89 in 58 (1 in 58+), 51 finer (6/18). NGC ID# 268M, PCGS# 8908

**1854 Small Date Twenty, AU58  
Original Luster Remains**

**4073 1854 Small Date AU58 NGC.** The 1854 Liberty double eagle with the small numerals in the date is more available than its Large Date counterpart. This pleasing near-Mint specimen offers lightly abraded orange-gold surfaces and well-detailed design elements that show just a trace of friction on the high points. Much original mint luster remains, adding to the outstanding eye appeal. NGC has graded 33 finer examples (6/18). NGC ID# 268R, PCGS# 8911

**4074 1855 XF45 PCGS Secure.** Original olive-gold surfaces show hints of orange-gold luster in the protected regions. The coin is well-detailed and relatively smooth, exhibiting no distracting marks. The reverse is rotated a trifle counterclockwise. Some deep coppery color is seen in the recesses of the portrait. NGC ID# 268V, PCGS# 8914

- 4075 1855 AU50 PCGS.** This impressive Type One double eagle exhibits the expected number of minor abrasions for a large gold coin that spent some time in circulation. The design elements show some light wear, but most interior detail remains intact and traces of original mint luster add to the overall positive appearance. NGC ID# 268V, PCGS# 8914

**1855 Twenty Dollar, AU58  
Rarely Found Finer**

- 4076 1855 AU58 NGC.** According to Doug Winter: "The 1855 is not often seen above properly graded About Uncirculated-55 to About Uncirculated-58 and I doubt if more than a half dozen exist which grade Mint State-62 or finer." This partly lustrous near-Mint example offers good strike detail and minimal evidence of friction. As usual, marks are scattered over each side. Several coppery alloy spots appear at the lower obverse. NGC reports 19 finer submissions (6/18). NGC ID# 268V, PCGS# 8914

- 4077 1856-S XF40 NGC.** Some light-to-moderate wear shows on the design elements of this impressive Type One double eagle, and a number of minor abrasions are evident on the lustrous orange-gold surfaces. The overall presentation is most acceptable. NGC ID# 2692, PCGS# 8919

**1856-S Double Eagle, AU53  
Nice Type One Example**

- 4078 1856-S AU53 PCGS.** The 1856-S Liberty double eagle claims a large mintage of 1.1 million pieces, but the issue circulated heavily in the regional economy for decades before numismatic interest in branch mint issues developed. This AU53 specimen offers moderately abraded orange-gold surfaces that retain traces of original mint luster, and well-detailed design elements that show just a touch of wear. NGC ID# 2692, PCGS# 8919

- 4079 1858 AU50 NGC.** From a mintage of 211,714 pieces, the 1858 double eagle is seldom seen in mint condition, and even AU specimens are somewhat scarce. This impressive AU example displays light wear on the design elements and a large number of grade-consistent minor abrasions are evident. Original mint luster remains intact in the sheltered areas. NGC ID# 2697, PCGS# 8923

- 4080 1858-S AU53 NGC.** The 1858-S double eagle is a rarity in Mint State, although this AU coin remains collectible. Light high-point wear leaves some luster in the protected areas, and each side displays attractive orange-gold color. Scattered abrasions are light. NGC ID# 2699, PCGS# 8925

- 4081 1859-S Poor 1 PCGS. CAC.** Perfect for a low-ball date or type set, this 1859-S double eagle is about as worn as possible without being unidentifiable. The top half of the date numerals are visible, and the upper loop of the mintmark is barely present. The central devices are mostly outlined and wear is even. NGC ID# 269C, PCGS# 8928

- 4082 1860 AU55 NGC.** The pleasing orange-gold surfaces of this attractive Choice AU specimen show the expected number of abrasions and minor chatter in the fields, with some light wear on the design elements and much original mint luster still intact. NGC ID# 269D, PCGS# 8929

- 4083 1861 XF45 NGC.** With a mintage of nearly 3 million coins, the 1861 double eagle is a favorite No Motto type coin. This Choice XF example is lustrous and well-detailed for the grade. The original yellow-gold luster shows scattered abrasions, including a small mark on Liberty's cheek that is singularly mentionable. Housed in a prior generation holder. NGC ID# 269G, PCGS# 8932

- 4084 1861 AU55 PCGS.** The surfaces of this Choice AU 1861 double eagle are lightly abraded, but not as significantly as we have seen on most other AU-level examples. The devices are also bold with little wear, and some luster remains in the fields. The 1861 is a classic type coin because of its mintage of almost 3 million pieces. It is one of only a few No Motto double eagles that are available in higher grades. NGC ID# 269G, PCGS# 8932

- 4085 1861 AU58 NGC.** This popular issue retains considerable luster on bright pink-gold surfaces and exhibits well-struck design features, with a couple of moderate marks on the reverse shield. This piece presents a pleasing overall appearance.  
*Ex: Long Beach Signature (Heritage, 2/2006), lot 3255.* NGC ID# 269G, PCGS# 8932

- 4086 1863-S VF35 NGC. CAC. Breen-7216.** Medium S. Numerous examples of the 1863-S exist in well-circulated condition, indicating the importance of gold coinage primarily on the West Coast, where gold pieces tended to stay in circulation despite the far-away Civil War. This is a Choice VF example that displays rich olive-gold color with strong orange overtones. Smooth wear gives the piece an attractive look of antique gold. CAC endorsed for quality and eye appeal. NGC ID# 269R, PCGS# 8940

**1866-S Motto Twenty, Bright AU50**

- 4087 1866-S Motto AU50 NGC.** Small Squat S. This is the first With Motto issue from the San Francisco Mint, a much more plentiful issue than its No Motto counterpart, and ideal for date collectors. Hints of luster remain in the fields, and the bright yellow-gold surfaces are only lightly abraded. Softness of strike on the portrait combines with light friction, resulting in the merging of the finer details of Liberty's hair. NGC ID# 26B2, PCGS# 8950

- 4088 1867-S AU50 NGC.** Small Squat S. The 1867-S Liberty double eagle had a fairly substantial mintage of nearly 1 million coins, but most were heavily circulated or later melted, making attractive AU specimens rather elusive, and Mint State pieces genuinely rare. This lightly worn, lightly abraded example retains significant amounts of original mint luster. NGC ID# 26A2, PCGS# 8952

- 4089 1867-S AU53 NGC.** Small squat S. Numerous pockets of luster emerge from the green-gold surfaces. Small abrasions are prevalent, but only a curved line beneath the U in UNITED merits mention. Like most Type Two issues, the 1867-S is rare in Mint State, although it is collectible in AU grades. NGC ID# 26A2, PCGS# 8952

- 4090 1868-S AU53 NGC.** The Type Two double eagle does not benefit much from treasure ship finds, unlike its Type One counterpart, and the mintages are generally smaller than those of Type Three twenties, making the Type Two a particularly difficult type to locate in high grade. This pleasing AU53 specimen is lightly worn, with numerous minor abrasions on both sides, but traces of original mint luster linger in the sheltered areas. NGC ID# 26A4, PCGS# 8954
- 4091 1868-S AU55 NGC.** While scarce in Mint State, the 1868-S is more available in About Uncirculated grades. This still-lustrous and minimally abraded Choice AU is sure to satisfy most collectors. Sharp definition remains on the devices and attractive rich-gold color flows throughout both sides. NGC ID# 26A4, PCGS# 8954
- 4092 1869-S AU55 NGC.** This pleasing Choice AU Type Two double eagle exhibits some light wear on the strongly impressed design elements, but the orange-gold surfaces are lightly abraded and traces of original mint luster add to the attractive presentation. NGC ID# 26A6, PCGS# 8956
- 4093 1870-S AU55 NGC.** Small Squat S. The mintage for the 1870-S double eagle approaches 1 million coins, but survivors are relatively scarce in high grades. Most of the star radials are clear and the feathers are well-defined, although Liberty's portrait is soft. Reddish-gold surfaces are original and show myriad tiny abrasions. NGC ID# 26A9, PCGS# 8959
- 4094 1871-S AU55 NGC.** The well-detailed design elements of this attractive Type Two double eagle exhibit just a touch of wear on the high points. The orange-gold surfaces show a large number of minor abrasions, but none are worthy of individual mention. Much original mint luster remains intact. NGC ID# 26ND, PCGS# 8962
- 4095 1871-S AU58 PCGS. CAC. Micro S.** This peach-gold double eagle entered Old West commerce only momentarily. Bagmarks are more extensive on the obverse than the reverse, though we note thin horizontal marks above the left (facing) wing and within the upper shield. CAC: 46 in 58, 28 finer (6/18). NGC ID# 26ND, PCGS# 8962

**1872 Twenty Dollar, MS60  
Conditionally Scarce Philadelphia Issue**

- 4096 1872 MS60 PCGS.** The 1872 Liberty double eagle claims a fairly small Philadelphia Mint production total of 251,850 pieces. Few examples were saved by contemporary collectors, making Mint State examples elusive in today's market. This attractive MS60 specimen is light rose to green-gold in color and imbued with deep, rich luster. An attractive example of the Type Two design. Population: 50 in 60, 70 finer (6/18). NGC ID# 26AD, PCGS# 8963
- 4097 1872-S AU58 NGC.** The well-detailed design elements of this impressive near-Mint specimen show just a trace of wear on the high points and the pleasing orange-gold surfaces are lightly abraded. Much original mint luster remains intact. NGC ID# 26AF, PCGS# 8965

- 4098 1873 Open 3 MS61 NGC. CAC.** The eye appeal of this Philadelphia Mint 1873 Open 3 double eagle is excellent. While nothing is mentioned on the holder, deep yellow-gold surfaces present a notable degree of semiprooflikeness with partly reflective, flashy fields and slightly frosted, well-struck devices. Both sides are expectedly abraded, but the coin is obviously finer than the grade suggests. NGC ID# 26AL, PCGS# 8967
- 4099 1873 Open 3 MS62+ NGC. CAC.** NGC and CAC have each rightly recognized the high quality of this coin for the grade, awarding a Plus designation and green sticker. The strike is uniformly strong. Frosty luster glistens over pleasing orange-gold surfaces that show none of the distracting marks one might expect to find on a double eagle at this level. NGC ID# 26AL, PCGS# 8967
- 4100 1875 MS60 PCGS.** While many lower-end Mint State twenties walk a thin line between About Uncirculated and truly Uncirculated status, this fully lustrous double eagle displays mint-fresh flash and sharp devices as if it just emerged from a 250-piece mint-sewn bag. Numerous abrasions dot the surfaces as suggested by the MS60 grade, but the eye appeal remains strong. The 1875 is the only readily collectible Philadelphia eagle from the decade. NGC ID# 2547, PCGS# 8973

**1875-CC Twenty Dollar  
Mint State Sharpness**

- 4101 1875-CC — Cleaned — PCGS Genuine Secure. Unc Details. Variety 1-B.** Patient rotation beneath a light reveals delicate hairlines, but this boldly struck Carson City type coin nonetheless commands substantial eye appeal. Bagmarks are minimal, and the orange-gold surfaces teem with luster. An affordable opportunity to obtain an Uncirculated example of the issue. At least 16 die marriages coined the relatively low mintage of 111,151 pieces.

- 4102 1875-S MS61 NGC. CAC.** Hints of aquamarine accompany the fields, but this lustrous and well-struck Type Two twenty dollar is primarily peach-gold. The obverse field shows the expected number of minor abrasions, while the reverse is only lightly marked. NGC ID# 26AU, PCGS# 8975

**1876-CC Liberty Twenty, AU50  
Popular Branch Mint Type Two Issue**

- 4103 1876-CC AU50 PCGS. Variety 3-A.** Despite a substantial mintage of 138,441 pieces, the 1876-CC double eagle is surprisingly elusive in high grade. This impressive AU example displays only light wear on the well-detailed design elements and the pleasing orange-gold surfaces show the usual number of minor abrasions for the grade. Open spaces in the fields show minor chatter, but traces of prooflike reflectivity are evident in the sheltered areas. NGC ID# 26AW, PCGS# 8977

**1876-CC Liberty Twenty, AU53  
Variety 5-A, Die Crack Left of Date**

- 4104 1876-CC AU53 PCGS. Variety 5-A.** The series-high mintage of 138,441 pieces makes the 1876-CC Liberty double eagle a relatively available issue and a popular branch mint type coin. This attractive AU53 example exhibits some light wear on the design elements, while the lightly abraded orange-gold surfaces retain traces of original mint luster. A vertical die crack is seen to the left of the date and another connects most of the letters in the denomination, identifying the Variety 5-A. NGC ID# 26AW, PCGS# 8977

- 4105 1877 MS61 PCGS.** An attractive Mint State Liberty double eagle, with well-detailed design elements that show some incompleteness on the eagle's tail feathers, due to lapping. The orange-gold surfaces radiate vibrant mint luster and show the expected number of contact marks for the grade. NGC ID# 2547, PCGS# 8982

- 4106 1878 Doubled Die Reverse MS61 PCGS. Breen-7270.** Three different doubled die reverse varieties are known for the 1878. Among these, Variety 1 shows the strongest die doubling, most evident on TWENTY DOLLARS although other reverse legends are also affected. This lustrous and sharply struck peach-gold representative displays marks consistent with the MS61 level. NGC ID# 26B3, PCGS# 8985

- 4107 1878 MS61 PCGS.** Rich peach toning increases the appeal of this lustrous and well-struck double eagle. Minor marks are distributed, though they are fewer than expected for the MS61 grade level. LIBERTY is minutely die doubled, not to be confused with the three different doubled die reverse varieties known for the issue. NGC ID# 26B3, PCGS# 8985

**1882-CC Double Eagle, XF45  
Hint of Field Reflectivity**

- 4108 1882-CC XF45 NGC. Variety 1-B.** A spike in front of Liberty's eye and a crack through the base of the denomination identify this usually seen die pair. This Choice XF Carson City double eagle from a low mintage of 39,140 coins has reddish-gold surfaces that show a hint of mirroring in the fields. The obverse exhibits full radials on the stars and only minor blending over the hair curls. Lightly abraded. NGC ID# 26BF, PCGS# 8997

**1884-CC Liberty Double Eagle, AU53  
Excellent Carson City Type Coin**

- 4109 1884-CC AU53 PCGS. Variety 1-A.** The 1884-CC Liberty double eagle claims a mintage of 81,139 pieces, a small production total in absolute terms, but about average in the context of the series. The strongly rendered design elements of this impressive AU53 example show a touch of friction, and the pleasing orange-gold surfaces are lightly abraded with traces of original mint luster on both sides. NGC ID# 26BK, PCGS# 9001

**1884-CC Twenty Dollar, AU53  
Smooth for the Grade**

- 4110 1884-CC AU53 NGC. Variety 1-A.** This AU53 1884-CC double eagle has everything one would hope to find in a lightly circulated twenty dollar gold piece from the Carson City Mint. That includes rich orange-gold surfaces partly aglow with remaining mint frost and well-struck devices that show minimal high-point rub. Relatively smooth for the grade. NGC ID# 26BK, PCGS# 9001

**1890-CC Twenty, AU53**

- 4111 1890-CC AU53 PCGS Secure. Variety 1-A.** The mintmark is mostly left of the D in DOLLARS on this reverse die, while the second C is over the upright of the D on the other known variety. The fields of this pleasing piece retain considerable luster with a slightly reflective appearance. Scattered marks are trivial. NGC ID# 26BY, PCGS# 9014

**1890-CC Liberty Twenty, AU53  
Excellent Branch Mint Type Coin**

- 4112 1890-CC AU53 NGC. Variety 1-A.** The 1890-CC Liberty double eagle claims a mintage of 91,209 pieces, a small production total in absolute terms, but actually quite generous in the context of the series. This lightly abraded AU53 example offers pleasing yellow-gold surfaces that retain much original mint luster. The sharply detailed design elements show just a trace of wear and eye appeal is outstanding. NGC ID# 26BY, PCGS# 9014

**1890-S Double Eagle, MS63  
Frosty Mint Luster**

- 4113 1890-S MS63 PCGS. Medium S.** A nearly full impression includes razor-sharp stars (both sides) and feathers. Delineation of Liberty's curls is almost complete. Thick, frosty mint luster rolls over warm orange-gold surfaces. Scattered ticks and grazes are generally small. The only mark of note occurs below Liberty's eye. Elusive in higher grades. NGC ID# 26BZ, PCGS# 9015

- 4114 1894-S MS62+ ★ NGC.** This Plus-graded MS62 specimen exhibits sharply detailed design elements and bright yellow-gold surfaces that show much prooflike reflectivity in the fields. Some minor chatter and scattered contact marks limit the grade, but the Star designation attests to the outstanding eye appeal. NGC ID# 26CC, PCGS# 9026

- 4115 1898-S MS63 NGC. CAC.** This attractive Type Three double eagle exhibits well-detailed design elements, with just a touch of softness on the obverse stars. The pleasing peach-gold surfaces radiate vibrant mint luster, with terrific eye appeal. NGC ID# 26CL, PCGS# 9034

- 4116 1900 MS64 NGC.** Remarkably smooth and lustrous for even the Choice Uncirculated level, this radiant 1900 double eagle seems conservatively graded given its absence of any significant marks and the presence of a razor-sharp strike. A loupe reveals minuscule imperfections but totally problem-free, frosted surfaces and splendid eye appeal. NGC ID# 26CP, PCGS# 9037

- 4117 1903 MS64+ PCGS. CAC.** The 1904 Liberty Head double eagle is best-suited for type purposes, but the 1903 is not too far behind. Even Gems are available. This high-end near-Gem radiates frosty luster from warm yellow-gold surfaces. Fully struck with minor marks. NGC ID# 26CW, PCGS# 9043

**1903 Twenty Dollar, Lustrous MS65  
Minimal Marks for the Grade**

- 4118 1903 MS65 PCGS.** The 1903 has a low mintage for a Type Three double eagle, although not as low as several other Philadelphia twenties from the early 1900s. The strike on this Gem is razor-sharp, and the lustrous, honey-gold surfaces show only a few light abrasions. As often seen on the 1903, a few scattered copper alloy spots add reddish and brown accents to the gleaming gold coloration. The issue is rare above the Gem level, where PCGS reports just four numerically finer examples (6/18). NGC ID# 26CW, PCGS# 9043

**1904 Twenty Dollar, MS65+  
Rich, Frosty Luster**

- 4119 1904 MS65+ PCGS.** This is the single most plentiful issue in the Liberty Head double eagle series (6.2 million coins). Even Gems are widely accessible, although finer coins become moderately elusive. Smooth honey-gold surfaces are richly frosted and fully struck. A few small ticks are apparent under a lens, but they are virtually indistinguishable to the unaided eye. NGC ID# 26CY, PCGS# 9045

**SAINT-GAUDENS DOUBLE EAGLES**

- 4120 1908 No Motto MS65 PCGS. CAC.** Ex: Wells Fargo Nevada Gold. A frosty, well-struck Gem with excellent eye appeal and original wheat-gold luster. MS65 is a plentiful grade among Wells Fargo Hoard coins, although this piece is in a minority of high-end-for-the-grade examples. Housed in a green label holder with a green CAC endorsement. NGC ID# 26F6, PCGS# 9142

- 4121 1908 No Motto MS66 PCGS.** Frosty orange-gold luster is original and mostly unabraded on this Premium Gem No Motto type coin. The strike is sharp, and each side offers pleasing eye appeal. The 1908 is the most plentiful No Motto issue, ideal for type representation. NGC ID# 26F6, PCGS# 9142

**1908 No Motto Double Eagle, MS66+  
Ex: Wells Fargo, Exceptionally Clean**

- 4122 1908 No Motto, Wells Fargo Nevada, MS66+ PCGS.** Ex: Wells Fargo. Pedigreed to the famous Wells Fargo Hoard, and exhibiting the exceptional preservation and quality that are characteristic of so many of those coins. This Plus-graded Premium Gem is richly frosted with warm honey and pale rose-gold hues. The motifs are mostly crisp, and there are no mentionable surface flaws.  
Ex: *FUN Signature (Heritage, 1/2015)*, lot 7754, where it realized \$2,467.50 NGC ID# 26F6, PCGS# 99142 Base PCGS# 9142

- 4123 1908 Motto MS63 PCGS.** A satiny lemon-gold double eagle with dusky gray toning on Liberty's high points. Only a brief vertical mark at 10 o'clock merits mention. Much scarcer than its 1908 No Motto counterpart.  
Ex: *Long Beach Signature (Heritage, 6/2006)*, lot 3985. NGC ID# BNAK, PCGS# 9147

- 4124 1909/8 FS-301 AU58 PCGS.** About half of the low-mintage 1909 Philadelphia issue was the overdate variety, caused when a working die was hubbed with two different dates. The present yellow-gold near-Gem retains considerable mint luster and displays only unimportant distributed marks.  
Ex: *Long Beach Signature (Heritage, 9/2005)*, lot 10231, where it brought \$862.50. NGC ID# 37XB, PCGS# 145740 Base PCGS# 9151

**1911-D/D Twenty Dollar, MS65+  
Incredibly Sharp Strike**

- 4125 1911-D/D FS-501 MS65+ PCGS. CAC.** The mintmark is repunched east of the primary. Examples of this variety grading finer than MS65 are scarce. This Plus-designated CAC coin displays vibrant orange-gold luster and remarkably clean surfaces — only a few marks on Liberty's raised leg are noted. The strike is sharp throughout the border stars, the torch, Liberty's fingers, and the Capitol. NGC ID# 26FK, PCGS# 145010 Base PCGS# 9158

- 4126 1914 MS62 NGC.** An attractive MS62 example of this early series issue, from a small mintage of 95,250 pieces, this coin offers well-detailed design elements and pleasing orange-gold surfaces that show the expected number of minor contact marks for the grade. Vibrant mint luster adds to the considerable eye appeal. NGC ID# 26FS, PCGS# 9164

**1915 Double Eagle, MS64  
Optimal Collector Grade**

- 4127 1915 MS64 PCGS.** The near-Gem MS64 level is an optimal condition for many collectors, since the certified population of 1915 double eagles drops dramatically at the MS65 grade. This is a visually impressive example, with vibrant orange-gold color and strong cartwheel luster that reveals occasional lilac accents. The strike is sharp on both sides, with minor abrasions that cause little distraction. PCGS shows just 54 finer examples, all at the MS65 level (6/18). NGC ID# 26FV, PCGS# 9167

- 4128 1923 MS64+ PCGS Secure. CAC.** A Plus-graded Choice example of this popular type issue, from a mintage of 566,000 pieces. The design elements are well-detailed and the lustrous orange-gold surfaces show a few scattered, minor contact marks. Eye appeal is outstanding. NGC ID# 26G5, PCGS# 9175

- 4129 1923-D MS65 PCGS.** The 1923-D is both plentiful in Gem condition and usually eye-appealing, as the present coin represents, making it ideal for type collectors. Sharp design elements reside amid frosty original luster that shows few abrasions. Bright yellow-gold interiors cede to vivid tangerine-orange border color. NGC ID# 26G6, PCGS# 9176

- 4130 1923-D MS66 PCGS.** Exemplary preservation confirms the Premium Gem quality of this 1923-D Saint-Gaudens double eagle. The specialist of this series will appreciate a lack of abrasions on the high points of Liberty's figure, which sets this piece apart from most of its peers. Frosty prairie-gold luster is original. NGC ID# 26G6, PCGS# 9176

**1923-D Twenty Dollar, MS66+  
Frosted Mint Luster and Subtle Patina**

- 4131 1923-D MS66+ NGC.** The 1923-D is undoubtedly one of the most, if not the most attractive of all Saint-Gaudens twenties. Mint luster is consistently thick and many coins exhibit rich red, green, and lilac coloration. This particular example shows the expected mint frost and slightly variegated reddish-gold and yellow-gold color. Sharply struck throughout. NGC ID# 26G6, PCGS# 9176

- 4132 1924 MS66 NGC.** The 1924 is a popular type collector and investor coin. This Premium Gem displays sharp motifs and frosty orange-gold luster with no significant abrasions. Eye appeal is pleasing and the fields shimmer beneath a light. NGC ID# 26G7, PCGS# 9177

- 4133 1927 MS66 PCGS Secure.** The 1927 double eagle is plentiful in MS66, but PCGS has seen only two dozen Superb Gems finer (6/18). This high-end coin displays a bold strike and original, frosty mint luster. The coloration includes shades of yellow-gold, lilac, peach, and orange. NGC ID# 26GG, PCGS# 9186

## COMMEMORATIVE SILVER

- 4134 1900 Lafayette Dollar MS64 PCGS Secure. CAC. DuVall 1-B.** Dusky forest-green and lavender-red toning embraces this coruscating and crisply struck Choice commemorative. Marks are limited to a few ticks behind Washington's head and a thin vertical line on Lafayette's jaw. Only a small fraction of MS64 examples have been confirmed by CAC. NGC ID# BYKW, PCGS# 9222
- 4135 1935/34 Boone MS67+ PCGS. CAC.** Brightly lustrous and sharp, this high-end Superb Gem possesses extraordinary eye appeal. Some daubs of toning appear around the borders, but the interiors are essentially brilliant. This variety has the small 1934 date in the field above PIONEER YEAR, with the coinage date of 1935 at the lower border. Examples are seldom offered in this condition. Population: 71 in 67 (10 in 67+), 3 finer. CAC: 30 in 67, 0 finer (6/18).  
*Ex: Central States Signature (Heritage, 4/2012), lot 7064, which realized \$2,530. NGC ID# 34SZ, PCGS# 9262*
- 4136 1938 Boone PDS Set MS66 PCGS.** A mere 2,100 sets were issued. Separately housed in holders bearing consecutive certification numbers. The set includes: **1938 MS66**, immaculate aside from minor obverse rim contact; **1938-D MS66**, brilliant except for a small spot west of the date; and a **1938-S MS66**, lightly toned and lustrous with the intricate strike customary for the type. (Total: 3 coins) NGC ID# BYG6, PCGS# 9277
- 4137 1936 Cincinnati MS66 PCGS.** This fascinating silver commemorative celebrates the 50th anniversary of Cincinnati, Ohio as "a music center of America." Dusky, mainly silver centers cede to glints of gold, blue, and crimson peripheral toning. A few flecks on Steven Foster's portrait are the only ones we can find. PCGS reports 20 higher grading events (5/18). NGC ID# BYCJ, PCGS# 9283
- 4138 1936-D Cincinnati MS66 PCGS. CAC.** Splashes of colorful patina adhere to the entire obverse border and parts of the reverse rim. The interiors are satiny silver-gray with pale almond-gold elements. A loupe reveals a handful of inconspicuous ticks, but this Premium Gem is undeniably high-end for the grade. NGC ID# BYCK, PCGS# 9284
- 4139 1936-S Cincinnati MS66 PCGS. CAC.** This Premium Gem shows a broad band of rose-red across the reverse border. The obverse is mostly dusky silver-gray. All three low-mintage Cincinnati half dollars are semikey issues in the silver commemorative series. Merely 5,000 of each were distributed to the public plus a small number reserved for assay purposes. NGC ID# BYCL, PCGS# 9285
- 4140 1893 Columbian MS67 NGC.** This Superb Gem Columbian half dollar is more than five full grade points higher than the typical survivor. The reverse displays variegated multicolor toning in pleasing pastel shades, while the obverse is mostly satiny stone-gray with faint colorful accents. Preservation is exemplary. Census: 37 in 67 (1 in 67+, 6 in 67★), 2 finer (5/18). NGC ID# BYGG, PCGS# 9297
- 4141 Three-Piece Lot of 1936 Delaware Half Dollars MS66 PCGS.** Each coin in this three-piece lot is graded MS66 and encapsulated in consecutively numbered PCGS holders. The coins feature dusky silver surfaces blanketed in a variety of original tones that include cobalt-blue, golden-orange, green, and violet. The Delaware commemorative half dollar claims a distribution of 20,993 examples and curiously features a "1936" date on the obverse and "1938" on the reverse. (Total: 3 coins) NGC ID# BYGJ, PCGS# 9301

## 1936 Gettysburg Half, MS67+ Original, Problem-Free Surfaces

- 4142 1936 Gettysburg MS67+ NGC. CAC.** The surfaces display the spotty golden-russet toning one expects from a coin that has resided for decades in an original holder of issue. There is also a pronounced lack of coin-to-coin contact, another indication this piece spent many years in a cardboard holder. The mint luster is softly frosted, as expected. An exceptional and unquestionably original Gettysburg half. Census: 72 in 67 (6 in 67+, 6 in 67★, 1 in 67+★), 4 finer. CAC: 48 in 67, 1 finer (5/18). NGC ID# BYGM, PCGS# 9305

## 1936 Gettysburg Half Dollar, MS67+ Light Champagne-Gold Patina

- 4143 1936 Gettysburg MS67+ NGC. CAC.** A light champagne-gold cast covers the whole of this softly lustrous Plus-graded Superb Gem Gettysburg half dollar. The Union and Confederate soldiers, as well as their respective shields, are boldly rendered. No marks are seen. The net distribution for this historically significant issue was 26,928 pieces. Census: 72 in 67 (6 in 67+, 6 in 67★, 1 in 67+★), 4 finer. CAC: 49 in 67, 1 finer (6/18). NGC ID# BYGM, PCGS# 9305
- 4144 1922 Grant With Star MS64 PCGS.** With only 4,256 of the Star variety produced, the Grant was one of the early 1920s commemoratives that created artificial varieties with design changes, a practice made infamous by later issues in the 1930s. This example has light gold patina at the periphery and pearl-gray surfaces with heavy die polish. A few small marks on the obverse preclude Gem status for this well-struck piece.  
*Ex: Denver ANA Signature (Heritage, 8/2006), lot 3852, realized \$2,300; Milwaukee ANA Signature (Heritage, 8/2007), lot 1201, realized \$2,300. NGC ID# BYPP, PCGS# 9307*

**1922 Grant Half Dollar, Satiny MS65  
With Star Variant**

**4145 1922 Grant With Star MS65 PCGS.** This satiny Gem displays faint hints of tan-gold and lilac color across otherwise brilliant surfaces, with no distracting abrasions visible. Moderate strike softness on Grant's hair and the central cabin is present on many With Star examples of this popular commemorative. The With Star Grant Memorial half dollar is the scarcer of the two types. PCGS has certified 52 pieces finer (6/18). NGC ID# BYPP, PCGS# 9307

**4146 1928 Hawaiian — Cleaned — PCGS Genuine Secure. AU Details.** The low-mintage Hawaiian is key to the 50-piece classic silver commemorative type set. This is a sharply defined, pearl-white example. Both sides display faint hairlines, but the satiny surfaces are unmarked save for a minor reed impression on the cheekbone.

**4147 1921 Pilgrim MS67 NGC.** This Superb Gem is among the finest Pilgrim Tercentenary half dollars at NGC, showing luminous, frosty luster with pearl-white color and a few peripheral freckles of russet. The preservation is remarkable and eye appeal excels. Census: 31 in 67 (1 in 67+, 6 in 67 ★, 1 in 67+ ★), 0 finer (6/18). NGC ID# BYHS, PCGS# 9360

**4148 1936-D Texas MS68 NGC. CAC.** Attractive shades of sea-green and lavender toning visit the virtually pristine surfaces of this spectacular MS68 example. The design elements are sharply detailed and vibrant mint luster shines through the toning. Census: 15 in 68 (1 in 68 ★), 0 finer. CAC: 7 in 68, 0 finer (5/18). NGC ID# BYJF, PCGS# 9387

**4149 1938 Texas MS67 PCGS. CAC.** The 1938 Texas half dollar is scarce in MS67 and rare any finer. CAC-approved coins are in the minority overall. This Superb Gem displays a bold strike and satin luster with delicate champagne-colored toning. Eye appeal abounds. Population: 67 in 67 (5 in 67+), 1 finer. CAC: 38 in 67, 1 finer (5/18). NGC ID# BYJL, PCGS# 9394

**4150 1938-D Texas MS67+ PCGS. CAC.** The 1938-D Texas Centennial half dollar is scarce in MS67, and only two numerically finer coins have been seen at PCGS (5/18). This Plus-graded Superb Gem offers delicate satiny luster with pale lavender-blue obverse toning and deeper gold, gray, and amber reverse patina that also shows the occasional pine-green accent. NGC ID# BYJM, PCGS# 9395

**4151 1951 Booker T. Washington MS67 PCGS.** Shades of lavender and sea-green toning enhance the impeccably preserved surfaces of this spectacular Superb Gem. Vibrant mint luster shines through the patina, with terrific eye appeal. Population: 26 in 67 (4 in 67+), 0 finer (5/18). NGC ID# BYK9, PCGS# 9424

**4152 1951-D Booker T. Washington MS67 PCGS. CAC.** An exceptional Superb Gem representative, with sharply detailed design elements and impeccably preserved surfaces that radiate vibrant mint luster throughout. Hints of pale gold, lime-green, and amber toning add to the outstanding eye appeal. Population: 41 in 67 (2 in 67+), 0 finer. CAC: 42 in 67, 0 finer (5/18). NGC ID# BYKA, PCGS# 9425

**4153 1952 Washington-Carver MS67 PCGS. CAC.** The 1952 Washington-Carver half dollar had the highest distribution of the series, estimated at more than 1.1 million coins, ideal for type representation. This Superb Gem representative is among the finer-known survivors, which are conditionally rare at this lofty grade level. Radiant mint luster illuminates mottled lilac-gray, olive, and champagne toning, while the design elements are sharply struck, and the preservation is excellent. Population: 31 in 67 (7 in 67+), 1 finer. CAC: 27 in 67, 0 finer (5/18). NGC ID# BYL3, PCGS# 9434

**COMMEMORATIVE GOLD**

**4154 1903 Louisiana Purchase, McKinley Gold Dollar MS66 PCGS.** A delightful Premium Gem McKinley gold dollar, from a distribution of 17,500 pieces, this coin exhibits sharply detailed design elements and vibrant mint luster throughout. The well-preserved orange-gold surfaces show slight roughness in the reverse field, near the O in ONE. NGC ID# BYLE, PCGS# 7444

**1903 Louisiana Gold Dollar, MS66 Prooflike  
McKinley Portrait**

**4155 1903 Louisiana Purchase, McKinley Gold Dollar, MS66 Prooflike NGC.** Portraits of President McKinley and President Jefferson are found on the Louisiana Purchase commemorative gold dollars. This impressive Premium Gem has brilliant yellow-gold surfaces and bold design motifs with fully prooflike fields. An excellent example from fresh dies. Only 15 examples of this commemorative variety have earned an NGC Prooflike designation. Census: 2 in 66 Prooflike, 0 finer (6/18). NGC ID# BYLE, PCGS# 7444

**4156 1904 Lewis and Clark Gold Dollar MS64 PCGS.** An attractive Choice specimen of the popular 1904 Lewis and Clark gold dollar, with sharply detailed design elements and lustrous orange-gold surfaces that show only minor signs of contact. Housed in a green label holder. NGC ID# BYLE, PCGS# 7447

**4157 1915-S Panama-Pacific Gold Dollar MS66 NGC.** A sharp Premium Gem, showing satiny rose-gold luster and unmarked surfaces. The smallest of the Panama-Pacific gold commemoratives, the dollar is also the most plentiful overall. Just 15,000 pieces were distributed, but many high-grade examples were preserved. Nonetheless, the issue is conditionally scarce finer than the present representative. NGC ID# BYLH, PCGS# 7449

**4158 1915-S Panama-Pacific Gold Dollar MS66 PCGS. CAC.** This razor-sharp Premium Gem displays original orange, peach, and straw-gold coloration with hints of lilac and green viewable under a loupe. No contact marks are apparent on either side. The Pan-Pac gold dollar is scarce in finer grades, especially with CAC endorsement. NGC ID# BYLH, PCGS# 7449

**4159 1915-S Panama-Pacific Quarter Eagle AU58 NGC.** Only the slightest trace of wear shows on the high points of the design elements, and this attractive near-Mint specimen displays lightly abraded orange-gold surfaces, with satiny mint luster on both sides. From a small distribution of 6,749 pieces. NGC ID# BYLP, PCGS# 7450

**4160 1915 Panama-Pacific Exposition Frame and Holders.** This lot includes: a classic Shreve & Co. copper-and-glass frame, 200 mm x 250 mm, a single slot for each commemorative type, a pink upper banner with gold lettering, five gray informational inserts with gold lettering, excellent condition of copper and glass; the ring on the back is missing, easel is present, slight fraying of leatherette corners; and **two five-coin leatherette holders**, black-and-gold rectangular exterior, purple velvet interior with five slots for the different commemorative varieties, working hinges, one information card and one outer cream-white box are present. No coins are included in the lot. (Total: 3 items)

**4161 1917 McKinley Gold Dollar MS66 PCGS.** The 1917 McKinley gold dollar claims a distribution of 10,000 pieces. This impressive Premium Gem exhibits well-detailed design elements and well-preserved orange-gold surfaces, with vibrant mint luster throughout. NGC ID# BYLL, PCGS# 7455

**4162 1926 Sesquicentennial Quarter Eagle MS65 PCGS.** A lovely, frosty Gem example of the final gold issue in the classic commemorative series. This luminous Sesquicentennial quarter eagle, struck to commemorate the 150th anniversary of the signing of the Declaration of Independence, shows no major abrasions and has great eye appeal. A few tiny coppery discolorations appear on each side under a loupe. NGC ID# 2FE9, PCGS# 7466

## MODERN BULLION COINS

### 1989 Half-Ounce Gold Eagle, MS70 Scarce This Fine

**4163 1989 Half-Ounce Gold Eagle MS70 NGC.** In 1989, half-ounce Gold Eagle coinage was nearly identical for business strikes and proofs (44,829 of the former, 44,798 of the latter). Top-grade examples of the regular issue are scarce and in demand among Registry Set collectors. This piece displays a full strike and satiny yellow-gold luster with perfect surfaces. NGC ID# 26NA, PCGS# 9832

**4164 1991 Silver Eagle MS70 PCGS.** More than 7.1 million one-ounce Silver Eagles were struck in 1991, but few survivors can match the quality and eye appeal of the present coin. This technically perfect example is fully struck, and both sides radiate vibrant mint luster. PCGS has graded 34 examples in MS70 (6/18). NGC ID# 26JE, PCGS# 9846

**4165 1994 Silver Eagle MS70 NGC.** A technically perfect and flawless example, this 1994 American Eagle one-ounce silver piece has reached the pinnacle of grading as an MS70. Both sides are brilliant and highly lustrous with no evidence of toning, featuring full design definition. NGC ID# 26JL, PCGS# 9876

### 1995-W Silver Eagle, PR69 Ultra Cameo Proof Series Key

**4166 1995-W Silver Eagle PR69 Ultra Cameo NGC.** In 1995, the West Point Mint issued 30,125 10th anniversary bullion program proof sets, which included a W-mintmarked 1995 Silver Eagle proof that was not offered in any other capacity to collectors. The 1995-W is now the unrivaled key to the Silver Eagle series. This near-flawless example is fully struck and untuned, showing stark white-on-black contrast. NGC ID# CFWX, PCGS# 9887

### 1995-W Silver Eagle, PR69 Deep Cameo Virtually Flawless, Registry Set Worth

**4167 1995-W Silver Eagle PR69 Deep Cameo PCGS Secure.** Registry Set collectors not wanting to spend the money necessary for a PR70 Deep Cameo 1995-W Silver Eagle will appreciate this PR69 Deep Cameo coin. Certified by PCGS, it is flawlessly struck and untuned. Under a loupe, the surfaces are virtually indistinguishable from a PR70 coin to the average viewer. Only 30,125 examples of this key date were distributed. NGC ID# CFWX, PCGS# 9887

**4168 1995-W Five-Piece Proof Eagle Set PR69 Ultra Cameo NGC.** A matched set of the five bullion denominations for 1995 from the West Point Mint (one-ounce, half-ounce, quarter-ounce, and tenth-ounce Gold Eagles and one-ounce Silver Eagle). All coins were struck in proof format and all are graded PR69, with fully struck design elements, reflective fields, and virtually pristine surfaces. The 1995-W Silver Eagle is the celebrated key to the series because of its limited mintage of 30,125 pieces. (Total: 5 coins) PCGS# 542350 Base PCGS# 9887

**4169 1999-W Quarter-Ounce Gold Eagle, Unfinished Proof Dies, FS-401, MS69 PCGS.** A fully struck caramel-gold representative that boasts dynamic luster and pristine preservation. Bullion coin production soared at the West Point Mint in 1999, a year of Y2K panic. Demand may have contributed to the present mint error, an Uncirculated finish coin whose mintmark indicates it should have been struck as a deep cameo proof. NGC ID# 26MG, PCGS# 511607 Base PCGS# 99942

**4170 1999-W Quarter-Ounce Gold Eagle, Unfinished Proof Dies, FS-401, MS69 PCGS.** Upon first glance, this flawless Uncirculated finish quarter-ounce gold eagle does not appear out of the ordinary, until the West Point mintmark is observed. It should only appear on deep cameo proofs, or, beginning in 2006, on burnished finish Uncirculated examples. A similar mint error is known on 1999-W tenth-ounce gold eagles. The FS-401 1999-W ten dollar ranks among the scarcest modern bullion issues. NGC ID# 26MG, PCGS# 511607 Base PCGS# 99942

- 4171 1999-W Quarter-Ounce Gold Eagle, Unfinished Proof Dies, FS-401, MS69 PCGS.** The numismatic community was surprised by the discovery that one-tenth ounce and one-quarter ounce die pair of 1999-W gold eagles were struck in Uncirculated format bearing the West Point mintmark. Mintmarked Gold Eagles of the Y2K year were intended to be Deep Cameo proofs. The varieties, although collectible, are stoppers in their series. This is a fully struck apricot-gold example with a few pinpoint imperfections on each side. NGC ID# 26MG, PCGS# 511607 Base PCGS# 99942

**2000 Silver Eagle, MS70  
Among the Scarcest Dates at This Grade Level**

- 4172 2000 Silver Eagle MS70 NGC.** This is one of the last truly scarce American Silver Eagles in MS70 before the populations start to inflate dramatically in 2002. Only a handful of other issues are more elusive in this ultimate grade level. Not a speck of color or a single surface mark appear on this unimprovable representative. Both sides are brilliant with satiny mint luster. NGC ID# 26JZ, PCGS# 9949

- 4173 (2005) "1876" \$100 Gold Union Ultra Cameo Gem Proof NGC.** Made from one ounce of pure gold, per the NGC insert. This issue was struck by the private New York Mint with the Smithsonian Institution receiving a portion of the sales revenue. The designs are based on a drawing by U.S. Mint Engraver George T. Morgan that was never struck as a pattern. A polished wooden presentation case and a certificate of authenticity (#194 of first 250 struck) are included.

**TERRITORIAL GOLD**

**1852 Assay Office Ten, VF Details  
K-12a, Small Denomination Gold Rush Issue**

- 4174 1852 Assay Office Ten Dollar — Cleaned — NGC Details. VF. K-12a, R.4.** The border beading is faint on this piece, partly due to wear. The central devices are nonetheless well-defined, showing most major details. Moderately abraded surfaces are bright yellow-gold in color and show an obvious cleaning but remain moderately appealing for the type. U.S. Assay Office gold pieces of this denomination are highly sought-after.  
*Ex: Old Colony Collection (ANR, 12/2005), lot 1019.  
From The Kadison Family Collection.*

**CALIFORNIA FRACTIONAL GOLD**

**1853 Liberty Octagonal Dollar, AU55  
M. Deriberpie, BG-525**

- 4175 1853 Liberty Octagonal Dollar, BG-525, High R.6, AU55 PCGS.** This Period One Octagonal dollar was produced by M. Deriberpie, whose name appears along the lower reverse border as DERIB. Four major varieties are known, this one with stars on the reverse and the maker's name, as previously mentioned. Green-gold surfaces show few major marks, but noticeable blending occurs over the portrait. The reverse is marginally better-defined. Population: 2 in 55, 8 finer (5/18). NGC ID# 2BLP, PCGS# 10502

- 4176 1871 Liberty Octagonal 25 Cents, BG-717, R.3, MS67 PCGS Secure.** The widely spaced date helps distinguish BG-717 from other Frontier, Deviercy & Co. 1871 varieties. A lustrous and pristine honey-gold Superb Gem. The strike is crisp and the quality is unsurpassable. Population: 9 in 67, 0 finer (6/18). NGC ID# 2BMU, PCGS# 10544

- 4177 1859 Liberty Octagonal 50 Cents, BG-901, High R.6, MS64 NGC.** Die State II. The so-called "Blind Head" portrait. The star near the tip of the coronet identifies this 1859 Octagonal 50 cent variety. Yellow-gold surfaces are typically struck with crude, uneven motifs that contrast mildly against overtly semiprooflike fields. Contact marks are nearly unseen. NGC ID# 2BVV, PCGS# 10759

- 4178 1869 Liberty Octagonal 50 Cents, BG-907, Low R.5, MS67 PCGS Secure.** A magnificent apricot-gold Superb Gem. The obverse is satiny, the reverse is prooflike, and both sides appear pristine. This Frontier & Co. variety lacks a fraction bar. The wreath is undersized and entered somewhat high. Nonetheless, DOLLAR is a close fit within the wreath. The reverse exhibits delicate concentric die lines. Population: 2 in 67, 0 finer (6/18). NGC ID# 2BW3, PCGS# 10765

**1870 Round Liberty Head Half Dollar  
BG-1010, MS67**

- 4179 1870 Liberty Round 50 Cents, BG-1010, R.3, MS67 PCGS Secure.** A collectible Period Two round half dollar made by Frontier & Co. This variety frequently comes in Uncirculated condition, but few examples are known finer than MS65. This Superb Gem is among the finest known. Most of the design elements are well brought up, and the original straw-gold surfaces yield frosty luster that is devoid of abrasions. A highly appealing example. NGC ID# 2BYK, PCGS# 10839

## COINS OF HAWAII

- 4180** 1847 Hawaii Cent MS62 Red and Brown PCGS. M. 2CC-5. Plain 4, 13 berries. Fire-red accompanies the legends and motifs of this single-year Hawaiian type coin. Blushes of charcoal-gray toning are east of the date and near the HA in HAWAII. The crisply struck surfaces are smooth aside from a flan depression on the reverse border at 1 o'clock. Listed on page 425 of the 2019 *Guide Book*. NGC ID# 2C52, PCGS# 10966
- 4181** 1879 T. Hobron, Kahului-Wailuku 12 1/2 Cent Railroad Token, 6/2 Stars, Thin Planchet — Obverse Scratches — NGC Details. AU. M. 2TE-8. Two die varieties are known for Metcalf 2TE-8. The present piece is the Small 8 variety, moderately more available than its Large 8 counterpart. Thomas Hobron was a railroad magnate in Hawaii territory. His one-bit tokens may have been used to pay employees, or provide change for merchants transporting sugar cane via his railway. This chocolate-brown example has a few horizontal pinscratches beneath the issuer's initials. The reverse is lightly double struck. Listed on page 426 of the 2019 *Guide Book*.

## PATTERNS

### 1855 Flying Eagle Cent in Copper or Bronze Judd-168 Original, PR63 Red and Brown

- 4182** 1855 Flying Eagle Cent, Judd-168 Original, Pollock-193, R.4, PR63 Red and Brown PCGS. Thirteen stars surround an eagle that is flying slightly upward, similar to the Christian Gobrecht / Titian Peale flying eagle design for the Gobrecht dollars (and soon the Flying Eagle cents), and yet the awkward, bunched position of the eagle's neck renders the design ineffective. The date 1855 is below with slanted 5s, and the reverse is similar to the large cent. The planchet is slightly smaller than the large cent, part of the effort to reduce the size of the "old coppers." Struck in bronze or copper with a plain edge. As noted on USPatterns.com: "... extremely rare showing any red color." The present specimen offers considerable mint red on each side, with a few darker flecks scattered about the surfaces.  
*Ex: Dallas Signature (Heritage, 10/2006), lot 2364, where it realized \$2,300.*  
*From The Kadison Family Collection.* NGC ID# 29AG, PCGS# 11721

### 1863 Indian Cent in Bronze Judd-299, PR64 Brown

- 4183** 1863 One Cent, Judd-299, Pollock-359, R.3, PR64 Brown PCGS. A transitional variety similar to the 1864 No L bronze cent but dated 1863; the regular-issue cents of this year were still of the copper-nickel composition. Struck in bronze, medal alignment, on a thick planchet with a plain edge. USPatterns.com states that approximately 200 examples are known of this popular pattern, and very few retain any traces of mint red. This piece has definite proof mirrors on each side with muted red and blue-brown patina. NGC ID# 29ED, PCGS# 60454

### 1864 No L Indian Cent, MS65 Judd-353, Aluminum-Bronze Alloy

- 4184** 1864 No L Indian Cent, Judd-353, Pollock-425, Snow-PT1a-2, Low R.6, MS65 NGC. CAC. Indian cent pattern struck from the regular dies without the L initial on the bust of the Indian. Struck in an aluminum-bronze alloy with a plain edge. Pollock-425 comes with a 5% aluminum alloy (Judd-354), a 7% aluminum alloy (Judd-353), and a 10% aluminum alloy (Judd-355). The three Judd varieties are not readily distinguished without elemental analysis. Usually seen with noticeable striking deficiencies, but the present Gem shows excellent definition on the feather tips and at the bottom of the truncation of the bust of the Indian. The surfaces are pumpkin-gold save for a blush of tan toning on the upper obverse. Census: 2 in 65, 1 finer (5/18). NGC ID# 29GC, PCGS# 60520

**1870 Standard Silver Ten Cents in Silver  
Judd-843, PR66**

- 4185 1870 Standard Silver Ten Cents, Judd-843, Pollock-942, Low R.6, PR66 NGC.** The obverse features the head of Liberty with a diadem in her hair and no stars on the tiara. A scroll with IN GOD WE TRUST curves beneath the bust rather than the date, which is shown on the reverse. The reverse conveys simplicity of design with 10 CENTS in the center, surrounded by a wreath of cotton and corn and with STANDARD above. Struck in silver with a reeded edge. A lovely Premium Gem, this Standard Silver dime exhibits blue, violet, and gold toning over fully mirrored fields and sharp design elements. NGC ID# 29VK, PCGS# 61087

**1882 Proof Liberty Nickel Pattern  
Judd-1684, AU Details**

- 4186 1882 Liberty Head Five Cents, Judd-1684, Pollock-1886, Low R.6 — Surfaces Smoothed — PCGS Proof Genuine. AU Details.** One of numerous interesting 1882 Liberty nickel patterns, Judd-1684 differs from the issued 1883 design in that UNITED STATES OF AMERICA is on the obverse, instead of stars. On the reverse, the wreath and prominent V are larger, and E PLURIBUS UNUM is centered across the upper margin. Struck in nickel with a plain edge. A lightly circulated gunmetal-gray example of this rare pattern. Unobtrusively smoothed, most apparent in the reverse field above the Roman numeral V.

**1882 Liberty Nickel, Struck in Nickel  
Judd-1690, PR64**

- 4187 1882 Liberty Head Five Cents, Judd-1690, Pollock-1892, R.5, PR64 PCGS.** A popular precursor to the Liberty nickel. Dated 1882 instead of 1883, and the stars are arranged differently relative to the portrait, particularly star 10. The reverse is identical to the issued 1883 No Cents nickel. Struck in nickel with a plain edge. An intricately struck and mark-free cream-gray specimen. A few tiny flecks are noted near star 1 and the date. NGC ID# 2AKC, PCGS# 62095

**GSA DOLLARS**

- 4188 1878-CC GSA MS64 Prooflike NGC.** A brilliant and lustrous first-year near-Gem. The strike is bold, and marks are inconsequential relative to the grade. Flashy fields further the eye appeal. The 1878-CC is scarcer in a GSA holder than the 1880-CC through 1885-CC issues. A GSA box and certificate accompany the lot. NGC ID# 253M, PCGS# 518846 Base PCGS# 7081
- 4189 1879-S GSA MS66 NGC. CAC.** As of (6/18), NGC has certified nearly 110,000 1879-S dollars, but examples in GSA holders are very scarce. This is a remarkable Premium Gem that boasts dynamic luster, a bold strike, and exceptionally clean surfaces. Only a field tick above the arrowheads precludes an even higher grade. NGC ID# 253X, PCGS# 519010 Base PCGS# 7092
- 4190 1880-CC GSA MS65+ NGC. VAM-8.** A whisper of straw-gold and silver-gray toning graces this lustrous and refreshingly unabraded Gem. The centers lack a complete impression, but the quality is nonetheless exceptional for the third-party grade. A GSA box and certificate is included with the lot. NGC ID# 2542, PCGS# 518851 Base PCGS# 7100
- 4191 1881-CC GSA MS66 NGC. VAM-3.** The obverse displays only a hint of peach toning near 4 o'clock. The reverse margin exhibits rich tan-brown and steel-blue patina. A crisply struck and thoroughly lustrous high-grade Carson City dollar. The fields are remarkably smooth, and the portrait shows only wispy contact. A GSA box accompanies the lot. NGC ID# 2547, PCGS# 518863 Base PCGS# 7126
- 4192 1882-CC VAM-2A1, 1 Top Below Left 8, GSA MS66 NGC.** A Hit List 40 Variety. The diagonal line beneath the first 8 in the date is a remnant of the top of a misplaced 1. An early but clashed die state of VAM-2, before the dies were polished to create VAM-2A2. Booming luster sweeps this sharply struck and well-preserved Carson City GSA dollar. Only a hint of golden patina adorns both sides. NGC ID# 254H, PCGS# 518866 Base PCGS# 7134
- 4193 1883-CC GSA MS66+ NGC. CAC. VAM-5A.** Lemon-gold toning graces the lower obverse of this high-grade Carson City GSA type coin. The strike is good, and the lustrous surfaces are magnificently free from marks. VAM-5A shows a clashed N (from IN) in front of Liberty's neck. NGC ID# 254S, PCGS# 518869 Base PCGS# 7144
- 4194 1885-CC GSA MS65+ NGC. CAC. VAM-3.** A lightly toned and thoroughly lustrous example of the lowest mintage Carson City Morgan issue. The central obverse exhibits faint roller marks, as made, but the fields are smooth and the portrait shows only unimportant indications of contact. NGC ID# 254M, PCGS# 518875 Base PCGS# 7160
- 4195 1885-CC GSA MS66 NGC. VAM-2B.** Lemon-gold toning dominates the obverse, though the lower-right obverse border displays a blush of cherry-red. The reverse remains brilliant. A nicely struck and well-preserved Premium Gem. Outstanding quality for this low-mintage Carson City issue. NGC ID# 254M, PCGS# 518875 Base PCGS# 7160

1891-CC Silver Dollar, MS63  
GSA Hoard

**4196** 1891-CC GSA MS63 NGC. CAC. An outstanding Select Mint State example, this 1891-CC Morgan silver dollar remains in its black plastic case as released by the General Services Administration nearly half a century ago. Both sides of this satiny silver dollar are brilliant and untoned, with reflective fields and minimal marks for the grade. NGC ID# 255H, PCGS# 518881 Base PCGS# 7206

**4197** 1891-CC Spitting Eagle, VAM-3, GSA, MS62 NGC. CAC. A Top 100 Variety. The die lump beneath the eagle's beak identifies the "Spitting Eagle" variety, often encountered on '91-CC dollars in GSA holders, but nonetheless popular. Lustrous and brilliant with clean fields and the expected number of wispy facial grazes. NGC ID# 255H, PCGS# 544108 Base PCGS# 518881

REDFIELD DOLLARS

**4198** 1883 Morgan Dollar MS62 NGC. An impressive 1883 Morgan dollar from the famous Redfield Hoard, housed in the red Paramount holder (where it was graded MS65). The lustrous surfaces show some minor, scattered contact marks, mostly on the obverse, with sea-green and lavender toning at the peripheries. The design elements are sharply detailed throughout and overall eye appeal is strong for the grade. NGC ID# 254G, PCGS# 7142

1883 Morgan Dollar, MS63  
Redfield Hoard Survivor

**4199** 1883 Morgan Dollar MS63 NGC. An attractive Select Morgan dollar from the Redfield Hoard, still housed in the red Paramount holder (where it was graded MS65). The mostly brilliant centers are surrounded by a ring of sea-green and turquoise toning. The design elements are sharply detailed throughout and the lustrous surfaces show some scattered, minor contact marks on both sides. NGC ID# 254G, PCGS# 7142

**4200** 1891-S Morgan Dollar MS65 NGC. Ex: Redfield Collection. Housed in a red Paramount holder designated "Mint State 65." Dappled russet-brown and apple-green toning graces the borders of this lightly abraded better-date dollar. Dazzling cartwheel luster and a razor-sharp strike further ensure the quality. NGC ID# 255K, PCGS# 7210

ERRORS

1999 One-Ounce Gold Eagle, MS69  
Struck-Through Obverse and Reverse

**4201** 1999 One-Ounce Gold Eagle — Struck-Through Obverse and Reverse — MS69 PCGS Secure. A strike-through is present on the lower-right border of Liberty's gown. The reverse also has a strike-through, which affects D STAT. The triangular obverse strike-through is 10 mm long with a base of 6 mm. The rectangular reverse strike-through is 9 mm long and 2 mm wide. A lustrous high-grade example of this popular bullion issue.

1999 One-Ounce Gold Eagle, MS69  
Pie-Shaped Reverse Strike-Through

**4202** 1999 One-Ounce Gold Eagle — Struck Through Reverse — MS69 PCGS Secure. The obverse of this pristine bullion coin has a normal appearance, but the reverse exhibits a pie-shaped depression, 15 mm in length and 8 mm at its widest. The strike-through extends from the flying eagle's claws to the rim at 7 o'clock. The design is present, but very blurry, within the strike-through, which was perhaps a thin piece of cloth.

## HARD TIMES TOKEN

1837 Feuchtwanger Cent, MS66  
High-Grade Hard Times Token  
HT-268, Breen 6-I

- 4203** 1837 Feuchtwanger Cent MS66 NGC. Low-120, HT-268, Breen 6-I, R.1. Dr. Lewis Feuchtwanger was an immigrant from Germany who attempted to interest the U.S. Mint in his soft white metal alloy known as German silver. Although his iconic eagle-and-snake cent tokens are best known, he also struck several elusive varieties of three cent tokens (HT-262 through HT-267), and two rare store cards (HT-260 and 261). The present Feuchtwanger cent is among the finest graded at NGC. The pristine olive-gray surfaces teem with cartwheel luster. The strike is fairly sharp, though incomplete as always in the centers. Listed on page 420 of the 2019 *Guide Book*.  
Ex: *Central States Signature* (Heritage, 4/2006), lot 5392, which realized \$2,300.  
From *The Kadison Family Collection*. NGC ID# 2CZP, PCGS# 20001

## CERTIFIED MODERN PROOF SET

1937 Five-Piece Proof Set, PR62 to PR66

- 4204** 1937 Five-Piece Proof Set, PR62 to PR66 NGC. This attractive, second-year set is certified by NGC. Included are:

**Cent PR63 Red and Brown.** Hints of brown toning subdue the mirrors on each side of this brilliant piece that has myriad carbon specks.

**Nickel PR62.** Although this piece has numerous trivial flyspecks on each side, it is sharply struck with fully mirrored fields and excellent eye appeal for the grade.

**Dime PR66.** Streaks of russet toning are seen across each side with splashes of gold on the reverse of this fully mirrored Premium Gem proof.

**Quarter PR66.** The mirrored fields on both sides of this Premium Gem proof are subdued by pale gray and russet patina.

**Half Dollar PR65.** A lovely silver-gray Gem proof, this piece exhibits wispy gold toning on the reverse. (Total: 5 coins)

## CERTIFIED MODERN PROOF SETS

**7844 Five-Piece 1938 Proof Set PR64 to PR66 PCGS.** The coins are individually housed in holders bearing consecutive certification numbers. The set includes: cent PR64 Red; nickel PR66; dime PR65; quarter PR64; No AW half dollar PR64. (Total: 5 coins)

**7845 Five-Piece 1939 Proof Set PR65 PCGS.** The coins are individually housed in holders bearing consecutive certification numbers. The set includes: cent PR65 Red; Reverse of 1938 nickel PR65; dime PR65; quarter PR65; half dollar PR65. (Total: 5 coins)

**7846 Five-Piece 1940 Proof Set PR64 to PR66 PCGS.** The coins are individually housed in holders bearing consecutive certification numbers. Although undesignated as such, the 1940 nickel is the rare "wavy steps" FS-901 variety. The set includes: cent PR64 Red; Reverse of 1938 nickel PR66; dime PR66; quarter PR64; half dollar PR66. (Total: 5 coins)

**7847 Five-Piece 1941 Proof Set PR64 to PR66 PCGS.** The coins are individually housed in holders bearing consecutive certification numbers. The set includes: cent PR64 Red; nickel PR66; dime PR65; quarter PR65; half dollar PR65. (Total: 5 coins)

**7848 Five-Piece 1942 Proof Set PR64 to PR67 NGC.** The coins are individually housed in holders bearing consecutive certification numbers. The set includes: Cent PR64 Red and Brown; Type One Nickel PR67; Dime PR66; Quarter PR65; Half Dollar PR66. (Total: 5 coins)

**7849 Six-Piece 1942 Proof Set PR64 to PR66 PCGS.** The coins are individually housed in holders bearing consecutive certification numbers. The set includes: cent PR64 Red; Type One nickel PR66; Type Two nickel PR66; dime PR66; quarter PR65; half dollar PR66. (Total: 6 coins)

**7850 Six-Piece 1942 Proof Set PR65 to PR67 ANACS.** The set includes: cent PR65 Red; Type One nickel PR66; Type Two nickel PR65; dime PR66; quarter PR66; half dollar PR67. (Total: 6 coins)

## CIVIL WAR TOKEN

**7851 54th Pennsylvania Volunteers, J.A. Garman Sutler Token MS64 PCGS Secure. S&I-PA-54-3B, R.5.** Brass. PCGS Population: (0/0). NGC Census: (0/0).

## WESTERN SOUVENIR GOLD

**7852 1899-Dated Alaska Gold 1/2 Pinch, Indian, Round, MS64 PCGS. X-Tn11, AIRH-1, R.6.** Die State 3.0. Medal turn. M.E. Hart's Coins of the Golden West series. Die varieties are listed at MEHartGold.com.

## MISCELLANEOUS MEDALS AND TOKENS

**7853 Four High-Relief Liberty Pop-outs From U.S. Coins.** The lot includes: 1944 Mercury dime; 1946 Washington quarter; 1937 Walking Liberty half dollar; 1921 Morgan dollar. (Total: 4 coins)

*End of Auction*

# Terms and Conditions of Auction

## Auctioneer and Auction:

1. This Auction is presented by Heritage Auctions, a d/b/a/ of Heritage Auctioneers & Galleries, Inc., Heritage Auctions, Inc., Heritage Collectibles, Inc., Heritage Luxury Property Auctions, Inc., Heritage Numismatic Auctions, Inc., Heritage Vintage Sports Auctions, Inc., Currency Auctions of America, Inc., Heritage Auctions (HK) Limited, or Heritage Auctions – Europe Cooperatief U.A. as identified with the applicable licensing information on the title page of the catalog or on the HA.com Internet site (the "Auctioneer"). The Auction is conducted under these Terms and Conditions of Auction and applicable state and local law. Announcements and corrections from the podium and those made through the Terms and Conditions of Auctions appearing on the Internet at HA.com supersede those in the printed catalog.

## Buyer's Premium:

2. All bids are subject to a Buyer's Premium which is in addition to the placed successful bid:
  - Fifteen percent (15%) on Domain Names & Intellectual Property Auction lots;
  - Twenty percent (20%) on Animation Art, Comic, Currency, Movie Posters, Sports Collectibles, US Coin, and World & Ancient Coin Auction lots;
  - Twenty-three percent (23%) on Wine Auction lots;
  - For lots in all other categories not listed above, the Buyer's Premium per lot is twenty-five percent (25%) on the first \$250,000, plus twenty percent (20%) of any amount between \$250,000 and \$2,500,000, plus twelve percent (12%) of any amount over \$2,500,000.
  - Minimum Buyer's Premium per lot is \$19, except for Sports Collectibles lots wherein the Buyer's Premium is \$14 per lot.

## Auction Venues:

3. The following Auctions are conducted solely on the Internet: Heritage Weekly Internet Auctions (Coin, Currency, Comics, Rare Books, Jewelry & Watches, Guitars & Musical Instruments, and Vintage Movie Posters); Heritage Monthly Internet Auctions (Sports, World Coins and Rare Wine). Signature® Auctions and Grand Format Auctions accept bids from the Internet, telephone, fax, or mail first, followed by a floor bidding session; HeritageLive! and real-time telephone bidding are available to registered clients during these auctions.

## Bidders:

4. Any person participating or registering for the Auction agrees to be bound by and accepts these Terms and Conditions of Auction ("Bidder(s)").
5. All Bidders must meet Auctioneer's qualifications to bid. Any Bidder who is not a client in good standing of the Auctioneer may be disqualified at Auctioneer's sole option and will not be awarded lots. Such determination may be made by Auctioneer in its sole and unlimited discretion, at any time prior to, during, or even after the close of the Auction. Auctioneer reserves the right to exclude any person from the auction.
6. If an entity places a bid, then the person executing the bid on behalf of the entity agrees to personally guarantee payment for any successful bid.

## Credit:

7. In order to place bids, Bidders who have not established credit with the Auctioneer must either furnish satisfactory credit information (including two collectibles-related business references) or supply valid credit card information along with a social security number, well in advance of the Auction. Bids placed through our Interactive Internet program will only be accepted from pre-registered Bidders. Bidders who are not members of HA.com or affiliates should preregister at least 48 hours before the start of the first session (exclusive of holidays or weekends) to allow adequate time to contact references. Credit will be granted at the discretion of Auctioneer. Additionally Bidders who have not previously established credit or who wish to bid in excess of their established credit history may be required to provide their social security number or the last four digits thereof so a credit check may be performed prior to Auctioneer's acceptance of a bid. Check writing privileges and immediate delivery of merchandise may also be determined by pre-approval of credit based on a combination of criteria: HA.com history, related industry references, bank verification, a credit bureau report and/or a personal guarantee for a corporate or partnership entity in advance of the auction venue.

## Bidding Options:

8. Bids in Signature, Auctions or Grand Format Auctions may be placed as set forth in the printed catalog section entitled "Choose your bidding method." For auctions held solely on the Internet, see the alternatives on HA.com. Review at <http://www.ha.com/c/ref/web-tips.zx#biddingTutorial>.
9. Presentment of Bids: Non-Internet bids (including but not limited to podium, fax, phone and mail bids) are treated similar to floor bids in that they must be on-increment or at a half increment (called a cut bid). Any podium, fax, phone, or mail bids that do not conform to a full or half increment will be rounded up or down to the nearest full or half increment and this revised amount will be considered your high bid.
10. Auctioneer's Execution of Certain Bids. Auctioneer cannot be responsible for your errors in bidding, so carefully check that every bid is entered correctly. When identical mail or FAX bids are submitted, preference is given to the first received. To ensure the greatest accuracy, your written bids should be entered on the standard printed bid sheet and be received at Auctioneer's place of business at least two business days before the Auction start. Auctioneer is not responsible for executing mail bids or FAX bids received on or after the day the first lot is sold, nor Internet bids submitted after the published closing time; nor is Auctioneer responsible for proper execution of bids submitted by telephone, mail, FAX, e-mail, Internet, or in person once the Auction begins. Bids placed electronically via the internet may not be withdrawn until your written request is received and acknowledged by Auctioneer (FAX: 214-409-1425); such requests must state the reason, and may constitute grounds for withdrawal of bidding privileges. Lots won by mail Bidders will not be delivered at the Auction unless prearranged.
11. Caveat as to Bid Increments. Bid increments (over the current bid level) determine the lowest amount you may bid on a particular lot. Bids greater than one increment over the current bid can be any whole dollar amount. It is possible under several circumstances for winning bids to be between increments, sometimes only \$1 above the previous increment. Please see: "How can I lose by less than an increment?" on our website. Bids will be accepted in whole dollar amounts only. No "buy" or "unlimited" bids will be accepted.

The following chart governs current bidding increments (see [HA.com/c/ref/web-tips.zx#guidelines-increments](http://www.ha.com/c/ref/web-tips.zx#guidelines-increments)).

| Current Bid .....       | Bid Increment | Current Bid .....               | Bid Increment |
|-------------------------|---------------|---------------------------------|---------------|
| < \$10 .....            | \$1           | \$10,000 - \$19,999 .....       | \$1,000       |
| \$10 - \$49 .....       | \$2           | \$20,000 - \$49,999 .....       | \$2,000       |
| \$50 - \$99 .....       | \$5           | \$50,000 - \$99,999 .....       | \$5,000       |
| \$100 - \$199 .....     | \$10          | \$100,000 - \$199,999 .....     | \$10,000      |
| \$200 - \$499 .....     | \$20          | \$200,000 - \$499,999 .....     | \$20,000      |
| \$500 - \$999 .....     | \$50          | \$500,000 - \$999,999 .....     | \$25,000      |
| \$1,000 - \$1,999 ..... | \$100         | \$1,000,000 - \$1,999,999 ..... | \$50,000      |
| \$2,000 - \$4,999 ..... | \$200         | \$2,000,000 - \$9,999,999 ..... | \$100,000     |
| \$5,000 - \$9,999 ..... | \$500         | >= \$10,000,000 .....           | \$200,000     |

12. If Auctioneer calls for a full increment, a bidder may request Auctioneer to accept a bid at half of the increment ("Cut Bid") only once per lot. After offering a Cut Bid, bidders may continue to participate only at full increments. Off-increment bids may be accepted by the Auctioneer at Signature® Auctions and Grand Format Auctions. If the Auctioneer solicits bids other than the expected increment, these bids will not be considered Cut Bids.

## Conducting the Auction:

13. Notice of the consignor's liberty to place bids on his lots in the Auction is hereby made in accordance with Article 2 of the Texas Business and Commercial Code. A "Minimum Bid" is an amount below which the lot will not sell. THE CONSIGNOR OF PROPERTY MAY PLACE WRITTEN "Minimum Bids" ON HIS LOTS IN ADVANCE OF THE AUCTION; ON SUCH LOTS, IF THE HAMMER PRICE DOES NOT MEET THE "Minimum Bid", THE CONSIGNOR MAY PAY A REDUCED COMMISSION ON THOSE LOTS. "Minimum Bids" are generally posted online several days prior to the Auction closing. For any successful bid placed by a consignor on his Property on the Auction floor, or by any means during the live session, or after the "Minimum Bid" for an Auction have been posted, we will require the consignor to pay full Buyer's Premium and Seller's Commissions on such lot.
14. The highest qualified Bidder recognized by the Auctioneer shall be the Buyer. In the event of a tie bid, the earliest bid received or recognized wins. In the event of any dispute between any Bidders at an Auction,

Auctioneer may at his sole discretion reoffer the lot. Auctioneer's decision and declaration of the winning Bidder shall be final and binding upon all Bidders. Bids properly offered, whether by floor Bidder or other means of bidding, may on occasion be missed or go unrecognized; in such cases, the Auctioneer may declare the recognized bid accepted as the winning bid, regardless of whether a competing bid may have been higher. Auctioneer reserves the right after the hammer fall to accept bids and reopen bidding for bids placed through the Internet or otherwise. Regardless that bids are made on a Property, Auctioneer reserves the right to withdraw the Properties, or any part of the Properties, from the Auction at any time prior to the opening of any lot containing such Properties for sale by the auctioneer (crier), or in the case of Internet-only auctions when the bid opens for either live bidding online or the beginning of the extended period, if any

15. Auctioneer reserves the right to refuse to honor any bid or to limit the amount of any bid, in its sole discretion. A bid is considered not made in "Good Faith" when made by an insolvent or irresponsible person, a person under the age of eighteen, or is not supported by satisfactory credit, collectibles references, or otherwise. Regardless of the disclosure of his identity, any bid by a consignor or his agent on a lot consigned by him is deemed to be made in "Good Faith." Any person apparently appearing on the OFAC list is not eligible to bid.
16. Nominal Bids. The Auctioneer in its sole discretion may reject nominal bids, small opening bids, or very nominal advances. If a lot bearing estimates fails to open for 40–60% of the low estimate, the Auctioneer may pass the item or may place a protective bid on behalf of the consignor.
17. Lots bearing bidding estimates shall open at Auctioneer's discretion (generally 40%-60% of the low estimate). In the event that no bid meets or exceeds that opening amount, the lot shall pass as unsold.
18. All items are to be purchased per lot as numerically indicated and no lots will be broken. Auctioneer reserves the right to withdraw, prior to the close, any lots from the Auction.
19. Auctioneer reserves the right to rescind the sale in the event of nonpayment, breach of a warranty, disputed ownership, auctioneer's clerical error or omission in exercising bids and reserves, or for any other reason and in Auctioneer's sole discretion. In cases of nonpayment, Auctioneer's election to void a sale does not relieve the Bidder from their obligation to pay Auctioneer its fees (seller's and buyer's premium) and any other damages or expenses pertaining to the lot.
20. Auctioneer occasionally experiences Internet and/or Server service outages, and Auctioneer periodically schedules system downtime for maintenance and other purposes, during which Bidders cannot participate or place bids. If such outages occur, we may at our discretion extend bidding for the Auction. Bidders unable to place their Bids through the Internet are directed to contact Client Services at 877-HERITAGE (437-4824).
21. The Auctioneer, its affiliates, or their employees consign items to be sold in the Auction, and may bid on those lots or any other lots. Auctioneer or affiliates expressly reserve the right to modify any such bids at any time prior to the hammer based upon data made known to the Auctioneer or its affiliates. The Auctioneer may extend advances, guarantees, or loans to certain consignors.
22. The Auctioneer has the right to sell certain unsold items after the close of the Auction. Such lots shall be considered sold during the Auction and all these Terms and Conditions shall apply to such sales including but not limited to the Buyer's Premium, return rights, and disclaimers.

## Payment:

23. All sales are strictly for cash in United States dollars (including U.S. currency, bank wire, cashier checks, travelers checks, eChecks, and bank money orders, and are subject to all reporting requirements). All deliveries are subject to good funds; funds being received in Auctioneer's account before delivery of the Purchases; and all payments are subject to a clearing period. Auctioneer reserves the right to determine if a check constitutes "good funds": checks drawn on a U.S. bank are subject to a ten business day hold, and thirty days when drawn on an international bank. Clients with pre-arranged credit status may receive immediate credit for payments via eCheck, personal, or corporate checks. All others will be subject to a hold of 5 days, or more, for the funds to clear prior to releasing merchandise. (Ref. T&C item 7 Credit for additional information.) Payments can be made 24-48 hours post auction from the My Orders page of the HA.com website.
24. Payment is due upon closing of the Auction session, or upon presentment of an invoice. Auctioneer reserves the right to void an invoice if payment in full is not received within 7 days after the close of the Auction. In cases of nonpayment, Auctioneer's election to void a sale does not relieve the Bidder from their obligation to pay Auctioneer its fees (seller's and buyer's premium) on the lot and any other damages pertaining to the lot or Auctioneer. Alternatively, Auctioneer at its sole option, may charge a twenty (20%) fee based on the amount of the purchase. In either case the Auctioneer may offset amount of its claim against any monies owing to the Bidder or secure its claim against any of the Bidder's properties held by the Auctioneer.
25. Lots delivered to you, or your representative are subject to all applicable state and local taxes, unless appropriate permits are on file with Auctioneer. Bidder agrees to pay Auctioneer the actual amount of tax due in the event that sales tax is not properly collected due to: 1) an expired, inaccurate, or inappropriate tax certificate or declaration, 2) an incorrect interpretation of the applicable statute, 3) or any other reason. The appropriate form or certificate must be on file at and verified by Auctioneer five days prior to Auction, or tax must be paid; only if such form or certificate is received by Auctioneer within 4 days after the Auction can a refund of tax paid be made. Lots from different Auctions may not be aggregated for sales tax purposes.
26. In the event that a Bidder's payment is dishonored upon presentment(s), Bidder shall pay the maximum statutory processing fee set by applicable state law. If you attempt to pay via eCheck and your financial institution denies this transfer from your bank account, or the payment cannot be completed using the selected funding source, you agree to complete payment using your credit card on file.
27. If any Auction invoice submitted by Auctioneer is not paid in full when due, the unpaid balance will bear interest at the highest rate permitted by law from the date of invoice until paid. Any invoice not paid when due will bear a three percent (3%) late fee on the invoice amount. If the Auctioneer refers any invoice to an attorney for collection, the buyer agrees to pay attorney's fees, court costs, and other collection costs incurred by Auctioneer. If Auctioneer assigns collection to its in-house legal staff, such attorney's time expended on the matter shall be compensated at a rate comparable to the hourly rate of independent attorneys.
28. In the event a successful Bidder fails to pay any amounts due, Auctioneer reserves the right to sell the lot(s) securing the invoice to any underbidders in the Auction that the lot(s) appeared, or at subsequent private or public sale, or relist the lot(s) in a future auction conducted by Auctioneer. A defaulting Bidder agrees to pay for the reasonable costs of resale (including a 15% seller's commission, if consigned to an auction conducted by Auctioneer). The defaulting Bidder is liable to pay any difference between his total original invoice for the lot(s), plus any applicable interest, and the net proceeds for the lot(s) if sold at private sale or the subsequent hammer price of the lot(s) less the 15% seller's commissions, if sold at an Auctioneer's auction.
29. Auctioneer reserves the right to require payment in full in good funds before delivery of the merchandise.
30. Auctioneer shall have a lien against the merchandise purchased by the buyer to secure payment of the Auction invoice. Auctioneer is further granted a lien and the right to retain possession of any other property of the buyer then held by the Auctioneer or its affiliates to secure payment of any Auction invoice or any other amounts due the Auctioneer or affiliates from the buyer. With respect to these lien rights, Auctioneer shall have all the rights of a secured creditor under Article 9 of the Texas Uniform Commercial Code, including but not limited to the right of sale (including a 15% seller's commission, if consigned to an auction conducted by Auctioneer). In addition, with respect to payment of the Auction invoice(s), the buyer waives any and all rights of offset he might otherwise have against the Auctioneer and the consignor of the merchandise included on the invoice. If a Bidder owes Auctioneer or its affiliates on any account, Auctioneer and its affiliates shall have the right to offset such unpaid account by any credit balance due Bidder, and it may secure by possessory lien any unpaid amount by any of the Bidder's property in their possession.

31. Title shall not pass to the successful Bidder until all invoices are paid in full. It is the responsibility of the buyer to provide adequate insurance coverage for the items once they have been delivered to a common carrier or third-party shipper.

**Delivery; Shipping; and Handling Charges:**

32. Buyer is liable for shipping, handling, registration, and renewal fees, if any. Please refer to Auctioneer's website HA.com/c/shipping.zx for the latest charges or call Auctioneer. Auctioneer is unable to combine purchases from other auctions or affiliates into one package for shipping purposes. Lots won will be shipped in a commercially reasonable time after payment in good funds for the merchandise and the shipping fees is received or credit extended, except when third-party shipment occurs. Buyer agrees that Service and Handling charges related to shipping items which are not pre-paid may be charged to the credit card on file with Auctioneer.

33. Successful international Bidders shall provide written shipping instructions, including specified customs declarations, to the Auctioneer for any lots to be delivered outside of the United States. NOTE: Declaration value shall be the item's hammer price together with its buyer's premium and Auctioneer shall use the correct harmonized code for the lot. Domestic Buyers on lots designated for third-party shipment must designate the common carrier, accept risk of loss, and prepay shipping costs.

34. All shipping charges will be borne by the successful Bidder. On all shipments in which Heritage charges the Delivery, Handling, and Transit Fee *infra*, any risk of loss during shipment will be borne by Heritage until the shipping carrier's confirmation of delivery to the address of record in Auctioneer's file, this is the "Secure Location". A common carrier's confirmation is conclusive to prove delivery to Bidder; if the client has a Signature release on file with the carrier, the package is considered delivered without Signature. Auctioneer shall arrange, select, and engage common carriers and other transportation vendors on your behalf. Transit services are subject to the following terms and conditions:

- a. **Scope of Transit Services:** Your properties for transit will be insured under one or more insurance policies issued by an authorized broker to Auctioneer. The properties will be insured for the invoice price of the properties (hammer price plus Buyer's Premium) ("Insured Value"). For each shipment, you will provide a Secure Location to which the items will be delivered. NOTICE: **Auctioneer is neither an insurance company nor a common carrier of any type.**
- b. **Auctioneer's Compensation for Transit Services:** Auctioneer will provide transit services to Buyer for ¼ of 1% of the Insured Value, plus packaging and handling fees and fees for the common carrier (collectively, "Delivery, Handling, and Transit Fee"). You agree to pay Delivery, Handling, and Transit Fee and comply with all terms of payment as set forth in paragraphs 23 to 31 of this Agreement.
- c. **Auctioneer's Limitation of Liability for Transit Services:** You understand and agree that Auctioneer's liability for loss of or damage to the items, if any, ends when the items have been delivered to the Secure Location, and Auctioneer has received evidence of delivery. If you claim that any property has sustained loss or damage during transit, you must report any such loss or damage to Auctioneer within seventy-two (72) hours of the delivery date. Your recovery for loss of or damage to any property is limited to the lesser of actual cash value of the property or the Insured Value. **Under no circumstances is Auctioneer liable for consequential or punitive damages.**

35. Due to the nature of some items sold, it shall be the responsibility for the successful Bidder to arrange pick-up and shipping through third-parties; as to such items Auctioneer shall have no liability. Failure to pick-up or arrange shipping in a timely fashion (within ten days) shall subject Lots to storage and moving charges, including a \$100 administration fee plus \$10 daily storage for larger items and \$5.00 daily for smaller items (storage fee per item) after 35 days. In the event the Lot is not removed within ninety days, the Lot may be offered for sale to recover any past due storage or moving fees, including a 10% Seller's Commission.

36A. The laws of various countries regulate the import or export of certain plant and animal properties, including (but not limited to) items made of (or including) Brazilian rosewood, ivory, whalebone, turtle shell, coral, crocodile, or other wildlife. Transport of such lots may require special licenses for export, import, or both. Bidder is responsible for: 1) obtaining all information on such restricted items for both export and import; 2) obtaining all such licenses and/or permits. Delay, failure, or incapacity to obtain any such license or permit does not relieve the buyer of timely payment, or afford them the capacity to void their purchase or payment. For further information, please contact Ron Brackemyre at 800-872-6467 ext. 1312.

36B. California State law prohibits the importation of any product containing Python skin into the State of California, thus no lot containing Python skin will be shipped to or invoiced to a person or company in California.

36C. Auctioneer shall not be liable for any loss caused by or resulting from:

- a. Seizure or destruction under quarantine or Customs regulation, or confiscation by order of any Government or public authority, or risks of contraband or illegal transportation of trade, or
  - b. Breakage of statuary, marble, glassware, bric-a-brac, porcelains, jewelry, and similar fragile articles
37. Any request for shipping verification for undelivered packages must be made within 30 days of shipment by Auctioneer.

**Cataloging, Warranties and Disclaimers:**

38. NO WARRANTY, WHETHER EXPRESSED OR IMPLIED, IS MADE WITH RESPECT TO ANY DESCRIPTION CONTAINED IN THIS AUCTION OR ANY SECOND OPINE. Any description of the items or second opine contained in this Auction is for the sole purpose of identifying the items for those Bidders who do not have the opportunity to view the lots prior to bidding, and no description of items has been made part of the basis of the bargain or has created any express warranty that the goods would conform to any description made by Auctioneer. Color variations can be expected in any electronic or printed imaging, and are not grounds for the return of any lot. NOTE: Auctioneer, in specified auction venues, for example, Fine Art, may have express written warranties and you are referred to those specific terms and conditions. .

39. Auctioneer is selling only such right or title to the items being sold as Auctioneer may have by virtue of consignment agreements on the date of auction and disclaims any warranty of title to the Property. Auctioneer disclaims any warranty of merchantability or fitness for any particular purposes. All images, descriptions, sales data, and archival records are the exclusive property of Auctioneer, and may be used by Auctioneer for advertising, promotion, archival records, and any other uses deemed appropriate.

40. Translations of foreign language documents may be provided as a convenience to interested parties. Auctioneer makes no representation as to the accuracy of those translations and will not be held responsible for errors in bidding arising from inaccuracies in translation.

41. Auctioneer disclaims all liability for damages, consequential or otherwise, arising out of or in connection with the sale of any Property by Auctioneer to Bidder. No third party may rely on any arbitration or mediation rights existing under the rules of any professional society or affiliation based upon the assigned description, or a derivative theory, breach of warranty express or implied, representation or other matter set forth within these Terms and Conditions of Auction or otherwise. In the event of a claim, Bidder agrees that such rights and privileges conferred therein are strictly construed as specifically declared herein; e.g., authenticity, typographical error, etc. and are the exclusive remedy. Bidder, by non-compliance to these express terms of a granted remedy, shall waive any claim against Auctioneer.

42. Auctioneer shall not be liable for breakage of glass or damage to frames (patent or latent); such defects, in any event, shall not be a basis for any claim for return or reduction in purchase price.

**Release:**

43. In consideration of participation in the Auction and the placing of a bid, Bidder expressly releases Auctioneer, its officers, directors and employees, its affiliates, and its outside experts that provide second opinions, from any and all claims, cause of action, chose of action, whether at law or equity or any arbitration or mediation rights existing under the rules of any professional society or affiliation based upon the assigned description, or a derivative theory, breach of warranty express or implied, representation or other matter set forth within these Terms and Conditions of Auction or otherwise. In the event of a claim, Bidder agrees that such rights and privileges conferred therein are strictly construed as specifically declared herein; e.g., authenticity, typographical error, etc. and are the exclusive remedy. Bidder, by non-compliance to these express terms of a granted remedy, shall waive any claim against Auctioneer.

44. Notice: Some Property sold by Auctioneer are inherently dangerous e.g. firearms, cannons, and small items that may be swallowed or ingested or may have latent defects all of which may cause harm to a person. Purchaser accepts all risk of loss or damage from its purchase of these items and Auctioneer disclaims any liability whether under contract or tort for damages and losses, direct or consequential, and expressly disclaims any warranty as to safety or usage of any lot sold.

**Dispute Resolution and Arbitration Provision:**

45. By placing a bid or otherwise participating in the auction, Bidder accepts these Terms and Conditions of Auction, and specifically agrees to the dispute resolution provided herein. Consumer disputes

shall be resolved through court litigation which has an exclusive Dallas, Texas venue clause and jury waiver. Non-consumer dispute shall be determined in binding arbitration which arbitration replaces the right to go to court, including the right to a jury trial.

46. Auctioneer in no event shall be responsible for consequential damages, incidental damages, compensatory damages, or any other damages arising or claimed to be arising from the auction of any lot. In the event that Auctioneer cannot deliver the lot or subsequently it is established that the lot lacks title, or other transfer or condition issue is claimed, in such cases the sole remedy shall be limited to rescission of sale and refund of the amount paid by Bidder; in no case shall Auctioneer's maximum liability exceed the high bid on that lot, which bid shall be deemed for all purposes the value of the lot. After one year has elapsed, Auctioneer's maximum liability shall be limited to any commissions and fees Auctioneer earned on that lot.

47. In the event of an attribution error, Auctioneer may at its sole discretion, correct the error on the Internet, or, if discovered at a later date, to refund the buyer's purchase price without further obligation.

48. **Exclusive Dispute Resolution Process:** All claims, disputes, or controversies in connection with, relating to and/or arising out of your Participation in the Auction or purchase of any lot, any interpretation of the Terms and Conditions of Sale or any amendments thereto, any description of any lot or condition report, any damage to any lot, any alleged verbal modification of any term of sale or condition report or description and/or any purported settlement whether asserted in contract, tort, under Federal or State statute or regulation or any claim made by you of a lot or your Participation in the auction involving the auction or a specific lot involving a warranty or representation of a consignor or other person or entity including Auctioneer { which claim you consent to be made a party} (collectively, "Claim") shall be exclusively heard by, and the claimant (or respondent as the case may be) and Heritage each consent to the Claim being presented in a confidential binding arbitration before a single arbitrator administered by and conducted under the rules of, the American Arbitration Association. The locale for all such arbitrations shall be Dallas, Texas. The arbitrator's award may be enforced in any court of competent jurisdiction. If a Claim involves a consumer, exclusive subject matter jurisdiction for the Claim is in the State District Courts of Dallas County, Texas and the consumer consents to subject matter and in personam jurisdiction; further CONSUMER EXPRESSLY WAIVES ANY RIGHT TO TRIAL BY JURY. A consumer may elect arbitration as specified above. Any claim involving the purchase or sale of numismatic or related items may be submitted through binding PNG arbitration. Any Claim must be brought within two (2) years of the alleged breach, default or misrepresentation or the Claim is waived. Exemplary or punitive damages are not permitted and are waived. A Claim is not subject to class certification. Nothing herein shall be construed to extend the time of return or conditions and restrictions for return. This Agreement and any Claim shall be determined and construed under Texas law. The prevailing party (a party that is awarded substantial and material relief on its damage claim based on damages sought vs. awarded or the successful defense of a Claim based on damages sought vs. awarded) may be awarded its reasonable attorneys' fees and costs.

49. No claims of any kind can be considered after the settlements have been made with the consignors. Any dispute after the settlement date is strictly between the Bidder and consignor without involvement or responsibility of the Auctioneer.

50. In consideration of their participation in or application for the Auction, a person or entity (whether the successful Bidder, a Bidder, a purchaser and/or other Auction participant or registrant) agrees that all disputes in any way relating to, arising under, connected with, or incidental to these Terms and Conditions and purchases, or default in payment thereof, shall be arbitrated pursuant to the arbitration provision. In the event that any matter including actions to compel arbitration, construe the agreement, actions in aid of arbitration or otherwise needs to be litigated, such litigation shall be exclusively in the Courts of the State of Texas, in Dallas County, Texas, and if necessary the corresponding appellate courts. For such actions, the successful Bidder, purchaser, or Auction participant also expressly submits himself to the personal jurisdiction of the State of Texas.

51. These Terms & Conditions provide specific remedies for occurrences in the auction and delivery process. Where such remedies are afforded, they shall be interpreted strictly. Bidder agrees that any claim shall utilize such remedies; Bidder making a claim in excess of those remedies provided in these Terms and Conditions agrees that in no case whatsoever shall Auctioneer's maximum liability exceed the high bid on that lot, which bid shall be deemed for all purposes the value of the lot.

**Miscellaneous:**

52. Agreements between Bidders and consignors to effectuate a non-sale of an item at Auction, inhibit bidding on a consigned item to enter into a private sale agreement for said item, or to utilize the Auctioneer's Auction to obtain sales for non-selling consigned items subsequent to the Auction, are strictly prohibited. If a subsequent sale of a previously consigned item occurs in violation of this provision, Auctioneer reserves the right to charge Bidder the applicable Buyer's Premium and consignor a Seller's Commission as determined for each auction venue and by the terms of the seller's agreement.

53. Acceptance of these Terms and Conditions qualifies Bidder as a client who has consented to be contacted by Heritage in the future. In conformity with "do-not-call" regulations promulgated by the Federal or State regulatory agencies, participation by the Bidder is affirmative consent to being contacted at the phone number shown in his application and this consent shall remain in effect until it is revoked in writing. Heritage may from time to time contact Bidder concerning sale, purchase, and auction opportunities available through Heritage and its affiliates and subsidiaries.

54. Rules of Construction: Auctioneer presents properties in a number of collectible fields, and as such, specific venues have promulgated supplemental Terms and Conditions. Nothing herein shall be construed to waive the general Terms and Conditions of Auction by these additional rules and shall be construed to give force and effect to the rules in their entirety.

**State Notices:**

Notice as to an Auction in California. Auctioneer has in compliance with Title 2.95 of the California Civil Code as amended October 11, 1993 Sec. 1812.600, posted with the California Secretary of State its bonds for it and its employees, and the auction is being conducted in compliance with Sec. 2338 of the Commercial Code and Sec. 535 of the Penal Code.

Notice as to an Auction in New York City: This Auction is conducted in accord with the applicable sections of the New York City Department of Consumer Affairs Rules and Regulations as Amended. This a Public Auction Sale conducted by Auctioneer. The New York City Auctioneers conducting the sale of behalf of Heritage Auctions No. 41513036 ("Auctioneer") are licensed Auctioneers including Dawes, Nicholas 1304724, Guzman, Kathleen 762165, Luray, Elyse 2015375, or as listed at HA.com/Licenses and as posted at the venue site. All lots are subject to: the consignor's right to bid thereon and consignor's option to receive advances on their consignments. Auction may offer, in its sole discretion, advances on consignments and extended financing to registered bidders, in accord with Auctioneer's internal credit standards. Auctioneer will disclose to bidders, upon request, a list of lots subject to an advance, reserve, guarantee, or Auctioneer's financial interests of any kind. All Terms and Conditions of Sale are available at HA.com and in the printed catalog, including term #21 which states: Consignor, auctioneer's affiliates and, its employees may bid on their lots or other lots for their own account in accordance with the laws of New York and they may have information as to the lots not available to the public. On lots bearing an estimate, the term refers to a value range placed on an item by the Auctioneer in its sole opinion but the final price is determined by the bidders.

Notice as to an Auction in Texas. In compliance with TDLR rule 67.100(c)(1), notice is hereby provided that this auction is covered by a Recovery Fund administered by the Texas Department of Licensing and Regulation, P.O. Box 12157, Austin, Texas 78711 (512) 463-6599. Any complaints may be directed to the same address.

# Terms and Conditions of Auction

## Additional Terms & Conditions:

### COINS & CURRENCY

COINS and CURRENCY TERM A: Signature. Auctions are not on approval. No certified material may be returned because of possible differences of opinion with respect to the grade offered by any third-party organization, dealer, or service. No guarantee of grade is offered for uncertified Property sold and subsequently submitted to a third-party grading service. There are absolutely no exceptions to this policy. Under extremely limited circumstances, (e.g. gross cataloging error) a purchaser, who did not bid from the floor, may request Auctioneer to evaluate voiding a sale: such request must be made in writing detailing the alleged gross error; submission of the lot to the Auctioneer must be pre-approved by the Auctioneer; and bidder must notify Ron Brackemyre (1-800-872-6467 Ext. 1312) in writing of such request within three (3) days of the non-floor bidder's receipt of the lot. Any lot that is to be evaluated must be in our offices within 30 days after Auction. Grading or method of manufacture do not qualify for this evaluation process nor do such complaints constitute a basis to challenge the authenticity of a lot. AFTER THAT 30-DAY PERIOD, NO LOTS MAY BE RETURNED FOR REASONS OTHER THAN AUTHENTICITY. Lots returned must be housed intact in their original holder. No lots purchased by floor Bidders may be returned (including those Bidders acting as agents for others) except for authenticity. Late remittance for purchases may be considered just cause to revoke all return privileges.

COINS and CURRENCY TERM B: Auctions conducted solely on the Internet THREE (3) DAY RETURN POLICY: Certified Coin and Uncertified and Certified Currency lots paid for within seven days of the Auction closing are sold with a three (3) day return privilege unless otherwise noted in the description as "Sold As Is, No Return Lot". You may return lots under the following conditions: Within three days of receipt of the lot, you must first notify Auctioneer by contacting Client Service by phone (877-HERITAGE (437-4824)) or e-mail (Bid@HA.com), and immediately ship the lot(s) fully insured to the attention of Returns, Heritage, 3500 Maple Avenue, 17th Floor, Dallas TX 75219-3941. Lots must be housed intact in their original holder and condition. You are responsible for the insured, safe delivery of any lots. A non-negotiable return fee of 5% of the purchase price (\$10 per lot minimum) will be deducted from the refund for each returned lot or billed directly. Postage and handling fees are not refunded. After the three-day period (from receipt), no items may be returned for any reason. Late remittance for purchases revokes these Return privileges.

COINS and CURRENCY TERM C: Bidders who have inspected the lots prior to any Auction, or attended the Auction, or bid through an Agent, will not be granted any return privileges, except for reasons of authenticity.

COINS and CURRENCY TERM D: Coins sold referencing a third-party grading service are sold "as is" without any express or implied warranty, except for a guarantee by Auctioneer that they are genuine. Certain warranties may be available from the grading services and the Bidder is referred to them for further details: Numismatic Guaranty Corporation (NGC), P.O. Box 4776, Sarasota, FL 34230, <http://www.ngccoin.com/services/writtenguarantee.asp>; Professional Coin Grading Service (PCGS), PO Box 9458, Newport Beach, CA 92658, <http://www.pcg.com/guarantee.html>; ANACS, 6555 S. Kenton St. Ste. 303, Englewood, CO 80111; and Independent Coin Grading Co. (ICG), 7901 East Bellevue Ave., Suite 50, Englewood, CO 80111.

COINS and CURRENCY TERM E: Notes sold referencing a third-party grading service are sold "as is" without any express or implied warranty, except for guarantee by Auctioneer that they are genuine. Grading, condition or other attributes of any lot may have a material effect on its value, and the opinion of others, including third-party grading services such as PCGS Currency and PMG may differ with that of Auctioneer. Auctioneer shall not be bound by any prior or subsequent opinion, determination, or certification by any grading service. Bidder specifically waives any claim to right of return of any item because of the opinion, determination, or certification, or lack thereof, by any grading service. Certain warranties may be available from the grading services and the Bidder is referred to them for further details: Paper Money Guaranty (PMG), PO Box 4711, Sarasota FL 34230; PCGS Currency, PO Box 10470, Peoria, IL 61612-0470. Third-party graded notes are not returnable for any reason whatsoever.

COINS and CURRENCY TERM F: Since we cannot examine encapsulated coins or notes, they are sold "as is" without our grading opinion, and may not be returned for any reason. Auctioneer shall not be liable for any patent or latent defect or controversy pertaining to or arising from any encapsulated collectible. In any such instance, purchaser's remedy, if any, shall be solely against the service certifying the collectible.

COINS and CURRENCY TERM G: Due to changing grading standards over time, differing interpretations, and to possible mishandling of items by subsequent owners, Auctioneer reserves the right to grade items differently than shown on certificates from any grading service that accompany the items. Auctioneer also reserves the right to grade items differently than the grades shown in the prior catalog should such items be reconsigned to any future auction.

COINS and CURRENCY TERM H: Although consensus grading is employed by most grading services, it should be noted as aforesaid that grading is not an exact science. In fact, it is entirely possible that if a lot is broken out of a plastic holder and resubmitted to another grading service or even to the same service, the lot could come back with a different grade assigned.

COINS and CURRENCY TERM I: Certification does not guarantee protection against the normal risks associated with potentially volatile markets. The degree of liquidity for certified coins and collectibles will vary according to general market conditions and the particular lot involved. For some lots there may be no active market at all at certain points in time.

COINS and CURRENCY TERM J: All non-certified coins and currency are guaranteed genuine, but are not guaranteed as to grade, since grading is a matter of opinion, an art and not a science, and therefore the opinion rendered by the Auctioneer or any third party grading service may not agree with the opinion of others (including trained experts), and the same expert may not grade the same item with the same grade at two different times. Auctioneer has graded the non-certified numismatic items, in the Auctioneer's opinion, to their current interpretation of the American Numismatic Association's standards as of the date the catalog was prepared. There is no guarantee or warranty implied or expressed that the grading standards utilized by the Auctioneer will meet the standards of any grading service at any time in the future.

COINS and CURRENCY TERM K: Storage of purchased coins and currency: Purchasers are advised that certain types of plastic may react with a coin's metal or transfer plasticizer to notes and may cause damage. Caution should be used to avoid storage in materials that are not inert.

COINS and CURRENCY TERM L: NOTE: Purchasers of rare coins or currency through Heritage have available the option of arbitration by the Professional Numismatists Guild (PNG); if an election is not made within ten (10) days of an unresolved dispute, Auctioneer may elect either PNG or A.A.A. Arbitration.

COINS and CURRENCY TERM M: For more information regarding Canadian lots attributed to the Charlton reference guides, please contact: Charlton International, PO Box 820, Station Willowdale B, North York, Ontario M2K 2R1 Canada.

COINS and CURRENCY TERM N: Some of the lots offered herein have been assigned to 1031 Services, Inc. for the purpose of consignor's tax deferred exchange.

COINS and CURRENCY TERM O: Financing. Auctioneer offers various extended payment options to qualified pre-approved persons and companies. The options include Extended Payment Programs (EPP) Flexible Payment Program (FPP) and Dealer Terms. Each program has its specific terms and conditions and such terms and conditions are strictly enforced. Each program has to be executed by the purchaser. Auctioneer reserves the right to alter or deny credit and in such case these auction terms shall control.

For wiring instructions call the Credit department at 877-HERITAGE (437-4824) or e-mail: CreditDept@HA.com

## Notice as to an Auction in New York City

This Auction is conducted in accord with the applicable sections of the New York City Department of Consumer Affairs Rules and Regulations as Amended. This a Public Auction Sale conducted by Auctioneer. The New York City Auctioneers conducting the sale of behalf of Heritage Auctions No. 41513036 ("Auctioneer") are licensed Auctioneers including Dawes, Nicholas 1304724, Guzman, Kathleen 762165, Luray, Elyse 2015375, or as listed at HA.com/Licenses and as posted at the venue site.

All lots are subject to: the consignor's right to bid thereon and consignor's option to receive advances on their consignments. Auction may offer, in its sole discretion, advances on consignments and extended financing to registered bidders, in accord with Auctioneer's internal credit standards. Auctioneer will disclose to bidders, upon request, a list of lots subject to an advance, reserve, guarantee, or Auctioneer's financial interests of any kind. All Terms and Conditions of Sale are available at HA.com and in the printed catalog, including term #21 which states: Consignor, auctioneer's affiliates and, its employees may bid on their lots or other lots for their own account in accordance with the laws of New York and they may have information as to the lots not available to the public. On lots bearing an estimate, the term refers to a value range placed on an item by the Auctioneer in its sole opinion but the final price is determined by the bidders. Rev 6-8-2016

## TASTING SCHEDULE

Los Angeles | June 2

Chicago | June 2

San Francisco | September 8

Hong Kong | September 14

New York | October 6

Miami | October 20

Grand Finale | To Be Announced

Visit [HA.com/BlindWineChallenge](http://HA.com/BlindWineChallenge) for Reservations

Put your palate to the test against the world's top collectors. Heritage is seeking the best blind taster among our passionate community. Participants will sample 8 world class wines over the course of 40 minutes and earn points for correctly identifying Country, Region, Varietal, Appellation, Vineyard and Producer. The highest score wines and the top three contestants earn a trip to the Grand Finale to taste with other qualifying participants from around the world.
